THE ENCYCLOPÆDIC DICTIONARY.

mēm, *s.* [A contract, of *memorandum* (q.v.).] A word placed as a note before something to aid the memory.

mēm' bēr, mem-bre, *s.* [Fr. *membre*, from Lat. *membrum* = a limb, a member of the body; Ital. *membro*; Sp. & Port. *miembro*.]

I. Ordinary Language:

1. A part of an animal body capable of performing a distinct office; a limb, a vital organ. "For the body is not one member, but many."—1 *Corinthians* xii. 14.

2. A part of an aggregate or whole: as—
(1) A part of a discourse or period; a head, a clause.

(2) One of a number of persons constituting a society, association, community, &c.; an individual forming part of an association; specif., one who represents a county or town in parliament.

"He was strenuously supported by Sir James Montgomery, member for Ayrshire."—*Macaulay's Hist. Eng.*, ch. xxi.

II. Technically:

1. *Arch.*: A moulding, either as a cornice of five members, or a base of three members, and applied to the subordinate parts of a building.

2. *Alg.*: Each part of an equation connected by the sign of equality. The one on the left is called the first member, and the one on the right, the second member.

¶ *Member of Parliament*: [1. 2 (2), & PARLIAMENT].

mēm-bēred, *a.* [Eng. *member*; -*ed*.]

1. *Oral Lang.*: Having members or limbs; used in composition: as, *big-membered*.

2. *Her.*: A term applied to a bird when its legs are borne of a different tincture to that of the bird itself.

mēm'bēr-shīp, *s.* [Eng. *member*; -*ship*.]

1. The state of being a member.
"No advantages from external church membership can of themselves give a man confidence towards God."—*South. Sermons*, vol. ii., ser. ii.

2. The members of a body, society, or association collectively.

mēm-brāç'i-dæ, *s. pl.* [Mod. Lat. *membræ*(s); Lat. fem. pl. adj. suff. -*idæ*.]

Entom.: A family of homopterous insects, of the order Rhyncoeta, remarkable for the extraordinary forms which the prothorax assumes. There is frequently a posterior part, wholly or partially covering the abdomen and wings. The typical genus *Membracis* (q.v.) and *Bocchium* are American; *Centrotus* and *Gargara* are common in Britain and in Europe.

mēm-brā-çīs, *s.* [Gr. *μembraç* (*membracis*), genit. *μembraçkos* (*membracikos*) = a kind of cicada.]

Entom.: The typical genus of the family Membracidae (q.v.). Chief species, *Membracis elevata* and *M. concolor*.

mēm-brā-nā, *s.* [Lat. = a membrane, a skin, from *membrum* = a limb, a member of the body.]

Anat.: A membrane. There are a *membrana succiformis*, a *membrana limitans*, &c.

membrana nictitans, *s.*

Zool.: A fold of the conjunctiva on the inner side of the eye. It constitutes the third eyelid of birds, and occurs also in some fishes, amphibians, and mammals, but is rudimentary in man and monkeys. In human anatomy it is called *plica semilunaris*.

membrana tympani, *s.*

Anat.: The drum of the ear.

mēm-brā-nā-çē-æ, *s. pl.* [Lat. *membræ*(a); fem. pl. adj. suff. -*ææ*.]

Entom.: A family of heteropterous insects of the order Rhyncoeta. Antennæ four-jointed, rostrum three-jointed, enclosed in a sheath, tarsi two-jointed. Ocelli generally absent. In the majority the antennæ are thickened or clavate. Chief genera: *Acanthia* (Cmex), *Aradus*, *Tingis*, *Munantia*, and *Syrtsis*.

mēm-brā-nā-çeoūs (**cc** as **sh**), *a.* [Lat. *membranaceus*, from *membrum* = a membrane (q.v.).] The same as MEMBRANOUS (q.v.).

"Consider its variety, suited in various foods, some membranaceous, agreeable to the fugivorous or carnivorous kind."—*Derham's Physico-Theology* bk. viii., ch. vi.

mēm-brāne, *s.* [MEMBRANA.]

Anat.: An expansion of any tissue in a thin and wide layer. Richet divides them into serous, mucous, and fibrous membranes. Among the most important membranes in the body are those of the brain: viz., the dura mater, the arachnoid, the pia mater and the falx. [MENINGITIS.]

¶ (1) *Additional membrane*:

Bot.: The name given by Brown to the quintine of the ovule.

(2) *Arachnoid membrane*: [ARACHNOID].

(3) *Schneiderian membrane*: [SCHNEIDERIAN MEMBRANE].

(4) *Undulating membranes*:

Zool.: Simple membranous bands, one margin only of which is attached, the other being free and exhibiting an undulatory motion. They are allied to and answer the same purpose as cilia. They are stated to occur on the spermatozoa of salamanders and tritons, and in the water vessels of some Annulidæ, Infusoria, and Rotatoria. (*Griffith & Henfrey*.)

membrano-bones, *s. pl.*

Comp. Anat.: Bones or ossifications which have their origin, not in cartilage, but in membranous connective tissue. The bones of the heart are membranous-bones.

"The different kinds of these membranous bones occur with greater or less abundance throughout this sub-order."—*Günther's Study of Fishes*, p. 24.

mēm-brā-nē-oūs, *a.* [MEMBRANOUS.]

mēm-brā-nif'ēr-oūs, *a.* [Lat. *membrana* = a membrane; *fero* = to bear, to produce, and Eng. adj. suff. -*ous*.] Having or producing membranes.

mēm-brā-ni-form, *a.* [Lat. *membrana* = a membrane, and *formis* = form, shape.] Having the form of a membrane or parchment.

mēm-brā-nip'ōr-a, *s.* [Lat. *membrana* = a membrane, and *porus* = a channel, a passage.]

1. *Zool.*: The typical genus of the family Membraniporida (q.v.).

2. *Palæont.*: Species are found in the Cretaceous and in the Tertiary rocks.

mēm-brā-ni-pōr-i-dæ, *s. pl.* [Mod. Lat. *membraniporida*(s); Lat. fem. pl. adj. suff. -*idæ*.]

1. *Zool.*: A family of Bryozoa or Polyzoa. The polyzoa, which is calcareous, or partly horny, partly calcareous, is composed of horizontal cells contiguous to each other. The species grow on shells, corals, &c. Genera: *Membranipora*, *Lepralia*, &c.

2. *Palæont.*: The family has existed from Palæozoic times till now.

mēm-brā-nōl'ō-gy, *s.* [Lat. *membrana* = a membrane, and Gr. *λογος* (*logos*) = a word, a discourse.] A treatise on membranes; the science which treats of membranes.

mēm-brā-nōūs, **mēm-brā-nē-oūs**, *a.* [Fr. *membranoux*; Ital. & Sp. *membranoso*.]

1. *Oral Lang.*: Belonging to or consisting of membrane; resembling a membrane.

2. *Bot.*: Thin and semi-transparent, like a fine membrane, as is the case with the leaves of mosses. It is non-development of parenchyma which makes the leaves of some plants membranous. (*Loudley*.)

membranous cellular tissue, *s.*

Bot.: Cellular tissue in which the walls of the cells are composed solely of membrane.

membranous labyrinth, *s.*

Anat.: Membranous structures inside the osseous labyrinth of the ear, and having spread over them the ultimate ramifications of the auditory nerve.

mēm-ē-çyl'ē-æ, *s. pl.* [Mod. Lat. *membræ*(a); Lat. fem. pl. adj. suff. -*ææ*.]

Bot.: A tribe of Melastomaceæ.

mēm-mēc'ŷ-lōn, *s.* [Lat., from Gr. *μημεκλον* (*mēmēklon*); *μημεκλον* (*mēmēklon*) = the edible fruit of the *Arbutus*. There is a certain superficial resemblance between the *Arbutus* and the *Mēm-cylon*.]

Bot.: The typical genus of the tribe Meme-cyloæ (q.v.). The species are small trees or shrubs with entire leaves, with a prominent midrib and clusters of small bluish flowers. About fifty species are known. *Mēm-cylon edule* is found in India, Ceylon, Tenasserim,

boil, **boÿ**; **pōut**, **jōwl**; **cat**, **çell**, **chorus**, **çhin**, **benç**: **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph** = **f**. -**cian**, -**tian** = **shan**. -**tion**, -**slon** = **shün**; -**çtion**, -**çslon** = **zhün**. -**cious**, -**tious**, -**slous** = **shus**. -**ble**, **dle**, &c. = **bel**, **del**.

consequence of some known antecedent one, and as the antecedent of some one immediately following. Ordinary minds remember incidents and facts by association of ideas of the first and more artificial kind: philosophers aim at doing so by the second and more natural kind of association. Men vary greatly in the value of their memories. A memory to be good should be susceptible, ready, and retentive. (See these words.) The keener one's susceptibility, the more interested he will be in human affairs, the more attention he will pay to all objects of sensation, and the more easily he will remember them; the more that reflective coexists in his mind with perceptive power, the more permanent will be the impression. The old, losing interest in recent events, as their mind and body decay, complain of difficulty in remembering them.

"This laying up of our ideas in the repository of the memory, signifies no more but this, that the mind has a power in many cases to revive perceptions, which it has once had, with this additional perception annexed to them, that it has had them before."—Locke: *Human Understand.*, bk. ii., ch. x., § 2.

"When an event or fact is recalled to the mind by an effort made for the purpose, this is not memory of the normal kind but recollection. The art which furnishes aid to memory is called Mnemonics (q.v.)."

2. *Physiol.*: This faculty is the property of the cerebral organs only, not of the organ of sense, and is never entirely lost except through disease or accident. It depends entirely on association, and is one of the first faculties aroused in the infant mind, traces of it also occurring in the lower animals.

* **mēm'or-ŷ**, v.t. [MEMORY, s.] To remember.

Mēm'phī-an, a. [See def.]
1. *Lit.*: Of or pertaining to Memphis, a city of ancient Egypt; Egyptian.
"The works of Memphian kings."
Milton: *P. L.*, l. 694.

* 2. *Fig.*: Very dark or black, from the supernatural darkness which overspread Egypt. (*Exod.* x. 21.)

mēn, s. pl. [MAN.]

¶ *Men of understanding*:

Church Hist. & *Eccles.*: A sect founded by Ægidius Cantor, an illiterate man, and William of Hildenssen, who was a Carmelite and better instructed. The sect was first discovered in Brussels in 1411. They trusted for salvation to Christ alone, and denied that confession and voluntary penance were necessary to salvation. With these tenets were combined some mystic views that a new law of the Holy Spirit and of spiritual liberty was about to be promulgated. They may have been a branch of the sect called Brethren of the Free Spirit. (*Mosheim*: *Church Hist.*; cent. xv., pt. ii., ch. v., § 4.)

* **men-of-straw**, s. [STRAW.]

men-pleaser, s. One who seeks to please men, rather than God.

"Not with eye-service as men-pleasers."—*Ephesians* vi. 6.

mēn-āc-cān-īte, **mēn-āch-an-īte**, s. [From Menaccan, Cornwall; suff. -ite (*Min.*); Ger. *menakinit*.]

Min.: A mineral crystallizing in the rhombohedral system, having its angles nearly the same as those of hematite (q.v.). Occurs also in laminar masses or as sand. Hardness, 5 to 6; sp. gr. 4.5 to 5; lustre, submetallic; colour, iron-black; streak, brownish-red to black; opaque; fracture conchoidal. Compos.: a titaniferous sesquioxide of iron, the proportions of the titanium and iron very varying; sometimes contains magnesia or manganese. Its varieties depend upon the amount of titanium they contain, and are given by Dana as follows:—(1) Kibbelophane, containing about 30 per cent. of titanium. (2) Crichtonite, containing the same amount of titanium, but crystallizing in acute rhombohedrons, having a basal cleavage. (3) Ilmenite, with from 26 to 30 per cent. of titanium. (4) Menaccanite, with about 25 per cent. of titanium, and occurring massive or as sand. (5) Hystatite, containing 15 to 20 per cent. of titanium, and much sesquioxide of iron; Washingtonite is here included. (6) Ubbelavallite, about 10 per cent. of titanium, and 70 per cent. of sesquioxide of iron. (7) Bissonite, 6 to 8 per cent. of titanium; it includes the "Eisenrose"

of the Swiss Alps. (8) Krageroo-Hæmatite, with less than 3 per cent. of titanium. (9) Magnesian Menaccanite, or Pierotamite, containing 10 to 15 per cent. of magnesia. Found in extensive beds in many parts of the world, as sands in rivers, and in grains in many igneous rocks.

mē nāc-cān-īt-ic, a. [Eng. *menaccanite*(e); -ic.] Pertaining to menaccanite (q.v.).

mēn-ācē, * **man-ace**, * **man-ase**, * **man-asse**, * **man-yah**, v.t. & i. [Fr. *menacer*, from *menace* = a threat, a menace (q.v.); Ital. *minacciare*; Sp. *amenazar*.]

A. Transitive:

1. To threaten; to express or show an intention or determination to inflict punishment or other evil, injury, or hurt on. (Followed by *with* or *by* before that which is threatened.)

"Our trade was interrupted and our shores menaced by these rovers."—*Macaulay*: *Hist. Eng.*, ch. xix.

* 2. To threaten, to denounce; to express or hold out threats of.

"He menaced revenge upon the cardinal."
Shakespeare: *Henry VIII.*, l. 2.

* **B. Intrans.**: To threaten, to utter threats; to look threatening.

"Who ever knew the heavens menace so?"
Shakespeare: *Julius Cæsar*, l. 3.

mēn'ācē, * **man-ace**, * **man-asse**, * **man-asse**, v. [Fr. (O. Fr. *menace*, *menache*, *minache*), from Lat. *minacio* = threats, from *minor* (genit. *minacis*) = threatening; *minor* = things projecting, . . . threats, from *minere* = to project; Ital. *minacciare*; Sp. *amenazar*.] A threat, a threatening; the denunciation of any injury or punishment; a declaration or indication of a disposition, intention or determination to inflict punishment or other evil.

"William had been provoked into muttering a few words of menace."—*Macaulay*: *Hist. Eng.*, ch. x.

mēn'āc-ēr, s. [Eng. *menace*(e); -er.] One who menaces or threatens; a threatener.

"Hence, *menacer* nor tempt me into rage: This roof protects thy rashness." *Philips*. (*Todd*.)

mēn-āch-an-īte, s. [MENACCANITE.]

mēn'āc-īng, pr. *par.*, a., & s. [MENACE, v.]

A. As pr. par.: (See the verb.)

B. As adj.: Threatening; indicating threats.

"England, though her aspect was sullen and menacing, still preserved neutrality."—*Macaulay*: *Hist. Eng.*, ch. xxv.

C. As subst.: The act of threatening; a threat, a menace.

mēn'āc-īng-lŷ, adv. [Eng. *menacing*; -ly.] In a menacing or threatening manner; with threats.

1. A household.

2. Housekeeping; household management.

3. A menagerie.

"I saw here the largest *menage* that I ever met with."—*Addition*: *Remarks on Italy*.

4. Management, handling.

"To savour in the *menage* of it so much modest sweetness."—*Glanville*: *Plus Ultra*, (Pref.)

* **mēn-age**, v.t. [MANAGE, v.] To manage, to control.

He, the rightful owner of that steed, He would could *menage* and subdue his pride."
Spenser: *F. q.*, ll. iv. 2.

mē-nāg-ēr-īe, **mē-nāg-ēr-ŷ**, s. [Fr., from *ménager* = to keep house; *ménage* = a household, housekeeping.] [MENAGE (2), s.]

1. A yard in which wild animals are kept.

2. A collection of wild animals; espec. one kept for exhibition.

mēn'ā-gōgue, s. [Gr. *μῆνες* (*mēnes*) = the menses of women; *ἀγωγός* (*agōgos*) = leading, driving; *ἀγώ* (*agō*) = to lead, to drive.] A medicine that promotes the flux of the menses.

mēn'āld, * **mēn'ōld**, * **mēn'ild**, a. [Cf. Wel. *menog* = spotted.] Spotted. (Said of animals.)

Mē-nān-dri-an, s. [For etym. see def.]

Church Hist. (Pl.): Followers of Menander, a disciple of Simon Magus, who, to all his master's heresies, added this of his own; that

without baptism in his name salvation was impossible, and to all so baptised he promised immortality and incorruptibility. He is also described by Tertullian, as pretending to be one of the sons from the pleroma (q.v.), sent to succour souls which were under oppression. (*Shipley*.)

mēn'āph-thōx-ŷl-īc, a. [Eng. *me(thyl)*: -naphth(o); *ox(o)yl*, and suff. -ic.] (See the compound.)

menaphthoxylic acid, s. [NAPHTHALENE-CARBOXYLIC ACID.]

mēn'āph-thŷl-a-mīnē, s. [Eng. *me(thyl)*: *naphthyl*, and *amine*.]

Chem.: C₁₁H₁₉NH₂. A liquid produced by treating an alcoholic solution of menaphthothiamide, C₁₁H₁₃N₃S, with hydrochloric acid and zinc. It boils at 290°–293°, and rapidly absorbs carbonic acid from the air. It unites with acids, forming salts, which all crystallize well. With alcoholic soda and chloroform, it yields the strongly-smelling compound form-menaphthyl nitride.

* **mēn-cl-oun**, s. [MENTION, s.]

mēnd, * **mēnd-oun**, v.t. & i. [A corrupt. of *amend* (q.v.).]

A. Transitive:

1. To repair or make good; as a breach, a rent, a defacement, or injury of like kind.

2. To repair or make good, as a thing broken, rent, defaced, or otherwise injured or damaged; to restore to the original state; to put into repair, shape, or order again; to patch up.

"He saw James the son of Zebedee, and John his brother, who also were in the ship mending their nets."—*Mark* i. 19.

3. To set right; to amend or repair what is amiss.

"That's a fault that water will mend."—*Shakespeare*: *Comedy of Errors*, ll. 2.

4. To amend; to make better; to improve; to alter for the better; to ameliorate; to correct.

"A man I sell the make, richely for to buye, Or my Chace Justice, the lawes to mend and right." *Robert de Brunne*, p. 69.

5. To advance, to further, to improve.

"Salt earth and bitter are not fit to sow, Nor will be sowed and mended by the plough."
Dryden: *Virgil*; *Georgic* ll. 324.

6. To add to, to increase.

"[He] had mended the cheer of his hosts by a present of fat lucks from his forests."—*Macaulay*: *Hist. Eng.*, ch. xxiv.

7. To increase, to quicken, to accelerate.

"Judgment, however tardy, mends her pace, When obstinacy once has conquered grace."
Cooper: *Esposicion*, 785.

* 8. To adjust, to set right.

"He will mend the ruff and sing."—*Shakespeare*: *All's Well That Ends Well*, ll. 2.

* 9. To improve upon.

"I'll mend our dinner here."—*Shakespeare*: *Comedy of Errors*, iv. 3.

B. Intrans.: To grow or become better; to improve, to amend.

"What think you of this fool? Doth he not mend?"—*Shakespeare*: *Twelfth Night*, l. 8.

* **mēnd**, s. [MEND, v.] An amendment; a correction, a remedy.

"If she be fair, tis the better for her; an she be not, she has the mēnds in her own hands."—*Shakespeare*: *Troilus & Cressida*, l. 1.

* **mēnd-a-ble**, a. [Eng. *mend*; -able.] That can be mended, corrected, or improved. Capable of improvement or amendment.

"Diligently reforme and amende in such as are mendable."—*Sir T. More*: *Workes*, p. 925.

England and as far south as Chesapeake Bay. It is also called Bony-fish, White-fish, Hard-head, Moss-bunker, and Pauhagen. In Massachusetts and Rhode Island they are known by their native name; in New York as Moss-Bunkers and Skippaugus. The economic value of this fish, surpassed in America only by that of the Gadoids, is derived chiefly from its use as bait, and from the oil extracted from it, the annual yield exceeding that of the whale from American fisheries. The refuse of the oil-factories supplies a material valuable for agricultural manures.

menhaden oil, s. Chem.: An oil obtained from a species of herring, Mosa menhaden. When distilled with excess of lime, it yields not less than sixteen volatile hydrocarbons.

mên hîr, s. [Gael. & Wel. mên = a stone, and hîr = high.]

MENHIR.

Archæol. & Anthrop. (Pl.): Tall stones; the last of the classes into which Megalithic monuments are usually divided. They occur singly and in groups, rough and unshaped, and sculptured and inscribed with Ogham writing or with runes. They are found in Ireland and Scotland, in Scandinavia, in Algeria, and in the Khassia Hills, Bengal. In the latter instance many of the stones are recent, and Major Austen (Journ. Anthrop. Inst., i. 127) thus accounts for their erection:

"If any of the Khassia tribe falls ill or gets into difficulties, he prays to some one of his deceased ancestors, whose spirit he fancies may be able and willing to assist him ... and, to enforce his prayer, he vows that, if it is granted, he will erect a stone in honour of the deceased. Ferguson's view as to the origin of European menhirs generally may be gathered from the extract:

"We can trace back the history of the menhirs from historic Christian times to non-historic regions when these rude stone pillars, with or without still ruder inscriptions, were gradually superseding the earthen tumuli as a record of the dead. — Ferguson: Route Stone Monuments, p. 69.

mên-nî-al, mên-ne-al, mên-ne-al, a. & s. [Mid. Eng. menne, meinne, meyny, &c.; -al.] [MANY.]

A. As adjective: 1. Belonging or pertaining to a retinue or train of servants; serving.

2. Pertaining to or suitable for servants; servile, low, mean.

B. As subst.: A retainer, one of a body of servants; a domestic servant. (Used chiefly in disparagement.)

mên-îl-ite, s. [From the place where found, Mên-îl Montant, Paris; suff. -ite (Men.)]

mên-nî-gê-al, s. [MENINGES.] Of or pertaining to the meninges (q.v.).

meningeal artery, s. Anat.: The largest of the branches given off by the internal maxillary artery. It enters the cranium by the spinal foramen, and distributes its branches chiefly to the dura-mater.

meningeal vessels, s. pl. Anat.: The vessels of the membranes of the brain.

mên-nî-gêçs, s. pl. [Gr. méninx (méninx), genit. méninxos (méninxos)] = a membrane. Anat.: (See extract.)

"The cerebrospinal centre is enclosed in certain membranes or meninges, which are three in number—the dura-mater, the arachnoid, and the pia-mater." Todd & Bowman: Physiol. Anat., i. 349.

mēn-in-ġi-tis, s. [Eng., &c. *mening(s)*; suff. *-itis*.]

Pathol.: The term applied by Herpin to the inflammation of the membranes enveloping the brain. Acute simple meningitis as a rule involves the membranes extensively, but is more marked over the convexity of the cerebral hemisphere than at the base or any localised spot. The premonitory symptoms are usually well marked, as headache, gradually getting worse, heaviness, giddiness, irritability, and frequently sickness and vomiting. When the disease is established, it presents the following stages: (1) Excitement; (2) Transition; (3) Depression. The extent of the inflammation and its position on the brain determine the symptoms. There are acute and chronic forms of the malady. The former generally terminates in death; whilst the latter results first in maniacal excitement, and then in phoey.

mē-nis-cal, o. [Mexisets.] Pertaining to or of the form of a meniscus.

mēn-is-ċi-ē-æ, s. pl. [Mod. Lat. *menisicæ* (*um*); Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A sub-tribe of Polypodiaceous Ferns without an indusium.

mē-nis-ċi-ūm, s. [Dimin. of Mod. Lat. *meniscus* (q.v.).]

Bot.: The typical genus of the subtribe *Menisicæ*. The *seri* are reniform, seated on the backs of the transverse venules, the veins pinnate, anastomosing. (*Griffith & Henfrey*.)

mē-nis-cōid, a. [Gr. *μηρίσκος* (*mēniskos*) = a little moon, and *εἶδος* (*eidos*) = form, appearance.] Having the form or appearance of a meniscus; concavo-convex, crescent-shaped.

mē-nis-cūs, s. [Gr. *μηρίσκος* (*mēniskos*) = a little moon; *μήνη* (*mēnē*) = a moon.]

1. *Optics*: A lens convex on one side and concave on the other. [LENS.] The concave side has a curve of greater radius than the convex side, and the lens is thicker in the middle than elsewhere.

2. *Archæol.*: A kind of bronze plate or disc, which was placed by the Athenians upon the heads of statues, to defend them from the rain and from the ordure of birds.

3. *Zool.*: A term applied to an organ of doubtful function in Echinorhynchus. (*Huxley*)

men-ise, s. [MINSOW.]

* **men-i-son**, * **men-i-soun**, s. [O. Fr. *menison*.] The dysentery. (*Piers Plouman*, [B] xvi. 111.)

mēn-i-spēr-mā-ċē-æ, s. [Mod. Lat. *menispermum* (*um*); Lat. fem. pl. adj. suff. *-æceæ*.]

Bot.: Menispermads, an order of Dicotyledonous Exogens, alliance Menispermales. It consists of sarmentaceous shrubs, with alternate, generally entire leaves, reticulated and often palminnerved. The wood develops only on one side of the pith. Flowers small, in racemes, generally dioecious; sepals in a ternary series or in binary rows; petals generally smaller than the sepals, six, or in a binary or single series; stamens as many as the petals or more numerous, distinct or monadelphous; ovules three or six; fruit, usually fleshy drupes, containing a single one-celled nut; seed one, enveloped in a membranaceous integument. Found climbing among trees in the tropics of Asia and America. The order is divided into six tribes: (1) Heteroclineæ, (2) Anomispermeæ, (3) Tilicocææ, (4) Leptogoneæ, with the subtribes Eleutharhæoneæ and Cissampelheæ, (5) Platygoneæ, (6) Pachygoneæ. (*Lindley*.) Known genera 60, species about 350. (*Treats of Bot.*)

mēn-i-spēr-mād-s, s. [Mod. Lat. *menispermum* (*um*); Eng. suff. *-ad*.]

Lat. Pl.: The name given by Lindley to the order Menispermaceæ (q.v.).

mēn-i-spēr-māl-æ, s. [Mod. Lat. *menispermum* (*um*); Eng. suff. *-alæ*.]

Bot.: Of or belonging to the genus *Menispermum* or of the order Menispermaceæ (q.v.).

menispermal-alliance, s. [MENISPERMALES.]

mēn-i-spēr-mā-lēs, s. pl. [Mod. Lat. *menispermum* (*um*); Lat. mas. and fem. pl. adj. suff. *-lēs*.]

Bot.: An alliance of Dicotyledonous Exogens, consisting of those with mono-heliamyoidous flowers, superior dissimulated carpels, and an embryo surrounded by abundant albumen. It contains six orders: Monmiaceæ, Athero-spermaeæ, Myristicææ, Lardizabalææ, Schizandraceæ, and Menispermææ (q.v.).

mēn-i-spēr-māt-s, s. [Mod. Lat. *menispermum* (*um*); Eng. suff. *-at-s*.]

Chem.: A salt of menispermic acid.

mēn-i-spēr-mic, a. [Eng. *menispermum* (*um*); *-ic*.] Contained in or derived from menispermium (q.v.).

menispermic-acid, n.

Chem.: A doubtful acid, said by Boullay to exist in the seeds of *Menispermum cocculis*. It is described as crystalline, tasteless, sparingly soluble in water, and capable of forming crystallizable salts with alkalis.

mēn-is-pēr-minc-s, s. [Mod. Lat. *menispermum* (*um*); Eng. suff. *-inc* (*Chem.*).]

Chem.: C₁₃H₁₂NO₂. An alkaloid discovered by Pelletier and Couerbe in the seeds of *Menispermum cocculis*. It crystallizes in prisms, insoluble in water, but soluble in alcohol and ether, from which it deposits in the crystalline state. It melts at 120, but is decomposed at a higher temperature. Menispermine does not appear to be poisonous.

mēn-i-spēr-mūm, s. [Gr. *μήνη* (*mēnē*) = the moon, and *σπέρμα* (*sperma*) = a seed.]

Bot.: Moon-seed. The typical genus of the order Menispermaceæ and the alliance Menispermales. Sepals, four to eight, in two rows; petals, six to eight; males twelve to twenty-four free stamens, females with six sterile ones and two to four capsules. Known species two, one American, the other Asiatic.

* **mēn-i-vēr**, s. [MINIVER.]

Mēn-kar, s. [Corrupted Arabic (?).]

Astron.: The chief star of the constellation Cetus. Called also a Ceti.

Mēn-nōn-ite, a. & s. [See def. B.]

A. As a adj.: Belonging to or characteristic of the sect described under B.

The students receive theological instruction in a room containing the library, over the Menonite chapel.—*McClintock & Strong*: *Cyclop. Bib. & Eccles. Lit.*, vi. 26.

B. As substantive:

Eccles. & Church Hist. (Pl.): The followers of Menno Simons (1492-1559), a priest at Witmarsum, in Friesland, who resigned his position from religious convictions. His teaching was ascetic rather than dogmatic, except that he was anti-pedobaptist. The discipline of the Menonites involved separation from the world, to the extent of refusing to bear arms or to fill any civil office. There was no hierarchy, but exhorters were chosen by the congregations, each of which was independent of all the rest, and from these exhorters elders were selected to administer the sacraments. The Menonites spread over Switzerland, Germany, Holland, and even to France. Their chief home now is in the United States and Canada, where they number nearly 200,000. There are also some German Menonite colonies in Southern Russia.

The Menonites of Holland have passed through an interesting and progressive history.—*Encyc. Brit.* (ed. 9th), xvi. 12.

mēn-ō-brān-ċhi-dæ, s. pl. [Mod. Lat. *menobranchius* (*us*); Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: A provisional family of tailed amphibians, sub-order Ichthyofila, group Perennibranchiata. It was erected for the reception of the possible genus *Menobranchius* (q.v.).

mēn-ō-brān-ċhūs, s. [Gr. *μήνω* (*mēnē*) = to remain, to be unchanged, and Lat. *branchia* = the gills of a fish; *branchia* (q.v.).]

Zool.: A genus of tailed amphibians, of the group Perennibranchiata. Although these animals have received generic distinction, it is by no means certain that they are not either the larva or the immature condition of an anlystome, Batrachoepe. *Menobranchius lateralis* is from the Mississippi, and *M. punctatus* from the lake district of North America. Dusky ash gray, with dark spots, a dark streak from the snout over the eyes; branchiæ three on each side, of bright crimson. Extremities four-cleft, without claws. Erroneously reported poisonous.

mēn-ō-lō-ġi-ūm, s. [MENOIOLŌY.]

mō-nōl-ō-ġy, s. [Gr. *μηνολογία* (*minolōgia*) from *μήνη* (*mēnē*) = a month, and *λογος* (*logos*) = a discourse, a word.]

1. *Ord. Lang.*: A register of months.

2. *Greek Church*: A calendar of the lives of the saints for each day in the year.

mōn-ō-pāuse, s. [Gr. *μῆνη* (*mēnē*), genit. *μηνος* (*mēnos*) = a month, and *παύσις* (*pausis*) = a stoppage.]

Physiol.: The final cessation of the menses in women.

mōn-ō-pō-mā, s. [Gr. *μῆνα* (*mēnā*) = to remain, and *πόμα* (*pōma*) = a food.]

Zool.: The typical genus of the family Menopomidae (q.v.), with a single species, *Menopoma alleghaniensis*, popularly known as the Hellbender. Found in the Allegheny and its tributaries. Length, from eighteen to twenty-four inches; pale slate-colour, mottled with dusky tints. The neck has a single gill-cleft on each side. It is very voracious, feeding on fish, molluscs, and worms.

mōn-ō-pō-mē, s. [MENOPOMA.] Any individual of the genus *Menopoma* (q.v.).

mōn-ō-pōm-i-dæ, s. pl. [Mod. Lat. *menopomidae* (*æ*); Lat. fem. pl. adj. suff. *-idæ*.]

1. *Zool.*: A family of tailed amphibians. It contains the genera *Menopoma* (q.v.) and *Sieboldia* (Cryptobranchus).

2. *Palæont.*: The large salamander originally described as *Homo diluvii testis* is believed to have belonged to this family.

mēn-or-rhā-ġi-a, **mēn-or-rhā-ġy**, s. [Gr. *μήνη* (*mēnē*), genit. *μηνος* (*mēnos*) = a month, and *ρήγνυμι* (*rhegnymi*) = to burst forth, to flow.]

Phys.: The flow of the menses; menstruation. Frequently used synonymously with uterine hæmorrhage, or to denote an immoderate flow of the menses.

mō-nōs-tā-sis, **mēn-ōs-tā-tion**, s. [Gr. *μῆνη* (*mēnē*), genit. *μηνος* (*mēnos*) = a month, and *στάσις* (*stasis*) = a standing.] [STASIS.]

Physiology:

1. The retention of the menses and their accumulation in the uterus.

2. The acute pain which sometimes precedes each appearance of the menses, presumably caused by the stasis of the blood in the capillary vessels of the uterus.

mēn-ōs-tā-tion, s. [MENOSTASIS.]

* **mēn-ōw** (1), s. [MINSOW.]

mēn-ōw (2), s. [Etym. doubtful.] (See the compound.)

menow-weed, s.

Bot.: *Ruellia tuberosa*.

mēn-sā, s. [Lat.] A table.

* *A mensa at toro:*

Law: (Lit., from board and bed.) A phrase applied to a kind of divorce effected by the sentence of an ecclesiastical court, by which the parties were separated, but the marriage relation itself was not dissolved. It is now superseded by a judicial separation. [BEI, s. II. 1; SEPARATION.]

* **mēn-sāl** (1), a. [Lat. *mensalis*, from *mensa* = a table.] Belonging to the table; transacted at table.

menal church, s. (See extract.)

Prior to the Reformation in Scotland, when the revenue of a parish, hospitable area from the taxation of parish church, those allotted to the bishop himself were called menal churches, as furnishing his table.—*McClintock & Strong*: *Cyclop. Bib. Lit.*, vi. 26.

* **mēn-sāl** (2), a. [Lat. *mensis* = a month.] Occurring once a month; monthly.

mēnsc, s. [Icel. *menška* = humanity, from *men-skir* = human; *man* = a man.] Manners, moderation. (*Scottch.*)

But we have mense and discretion, and are moderate of our months.—*See* *It.*: *Rob. Boy*, ch. vi.

*** mēn-tō, pref.** [Lat. *mentum* (2).] Of or belonging to the chin.

mento-hyoid, a.

Anat.: Connected with the chin and the hyoid bone. There is a mento-hyoid muscle.

*** mēn-tōn-nière, mēn-tōn-ière (4 as y), s.** [Fr. from *menton*; Lat. *mentum* = the chin.]

Old Arm.: A steel gorget or defence for the chin and throat, secured to the basinet and to the cuirass. It was sometimes furnished with a small door for breathing.

MENTONNIERE.

mēn-tor, s. [From Mentor, in Homer, the wise counsellor of Telemachus.] A monitor, a wise counsellor or adviser.

*** mēn-tōr-i-al, a.** [Eng. *mentor*; -ial.] Containing or of the nature of advice or counsel.

mēn-tūm, s. [Lat. = the chin, from a root, *men-*, *min-* = to project.]

1. *Entom.*: The basal portion of the labium or lower lip in insects.

2. *Zool.*: The anterior and inferior mandible of the lower jaw. In man it is known as *mentum prominens*, on account of the mental prominence (q.v.); in the lower mammals it is called *mentum absconditum*.

3. *Bot.*: A projection caused by the extension of the foot of the column in some orchids.

mēnt-zēl-i-a, s. [Named after C. Mentzel, a botanical author of Brandenburg.]

Bot.: A genus of Loasaceae, tribe Loasaceae. They are herbs, with orange or yellow flowers. The root of *Mentzelia hispida*, a Mexican species, is said to be purgative.

mē-nū, s. [Fr.] A list of the dishes, &c., to be served at a dinner, supper, &c.; a bill of fare.

mē-nūr-a, s. [Gr. *μήνη* (*mēnē*) = the moon, a crescent, and *οὐρα* (*oura*) = a tail.]

Ornith.: A genus of Passerine songless birds from Australia, typical of the family Menuridae, or the sub-family Menurine. Three species are known: *Menura superba*, the Lyre-bird; *M. victoria*, separated from the former by Gould (*Proc. Zool. Soc.*, 1862, p. 23), and *M. alberti*, first described by C. L. Bonaparte (*Cons. Avium*, i. 215).

mē-nūr-i-dae, s. pl. [Mod. Lat. *menura*(*o*); Lat. fem. pl. adj. suff. -idae.]

Ornith.: A family of Passerine songless birds, containing the single genus Menura (q.v.). Mr. Selator (*Ibis*, 1880, p. 345) forms the families Menuridae and Atrichidae into a group, Pseudoscines (q.v.).

mēn-ū-rī-nae, s. pl. [Mod. Lat. *menura*(*o*); Lat. fem. pl. adj. suff. -inae.]

Ornith.: A sub-family of Garrard's Abnormal Acronyoidian Oscines. It contains two genera: Menura and Atrichia. (*Proc. Zool. Soc.*, 1876, p. 518.) [SCRB-BIRD.]

*** menuse, s.** [MINNOW.]

mēn-ŷ-ān-thē-ae, s. pl. [Mod. Lat. *menyanthes*(*es*); Lat. fem. pl. adj. suff. -eae.]

Bot.: A tribe of Gentianeae, differing from the typical one, Gentianeae, by having the corolla induplicate.

mēn-ŷ-ān-thēs, s. [Said to be from Gr. *μήν* (*mēnē*) = a month, and *ἄνθος* (*anthos*) = a flower, because it continues a month or because it excites menstruation. If it could be derived from *μηνῶς* (*mēnāōs*) = to disclose, this would account for the *ŷ*, which the former etymology does not.]

Bot.: Buckbean, the typical genus of the tribe Menyantheae (q.v.). Calyx, five-partite; corolla, funnel-shaped, fleshy, the segments hairy within; stamens, four; stigma, two-lobed; capsule, one-celled, two-valved, the valves bearing the seeds or parietal placentae along their middle. Only known species, *Menyanthes trifoliata*, the Buckbean or Marsh-trefoil, has ternate, stalked leaves, with obovate, obscurely-toothed leaflets. From the sheathing base of the leaf-stalk arises a flower-stalk, terminating in a compound raceme or thyrsus of many white flowers, tipped externally with red, and beautifully fringed with white threads within. The rhizome is a highly valuable tonic. It is very bitter. It is given in intermittent and remittent fevers, gout, rheumatism, scurvy, dropsy, hoopes, and worms, and can be used as a substitute for hops in making beer.

mēn-ŷ-ān-thin, s. [Mod. Lat. *menyanthes*(*es*); -in.]

Chem.: $C_{22}H_{36}O_6$. A bitter substance isomeric with pimperin, discovered in buckbean (*Menyanthes trifoliata*). It is obtained as a nearly colourless resinous mass, having a very bitter taste. It is easily soluble in hot water, alcohol, and alkalis, and insoluble in ether.

mēn-ŷ-ān-thōl, s. [Eng. *menyanth*(*in*), and Lat. *ol(eum)*.]

Chem.: An oily body obtained by distilling menyanthin with dilute sulphuric acid. It is heavy and colourless, smells of bitter almond oil, and has a faint acid reaction.

mēn-ŷ-iē, mēn-ŷ-iē, mēn-ŷ-ē, s. [MEINY.]

mēn-ŷ-i-ē-sī-a, s. [Named after Archibald Menzies, a Scotch botanist, surgeon, and naturalist to Vancouver's expedition.]

Bot.: A genus of Ericaceae (Heaths), tribe Andromedidae. *Menziesia corymbosa* is called by Sir Joseph Hooker *Phyllocladus corymbosa*, and *M. pulchella*, *Daboecia pulchella*.

Mē-phīs-tō-phē-lē-an, Mē-phīs-tō-phē-lī-an, a. [MEROPHILES.] Resembling the character of Meropistes in Marlowe's play of Dr. Faustus; diabolical, sardonic.

Mēph-is-tōph-ē-lēs, * Mēph-is-tōph-i-lis, * Mēph-is-tōph-i-lis, s. [Supposed to be a corruption of Gr. *Νεφροσθηλής* (*Nephrosthelēs*), from *νεφρός* (*nephros*) = a cloud, and *φίλω* (*philo*) = to love.] The name of a familiar spirit who plays a principal part in Marlowe's play of Dr. Faustus.

mē-phit-ic, * mē-phit-ick, mē-phit-ic-al, a. [Lat. *nephiticus*, from *nephitis* =

nephitis (q.v.): Fr. *nephitique*; Ital. & Sp. *nephítico*.] Of or pertaining to nephitis; offensive to the smell; foul, noxious, poisonous, pestilential; destructive of life.

mē-phī-tis, s. [Lat.]

1. *Med. Lat.*: A foul, offensive, noxious, or pestilential exhalation from decomposing substances, filth, &c.

2. *Zool.*: Skunk, an American genus of arboreal mammals, family Mephitidae (q.v.), remarkable for the power of ejecting a fetid liquid from the anal glands. *M. mephitis* is the Common Skunk; *M. putorius*, the Little Striped Skunk (q.v.); and the *M. mayotata*, the White-backed Skunk (q.v.). [SKUNK.]

mēph-it-ism, s. [Eng. *mephitis*(*is*); -ism.] The same as MERPHITIS, 1.

mē-rā-cious, a. [Lat. *mercans* = pure, unmixed, from *mercus* = pure.] Free from admixture or adulteration, pure; hence, strong, laxative.

Mēr-āk, s. [Corrupted Arabic.]

Astron.: A fixed star, *β Ursæ Majoris*.

*** mēr-ca-ble, a.** [Lat. *mercabilis*, from *mercator* = to trade; *merc* (genit. *mercis*) = merchandise.] That may or can be bought or sold.

mēr-can-til, * mēr-can-til, a. [Fr. *mercantile*, from Low Lat. *mercantilis* = mercantile, from Lat. *mercans* (genit. *mercantis*), plur. of *mercator* = to trade; Sp. & Port. *mercantil*; Ital. *mercantile*.] Pertaining to or connected with merchants and trade; relating to trade and commerce, or the buying and selling of goods; commercial.

"An adept in the mystery of mercantile politics."—*Macaulay*: *Hist. Eng.*, ch. vi.

*** mēr-can-til-ism, s.** [Eng. *mercantile*(*is*); -ism.] The same as MERCANTILITY (q.v.).

"All led astray by the sophism of mercantileism."—*Contemporary Review*, Nov., 1881, p. 193.

*** mēr-can-til-ist, a.** [Eng. *mercantile*(*is*); -ist.] Devoted to mercantile affairs.

"The mercantile reasoners have deduced erroneous conclusions."—*Contemporary Review*, Nov., 1881, p. 193.

*** mēr-can-til-i-tŷ, s.** [Eng. *mercantile*(*is*); -ity.] Mercantile spirit.

"He was all on fire with mercantility."—*Rowe*: *Character & Health*, ch. lxxvi.

mēr-cāp-tān, s. [Lat. *mercurium captan*(*is*) = absorbing mercury.]

Chem. (Pl.): $C_{12}H_{22}S_{11}$. Thio-alcohols, the sulphurates of the alcohol radicals, that is, where the oxygen is replaced by sulphur—e.g., $C_{12}H_{22}S_{11}$; S = the mercaptan of ethylic alcohol.

mēr-cāp-tāc, s. [Eng. *mercaptan*(*is*); plur. suff. -ides.]

Chem. (Pl.): Compounds formed by the substitution of metals for hydrogens in the mercaptans—e.g., C_2H_5Na ; S = sodic ethyl mercaptide.

mēr-cāp-tō-ic, a. [Eng., &c. *mercaptan*(*is*); *o* connective, and suff. -ic.] Contained in or derived from mercaptan.

mercaptioic acid, s.

Chem.: A name given by Croissant and Bretonniere to the sulphuretted dyes obtained by the action of metallic sulphides, or of sulphur and an alkali, on carbohydrates, gum-resins, &c.

*** mēr-cat, s.** [Lat. *mercatus*, from *mercator* = to trade.] Market, trade.

*** mēr-ca-tante, s.** [Ital.] A foreign trader. (*Shallop*: *Tammy of the Shaver*, iv. 2.)

*** mēr-ca-tivo, a.** [Eng. *mercat*; -ive.] Of or pertaining to trade.

Mēr-cā-tōr, s. (See the compound.)

Mercator's chart or projection, s. A mode of projection or representation of a portion of the surface of the earth upon a plane, in which the meridians are represented by equi-distant parallel straight lines, and the parallels of latitude by straight lines perpendicular to them. This chart is particularly adapted to the purposes of navigation, inasmuch as the plot of a ship's course, or a rhumb line between two points upon it, is represented by a straight line. On this account, as well as on account of the facilities which it affords for making calculations neces-

Chem.: N₂H₄. Mercurammonium. Not known in the free state. The hydrated oxide, N₂H₄(HO)₂, is prepared by pouring a solution of ammonia upon yellow mercuric oxide. It forms a yellowish-white powder, yielding definite salts with the mineral acids.

mēr cūr-ām mō-nī-ūm, s. [Eng. mercur(y), and ammonium.] [MERCURAMMONIUM.]

mēr-cūr-ī-āl, a. & s. [Lat. mercurialis, from mercurius = mercury (q.v.); Fr. mercurial; Sp. mercurial; Ital. mercuriale.]

A. As adjective:

1. Of or pertaining to Mercury; having the qualities ascribed to Mercury. An astrological word introduced when men believed that those who were born while the planet Mercury was in the ascendant would necessarily be light-hearted; sprightly, gay, flighty, changeable, fickle.

"Figgot being a more forward and mercurial man got glory of it among most scholars."—Wood, *Fests Ozon*, vol. II.

2. Pertaining to Mercury, regarded as the god of trade; hence, pertaining to trade or money-making.

"Thus tucking, lying evasion, with several other such like curial virtues, are a sort of properties pertaining to the mercer's trade, as well as to the mercurial profession."—P. Whitehead *Gynasiod*, bk. I. (Note.)

3. Of or pertaining to mercury or quicksilver; containing or consisting of quicksilver.

4. Caused by quicksilver: as, a mercurial disease.

B. As substantive:

1. A person of a mercurial temperament; one who is sprightly, changeable, or fickle.

2. A preparation of mercury, used as a drug.

mercurial-bath, s. A bath used in the pneumatic trough in collecting such gases as are largely absorbed by water.

mercurial-finger, s. *Astrol.*: The little finger. (See extract.)

"The thumb in chironomy we give to Venus, the forefinger to Jove, the middle to Saturn, the ring to Sol, the least to Mercury."—Ben Jonson *Alchemist*, l. 2.

mercurial-gauge, s. The pressure-gauge in which the steam acts upon a body of mercury, and raises a column of it in a glass tube.

mercurial-level, s. A form of level in which mercury is used.

mercurial-ointment, s.

Pharm.: An ointment made of mercury, lard, and suet, rubbed thoroughly together. Called also Blue Ointment.

mercurial-palsy, mercurial-tremors, s.

Pathol.: A kind of palsy produced by the abuse of mercury.

mercurial-pendulum, s. A compensation pendulum invented by Graham of London, 1700. A jar of mercury is used for the bob or weight. As the pendulum expands, the mercury rises, and by the rise of its centre of gravity compensates for the inequality caused by the expansion of the pendulum. [PENDULUM.]

mercurial-pill, s. [BLUE-FILL.]

mercurial-plaster, s.

Pharm.: A plaster made of mercury, olive-oil, sulphur, and lead-plaster.

mercurial-pump, s. A pump invented by Haskins in 1720, in which a column of mercury acts as plunger and piston packing.

mercurial-suppository, s. [SUFPOSITORY.]

mercurial-thermometer, s. A thermometer tube filled with mercury, in contradistinction to a spirit, air, or metallic thermometer.

mercurial vapour-bath, s. [VAPOUR-BATH.]

mēr-cūr-ī-āl inc, s. [Mod. Lat. mercurialis; Eng. suff. -ine (Chem.).]

Chem.: A volatile base obtained, together with ammonia, by distilling the seeds of *Mercurialis perennis* with lime or potash and water. According to E. Schmidt, this base is identical with methylamine.

mēr cūr-ī-ā-lis, s. [Lat., as adj. = pertaining to mercury; as subst., the Dog's Mercury.]

see def. So called because Mercury is said to have discovered its virtues.]

Bot.: Dog's Mercury; a genus of Euphorbiaceæ, tribe Acalyphææ. Flowers monoecious or dioecious; males in interrupted axillary spikes; females clustered, spiked or racemose. Sepals, three; stamens, eight to twenty, generally nine to twelve. Styles, two, simple; ovary and capsule two-celled, cells are seeded. Known species, six; from the Eastern Hemisphere. Two are British: *Mercurialis perennis* and *M. annua*. The former is prostrate, has a simple stem, and flowers in March and April. The latter is nearly glabrous, with the stem branched, and flowers from July to October. The leaves of *M. annua* are eaten as a potherb.

mēr-cūr-ī-āl-ist, s. [Eng. mercurial; -ist.]

1. A person of a mercurial temperament; one who is sprightly, tickle, and changeable.

"Mercurialists are solitary, much in contemplation, subtle, poets, philosophers, and musing much about such matters."—Barton *Annals of Medicine*, p. 130.

2. A physician who is much given to the use of mercury in his treatment of diseases.

mēr-cūr-ī-āl-īzē, v.l. & t. [Eng. mercurial; -ize.]

A. *Intrans.*: To act capriciously; to be capricious or changeable.

B. *Transitive.*:

1. *Med.*: To treat or affect with mercury.

2. *Pholog.*: To treat with mercury; to expose to the vapours of mercury.

mēr-cūr-ī-āl-ly, adv. [Eng. mercurial; -ly.] In a mercurial manner.

mēr-cūr-ic, a. [Eng. mercur(y); -ic.] Contained in or derived from mercury.

mercuric-chloride, s.

Chem.: HgCl₂. Corrosive sublimate. It is prepared by decomposing mercuric-sulphate with hydrochloric acid. It melts at 265°, boils at 292, and its vapour condenses in crystalline needles or octahedra. Alcohol and ether dissolve it readily. It is a violent, acrid poison, the best antidote being white of egg.

mercuric-cyanide, s.

Chem.: Hg(CN)₂. Prepared by dissolving yellow mercuric oxide in aqueous hydrocyanic acid, the former being in slight excess. It crystallizes in brilliant quadratic prisms, slightly soluble in water, and is very poisonous.

mercuric-ethide, s. [MERCURY-DI-ETHYL.]

mercuric-fulminate, s. [FULMINATE.]

mercuric-iodide, s.

Chem.: HgI₂. A brilliant red, crystalline powder, prepared by triturating mercury with iodine. It is insoluble in water, but soluble in alcohol and in solutions of potassic iodide or of mercuric chloride, yielding colourless liquids.

mercuric-oxide, s.

Chem.: HgO. Red oxide of mercury. Obtained by decomposing the nitrate by heat. It is slightly soluble in water, and dissolves in fused potassic hydrate. It is highly poisonous.

mercuric sulphide, s. [VERMILION.]

mēr-cū-ried, *pa. pur. or a.* [MERCURY, v.]

mēr-cūr-ī-fī cā-tion, s. [MERCURY] The act of mixing with mercury.

"It remains, that I perform the promise I made, of adding the ways of *mercurification* (as chymists speak above referred to)."—Boyle *Works*, I. 643.

mēr-cūr-ī-fy, v. t. [Eng. mercury; -fy.]

1. To obtain mercury from, as from metallic minerals, by the application of intense heat, which expels the mercury in fumes, which are afterwards condensed.

"A part only of the metal is mercurified."—Boyle *Works*, I. 641.

2. To treat or combine with mercury; to mercurialize.

mēr-cūr-ī-ōūs, a. [Eng. mercury; -ous.] The same as MERCURIAL (q.v.).

mēr-cūr-ī-ōūs nēss, s. [Eng. mercurialis; -ness.] The quality or state of being mercurial.

"A chapin with wings, to denote the mercuriousness of this messenger."—Fuller. *Worthies*; Kent.

mēr cū rişm, s. [Eng. mercur(y); -ism.] A communication of news or intelligence; an announcement, a communication.

mēr-cūr-ī-ūs, s. [Lat.]

Chem.: This term was applied by the alchemists to all volatile substances. Thus quicksilver was called *Mercurius volatilis*, and alcohol, *M. combustibilis*. At present it is only applied to quicksilver, e.g., *M. dulcis* & synonymous with alcohol.

mēr cū rōs ām mō-nī-ūm, s. [Eng. mercurialis; and ammonium.]

Chem.: Hg, H₂, N₂. Not known in the free state. The chloride of this base is the black substance formed when dry calomel is exposed to the action of ammoniac gas.

mēr-cū-rouūs, a. [Eng. mercur(y); -ous.] (See the compounds.)

mercurous chloride, s.

Chem.: Hg₂Cl₂, calomel. It may be obtained by precipitating a solution of mercurous nitrate with one of common salt. It crystallizes in quadrilateral prisms, and is tasteless and insoluble in water. It is of great importance in medicine.

mercurous oxide, s.

Chem.: Hg₂O. Prepared by adding caustic potash to mercurous nitrate. It is a dark gray, nearly black powder, insoluble in water, and slowly decomposed by the action of light into red oxide and metallic mercury.

mēr-cū-rō-vin-yl, s. [Eng. mercur(y); a connect., and vinyl (q.v.).] (See the compound.)

mercurovinyl oxide, s. [MERCURIO-ETHYL-OXIDE.]

mēr-cū rŷ, mēr-cū-ric, s. [Norm. Fr. mercurie (Fr. mercur), from Lat. Mercurius = Mercury.]

I. *Ordinary Language.*:

1. *Lit.*: In the same sense as II.

2. *Figuratively.*:

* (1) A messenger, a courier, an intelligenceer.

"Following the mirror of all Christian kings, With winged heels, as English *he couriers*."

—*Shakspeare Henry 1*, l. 13. (King's.)

* (2) A common name for a newspaper or periodical publication.

"No allusion to it is to be found in the *Southey Mercuries*."—*Academy Hist. Eng.*, ch. XXI.

* (3) One who carries about newspapers for sale.

(4) Liveliness of temperament; spirit, volatility, sprightfulness, fickleness, changeableness.

II. *Technically.*:

Astron.: The planet nearest the sun, unless indeed it be established that the hypothetical Vulcan really exists. Its stationary points are from 15 to 20 degrees of longitude from the sun, hence it rises and sets not far from the time when the sun does so. The light of the sun and the haze of the horizon combine to render observation of the planet difficult; hence, as Sir John Herschel says, we can see little more of the planet than that it is round, and exhibits phases. It varies in brightness from 15° to 12° of the celestial circle or vault. Hence it is sometimes telescopic, and at other times visible to the naked eye, being as bright as a star of the second magnitude. It was known to the ancients. Its diameter is about 3,200 miles; its mass about 1/4th that of the earth; its sidereal period 87 days, 16 hours, 49 minutes, 50 seconds. It is seen at its greatest brightness as an evening star, at average intervals of about 116 days. Its average distance from the sun is 35,500,000 miles. Its greatest and least distances differ nearly thirteen million miles. It moves in its orbit about 109,500 miles an hour, against 68,049 performed in the same time by the earth. The orbit of Mercury is remarkable for its extreme eccentricity, the distance from the sun varying from about 30,000,000 to 43,000,000 millions of miles. The effect of this would be that, supposing there were any inhabitants of Mercury, when a period of about six weeks, the sun would be in apparent size, and give about double the quantity of light and heat. The planet is supposed to rotate on its axis in 24h. 3m. 28s. Transits of Mercury over the sun's disc occur like those of Venus, but more frequently; the

mercury diethyl, s.

Chem.: Hg²(C₂H₅)₂. Mercuric ethide. Pre- pared like the methyl compound, and possessing similar properties. It boils at 139, and has a sp. gr. of 2.14; at 200 its vapour decomposes into mercury and butane.

mercury di-isoamyl, s.

Chem.: Hg²(C₇H₁₄)₂. A colourless liquid, obtained by gently heating isoamyl iodide, acetate ether, and sodium amalgam. Sp. gr. 1.90, insoluble in water, giving with a solution of isomne, crystalline plates of mercury iso- amyl iodide, Hg₂(C₇H₁₄I)₂.

mercury dimethyl, s.

Chem.: Hg²(CH₃)₂. A colourless retractive liquid, prepared by adding sodium amalgam to a mixture of methylic iodide and ethylic acetate. It is immiscible with water, boils at 97, and has a sp. gr. 4.069 at ordinary temperature. It is a solvent for caoutchouc, resin, and phosphorus.

mercury dinaphthyl, s.

Chem.: Hg²(C₁₀H₈)₂. A crystalline substance, prepared by boiling a mixture of bromo- naphthalene and benzene with sodium amal- gam. It melts at 217, is insoluble in water, difficultly soluble in hot alcohol, but very soluble in chloroform.

mercury diphenyl, s.

Chem.: C₆H₅Hg²C₆H₅. A crystalline body, obtained by heating bromo-benzene with sodium amalgam and a small quantity of ethylic acetate. It becomes yellow on exposure to light, melts at 129, and sublimes unchanged. It is insoluble in water, slightly soluble in alcohol and ether, but very soluble in benzene.

mercury goose foot, s.

Bot.: *Chenopodium Bonus Henricus*. It has hastate-triangular leaves, and compound and axillary spikes of flowers. The leaves are used for spinach. Called also Good King Henry.

mercury iodide, s.

Min.: The same as COCCINITE (q.v.).

mercury selenide, s.

Min.: The same as THEMANNITE (q.v.).

mercury sulphide, s.

Min.: The same as CINNABAR and META- CINNABARITE (q.v.).

mër eü rý, p.t. [MERCURY, s.] To treat with a preparation of mercury.

"They are as tender as a lady's face new mercuried." —Ben Jonson: *Cynthia's Revels*, I, 1.

mër cý, mer ci, mer cie, s. [Fr. *merci*, from Lat. *mercedem*, accus. of *merces* (genit. *mercedis*) = reward, pay, pity, mercy, from *merx* (genit. *mercedis*) = merchandise, traffic, from *merco* = to gain, to buy, to merit; Sp. *merced*; Port. *merço*; Ital. *mercé*.]

1. That benevolence or kindness of heart or disposition which induces a person to overlook injuries, or to treat an offender with greater forbearance and clemency than he deserves; a disposition to temper justice with mercy; tenderness of heart, mildness, compassion. "There's mercy in every place." —*Compter: Alexander Selkirk*.

2. An act or exercise of kindness, compassion, or clemency; a blessing; a kind or meritorious act proceeding from Providence. "E'en a judgment, making way for thee, seems in their eyes a mercy for thy sake." —*Compter: Task*, ii, 132.

3. Pardon, forgiveness. "Every year we have a mercy" —*Shakspeare: Measure for Measure*, iii, 1.

4. Pity, compassion. "They cried the more, saying, Have mercy upon us, O Lord, thou son of David." —*Bible: Ps. lxxi*.

5. Power of acting at pleasure, discretion, liberty; unrestrained exercise of will or authority. "Thee's friends' life lies in the mercy of the duke." —*Shakspeare: Merchant of Venice*, iv, 1.

• (1) *To be in mercy*: To be under leniency. "And the said William Kent being suddenly called to before it is considered, that the said Willibrod and his pledges of presentment, to wit, John Doe and Richard Roe, be in mercy for his false complaint." —*Blackstone: Commentaries*, iii, App. No. 1, p. 6.

mercury amalgam, s.

1. *Mercurius* (q.v.): The compounds formed by the union of mercury with the other metals. The solid amalgams appear to be definite compounds, whilst the liquid amalgams may be regarded in many instances as solutions of definite compounds in excess of mercury. The most useful and interesting are those of gold, silver, and zinc.

"They are as tender as a lady's face new mercuried." —Ben Jonson: *Cynthia's Revels*, I, 1.

mër cý, mer ci, mer cie, s. [Fr. *merci*, from Lat. *mercedem*, accus. of *merces* (genit. *mercedis*) = reward, pay, pity, mercy, from *merx* (genit. *mercedis*) = merchandise, traffic, from *merco* = to gain, to buy, to merit; Sp. *merced*; Port. *merço*; Ital. *mercé*.]

1. That benevolence or kindness of heart or disposition which induces a person to overlook injuries, or to treat an offender with greater forbearance and clemency than he deserves; a disposition to temper justice with mercy; tenderness of heart, mildness, com- passion. "There's mercy in every place." —*Compter: Alexander Selkirk*.

2. An act or exercise of kindness, compassion, or clemency; a blessing; a kind or meritorious act proceeding from Providence. "E'en a judgment, making way for thee, seems in their eyes a mercy for thy sake." —*Compter: Task*, ii, 132.

3. Pardon, forgiveness. "Every year we have a mercy" —*Shakspeare: Measure for Measure*, iii, 1.

4. Pity, compassion. "They cried the more, saying, Have mercy upon us, O Lord, thou son of David." —*Bible: Ps. lxxi*.

5. Power of acting at pleasure, discretion, liberty; unrestrained exercise of will or authority. "Thee's friends' life lies in the mercy of the duke." —*Shakspeare: Merchant of Venice*, iv, 1.

• (1) *To be in mercy*: To be under leniency. "And the said William Kent being suddenly called to before it is considered, that the said Willibrod and his pledges of presentment, to wit, John Doe and Richard Roe, be in mercy for his false complaint." —*Blackstone: Commentaries*, iii, App. No. 1, p. 6.

(2) *To take to mercy*: To forgive, on pay- ment of a fine or penalty.

"That they of Ipre shalbe pay to the kyng xi thousand frankes, towards his charges coming thither: to the which they of Ipre made no refuse, but were right joyful therof. Thus they of Ipre were taken to mercy." —*Historia: Frouart; Cronicle*, vol. iii, ch. cxxvii.

(3) *Sisters of mercy*: [SISTERHOOD.]

mercy-seat, *merci seate, s.

1. Lit. & Jewish Antiq.: Heb. מִסְפָּה (kap-pôreth); in Arabic from مِسْفَر (mishfar) = to cover in the literal sense, or مِسْفَر (kipper) = to cover figuratively, specially to cover sin. Hence, the Septuagint renders the word ἱλαστήριον (hilastērion) = that which is propitiatory or offered in propitiation; and the Vulgate propitiatorium = an atonement, a propitiation. The golden covering placed upon the ark of the testimony. Whether it was the actual lid of that ark, or a tablet placed above the lid, is doubtful. Like the ark, it was two-and-a-half cubits (3 feet 3 inches) long, and one-and-a-half (2 feet 3 inches) broad. At each end was a cherub, the two looking face to face, and covering the mercy-seat with their wings. The tabernacle was put in the most holy place of the tabernacle, and afterwards of the temple (Exod. xxv, 17-22, xxvi, 34, xxxvii, 6-9, xl, 20; 1 Chron. xxviii, 11). On the great day of the Atonement, Aaron, the high priest, cast incense on coal (charcoal) burning in a censer, and the cloud of sweet-scented spices which thence arose covered the mercy-seat, God, whose special dwelling when he visited the place was between the cherubims (Psalms lxxx, 1), appearing in the cloud (Lev. xvi, 12, 13). The mercy-seat was also sprinkled seven times with the blood of a bullock and a goat, offered as a sin-offering (Lev. xvi, 15). Jehovah spoke to Moses from off the mercy-seat (Num. vii, 89).

"And over it the cherubims of glory shadowing the mercy-seat; of which we cannot now speak particularly." —*Hebrews ix*, 5.

2. Fig.: In the New Testament the entry of the high priest into the most holy place is made symbolical of the entry of Christ into heaven, to pursue His work of intercession, and of the approach of the Christian to God by the blood of Jesus (Heb. x, 19-22), who, in devotional language, an approach to the mercy-seat signifies an approach to God in prayer.

"Jesus: where'er thy people meet, These they behold thy mercy-seat." —*Compter: Hymn: Hymns*, xxvi.

*mercy-stock, s. A propitiation.

"Our saviour, our Reason, our Spokesman, our Mercy-stock." —*Hudibras*: *Works*, p. 152.

*mercy-stroke, s. The death-blow, as putting an end to pain.

mèrd, *mard, *mer da, s. [Fr. *merde*, from Lat. *merdo*.] Ordure, dung.

"Bure of th' head, burst clouds, chalk, merda, and clay." —*Ben Jonson: Alchemist*, ii, 3.

mère, *mèer, a. [Lat. *merus* = pure; O. Fr. *merc*.]

1. Pure, unadulterated.

"Our wine is here mingled with water and with myth; there [in the life to come] it is mere and un-mixed." —*Jos. Taylor: The Worthing Communion*.

2. Genuine, free from admixture.

"But now our joys are mere and unmixt; for that we may do our duty and have our reward at once." —*Jos. Taylor: Tale of Conscience*. [EIGHT, 164.]

3. Such and no more; this or that alone; apart from anything else; sole, alone, simple.

"He well knew that mere names exercise a mighty influence on the public mind." —*Macaulay: Hist. Eng.*, ch. xxvii.

4. Absolute, unqualified, entire; in every respect, downright.

"This is mere falsehood." —*Shakspeare: A Winter's Tale*, iii, 2.

mere right, s.

Law: The right of property without posses- sion.

mère (1), s. [A.S. *mere*; cogn. with Dut. *meer*; Engl. *mere*; Goth. *meer*; O. H. Ger. *meeri*; High Ger. *meer*; Russ. *meer*; Lith. *meris*; Wel. *meir*; Gael. & Ir. *meir*, Lat. *mare*.] A lake, a pool.

mère (2), *meare, *mèer, *meere, s. [A.S. *meare*, *meare*; Dut. *meer*; Engl. *meere*.] A boundary, a border; a bound by-stone.

"What mound or stately mères offend to my sight?" —*Shakspeare: The Merry Wives of Windsor*, I, 1.

*mère, *mear, p.t. [MERE (2), s.] To bound, to limit, to divide.

"That have honour of the Latin name, Which mæred her rule with Arax and Byze." —*Spenser: Faerie Queene*, xiii.

* **mèred**, *a.* [MERE, *a.*] Entire, sole, only. "At such a point. When half to half the world opposed, he being The mered question." *Shakspear: Antony & Cleopatra*, III. 11.

mère-ly, **mee-re-ly**, **mcor-ly**, *adv.* [Eng. *mere*, *a.*; *ly*.] Purely, only, solely, simply. It separates that which it designates and qualifies from everything else. But in so doing, the chief or most emphatic reference may be made either to that which is included, or to that which is excluded. In modern English it is always to the latter. In Shakspear's day the other reference was more common, that, namely, to which was included—

(1) Merely, referring to what is included rather than what is excluded; absolutely, entirely, quite, utterly.

"Eye out! to fly: 'tis an unweeded garden, That grows to seed; things rank and gross in nature, Possess it merely." *Shakspear: Hamlet*, I. 2.

(2) Solely, only; for this and nothing more; in this and no other way.

"Never to remove an anomaly merely because it is an anomaly."—*Macaulay: Hist. Eng.*, ch. XI.

mër-ên-chÿ-ma, *s.* [Gr. *μέρος* (*meros*) = a part, and *εἴχμα* (*eichuma*) = infusion.]

Bot.: Imperfect cellular tissue found abundantly in intercellular spaces. Professor Morren makes it a subdivision of Parenchyma. Meyer gave the name to tissue with ellipsoidal or spheroidal cells. More commonly known as Lax Parenchyma.

mër-ên-chÿm-a-tòus, *a.* [Eng., &c., *merenchyma*; *t* comm., and suff. *-ous*.]

Bot.: Having the structure or appearance of merenchyma (q. v.).

* **mères-man**, *s.* [Eng. *mere* (2), *s.*; and *man*.] One who has charge of or points out boundaries; a measurer.

mère stone, **mce-re stone**, *s.* [Eng. *mere* (2), *s.*, and *stone*.] A boundary-stone; a landmark.

"The mischief of a *meeresstone* is to blame. But it is the unjust judge, that is the capital remover of land marks, when he defineth a misse of lands and property."—*Bacon: Essays: Of Judicature*.

* **mër-ê-tri-cian**, *a.* [Lat. *meretricius* = meretricious (q. v.).] Meretricious.

"Take from Luhan commerce meretricianamour."—*T. Boccac: Decamer.*, III. 263.

mër-ê-tri-cious, *a.* [Lat. *meretricios* = pertaining to a courtesan, from *meretrix* (genit. *meretricis*) = a courtesan, from *mero* = to gain, to earn.]

1. Of or pertaining to courtesans or prostitutes; such as is practised by harlots.

"Her deceitful and meretricious traffick with all the nations of the world."—*Sp. Hall: Hard Texts: Isaiah* XLVII. 17.

2. False; alluring by false show; worn or assumed for show; unreal, tawdry, gaudy, showy; extremely bad in taste.

"No meretricious grace to beguile, No clustering ornaments to clog the pile." *Cowper: Truth*, 23.

mër-ê-tri-cious-ly, *adv.* [Eng. *meretricious*; *ly*.] In a meretricious manner; with false show; tawdriily, gaudily, against good taste.

mër-ê-tri-cious-ness, *s.* [Eng. *meretricious*; *-ness*.] The quality or state of being meretricious; false show, tawdriness, showiness.

* **mër-ê-trik**, *a.* [Lat. *meretricius* = meretricious (q. v.).] Harlot, meretricious.

"And therefore, thinke it impossible to be any knaue or errors in so holy fathers with their meretrici mother."—*Joye: Exposition of Iudiel*, ch. XI.

mër-ga-nèt-ta, *s.* [Mod. Lat., from Lat. *mergus* = a diver, and Gr. *γάμμα* (*gamma*) = a duck.]

Ornith.: Torrent-duck; a peculiar genus of Anatidae, restricted to the Andes of South America, from Colombia to Chili. These species are known: *Merganetta verreauxi*, *M. andrucci*, and *M. leucogaster*. Mr. Bridges says of the first species, "It swims and dives against the flow of the Chilean mountain-torrents with a rapidity truly astonishing." (*Proc. Zool. Soc.*, 1874, p. 407.)

mër-ga-nèt-ti-næ, *s. pl.* [Mod. Lat. *mergunculæ* (q.); Lat. fem. pl. adj. suff. *-inæ*.]

Ornith.: A sub-family of Anatidae. It contains but a single genus, *Merganetta* (q. v.).

mër-gân-sër, *s.* [Lat. *mergas*] = a diver, and *anser* = a goose.]

Ornithology: 1. A genus erected by Leach for his *Merganser venter*, the *Mergus acropus* of Linnaeus.

2. A popular name for any member of the Linnaean genus *Mergus*, especially for *Mergus acropus*, the Goosander (q. v.).

mèrgè, *v.t. & i.* [Lat. *mergo* = to dip.]

A. Trans.: To sink; to drown; to cause to be swallowed up or absorbed. (Only used figuratively.)

"Whenever a greater estate and a less coincide and meet in one and the same point, without any intermediate estate, the less is immediately annihilated; or in the last phrase is said to be merged, that is, sunk or drowned in the greater."—*Blackstone Comment.*, bk. II, ch. XI.

B. Intrans.: To be absorbed or swallowed up; to be lost or sunk.

† **mër-gèl-lüs**, *s.* [Mod. Lat., dimin. of Lat. *mergus* (q. v.).]

Ornith.: In some classifications a genus of the sub-family Merginae. It contains but one species, the Snew, *Mergellus* (*Mergus*) *albellus*.

mèrg-ër, *s.* [Eng. *merg(e)*; *-er*.]

1. *Oral Lang.*: One who or that which merges.

2. *Law*: (See extract.)

"*Merge* is the act of law, and is the annihilation of one estate in another. Its effect is to consolidate two estates, and to conform them into one estate. After *merge*, the only subsisting estate continues precisely of the same quantity and extent of ownership as it was before the accession of the estate which is merged. It is a fundamental rule that there cannot be any *merge* unless there be a remainder or reversion in which the particular estate may merge."—*Mogheve: On Merge*, pt. I, ch. 1.

mèrg-î-næ, *s. pl.* [Lat. *mergus*]; fem. pl. adj. suff. *-inæ*.]

Ornith.: A sub-family of Anatidae. Prince Bonaparte makes it include *Mergus albellus*, erected into a genera, and Leach's genus *Merganser*. According to the *Brit. Mus. Cat.* (Gray) it comprises the Linnaean genus *Merganser*, and *Mergellus* (q. v.).

mër-gü-lüs, *s.* [Mod. Lat., dimin. of Lat. *mergus* (q. v.).]

Ornith.: A genus of Anatidae, erected by Vieillot for the reception of *Mergulus arcticus*, the Little Auk (q. v.). Bill shorter than the head, thick, broader than high at base, upper mandible indistinctly grooved, tips of both notched; commissure arched; nostrils lateral, round, at base of bill; legs, short and abdominal; three webbed toes; wings and tail short.

mër-güs, *s.* [Lat. = a diver, a water-fowl; *mergo* = to dip, to plunge into.]

Ichthy.: A genus of natatorial birds, family Anatidae. Bill about as long as the head, slender, rather pointed; base large; mandibles serrated, point of upper curved; nostrils lateral; legs short; three toes in front webbed, hind toe with pendent lobe; wings of moderate size, first and second quill feathers nearly equal in length. Wallace (*Geog. Dist. Animals*, II. 364) defines the range of the genus in space as: Palearctic and Nearctic regions, Brazil, and the Auckland Islands. *Mergus albellus* is the Snew, *M. cucullatus* the Hooded Merganser, *M. serrator* the Red-breasted Merganser, and *M. merganser* the Goosander. (Barrell.)

mër-i-ân-dra, *s.* [Gr. *μερίς* (*meris*) = a part, a division, and *άνδρ* (*andr*), genit. *άνδρός* (*andros*) = a man, a stamen.]

Bot.: The typical genus of the family Meriandriaceæ (q. v.). *M. strobilifera* is carnivorous and antispasmodic. An infusion of the leaves is given in India in apoplexy and sore throat.

mër-i-ân-dri-dæ, *s. pl.* [Mod. Lat. *meriandriæ* (q.); Lat. fem. pl. adj. suff. *-idæ*.]

Bot.: A family of Labiales, tribe Mentheæ.

mër-i-â-ni-a, *s.* [Named after M. de Merian, who wrote on the insects of Surinam.]

Bot.: Jamaica Rose; a genus of Melastomaceæ, tribe Melastomeæ. *Meriania hawaiiensis* is the White-flowered, and *M. purpuræ* the Purple-flowered Jamaica Rose.

mër-i-carp, *s.* [Gr. *μερίς* (*meris*) = a part, and *καρπος* (*karpos*) = fruit.]

Botany: 1. The name given by De Candolle to the

half of a cremocarp, of an umbelliferous fruit. Mericarps are indehiscent.

2. The distinct pieces into which cremiferous siliqua or siliqua splits.

mèr'id-i-ân, *a. & s.* [Fr. *méridien*, from Lat. *meridians* = pertaining to mid-day; *meridies* (for *meridies*) = mid-day; *meridies* = middle, and *dies* = a day; Ital. & Sp. *meridiano*.]

A. As adjective: 1. *Ordinary Language*:

(1) Literally:

(1) Of or pertaining to mid-day or the meridian; noon-day.

"And had a dawdling sky display The blaze of a meridian day." *Comper: Poetical Epistle to Lady Anne*.

(2) Of or pertaining to the magnetic meridian.

2. *Figuratively*:

(1) Pertaining to or at the highest point or culmination; pertaining to the point or period of highest splendour; as, *meridian glory*.

"(2) Complete, thorough. "Out of the mouth of a meridian (Madin)."—*North: Travels*, p. 186.

II. Geol.: Noon-day; in allusion to the mid day date of the strata to which it is applied. A term appropriated to certain middle formations of the Appalachian Palæozoic system, which are called in the New York Survey, the Oriskany Sandstone, and which appear to be on the horizon of the Lower Ludlow rocks of England. The greatest thickness of this sandstone is less than 200 feet. Its distinctive fossils are large brachiopodous bivalves. (*Prog. H. D. Rogers: Geology of Pennsylvania*.)

B. As substantive:

1. *Ordinary Language*:

(1) Literally:

(1) Mid-day; noon-day.

(2) In the same sense as II. 2.

2. *Figuratively*:

(1) The highest point; the culmination; the point or period of highest splendour.

"From that full meridian of my glory I haste now to my setting." *Shakspear: Henry VIII.*, In 2.

(2) The special circumstances, requirements, conditions, or capabilities of; as of a country, a district, a sphere of life, &c.

"All other knowledge merely serves the concerns of this life, and is fitted to the meridian thereof."—*Hale: Orig. of Manhood*.

II. Technically:

1. *Astron.*: [*Celestial Meridian*].

2. *Geog.*: [*Terrestrial Meridian*].

(1) *Celestial Meridian*: The great circle marked out on the sphere by the prolongation of the terrestrial meridian passing through the spot where the observer stands. It is, as apparently the case, the earth be at rest, then the celestial meridian becomes a fixed circle, across which all the stars pass in their diurnal courses from East to West. If, as is really the case, the stars are at rest, and the earth rotate, then the spectator's meridian sweeps daily across the plane from West to East.

(2) *First meridian*: That meridian from which all others are reckoned, counting eastward or westward, and from which also longitudes are reckoned.

(3) *Magnetic Meridian*: [*MAGNETIC*].

(4) *Meridian altitude of the sun or of a star*: Its altitude when on the meridian of the place where it is observed.

(5) *Meridian distance of a point*: The distance from the point to some assumed meridian, generally the one drawn through the extreme east or west point of the survey.

(6) *Meridian line on a dial*: The same as the twelve o'clock hour line.

(7) *Meridian of a globe*: The brazen circle in which it turns and by which it is supported; also meridian-lines drawn on the globe itself, generally at a distance of 15°.

(8) *Terrestrial meridian*: The terrestrial meridian of any place on the earth's surface is a great circle passing through the two poles and the place.

"These cases are frequently found on the sea-shore, and are called mermaid's purses, &c."—Yarrell, *British Fishes*.

*mēr-mān, s. [A.S. *mere* = a mere, a lake, and Eng. *man*.] The male corresponding to the mermaid (q.v.): a sea-man, with the tail of a fish instead of legs.

mēr-mīs, s. [Gr. *μέρμις* (*mermis*) = a cord, a string.]

Zool.: A nematoid genus of worms, some of the species of which are parasitic in insects. *Mermis nigrescens* emigrates *en masse* out of insects in hot weather, and being found on the ground in great numbers give rise to the popular belief that there has been a shower of worms. The larvæ of *M. albicans* especially resort to caterpillars, to the larvæ of other insects, or even to a mollusc, *Succinea amphibola*.

mēr-ō-blast, s. [Gr. *μέρος* (*meros*) = a part, and *βλαστός* (*blastos*) = a sprout, shoot, sucker.]

Biol.: An ovum only a portion of which is directly germinal. [MEROBlastic.]

mēr-ō-blās-tic, a. [Eng. *meroblast*; -ic.] A term applied to the ova of oviparous animals, in which the yolk is chiefly nutritive and in a small part only formative.

"So also it has been customary to distinguish such ova as those of birds by the term *meroblastic*, as indicating that a part only of the yolk is directly or practically germinal or engaged in embryonic development."—Quain, *Anatomy* (1882), li. 732.

mēr-ō-čēle, s. [Gr. *μῆρος* (*mēros*) = the thigh, and *κήλη* (*kēlē*) = a tumour.]

Surg.: Hernia of the thigh; protrusion of the intestines at the upper part of the thigh.

Mēr-ō-pē, s. [Lat., from Gr. *Μερόπη* (*Meropē*), q.v.]

1. Astron.: The smallest and least bright of the Pleiades.

2. *Class. Mythol.*: One of the Pleiades, who were regarded as daughters of Atlas. Of all her sisters she alone failed to captivate the affections of a celestial deity, and married a mortal. On this account the star into which she was at last transformed was less bright than the others. [1.] [MYTH.]

mē-rōp-i-dæ, s. pl. [Lat., &c. *merop(s)*, fem. pl. adj. suff. -idæ.]

Ornith.: Bee-eaters, a family of insectivorous birds, of which Merops is the type. Their range in space is over the Palearctic, Ethiopian, Oriental, and Australian sub-regions. Five genera are known, all recent.

mē-rōp-i-dān, a. & s. [Mod. Lat. *meropid(a)*, Eng. adj. suff. -an.]

Ornithology: A. As adj.: Of or belonging to the family Meropidae; as, of *meropidan* affinities.

B. As subst.: A bird of the family Meropidae (q.v.).

mēr-ōps, s. [Lat., from Gr. *μέροψ* (*merops*) = *Merops apister*, the typical species of the genus.]

Ornith.: The typical genus of the family Meropidae. The bill moderate or long, arched, acuminate, margins entire; tongue narrow, horny at apex; tarsi short; tibia denuded above the heel; wings long, tail with two middle feathers elongate. Twenty-one species are known. *Merops apister* is common in the south of Europe and in Africa, and is an occasional visitor to Britain. The back is reddish-brown, the throat yellow with a black margin, breast and belly greenish-blue. It feeds on insects, especially wasps and bees, which it captures on the wing, like swallows.

*mēr-or-gān-i-zā-tion, s. [Gr. *μέρος* (*meros*) = a part, and Eng. *organization* (q.v.).] Partial organization; organization in part.

mēr-ōs, mēr-ūs, s. [Gr. *μέρος* (*meros*) = a part.]

Arch.: The plain surface between the channels of a triglyph.

mēr-ō-stōm-a-ta, s. pl. [Mod. Lat., from Gr. *μῆρος* (*meros*) = thigh, and *στόμα* (*stoma*) = a mouth.]

Zool.: A legion of Crustacea; the individuals are often of gigantic size. The mouth is furnished with mandibles and maxillæ, the terminations of which become walking or swimming feet, and organs of prehension. It contains one recent order, Xiphosura (King-crabs or Horseshoe crabs), and one extinct, Euryptera.

Mēr-ō-vin-gī-an, a. & s. [From Low Lat. *Merovius* = *Meroveg* = the great warrior, who founded the dynasty in the early part of the fifth century.]

A. As adjective: 1. A term applied to the earliest dynasty of French kings. It was succeeded by the Carolingian dynasty in 752.

2. A term applied to the written characters of French MSS. of the Merovingian period.

B. As subst.: A sovereign of the Merovingian dynasty.

mē-rōx-ēne, s. [Gr. *μέρος* (*meros*) = part, and *ξένος* (*xenos*) = a stranger.]

Min.: The name was originally given by Brethaupt to the mica (q.v.), from Monte Somma, which was found in brilliant crystals and with numerous plates. It was considered to be uniaxial and rhombohedral in crystallization, and referred to the species biotite (q.v.). Tschermak retains the name for the Vesuvian magnesian mica, and refers it to a group in which the optic axial plane is parallel to the plane of symmetry. He shows also that this mica, in common with all the others, is monoclinic in crystallization.

*mēr-rī-fy, *mēr-rý-fy, v. t. [Eng. *merry*; -fy.] To make merry; to amuse.

"It merryed us all."—*Mdm. D'Arbway*; *Dairy*, l. 324.

mēr-rī-ly, *mer-e-ly, *mer-i-ly, adv. [Eng. *merry*; -ly.] In a merry manner; with mirth or merriment; gaily, mirthfully.

"Merrily sang the birds, and the tender voices of women."—*Longfellow*; *Mosses Stambish*, v.

*mēr-rī-make, *mer-ry-make, s. [Eng. *merry*, and *make*.]

1. A meeting for mirth and amusement; a merry-making.

"We'll have feasts, And funerals also, merry-makes and wars."—*E. H. Browning*; *Drums of Exile*.

4. Indicating or expressive of mirth or merriment; gay.

"When thy merry steps draw near."—*Longfellow*; *Spring*.

*5. Full of gibes or sneers; sarcastic.

*6. Prosperous, favourable.

"There ere my feeble barke a swifter may stay, Till merry wind and weather call her to the away."—*Spenser*; *F. Q.* I. xii. l.

¶ To make merry:

1. To feast with mirth.

"And they that dwell upon the earth shall rejoice over them, and make merry."—*Rev.* vi. 10.

2. To indulge in hilarity; to laugh; as, To make merry at a person's mistakes.

merry-andrew, s. A buffoon, a zany, one who makes sport for others. The term is said to be derived from Andrew Bourde or Borde, physician to Henry VIII., who, in order to instruct the people, used to address them at fairs and other crowded places in an eccentric and amusing manner.

"The Italian *merry-andrews* took their place, And quite debauch'd the stage with lewd grimace."—*Dryden*; *Epist. to the Care of Oxford*.

merry-dancers, s. pl. The Aurora Borealis of northern lights; so called from their never-ceasing motion.

*merry-go-down, s. Strong ale.

merry-go-round, s. A machine consisting of a number of wooden horses and little carriages, made to revolve in a circular frame by machinery, on which children are treated to a ride.

"They took a gentle form of equestrian exercise upon the wooden horses of the merry-go-round."—*Daily Telegraph*, March 9, 1885.

*merry-go-sorry, s. A mixture of laughing and crying.

"The ladie with a merry-go-sorry."—*Breton*; *Fortunes of Two Princes*, p. 25.

merry-guilt, s. A kind of cotton fabric made in Assam.

merry-hearted, a. Merry in heart; mirthful, gay.

"The new wine in-mirth, the vine languidly, and the merry-hearted do sigh."—*Isaac* xvii. 7.

merry-make, v. t. [MERRYMAKE, s.]

merry-making, a. & s.

A. As adj.: Making merry; jovial.

"His talents leading to exalt the freaks Of merry-making beggars."—*Wordsworth*; *Excursion*, bk. vi.

B. As subst.: Merriment, gaiety, merry sports.

"Is this a place for mirth and cheer— Can merry-making enter here?"—*Wordsworth*; *Matron of Jedburgh*.

*merry-man, s. A merry-andrew; a buffoon.

merry-meeting, s. A meeting or party for merry-making; a feast, a festival.

merry-thought, s. The femur or forked bone of a fowl's breast, which is used in sport by unmarried persons, each taking hold of and pulling at one of the forks, the possession of the longest piece when broken being an omen of an early marriage to the one who gets it.

"Let him not be breaking merry-thoughts under the table with my cousin."—*Echard*; *Plautus*.

*mēr-rý, v. t. [MERRY, a.] To make merry; to delight.

"Though pleasure merries the senses for a while."—*Feltham*; *Reveries*, p. 44.

*mēr-sion, s. [Lat. *mersio*, from *merus*, *pa*, par. of *mergo* = to dip.] [MERGE.] The act of dipping or plunging under water; immersion.

"The mersion also in water, and the emersion, thence doth figure our death to the former, and receiving to a new life."—*Burrow*; *Of Baptism*.

mēr-tén-sí-a, s. [Named after F. C. Meitens, a German botanist and Professor of Medicine at Bremen.]

Botany:

1. Smooth Groundwell; a genus of Boraginaceæ, tribe Lithospermeæ. Calyx five-parted; corolla regular, funnel-shaped; stamens protruded beyond the tube; filaments elongated; fruit sub-inflatescent. Twenty species are known. They are from the North Temperate and Arctic Zones. One, *Mertensia mertensiana*, is found in places along the British coasts.

2. A genus of Polydriaceæ, tribe Gleicheniæ. The Brazilian negroes make paper from the stalks of *Mertensia dichotoma*.

Mer-ù, s. [Sansc.]

Hindoo Mythol.: A mountain at the North Pole, supposed, like the Greek Olympus, to be the abode of the gods. (*Trig.* K. M. *Meru*)

mēr-y-lā, s. [Lat. = a blackbird.]

Ornith.: In some classifications, a genus of birds, having as its type the Blackbird, which

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhun. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bcl, dcl.

mesaconic acid, s.

Chem.: C₅H₇O₄ = C₅H₇(COOH). Citracaric acid. A dibasic acid, isomeric with itaconic acid, obtained by boiling a weak solution of citraconic acid with a sixth of its volume of nitric acid. It crystallizes in fine, shining needles, slightly soluble in cold water, but very soluble in boiling water, in alcohol, and in ether. It melts at 208 to a clear liquid, which solidifies on cooling to a crystalline mass. By dry distillation it splits up into citraconic anhydride and water. The salts of mesaconic acid have the formula C₅H₅M₂O₄ and C₅H₃M₂O₄, and are nearly all crystallizable.

mesaconic ether, s.

Chem.: C₅H₇O₄ = C₅H₅(C₂H₅)O₄. A colourless, mobile liquid, prepared by distilling a mixture of mesaconic acid, sulphuric acid, and alcohol. It has an agreeable fruity odour, but a bitter taste, and distils at 220 without alteration. Its density is 1.043, and it is not attacked by ammonia.

mēs ěm brý ā-çē æ, s, pl. [Mod. Lat. *mesembryanthemum*]; Lat. fem. pl. adj. suff. -*aceus*]

Bot.: Ficoides; an order of perigynous exogens, alliance Ficoidales. It consists of succulent shrubs or herbs, with opposite simple leaves. The flowers are terminal, though so short-stalked as to appear lateral, they are showy, and generally open under the influence of sunshine, closing on its departure. Petals in many rows. Stamens indefinite in number; ovary inferior or nearly superior, many or one-celled. Stigmas numerous, distinct; ovules indefinite, attached to a central placenta. Fruit capsular, surrounded by the fleshy calyx opening in a stellate manner at the apex, or splitting at the base. Found chiefly on the hot sandy plains of South Africa. A few grow in the north of Africa, in the south of Europe, in Asia, the Islands of the Pacific, and South America. (Lindley.) Known genera, sixteen; species upwards of 400. (Prof. Balfour.)

mēs ěm brý ān-thē-mum, s. [Gr. *μεσέμβριον* (*mesēmbriōn*) = midday, noon, and *ἄθος* (*athos*) = blossom, flower. So named because these plants open only for a short time in the middle of the day.]

Bot.: The typical genus of the order Mesembryaceæ (q.v.). It consists of very succulent plants, with thick, fleshy leaves and showy flowers, with four or five sepals, and many narrow petals, generally in several series. *Mesembryanthemum cyclobotrys* is the Ice-plant (q.v.); its juice, when is considered diuretic,

has been prescribed in dropsy and liver complaints; the plant itself is used in Spain, as are *M. egypticum* and *M. nodiflorum* in Egypt, as a kind of barilla for glass works. The succulent root of *M. ebuli*, the Hottentot's Fig of Cape Colony, is eaten, as are those of *M. geniculiflorum*; the seeds are also ground into flour. The fruit of *M. aquiliferale*, Pig-faces or Camagou, is eaten in Australia. *M. eucardium* is chewed by the Hottentots like tobacco.

Ant.: The middle portion of the brain, developing from the original middle vesicle, and comprising the *corpora quadrigemina* and *cora cerebri*, with contracted internal hollow, the passage from the third to the fourth ventricle. (Quain.)

mēs ěn-tēr ic, * mēs ěn-tēr iek, a. [Eng. *mesenteric*]; -ic; Fr. *mesentérique*.] Of or pertaining to the mesentery. Thus there are mesenteric glands, veins, and a plexus.

mesenteric-disease, s.

Pathol.: *Tuberc mesenterici*, a tubercular or strumous degeneration of the mesenteric glands. It stands to them in the same relation as phthisis to the lungs, and, says Dr. Tanner, might be called abdominal phthisis. It particularly affects infants and young children. The abdomen is swollen, tense, and painful; the motions extremely fetid, the rest of the body wasted; the angles of the mouth ulcerated; the lips deep red. It generally ends in death.

mesenteric-glands, s, pl.

Ant.: The glands through which the lymphatic capillaries pass in the folds of the mesentery.

mēs ěn-tēr i-çā, s. [Fem. sing. of Mod. Lat. *mesentericus* = of, belonging to, or resembling the mesentery.]

Bot.: The mycelium of certain fungi.

mesial-line, s. [MEDIAN-LINE, s.]

mesial-plane, s.

Anat.: An imaginary plane dividing the head, neck, and trunk into similar halves, towards right and left.

mesial-plate, s. [VISCERAL-PLATES.]

mēs-ý-däte, s. [Eng. *mesidic* (1); -ate.]

Chem.: A salt of mesidic acid.

mě síd' íe, a. [Erg. *mesid* (1); -ic.] Derived from mesidine.

mesidic-acid, s.

Chem.: $C_9H_8O_4 = C_6H_5(CH_2CO_2H)_2$. A dibasic acid, intermediate in composition between mesitylenic acid, $C_9H_8O_2$, and trimesic acid, $C_9H_6O_6$, prepared by oxidizing mesitylenic acid with a mixture of potassium dichromate and sulphuric acid. It crystallizes in colourless shining needles, insoluble in cold water, slightly soluble in boiling water, but very soluble in alcohol and ether. It melts at 287°-288°. Its potassium salt, $C_9H_7O_4K_2$, crystallizes in shining laminae, very soluble in water. The silver salt is insoluble in cold, but very soluble in boiling water. Ethyl mesidate, $C_9H_7O_4(C_2H_5)_2$, is a colourless radio-crystalline mass, insoluble in water but soluble in alcohol.

mēs-ý-díne, s. [Eng. *mesitylene* (1); (am)id(-ogen), and suff. -ine (*Chem.*).]

Chem.: $C_9H_{11}(NH_2) = C_6H_5(CH_2)(NH_2)_2$. Amidomesitylene. A colourless oily liquid, obtained by boiling nitromesitylene with tin and hydrochloric acid, and separating from the hydrochloride by means of ammonia. It is insoluble in water, but soluble in alcohol and ether. The hydrochloride, $C_9H_{11}(NH_2)HCl$, forms feathery crystals, soluble in water and alcohol. The stannous chloride, $2(C_9H_{11}N^+HCl)SnCl_2$, forms needle-shaped crystals, which are decomposed by water.

mě-síte, s. [Gr. μέσος (*mesos*) = the middle.]

Chem.: $C_9H_8O_2$. An oxygenated oil obtained by distilling lignone with sulphuric acid. It boils at 72°, and is slightly soluble in water.

mě-sít-ýe, a. [Eng. *mesityl* (1); -ic.] Contained in or derived from mesityl (1).

mesitic-alcohol, s.

Chem.: A name given to acetone on the supposition that it is an alcohol containing the radical mesityl, C_9H_5 , isomeric with allyl. (*Watts*.)

mesitic-aldehyde, s.

Chem.: C_9H_8O . A body isomeric with acrolein, prepared by heating acetone with strong nitric acid. It is lighter than water, has a sweet pungent odour, and dissolves readily in caustic potash, yielding a brown liquid.

mesitic-ether, s.

Chem.: $C_9H_{10}O$. Oxide of mesityl. Produced by the action of alcoholic potash on chloride of mesityl. It is a mobile, colourless liquid, of a peppermint odour, boiling at 133°, and having a sp. gr. of 0.848 at 23°. It is insoluble in water, but soluble in alcohol and ether.

mēs-ý-tino, mēs-ý-tite, s. [Gr. μεσότης (*mesotēs*) = a go-between; Ger. *mesitin*.]

Min.: A rhombohedral mineral, having a perfect rhombohedral cleavage. Hardness, 4 to 4.5; sp. gr. 3.33 to 3.36; lustre, vitreous, sometimes pearly; colour, yellowish-white to yellowish-brown. Compos.: carbonate of magnesia, 59.2; carbonate of iron, 40.8 = 100; represented by the formula $2MgCO_3 + FeO \cdot CO_2$. Occurs with quartz and magnetite at Traversella, Piedmont; and with pyrrhite and quartz at Morro Velho, Brazil. Named mesitine because intermediate in composition between magnesite and siderite (1.v.). Called also mesitine-spar.

mesitine-spar, s.

Min.: The same as MESITINE (1.v.).

mēs-ít-öl, s. [Eng. *mesit(ylene)*, and Lat. *oil* (1); = oil.]

Chem.: $C_9H_{12}O = C_6H_5CH_2OH$. An oily body obtained by fusing potassium mesitylenesulphonate with potassium hydroxide, acidulating the fused mass with sulphuric acid, and distilling with water. It is soluble in alcohol, ether, and benzene, floats on water, and has a strong odour of phenol. It boils at 220°, and dissolves in the fixed alkalis.

mēs-ít-ýl, s. [Formed from some of the letters of Eng. *methyl*, and *acetone*, with suff. -yl (1.v.).]

Chem.: A hypothetical monatomic radical, supposed by Kane to exist in acetone, C_3H_8O .

mesityl-oxide, s.

Chem.: $C_9H_{10}O$. Formed by the action of zinc methyl or zinc ethyl on acetone, or by the distillation of diacetanamine. Strong sulphuric acid converts it into mesitylene, and, by boiling with dilute nitric acid, it is converted into acetic and oxalic acids.

mě-sít-ý-lēn'-a-mído, s. [Eng. *mesitylen* (1), and *amide*.]

Chem.: $C_9H_9O \cdot NH_2$. A crystalline body obtained by gently heating a mixture of mesitylene and phosphorus pentachloride, adding the product to strong ammonia, washing the resulting crystalline mass with dilute ammonia, and re-crystallizing from boiling water. It crystallizes in long needles, soluble in boiling water, and in alcohol and ether, melts at 133°, and sublimes without decomposition.

mě-sít-ý-lēne, s. [Eng. *mesityl* (1); -ene.]

Chem.: $C_9H_{12} = C_6H_5(C_2H_5)_2$. Mesityl. A trimethyl benzene, isomeric with cumene, formed when two volumes of acetone are distilled with one volume of sulphuric acid in a retort half filled with sand. It is a light colourless liquid, of high refractive power, and pleasant odour, boiling at 163°, and burning with a bright but smoky flame. With bromine, chlorine, nitric and hydrochloric acids it forms crystalline substitution products.

mesitylene-acediamine, s.

Chem.: $C_9H_{10}(NH \cdot C_2H_5)_2$. A body prepared by boiling mesitylene-diamine, $C_9H_{10}(NH_2)_2$, with glacial acetic acid. It melts at a temperature above 300°, and is insoluble in water and dilute hydrochloric acid.

mesitylene sulphonic-acid, s.

Chem.: $C_9H_7(SO_3H) = C_6H_5(CH_2)_2(SO_3H)$. An acid produced by the action of ordinary sulphuric acid on mesitylene. It crystallizes in coarse laminae, melts at 90°, and at a higher temperature is resolved into mesitylene and sulphuric acid. It forms salts called mesitylene-sulphonates, most of which are crystalline and soluble in water and alcohol.

mesitylene sulphuric-acid, s.

Chem.: $C_9H_{12}SO_3$. Sulphomesitylic acid. A brown acid liquid obtained by dissolving mesitylene in fuming sulphuric acid, on exposure to the air it gradually solidifies to a crystalline mass.

mě-sít-ýl-ēn'-ie, a. [Eng., &c. *mesitylen* (1); -ic.] Contained in or derived from mesitylene (1.v.).

mesitylenic-acid, s.

Chem.: $C_9H_{10}O_2 = C_6H_5 \begin{matrix} \text{CH}_3 \\ | \\ \text{C} \\ | \\ \text{COOH} \end{matrix}$. A monobasic, aromatic acid formed by the oxidation

of mesitylene with dilute nitric acid. It is sparingly soluble in water, but very soluble in alcohol, from which it crystallizes in large monoclinic crystals, melting at 106°, and subliming without decomposition. By oxidation with chromic acid it is converted into the dibasic myric acid, $C_9H_6O_6$, and finally into the tribasic trimesic acid, $C_9H_6O_6$. All its salts are more or less soluble in water.

mě-sít-ý-lól, s. [Eng. *mesityl*, and Lat. *oil* (1); = oil (2).] [MESITYLENE.]

mēs-ý-jíd, s. [Arab. = a place of worship.] A mosque.

* **mēs-kēl'-tō, s.** [Sp. *mesquita*.] A mosque (1.v.).

"The very Mahometans . . . have their sepulchres near the *mesquita*."—*Up. Hall's Works*, v. 311

* **mēs'-lin, * mas'-lin, * mast'-lin, * mes'-linē, * mis'-cel'-in, * mis'-cel'-inc, * mis'-sel'-anc, s.** [O. Fr. *mesillon*, from Low Lat. *mesillum* = mixed grain, from Lat. *mistus* = mixed.]

1. Mixed corn or grain: as, wheat and rye mixed.

"Take thee, therefore, all kinds of grain, wheat, and barley, and beans, and lentils, and fitches, and put them all together, and make bread of this *mesaline*."—*By. Hall: Word Texts; Ezekiel* iv. 9.

2. Bread made of mixed corn.

"Then it is named *meselin*, that is, bread made of mingled corn."—*Hudoe's: Descrip. of Eng.* bk. ii. ch. vi.

3. Mixed metal: as, brass or bronze.

"Nor brass, nor copper, nor *mesillon* mineral."—*Brewer: Linnæus*, iv. l.

mēs-mēr-eē, s. [Eng. *mesmer*; -ee.] A person placed under the influence of mesmerism; a person on whom a mesmerist operates.

mēs-mēr'-ic, * mēs-mēr'-i-cal, a. [Eng. *mesmer*; -ic.] Of or pertaining to mesmerism; produced by mesmerism.

mēs-mēr-ism, s. [For etym. see def.]

Hist. & Med.: The system popularised by Franz Anton Mesmer (1733-1815), a Swiss physician, and by him called Animal Magnetism. He believed that the stars exercised an influence over men, and, identifying this with magnetism, sought to effect cures by stroking his patients with magnets. Finding that Gassner, a Swabian priest, effected cures by stroking with his hand, Mesmer abandoned the use of magnets, persuaded that some mysterious force present in himself was the means by which cures were effected. The French government offered him 20,000 francs for his secret, but he refused; and a commission was appointed to examine into the cures said to have been effected by him. They admitted many of the facts, but declined to admit that such an agent as animal magnetism existed. Mesmer delighted in mysterious surroundings, and affected a strange weird style of dress; but one of his disciples, the Marquis de Puységur, showed that sleep might be induced by gentle manipulation alone, thus removing mesmerism from the sphere of mystery to one where it might be subjected to scientific investigation. In 1843, Mr. Braid, a surgeon of Manchester, investigated the subject. [HYPNOSISM.] In 1843, Baron von Reichenbach made public his views as to *odyl* (1.v.). The phenomena of animal magnetism, electrobiology, hypnotism, mesmerism, and odylic force are practically the same. Within the last few years they have been scientifically investigated, notably by Dr. Carpenter in England and by Prof. Weirhold and Dr. Heidenhain on the Continent. The chief phenomena are a hypnotic state induced by the patient gazing fixedly at some bright object, or by passes made by the operator; muscular rigidity, sometimes to such an extent as to admit of the body resting supported only by the head and heels on two chairs, insensibility to pain, and perverted sensation, as exhibited in a slightly hypnotized patient drinking water and imagining it to be delicious wine or nauseous medicine at the will of the operator. mēs-mēr-ist, s. [Eng. *mesmer*; -ist.] One who practises or believes in mesmerism.

mēs-mēr-i-zā-tion, s. [Eng. *mesmer* (1); -ation.] The act of mesmerizing; the state of being mesmerized.

bōil, bōy; pōūt, jōw1: eat, çell, ehorus, çhin, bençh; go, çem; thin, çis; sin, aç; expect, Xenophon, eçist. -iñç, -cian, -tian = şan. -tien, -sion = şüh; -çion, -çion = züh. -cious, -tious, -sious = şüs. -ble, -dle, &c. = be1, aç:

1. Zool. : A genus of Xiphoid Whales, sometimes referred to the family Rhyncoceti. The best established species are Mesoplodon bidens (sometimes called M. Sowerbiansis, or Sowerby's Whale, which has two teeth in the lower and none in the upper jaw), M. europaeus, M. densirostris, M. layardi, M. trossi, and M. Hectori. Geographical range in northern and southern hemispheres, but more abundant in the latter.

2. Palaeont. : Abundant in Later Miocene and Pliocene age; the long, cylindrical rostrum is of frequent occurrence in the bone-bed at the base of the Red Cliffs of Suffolk.

mēs-ō-pō-dī-ūm, s. [Pref. meso-, and Gr. pous (pous), genit. podos (podos) = a foot.] Zool. : The middle portion of the foot of molluscs.

mēs-or-chī-ūm, s. [Pref. meso-, and Gr. orchis (orchis) = a testicle.] Anat. : A duplicate of the serous membrane of the testicle.

mēs-ō-rēc-tūm, s. [Pref. meso-, and Eng., &c. rectum (q.v.).] Anat. : A triangular reflection, formed by the peritoneum between the posterior surface of the rectum and the anterior surface of the sacrum. The inferior mesenteric vessels terminate in the layers of the mesorectum.

mēs-ō-rhīnc, a. [Pref. meso-, and Gr. rhis (rhis), genit. rhinos (rhinos) = the nose.] Anthrop. : A term applied to skulls having a nasal index ranging from 48 to 53. Used also of races possessing such skulls. [Nasomalar index.]

mēs-ō-sē-mī-a, s. [Pref. meso-, and Gr. semeion (semeion) = a mark.] Entom. : A South American genus of Erycinidae. It consists of many species of brown or blue butterflies, marked with black lines, especially on the hind wings; and nearly all have a large round black spot in the middle of the fore wings, marked with two or more white dots.

mēs-ō-spēr-m, s. [Pref. meso-, and Gr. sperma (sperma) = a seed.] Bot. : The same as SARCODERM (q.v.).

mēs-ō-stēr-nūm, s. [Pref. meso-, and Lat. sternum, from Gr. sternon (sternon) = the breast-bone.] Anat. : The middle part of that half of the sternum which covers the breast (Mens); the ensiform process of the sternum or breast-bone constituting its sixth segment. In most cases it remains cartilaginous till the age of puberty, and in a few instances till advanced life. (Quatin.)

mēs-ō-tār-ī-a, s. [Pref. meso-, and Mod. Lat., &c. otaria (q.v.).] Palaeont. : A phocine genus, allied to Otaria. It was founded by Prof. P. J. van Beneden on some fragmentary remains from the Pliocene of Flanders. He called the species Mesotaria ambigua.

mēs-ō-tar-tār-īe, a. [Pref. meso-, and Eng. tartaric.] (See the compound.)

mesotartaric acid, s. Chem. : Inactive tartaric acid. [TARTARIC ACID.]

mēs-ō-thē-çī-ūm, s. [Pref. meso-, and Gr. thēkion (thēkion), dimin. of thēkē (thēkē) = a chest.] Bot. : According to Schleiden, an inner coat in a young author. It becomes the second coat in an adult one.

mēs-ō-thēr-ī-ūm, s. [Pref. meso-, and Gr. thērion (thērion) = a wild animal.] Palaeont. : A genus of fossil rodents from South America. The lower jaw has four incisor-teeth. The broad middle pair of teeth have an elongated ring of enamel around them, instead of having the edge worn away with a chisel-like form; and hence Mr. Alston has created for this one genus a section of the Rodent order, and called it Hebetidentata or Blunt-toothed Rodents. Mesotherium cristatum is found in the Pliocene of the Pampanas of La Plata.

* mē-sōth-ē-sis, s. [Gr. μέσος (mesos) = middle, and θέσις (thesis) = a placing; τίθημι]

(titheō) = to place.] Middle, mean. (Coloridge.)

mēs-ō-thōr-āx, s. [Pref. meso-, and Eng. thorax.] Entom. : The middle ring of the three constituting the thorax. It is situated between the prothorax in front of it, and the metathorax behind it.

mēs-ō-týpe, s. [Gr. μέσος (mesos) = in the middle, and τύπος (typos) = form; Ger. mesotyp.] Min. : A name formerly used for a number of minerals supposed to belong to the zeolite group. Subsequently it was divided into lime-mesotype, soda-mesotype, and lime-and-soda mesotype. These are now designated Scolecite, Natrolite, and Mesolite respectively. (See these words.)

mēs-ō-vār-ī-ūm, s. [Pref. meso-, and Mod. Lat. ovarium (q.v.).] Anat. : A fold of the peritoneal membrane, corresponding in the female to the mesorchium in the male.

mēs-ōx-āi-īe, a. [Pref. meso-, and Eng. oxidic.] Contained in or derived from alloxan.

mesoxalic acid, s. Chem. : C₃H₂O₆, O₁₁. A dibasic ketonic acid, obtained by boiling alloxan or alloxanic acid with aqueous alkalis. It has a strong acid reaction, is very soluble in water, and its solution is not decomposed by boiling. The barium salt, C₃H₂Ag₂O₆, which crystallizes in yellow laminae, is prepared by boiling a saturated solution of baric alloxanate. The silver salt, C₃H₂AgO₆, is produced when mesoxalic acid and ammonia are added to argentic nitrate.

mēs-ō-zō-a, s. pl. [Pref. meso-, and Gr. ζῷα (zōa), pl. of ζῷον (zōon) = an animal.] Zool. : A term proposed by Van Beneden for parasites in which no mesoderm is developed, nor any trace of an alimentary apparatus present.

"I am disposed to agree with Van Beneden that the Dicyemida should be regarded as the representative of a distinct division, the Mesozoa, intermediate between the Protozoa and the Metazoa."—Huxley. Jour. Invert. Animals, p. 67.

mēs-ō-zō-īe, a. [Pref. meso-, and Gr. ζῷή (zōhē) = life, and Eng. suff. -īe.] Geol. : A term introduced by Prof. Phillips in lieu of the word Secondary. It is modelled on the word Palaeozoic (q.v.), applied to older strata. Though Mesozoic is largely used, yet Sir Charles Lyell preferred the older and simpler word Secondary.

mēs-pī-lō-dāph-nē, s. [Lat. mespilus, and daphne; Gr. δάφνη (dāphnē) = a laurel tree.] Bot. : A genus of Lauraceae. It consists of Brazilian trees with netted leaves; flowers in axillary panicles, with nine to twelve stamens. Mespilodaphne pretiosa, the Casco pretiosa of the Portuguese, furnishes a kind of cinnamon.

mēs-pī-lūs, s. [Lat. = a medlar; Gr. μεσπίλη (mespilē) = the medlar tree; μέσπιλον (mespilon) = its fruit.] Bot. : A genus of Pomaceae (Appleworts); or, according to Sir Joseph Hooker, a subgenus of Pyrus. The fruit is large, five-celled; the cells one-seeded; the endocarp bony, the flowers solitary. Mespilus (or Prunus) germanica is the Medlar (q.v.).

* mēs-prīse, * mēs-prize, s. [O. Fr. (Fr. mespris), from mespriser (Fr. mépriser) = to despise.] [MISPRIZE.]

1. Contempt, scorn, insolence. "And eke reward the wretch for his mesprise." Spenser: F. Q., III. ix. 9.

2. Mistake. "Through great misadventure or mesprise Her life had come into that hazardize." Spenser: F. Q., II. xii. 19.

mēs-s (1), * mesase, * messe, s. [O. F. mes = a dish, a course at table (Fr. mets), orig. pa. par. of mettre = to place; Lat. mitto = to send; Ital. messo = a course of dishes at table.]

1. A dish or a portion of food sent to or set on a table at one time; food prepared for a person or party of persons. "He took and sent messes unto them; but Benjamin's mess was five times so much as any of theirs."—Gen. xliii. 34.

2. As much provender or fodder as is given to a beast at once. "The only a pace that ends misse, Crumbling your bounds their messes." Browning: Pippin Passes, ii.

3. A number of persons who sit down to table together, or the food provided for them; specif., a company or number of officers or men, is belonging to the same regiment or ship, who take their meals together.

1. A set or party of four; from the company at great feasts being arranged or divided into sets of four. Applied— (1) To persons. "Where are your mess of sons [i.e. the following four, Edward, George, Richard, and Edmund] to back you now?"—Shakespeare: Henry VI., i. 4.

(2) Of things. "There lacks a fourth thing to make up the mess."—Lutwiler: Sermon v.

2. In the Inns of Courts a mess still consists of four persons. "5. A small piece; a small quantity. "I will chop her into messes."—Shakespeare: Othello, iv. 1.

mess deck, s. Naut. : The deck on which a ship's crew messes.

mess-kit, s. That portion of camp equipment consisting of cooking utensils.

mess-table, s. The table at which the members of a mess take their meals.

mēs-s (2), s. [A variant of mess (q.v.).] 1. Lit. : A mixture of things in disorder; a state of dirt and disorder; a jumble; anything dirty.

2. Fig. : A situation or position of difficulty, embarrassment, trouble, or distress; a muddle, a difficulty, a trouble.

* mēs-s (3), * messe, s. [Mess (2), s.] mēs-s (1), e. i. & t. [MESS (1), s.]

A. Intrans. : To take meals together, as members of a mess; to associate at the same table; said esp. of naval or military officers or men; to associate generally.

B. Trans. : To supply or provide with a mess; to supply with food.

mēs-s (2), e. t. [MESS (2), s.] To make in a mess; to make dirty or foul; to dirty, to soil.

mēs-s-āçç, s. [Fr., from Low Lat. missaticum = a message, from Lat. missus, pa. part. of mittere = to send.]

1. A notice or communication sent from one person to another either verbally or in writing. "He swift as an express." Reports a message with a pleasing grace." Cooper: Truth, 205.

2. Specif. : An official communication sent through an official messenger; as, a message from the Queen to Parliament.

* 3. A messenger. "A message that meyn he moldez to seche." Early Eng. Allit. Poems; Cleanliness, 48.

* mēs-s-āçç, e. t. [MESSAGE, s.] To carry or deliver as a messenger. "He dyd in expressed command to me message his errand." Spenser: Virgil; Lucan iv. 377.

* mess-ag-er, * messagere, s. [Eng. messenger (q.v.); -er.] A messenger (q.v.). "The rainbow is his messenger."—Bower: C. A., v.

Mēs-sā-lī-an, s. [From the Syriac name = those who pray.] Church Hist. & Ecclesiol. (Pl.). The same as EUGUTES (q.v.).

mēs-san, mēs-sin, a. & s. [O. Fr. mastin; Fr. mastin = a mastiff.]

A. As adj. : Curious, mongrel. (Scotch.)

B. As subst. : A mongrel dog, a cur, a dog of no breed. (Scotch.) "No, Mess Lucy, you need never thank it: You would not consent to put both your father's poor dog, and would you use me wam than a messin?"—Scott: Guy Rimering, ch. xv.

* mēs-s (1), s. [MESS (1), s.]

mēs set. [MESSIAS.] A mongrel dog, a rat, a messiah (q.v.).

* Mēs si qd. [From Messiah, on the analogy of Lord, Christ, &c.] An epic poem having the Messiah for its hero; ...

Mēs si ah, * Mēs si as. Heb. מָשִׁיחַ (mashiah) = anointed, a verbal noun and participle, from מָשַׁח (mashah) = to smear with colours, to anoint; Gr. Μεσσίας (Messias).

1. *Ch. S. Hist. & Myth.*: The Anointed One; a certain Personage of Being regarding whom Daniel prophesied. He was called "the Prince," was apparently identified with the "most Holy One," was to appear at the end of "seven weeks and three score and two weeks," from the issue of the decree to rebuild Jerusalem, was in sixty-two weeks to be "cut off but not for himself," after which Jerusalem was to be destroyed by foreign invaders (Dan. ix. 25, 26). In Psalm ii. 2, the Lord and his anointed might be rendered the Lord and his Messiah. Three classes of men were often mentioned under the Jewish dispensation: (1) Priests, and especially high priests (Ex. vi. xxviii. 41; Levit. iv. 3, 5, 16; Num. xxxv. 25; 1 Kings i. viii. ix. 16, xvi. 37; Sam. vii. 7; 1 Kings v. 34, xiv. 19) (2) Prophets; Eljah, by one his translation, was directed to anoint Elisha, his successor (1 Kings xv. 12; cf. also Isai. lxi. 1-3). Presumably then the Messiah spoken of by Daniel would discharge priestly, kingly, or prophetic functions, or two out of the three, or all the three. The name "the Prince" would suggest that kingly functions would be especially prominent. During the later and more calamitous period of the old Hebrew monarchy, there were increasingly potent desires for the coming of the Messiah, who was regarded chiefly as a deliverer from foreign oppressors. ... In Jewish belief that advent is still to be expected.

2. *Ch. S. Hist. & Myth.*: The Anointed One is in Greek Χριστός (Christos), from χρίω (chriō) = to anoint. So thoroughly are the words identical, that the Heb. מָשִׁיחַ (mashiah), which occurs thirty-nine times in the Old Testament, is in every case rendered in the Septuagint χριστός (christos). When Jesus of Nazareth consented to accept the appellation "the Christ," he simply "Christ," as his official designation, he became to be the Messiah of Daniel's prophecy (Matt. i. 16, xvi. 20, xxvi. 63; Mark vi. 29, xiv. 94; Luke ii. 15, ix. 20, xxv. 67; John i. 41, v. 43, &c.). All Christendom has acknowledged the claim. [CHRIST.]

3. *Eng. Lit.*: The holy anointed leader of a nation, capable, if properly appreciated and followed, of leading it to the most prosperous. Thus, *et cetera*, of the assassination of Julius Cæsar, Napoleon III. said of nations in general, "They can fly their Messiah."

mēs si ah ship, mes-i ah ship. [Eng. Lit.] The date, with, or position of the Messiah.

mēs si An ie. [Low Lat. Messianicus; M. = Messias.] Relating to the Messiah, as, M. = the psalms, Messianic prophecy.

* Many Old Testament prophecies are regarded by the great majority of Christian as Messianic, even though the personage predicted may not be formally termed the Messiah. Among them are the following:—

Gen. i. 1, 2, 22; 12. 1-3; 22. 17, 18; 24. 7; 28. 10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

* Mēs si as. [MESSIAH.]

Mēs si dor. [Fr. from Lat. messis = harvest, and Gr. δῶρον (dōron) = a gift. Properly meaning corn harvest.] The name given in October, 1793, by the French Convention to the tenth month of the Republican year. It commenced on June 19, and was the first summer month.

messieurs (as mēs-yürs). *s. pl.* [Fr. pl. of monsieur (mɔ̃sɥr)]. SIRS, gentlemen. It is used in English as the plural of Mr., and is generally contracted to Messis.

Mēs si nēse. *a. & s.* [Eng. Messin, -ese.]

A. *Acad.*: Of or pertaining to Messina in Sicily, or its inhabitants.

B. *Lit. subst.*: A native or inhabitant of Messina; as a plural, the people of Messina.

* mēs māk iēt. *s.* [Eng. mess (D. s., and making).] The act or practice of eating together.

"His friendship began by *messmaking* in the Temple hall." — *Arch.*: *Great Lord* (London), i. 55.

mēs's mäte. *s.* [Eng. mess (D. s., and mate).]

* mēst līng, *s.* [MELSIN.] Yellow metal; brass used for the manufacture of church vessels and ornaments in the Middle Ages.

mēs-u-a, *s.* [Named after two Arabian physicians called Meso. They were father and son, and flourished at Damascus in the eighth and ninth centuries.]

Bot.: A genus of Clusiacea, tribe Calophyllaceæ. *Mesia ferrea* is a middle-sized evergreen tree, growing in the south of India and Ceylon, the east of Bengal, the Eastern Peninsula, and the Andaman Islands. The fruit, which is wrinkled and has a rind like a chestnut, is eaten by the natives. The fragrant blossoms are sold under the name of *nagesar* or *nageskar* in Indian bazaars; they are stimulant, aromatic, and stomachic, useful in thirst, stomach irritation, and excessive perspiration. An attar is prepared from them. It made with butter and sugar into a paste, they tend to stop bleeding piles. The bark is a mild astringent and aromatic. A thick and dark-colored oil expressed from the kernels is used in India as an external application in itch and sores, and as an embrocation in rheumatism. It is also burnt in lamps. (*Calcutta Exhib. Report*, &c.)

* mēs-ūr-a ble (sas zb), *a.* [MEASUREABLE.]

mēs-ūre (s as zh), *s. & v.* [MEASURE, *s. & v.*]

* mē-sym-ni eum, *s.* [Gr. μέσος (mesos) = middle, and εὐνομος (eunomus) = a hymn, a song.] *Ancient Poetry*: A repetition at the end of each stanza; a burden.

mēt (1), *pret. & pa. pres. of v.* [MEET, *v.*]

* mēt (2), *pret. & pa. pres. of v.* [METE, *v.*]

mēt, *s.* [METE, *v.*] A measure of any kind; a bushel, a barrel.

mēt-a-, *pref.* [Gr. = among, with, after; cogn. with A.S. *mid*; Goth. *mith*; Ger. *mit* = with.] A prefix frequently used with words derived from the Greek, and denoting *beyond*, *over*, *after*, *with*, *between*, and frequently *change* or *transposition*.

meta-compounds, *s. pl.*

Chem.: As applied to inorganic substances, it refers to bodies having a similar composition to the ortho-compounds, but in which an obscure change has taken place affecting their chemical properties. In organic chemistry it applies to compounds of identical percentage composition, and molecular weight, in which the carbon-nuclei are united to one another by an atom of a polyvalent element, such as nitrogen; e.g. —

(ortho.) (Meta.)

meta cresol, *s.* [CREOSOL.]

meta-oleic, *a.* [METOLEIC.]

mē-tāb-a-sis, *s.* [Pref. *meta*, and Gr. *βασις* (basis) = a going; *βαίρω* (baíro) = to go.]

1. *Med.*: A change of remedy or treatment.

2. *Rhet.*: A passing from one thing to another; transition.

mēt-a-bis-mūth-lic, *a.* [Pref. *meta*, and Eng. *hæcathic* = derived from or containing haemuth.]

metabimethic acid, *s.*

Chem.: BiO₂H₁₀. An acid obtained as a red deposit by passing chlorine through a solution of potassic hydrate, containing bis-methous oxide in suspension. It is soluble in a hot solution of potassic hydrate.

mē-tāb-ō-la (1), *s.* [Gr. μεταβολή (metabolē), from μεταβαλλω (metaballō) = to throw over, to change.]

Med.: A change of some sort, as of air, time, or disease.

mē-tāb-ō-la (2), *s. pl.* [Neut. pl. of Gr. μεταβολος (metabolos) = changeable.]

Entom.: A sub-class of insects, containing those having complete metamorphosis. The larva, pupa, and imago are all very different in appearance, and these several states constitute three quite distinct phases of life. The larva is known as a maggot, a grub, or a caterpillar. The pupa, which is always quiescent, is sometimes called a chrysalis. *Dallas* divides it into two sections: Mandibulata, containing the orders Coleoptera, Hymenoptera, and Neuroptera; and Haustellata, containing the orders Lepidoptera, Iptera, and Aphaniptera.

mēt-a-bō-li-ān, *s.* [METABOLA.] *Entom.*: One of the Metabola (q.v.).

fat, fat, fare, amidst, what, fall, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sirc, sīr, marine; gō, pōt, or, wore, wolf, work, whō, sōn; mūte, cub, cure, unīte, cūr, rāte, full; trȳ, Syriān. æ, œ = ē; ey = ā; qu = kw.

mēt-a-bōl-ic, *a.* [Gr. μεταβολικός (*meta-bolikos*) = changeable.] [METABOLA.]

1. *Biol.*: Affected by, or exhibiting, metabolismism.
2. *Phys.*: Acted upon by chemical affinity operating in circumstances or conditions which present themselves in living beings only. [METABOLIC-FORCE.]
3. *Zoology*:

(1) Of, belonging to, or undergoing metamorphosis.

(2) Polymorphic; assuming different characters.

metabolic-force, *s.* [VITAL-AFFINITY.]

mē tāb-ō-liſm, *s.* [Ger. *metabolismus*.] [METABOLA.]

1. *Theol.*: The doctrinal views of Ignatius, Justin, and Irenaeus on the Eucharist. They stand midway between transubstantiation and the merely symbolical view.

2. *Entom.*: Metamorphosis.

3. *Biology*:

(1) The sum of the chemical changes within the body, or within any single cell of the body, by which the protoplasm is renewed or changed to perform special functions, or broken up and prepared for excretion.

(2) A change from a higher or more complex to a lower or simpler substance.

mēt-a-bōr-ic, *a.* [Pref. *meta-*, and Eng. *boric*.] Derived from or containing boric acid.

metaboric acid, *s.* [BORIC-ACID.]

mēt-a-brūsh-ite, *s.* [Pref. *meta-*, and Eng. *brushite*.]

Min.: A monoclinic mineral found in crystals in the guano and altered coral rock in the island of Somboro, Lesser Antilles. Cleavage, clinodagonal, perfect; hardness, 2½ to 3; sp. gr. 2.288 to 2.362; lustre, feeble, but on cleavage face pearly; colour, pale yellow; translucent to transparent; compos.: phosphoric acid, 41.90; lime, 35.42; water, 20.68 = 100.

mēt-a-car-pāl, *a.* [METACARPUS.]

Anat.: Of or pertaining to the metacarpus.

metacarpal saw, *s.*

Surg.: A narrow-bladed saw, for dividing the long bones of the hand or foot.

mēt-a-car-pō, *pref.* [METACARPUS.]

Anat.: Of or belonging to the metacarpus. (q.v.)

metacarpo-phalangeal, *a.*

Anat.: Of or belonging to the phalanges, and to the metacarpus. There are *metacarpophalangeal* articulations.

mēt-a-car-pūs, *s.* [Pref. *meta-*, and Lat. *carpus*, from Gr. *καρπος* (*karpos*) = the wrist.]

Anat.: The bony structure of the palm of the hand, between the wrist and the fingers. It comprises five shafted bones.

mēt-a-čēn-tre (*tre* as *tōr*), *s.* [Pref. *meta-*, and Eng. *centr*.]

Hydros.: The point of intersection of the vertical line passing through the centre of gravity of a floating body in *equilibrium*, and a vertical line through the centre of gravity of the fluid displaced, if the body be turned through a small angle, so that the axis takes a position inclined to the vertical. If the metacentre is above the centre of gravity, the position of the body is stable, if below it, it is unstable.

mēt-a-čēt-a-mide, *s.* [Pref. *meta-*, and Eng. *acetamide*.] [PROPIONAMIDE.]

mēt-ač-ē-tōnc, *s.* [Pref. *met-*, and Eng. *actone*.]

Chem.: C₆H₁₂O. A substance obtained in the dry distillation of sugar or starch with lime. It is a colourless oil, having an agreeable odour, insoluble in water, but very soluble in ether and alcohol.

mēt-ač-ē-tōn-ic, *a.* [Eng. *metactone*(*e*); *-ic*.] Derived from or contained in metactonic acid.

metacetic acid, *s.* [PROPIONIC-ACID.]

mēt-ač-ē-tōn-ī-trile, *s.* [Pref. *met-*, and Eng. *acetone*(*trile*).] [PROFONITRILE.]

mēt-a-chlōr-āl, *s.* [Pref. *meta-*, and Eng. *chloral*.]

Chem.: C₂H₃Cl₃O. Insoluble chloral. A solid, white amorphous substance, formed when chloral is acted on by sulphuric acid. It is insoluble in water, alcohol, and ether. When heated to 180°, it is reconverted into ordinary chloral.

mēt-a-chlōr-ite, *s.* [Gr. *μετα* (*meta*) = after, and Eng. *chlorite*.]

Min.: A foliated columnar mineral of a dull, leek-green colour, and pearly lustre. Hardness, 2½; compos.: silica, 23.7; alumina, 10.43; protoxide of iron, 40.36; magnesia, 3.10; lime, 0.71; potash and soda, 1.45; water, 13.75 = 99.60. Found in veins in a green rock at Büchenberg, near Ellbingerode, Harz.

mēt-a-chrōm-ic, *a.* [Pref. *meta-*, and Eng. *chromic*.] Derived from or containing chromic acid.

metachromic-oxide, *s.*

Chem.: A term applied by Frémy to the oxide of chromium which is precipitated by ammonia from a violet chromic salt, and is soluble in acetic acid, potash, and excess of ammonia, in opposition to the oxide, which, by the action of boiling water, is rendered insoluble in these liquids.

mēt-āch-rōn-ism, *s.* [Gr. *μετά* (*meta*) = after, and *χρόνος* (*chronos*) = time.] An error in chronology by assigning an event to a date after the true one.

mēt-a-čin-na-bar-ite, *s.* [Pref. *meta-*; Eng. *cinnabar*, and suff. *-ite* (*Min.*).]

Min.: A grayish-black amorphous mineral. Hardness, 3; sp. gr. 7.79 to 7.748; lustre, metallic; streak, black; fracture, uneven. Compos.: sulphide of mercury, formula Hg.S. Differs from emmalbar (q.v.) in colour, streak, density, and lustre, being identical in these respects with the artificial mineral. Found at the Redington mine, Lake Co., California.

mēt-a-čin-na-mein, *s.* [Pref. *meta-*, and Eng. *cinnamēin*.]

Chem.: C₁₀H₁₄O₂ = $\left. \begin{matrix} C_9H_7O \\ C_7H_7 \end{matrix} \right\} O$. A crystalline substance, isomeric with cinnamēin, produced by keeping cinnamēin under water for three or four weeks. It melts between 12° and 15°, resolidifying on cooling, but after solution in boiling alcohol it cannot be again obtained in the crystalline form.

mēt-a-čin-na-mēnc, *s.* [Pref. *meta-*, and Eng. *cinnamēnc*.]

Chem.: C₈H₈. Metastyrilene. A white, transparent, highly refractive, solid substance, isomeric with cinnamēnc, formed, together with cinnamēnc and other products, by heating phenylbromethyl with an alcoholic solution of potassic cyanide. By distillation in a small retort, it yields pure liquid cinnamēnc.

mēt-a-čīsm, *s.* [Lat. *metacismus*, from Gr. *μετακισμος* (*metakismos*).] A defect in the pronunciation of the letter *m*; a too frequent repetition of the letter *m*.

mēt-a-cō-paiw-ic, *a.* [Pref. *meta-*, and Eng. *copaiba*.] Derived from or contained in *copaiba* (q.v.)

metacopalvic acid, *s.*

Chem.: C₂₂H₃₄O₄. An acid discovered by Strauss in 1865 in the balsam of *copaiba*, imported from Maracaiho. It crystallizes in laminae, insoluble in water, but is soluble in alcohol and ether, and melts at 205°-206°. It has a bitter taste, an acid reaction, and decomposes carbonates. Its neutral solution in ammonia forms white precipitates with the salts of calcium, barium, and lead.

mēt-āc-rō-icīn, *s.* [Pref. *met-*, and Eng. *acrolein*.]

Chem.: C₃H₄O₂ = 3C₂H₃O. A crystalline body polymetric with acrolein, obtained by heating the hydrochloride of acrolein with potassium hydrate. It forms colourless needle-shaped crystals, insoluble in water, but soluble in alcohol and ether. It melts at 50°, but at a higher temperature is changed into acrolein.

mēt-a-čy-an-ān-ī-līnc, *s.* [Pref. *meta-*; Eng. *cyanogen*, and *aniline*.]

$$\begin{matrix} C(NH) - NH(C_6H_5) \\ Chem.: C_{11}H_{11}N_3 = \\ C(NH) - NH(C_6H_5) \end{matrix}$$
 A modification of cyananiline, obtained by dis-

tiling uramidobenzoic acid with a fourth of its weight of phosphoric anhydride. It melts at 54°.

mēt-a-čy-mēnc, *s.* [Pref. *meta-*, and Eng. *cyane*.] [CYMENE.]

mēt-a-đi-čy-an-ō-bēr-zēnc, *s.* [Pref. *meta-*, and *benzoin*, and Eng. *benzene*.]

Chem.: C₆H₆(C₂N₂). A crystalline substance obtained by distilling the potassium salt of benzene-metadisulphonic acid with potassium cyanide. It is very soluble in water, and melts at 156°.

mēt-a-čēr-ric, *a.* [Pref. *meta-*, and Eng. *ferric*.] Derived from or contained in ferric acid.

metaferric-oxide, *s.*

Chem.: Fe₂O₃.H₂O. An insoluble modification of ferric hydrate produced by boiling the ordinary yellow hydrate in water for six or seven hours. It is then nearly insoluble in strong boiling nitric acid.

mēt-a-fūr-ī-rōl, *s.* [Pref. *meta-*, and Eng. *furfural*.]

Chem.: C₅H₄O₂. An aromatic oil, always present in crude furfural. It has a higher boiling point than furfural, and oxidizes very readily into a brown resin.

mēt-a-gāl-lāte, *s.* [Pref. *meta-*, and Eng. *gallate*.]

Chem.: A salt of metagallie-acid.

mēt-a-gāl-līc, *a.* [Pref. *meta-*, and Eng. *gallic*.] Derived from or contained in gallic acid (q.v.)

metagallic-acid, *s.*

Chem.: C₁₂H₁₀O₆. A black shining mass resembling charcoal, obtained by heating dry gallic acid rapidly to 250°. It is insoluble in water, but soluble in the alkalis, from which it is again precipitated by the addition of an acid. It forms insoluble salts with several of the metals.

mēt-āgc, *s.* [Eng. *met*(*e*), *v.*; *-age*.] METTERAGE.]

1. The act of measuring; measurement, especially of coal.

"An act . . . in relation to the advancement or *metage* of coals."—*Defer*: *Tour thro Britain*, ii. 145.

2. The charge or toll charged for measuring.

mēt-a-gēl-a-tīnc, *s.* [Pref. *meta-*, and Eng. *gelatine*.]

Photog.: Gelatine which has been deprived of its setting power, usually by boiling with ammonia. It is sometimes used in preference to ordinary gelatine in the earlier stages of compounding a gelatine emulsion.

mēt-a-gēn-č-sis, *s.* [Pref. *meta-*, and Eng. &c. *genesis* (q.v.).]

Biol.: A term introduced by Prof. Owen, and defined by him as—

"The changes of form which the representative of a species of animal or plant undergoes in passing by a series of successively generated individuals from the egg to the mature or imago state. It is distinguished from metamorphosis, in which those changes are undergone in the same individual."—*Comp. Anat. Invert. Anim.* (Glossary).

To show the distinction between metamorphosis and metagenesis, he carefully traces the course of development of the Lernean parasite of the perch, and points out that metamorphosis "is attended with the casting-off of a certain proportion of the precedent individual," or the new animal may be said to creep out from the old; while in metagenesis

"the outer case and all that gave form and character to the precedent individual perish and are cast off; they are not changed into the corresponding parts of the new individual. These are due to a new and distinct developmental process, rendered possible through the retention of a certain proportion of the unchanged germ-cells. The process is essentially the same as that which develops the cercarium larva of the Distoma within the gregariniform one, or the external bud from the Hydra, or the internal bud from the Aphis. It is a slightly modified parthenogenesis; and the phases by which the locomotive medusoid larva of the Lerneæ passes through the entomerozoic stage before retrograding to the final condition of the oviparous, limbless, biosted, and rooted parasite, are much more those of a *metagenesis* than of a metamorphosis."—*Comp. Anat. Invert. Anim.*, lect. xiii.

Herbert Spencer (*Principles of Biology*, vol. i., ch. vii.), adopts the term as one of the three divisions of his agamogenesis, and divides it into (1) external, where "the new individuals bud out, not from any specialized reproductive organs, but from unspecialized parts of the parent;" and (2) internal, as in the case of

the "King's-yellow worm" produced in the egg of Distoma. It increases in size, and the greater part of its finer substance is transformed into Cercariae (the larvae of Distoma), until at length it becomes little more than a living sac, full of living offspring. In Distoma parvum, the brood arising by internal gemmation are of the same form as their parent, themselves producing Cercariae after the same manner at a subsequent period.

mēt-a-gē-nēt-ic, mēt-a-gēn-ic, a. [METAGENESIS.] Belonging to or connected with metagenesis (q.v.).

"This second phase or form in the metagenetic process of the entozoon."—Owen: *Comp. Anat. 1850* (4th ed., 2nd), p. 24.

mēt-āg-nōs-tics, s. [Pref. *mēt-*, and Gr. γνῶσις (*gnōsis*) = knowledge.] A synonym for metaphysics, because it transcends ordinary knowledge. (McCulloch & Strong.)

***mēt-a-grām-ma-tism, s.** [Gr. μετὰ (*meta*) = beyond, over, and γραμμα (*gramma*), genit. γραμματος (*grammatos*) = a letter.] The same as ANAGRAMMATISM (q.v.).

"Anagrammatism or metagrammatism, is a dissolution of a name into its letters, as its elements, and a new connection of it by artificial transposition, with or without addition, subtraction, or change of any letter into different words, making some perfect sense applicable to the person named."—Cotton: *Keenies*.

mēt-a-hæ-mō-glō-bin, s. [Pref. *mēt-*, and Eng. *hæmoglobin*.]

Chem.: A mixture of hæmatin and an albuminous substance resembling serum-albumin, produced by the decomposition of hæmoglobin, when a concentrated solution of this substance is left to itself, at ordinary temperatures. It has an acid reaction.

mēt-ā, *met-tal, *met-tall, *met-tle, s. & a. [Fr. *metal*, from Lat. *metallum* = a mine, metal; Gr. μέταλλος (*metallon*) = a pit, a mine, a mineral, a metal.]

A. As substantive:

I. Ordinary Language:

1. Literally:

* (1) A mine.

"It was impossible to live without our king, but as slaves live, that is such who are visibly dead, and persons condemned to metals."—Jer. Taylor: *Ductor Dubitatorum*. (E. D. Beebe.)

(2) In the same sense as II. 4.

"Where one vein is discovered, there is another always found not far off; which is a rule observed not in mines of silver only, but also in all others of what metallist sever; and heretofore it seemeth that the Greeks doe call their metallin (μέτα τα αλλα)."—P. Holland: *Plinie*, bk. xxxiii., ch. vi.

* **2. Fig.**: Courage, spirit, mettle. (Now only written *mettle*.)

"Being glad to find their companions had so much metal, after a long debate the major part carried it."—*Clarendon: Civil War*.

II. Technically:

1. Chem. (Pl.): A term applied, in popular language, to a number of elementary substances which agree in presenting in various degrees certain well-defined physical characters, such as lustre, malleability, and ductility, and of which substances gold and silver may be regarded as typical representatives. In a strictly chemical sense the definition is inadequate, as there are several metallic substances to which it has only a slight and relative application.

2. Civil Engineering:

(1) Broken stone for roads, according to the McAdam principle.

(2) Broken stone around and beneath the wooden ties of a railway; ballast.

3. Foundry: The workman's term for cast-iron.

4. Geol.: Some geologists have supposed that tin is of higher antiquity than copper, copper than lead or silver, and all of them more ancient than gold. But later observation has brought together facts inconsistent with this hypothesis.

5. Glass: The technical name for the molten glass in readiness for blowing or casting.

6. Metall.: [METALLURGY.]

7. Ordn.: The effective power of the guns of a vessel expressed in the sum of the weights of the solid shot.

8. Rail-engin. (Pl.): The rails of a railroad. "The passenger locomotive dashed with great force, completely embedding itself in the tender of the coal train engine, lifting it from the metals, and doing considerable damage to the foremost carriages."—*Daily Telegraph*, Dec. 30, 1884.

B. As adj.: Made of metal; metallic.

* (1) *Bimetallic*:

Currency: The legal obligation of a national mint to coin both gold and silver at a fixed ratio between the two metals, compelled with a law giving debtors the power, unless prevented by special contract, to satisfy their creditors by payment in either of the metals thus coined. This system was first introduced in 1803 by the French law of 7 Germinal, year XI., which enacted that 5 grammes weight of silver, nine-tenths fine, should be coined into the monetary unit of one franc. The kilogramme of standard silver was therefore coined into 200 francs. The same law provided for the kilogramme of standard gold, nine-tenths fine, being coined into 155 pieces of 20 francs, equal to 3,100 francs, or at the rate of 5 grammes weight of standard gold into 15½ francs, thus establishing the mint ratio of 15½ to 1 (i.e., 3/20), which still remains the proportionate weight and comparative mint value, in France, of any given sum in French-coined silver and gold respectively. The mint regulations alone could not, however, make this ratio immutable. Demand and supply, and relative scarcity or abundance of either of the two metals, would cause fluctuations in the ratio of nominal value theoretically fixed by the mint law, if it had not been supplemented by the privilege accorded to debtors in France of paying their creditors either in silver or gold coin, under Art. 1190 of the Code Napoleon.

(2) *Bimetalist*: One who is in favour of Bimetallicism (q.v.).

(3) *Royal metal*: The same as METAL, s., A. II. 1. (1).

metal broker, s. One who deals or trades in metals.

metal casting, s. The act or process of producing casts in metal by pouring it into moulds while in a state of fusion.

metal furniture, s.

Print.: The metallic portion of the pieces used in filling up blanks, &c., in chases. It includes register, side sticks, head and foot sticks, quotation furniture (hollow pieces of metal used to fill up blank spaces), and hollow quadrats. [FURNITURE.]

metal gauge, s. A gauge for determining the thickness of sheet metal.

metal plane, s. A form of plane for facing soft metal plates by taking a fine shaving therefrom. The angle of the plane with the sole is adapted to the hardness of the metal being worked.

metal saw, s. A fine-toothed, hard, steel saw stretched in a frame, and used for sawing metal; a hack-saw.

mēt-ā, v. t. [METAL, s.] To cover with metal; to lay metal on, as roads with broken granite, &c.

mēt-ā-dē-hyde, s. [Pref. *mēt-*, and Eng. *aldehyde*.]

Chem.: C₂H₄O = {CH₂ / COH}. An isomeric modification of aldehyde, formed by the action of dilute acids, calcic chloride, &c., on aldehyde cooled to a temperature below 0°. It crystallizes in needles or prisms, insoluble in water, but slightly soluble in alcohol and ether. It sublimates at 100°, and at a higher temperature is partly reconverted into aldehyde.

mēt-a-lēp-sis, s. [Gr. = participation, from μετὰ (*meta*) = with, and λήψις (*lēpsis*) = a taking, from λήψομαι (*lēpsomai*), fut. of λαμβάνω (*lambanō*) = to take.]

Rhet.: The continuation of a trope to one word through a succession of significations, or the union of two or more tropes of a different kind in one word, so that several gradations or intervening senses come between the word expressed and the thing intended by it: as, "In one Caesar there are many Marines;" here Marins, by a synecdoche or automasmia, is put for any ambitious, turbulent man, and this, by a metonymy of the cause, for the ill effects of such a temper to the public.

mēt-a-lēp-sy, s. [METALEPSIS.]

mēt-a-lēp-tic, mēt-a-lēp-tic-al, a. [Gr. μεταληπτικός (*metalēptikos*) = capable of partaking or receiving.] [METALEPSIS.]

I. Ordinary Language:

1. Pertaining to a metalepsis or participation; transitive.

2. Transverse: as, the *metaleptic* motion of a muscle.

II. Chem.: A term suggested by Dumas to express the substitution of chlorine for hydrogen, atom for atom, in organic compounds.

mēt-a-lēp-tic-al-ly, adv. [Eng. *metaleptic*; *-ly*.] In a metaleptic manner, by transposition.

mēt-al-ine, s. [Eng. *metal*; *-ine*.] A compound for journal-boxes of metal, metallic oxide, organic matter, reduced to powder and compounded with wax, gum, or fatty matters.

mēt-alled, a. [Eng. *metal*; *-ed*.]

I. Ordinary Language:

1. *Lit.*: Coated or covered with metal, as a ship of war.

* **2. Fig.**: Full of mettle or spirit; mettled, adent.

II. Civil Engin.: Covered or overlaid with metal, as a road.

mē-tāl-lic, *mō-tāl-lick, *mē-tāl-lic-al, a. [Lat. *metallicus*, from *metallum* = a mine, a metal; Gr. μεταλλικός (*metallikos*); Fr. *métallique*; Ital. *metallico*; Sp. *metálico*.]

1. Pertaining to a metal or metals; consisting of or containing metal; having the nature or properties of a metal; resembling a metal.

"In his womb was hid metallic mines."

"The work of sulphur."—*Milton: P. L.*, l. 673.

2. Sounding as metal would sound if struck; ringing.

"A distinct, hollow, metallic, and clangorous, yet apparently muffled reverberation."—*E. A. Poe: Fall of the House of Usher*.

* **Bimetallic**: Pertaining to or characteristic of Bimetallicism. [METAL, s. ¶ (1).]

metallic barometer, s. A form of metal barometer, as contradistinguished from an instrument in which a fluid is employed. Also known as a holosteric barometer. Vidi invented the diaphragm form. [ANEROID.] Bourdon invented the bent-tube form; a flattened, curved, exhausted tube, one end of which is fixed and the other geared to an index-pointer which traverses a graduated arc. Changes of pressure of the atmosphere affect the curvature of the tube, and so move the finger.

metallic cartridge, s. A cartridge in which the charge is contained in a metallic capsule, in contradistinction to the paper cartridge.

metallic cuckoo-shrikes, s. pl. *Ornith.*: The genus *Campophaga*, consisting of African cuckoo-shrikes with metallic plumage.

metallic elements, s. pl.

Chem.: Those elements which possess certain properties in a greater or less degree, such as lustre, malleability, ductility, and conductivity for the electric current. The most important are: potassium, sodium, magnesium, barium, strontium, calcium, aluminium, chromium, zinc, manganese, cobalt, nickel, tin, gold, platinum, lead, mercury, silver, copper, cadmium, bismuth, arsenic, and antimony. [ELEMENTS.]

metallic lustre, s. [LUSTRE.]

metallic-oxide, s. A compound of metal and oxygen.

metallic packing, s. Piston-packing, consisting of a ring or several rings of iron or other metal cast so as to possess elasticity in themselves, or cut into segments and pressed against the interior of the cylinder by springs.

metallic paper, s. Paper for memorandum-books, adapted to take an indelible mark from a leaden or pewter pencil. The paper is surfaced with a solution of lime, whitening, and size.

metallic pencil, s. A pencil made with a tip or point of lead or pewter, and used for writing on metallic paper.

metallic-salts, s. pl.

Chem.: Compounds formed by the substitution of a metal or metals for one or more of the displaceable hydrogen atoms in an acid.

metallic-tinkling, s.

Path.: A sound as of tinkling metal heard

fāte, fāt, fāre, āmidst, whāt, fāll, father: wē, wēt, hēre, camel, hēr, thēre; pīnc, pīt, sīre, sir, marine: gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, eūb, eūre, ūnite, eūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā; qu = kw.

by means of the stethoscope, especially if succussion be practised when, in the pneumothorax, air is mingled with liquid in a cell.

metallic-tissue loom, *s.* A loom for weaving with metallic threads, as in making gold and silver lace, braid, &c., entirely of metal, without any mixture of silk or other threads. These looms are also used in making tissues in which the warp is of silk or thread and the weft of gold or silver wire or silk thread covered with a flattened silver wire which has been gilt.

metallic-tractors, *s. pl.*

Hist. & Med.: Plates of metal, which, according to Dr. Elisha Perkins, of Plainfield, Connecticut, possessed the power, when applied to a diseased part, of removing pain, and effecting a cure. Dr. Perkins had an agent in England, and the success claimed for the tractors led to the investigation mentioned in the extract.

"Dr. Hagerath of Bath (in conjunction with Mr. Richard Smith of Bristol) tested the value of Perkins metallic tractors by substituting two pieces of wood, painted in imitation of them, or even a pair of tennery nails disguised with sealing-wax, or a couple of silver-pennils, which they found to possess all the virtues that were claimed for the real instruments. — *Carpenter: Human Physiol.*, p. 265. (Note)

* **mē tāl li-fāc-ture**, *s.* [Lat. *metallum* = a mine, a metal, and *factura* = a making; *fāc-ere* = to make.] The manufacture of metals.

mēt-al-lif-ēr-ōūs, *a.* [Lat. *metallifer* = producing metal; *metallum* = a mine, a metal; *fero* = to bear, to produce, and Eng. adj. suff. *-ous*; Fr. *metallifère*; Ital. *metallifero*; Sp. *metallífero*.] Producing metal, yielding metals; as, a *metalliferous* district.

mē tāl li-form, *a.* [Lat. *metallum* = a mine, a metal, and *forma* = form, shape; Fr. *metalliforme*.] Having the form of metal; resembling metal.

mēt-al-line, *a.* [Fr. *métallin*; Ital. *metallino*; Sp. *metallino*.] Pertaining to a metal or metals; containing or consisting of metal; metallic.

"The quicksilver was by this means brought to appear a very close and lovely metallic cylinder, not interrupted by interspersed bubbles as before." — *Boyle: Works*, i. 49.

mēt-al-līng, *s.* [Eng. *metal*; *-ing*.]

1. The act or system of covering with metal, as roofs.

2. The materials, broken stones, &c., with which roads are metalled.

* **mēt-al-list**, *s.* [Fr. *metalliste*.] A worker in metals; one who is skilled in metals and their properties.

"Ignorant metallists, which cast away the precious ore because they cannot separate the gold from the dross." — *Sp. Hall: Richardson*.

* **mēt-al-li-zā-tion**, *s.* [Eng. *metalliz-(-)*; *-ation*; Fr. *metallisation*.] The act or process of metallizing or forming into a metal.

* **mēt-al-lize**, *v.t.* [Eng. *metal*; *-ize*; Fr. *metalliser*; Sp. *metallizar*.] To form into a metal; to give proper metallic properties to.

mē-tāl-lō-chrōme, * **mē-tāl-lō-chrō-mŷ**, *s.* [Gr. *μεταλλο* (*metallon*) = a metal, and *χρῶμα* (*chrōma*) = colour.] A colouring of metals by means of galvanism. It is an invention of Nobili, and consists in depositing thin films of a metal on metallic bodies by means of a galvanic battery, so as to form a number of rings. As the deposited rings are not everywhere of the same thickness, they produce elevations and depressions, which, though not visible to the naked eye, nevertheless cause a refraction of the rays of light, thus giving rise to the formation of prismatic colours.

mēt-al-lōg'-ra-phist, *s.* [Eng. *metallurgist*; *-ist*.] A writer upon metallurgy or the science of metals.

mēt-al-lōg'-ra-phŷ, *s.* [Gr. *μεταλλο* (*metallon*) = metal, and *γραφῆς* (*graphēs*) = to write, to describe; Fr. *metallurgie*.]

1. The science of metals; an account of metals or metallic substances.

2. A process invented by Abate, in 1851. It consists in printing from wooden blocks upon metallic surfaces, so as to produce imitations of the grain of the wood. A veneer of wood is wetted with a solution of hydrochloric or sulphuric acid, and is then impressed upon

the metal so as to cause the deposition of a coloured metallic oxide. Or the impression is taken on calico, which is then in a condition to transfer it to the metal under pressure.

3. A substitute for lithography in which metallic plates are substituted for the lithographic stone.

mēt-al-lōid, *a. & s.* [Gr. *μεταλλο* (*metallon*) = metal, and *εἶδος* (*eidos*) = form, appearance; Fr. *metalloïde*.]

A. *As adj.*: Having the form or appearance of a metal; like, relating, or pertaining to metalloids.

B. *As substantive*:
Chem. (Pl.): Non-metallic elements. A term applied by Berzelius, in 1811, to distinguish the non-metallic elementary substances from the metals, in which sense it has been commonly used to the present time. The non-metallic elements are: oxygen, sulphur, chlorine, bromine, iodine, fluorine, nitrogen, phosphorus, carbon, boron, silicon, hydrogen, selenium, and tellurium.

* **mēt-al-lōid-al**, *a.* [Eng. *metalloid*; *-al*.] The same as METALLOID, A. (q.v.).

mēt-al-lūr-gic, **mēt-al-lūr-gic-al**, *a.* [Eng. *metallurgy*; *-ic*, *-ial*; Fr. *metallurgique*; Ital. *metallurgico*.] Of or pertaining to metallurgy or the art of working metals.

metallurgic-chemistry, *s.*
Chem.: The term embraces the application of chemical principles, as distinct from mechanical means, in the separation of metals from their ores and compounds. It includes melting by reduction, as when hydrocarbons are brought into contact with metallic oxides at a high temperature; melting by oxidation of impurities; separation by solvents, as when lead is employed to recover silver and gold from their sulphides; and the precipitation of one metal by another, as in the case of the deposition of copper from its solution by metallic iron, together with the application of the laws of electricity in the important process of electro-plating, &c.

mēt-al-lūr-gist, *s.* [Eng. *metallurgist*; *-ist*; Fr. *metallurgiste*.] A worker in metals; one who purifies, refines, and prepares metals for use.

mēt-al-lūr-gŷ, *s.* [Fr. *metallurgie*, from Low Lat. **metallurgia*, from Gr. *μεταλλουργός* (*metallourgos*) = working in metals, mining; *μεταλλουργεω* (*metallourgeo*) = to work metals; *μεταλλον* (*metallon*) = metal, and *εργον* (*ergon*) = work; Ital. *metallurgia*; Sp. *metallurgia*.] The art of separating metals from their ores or from impurities; comprehending the processes of smelting, reducing, refining, alloying, parting, plating, &c.

* **mēt-al-mān**, *s.* [Eng. *metal*, and *man*.] A worker in metals, a smith.

* **mēt-a-lōg'-ic-al**, *a.* [Prof. *meta-*, and Eng. *logical*.] Beyond the province of logic.

mēt-a-lū-mīn-a, *s.* [Prof. *met-*, and Eng. *aluminum*.]

Chem.: A name applied to the soluble dihydrate of alumina, obtained by dissolving a solution of acetate altered by heat. The solution is tasteless, and neutral to test paper.

mēt-āl-y-sis, *s.* [Prof. *meta-*, and Eng. (*an-*) *lysis*.]

Chem.: Döbereiner's name for Catalysis (q.v.).

mēt-a-mar-gār-ic, *a.* [Prof. *meta-*, and Eng. *margaric*.] Contained in or derived from margaric acid.

metamargaric-acid, *s.*
Chem.: An acid once supposed to be isomeric with margaric acid, but now known to be a mixture of stearic and palmitic acids.

mēt-a-mē-cōn-ic, *a.* [Prof. *meta-*, and Eng. *meconic*.] Contained in or derived from meconic-acid.

metameconic-acid, *s.* [COECONIC-ACID.]

mēt-a-mēre, *s.* [Gr. *μετά* (*meta*) = with, among, and *μερος* (*meros*) = a part.]

Comp. Anat.: One of a series of similar parts.

mēt-a-mēr-ic, *a.* [METAMERISM.]

Chem.: Referring to the quality of metamerism.

mē-tām-ēr-ism, *s.* [Prof. *meta-*; Gr. *μερος* (*meros*) = a part, and Eng. *smil.* *-ism*] [ISOMERISM.]

mēt-a-mor-phŷe, *a.* [Eng. *metamorphosis*; *-ic*.]

1. *Ord. Lang.*: Producing or causing metamorphosis; transforming; causing change in form or structure.

2. *Geol.*: (See the compound).

metamorphic limestone, *s.*
Geol.: Crystalline or, as it was called by the older geologists, Primary Limestone. In general it occurs in thin beds forming a foliated schist, resembling gneiss or mica schist, and alternating with those rocks, in which case it often contains crystals of mica, sometimes with quartz, hornblende, talc, chlorite, garnet, &c. At other times, it is a white, crystalline, granular marble, capable of being used for sculpture. It is largely developed in the Alps, and more sparingly in the hypogean districts of Norway, Sweden, and Scotland.

metamorphic rocks, metamorphic strata, *s. pl.*

Geol.: The term—first proposed by Lyell in 1833, and since universally adopted—for the stratified crystalline rocks—that is, rocks which have been presumably laid down originally by the action of water, and then transformed by fire, chemical agency, pressure, or all combined. Metamorphic action is divided into local affecting only small portions of rock, or small areas, and regional—affecting rocks over considerable regions. The metamorphic rocks constitute one of the five great classes of rocks. The chief are gneiss, mica schist, hornblende schist, serpentine, actinolite schist, mica-schist or micaceous schist, clay slate, argillaceous schist, or argillite, chlorite schist, quartzite or quartz rock, and crystalline or metamorphic limestone. Besides these which were probably at first sedimentary, the other classes of rocks have in places undergone metamorphosis.

mēt-a-mor-phŷine, *s.* [Prof. *meta-*, and Eng. *morphine*.]

Chem.: An opium base obtained from the residue in the preparation of opium tincture. It crystallizes from alcohol in stellate groups of prisms. It is not bitter; dissolves in 600 parts cold water, and in nine parts boiling alcohol. It is nearly insoluble in ether.

mēt-a-mor-phŷm, *s.* [Eng. *metamorphosis*.]

1. *Ord. Lang.*: The act or process of meta-morphosing or changing the form or structure of anything.

2. *Geol.*: The changes, chemical, mineralogical, and textural, which have been produced in the rocks, called, in consequence, metamorphic. [METAMORPHIC-ROCKS.]

mēt-a-mor-phist, *s.* [Eng. *metamorphosis*; *-ist*.]

Church Hist.: A name given to certain sacramentarians of the fifteenth century, who affirmed that Christ's natural body with which he ascended was wholly deified, and had entirely lost its humanity. (*Shipley*.)

* **mēt-a-mor-phize**, *v.t.* [Eng. *metamorphosis*; *-ize*.] To transform, to change, to metamorphose.

mēt-a-mor-phōse, *v.t.* [Fr. *métamorphoser*.] [METAMORPHOSIS.] To transform; to change into a different form; to change the form, shape, or character of; to transmute.

"Can true substantiate, *metamorphose*,
And charin whole herds of beasts, like Orpheus"
Butler: Macellaneous Thought

* **mēt-a-mor-phōse**, *s.* [METAMORPHOSIS, *v.*] A change of form or character; a metamorphosis, a transformation.

"What odious change,
What metamorphose strikes the dubious eye?"
Thompson: Sarcinae, ll.

* **mēt-a-mor-phōsēr**, *s.* [Eng. *metamorphoser*; *-er*.] One who or that which metamorphoses, changes, or transforms.

mēt-a-mor-phōsŷic, *a.* [Eng. *metamorphosis*; *-ic*.] Of or pertaining to metamorphosis; changing the form or character; transforming.

mēt-a-mor-phōsŷis, *s.* [Lat., from Gr. *μεταμορφωσις* (*metamorphōsis*) — a transmuta-

tion, from μεταμορφωσις (metamorphōsis) = to change, to be transformed; μετα (meta) = denoting change, and μορφή (morphē) = to form; μορφή (morphē) = form, shape; Fr. metamorphose; Ital. metamorfosē; Sp. metamorfosis.

I. *Ord. Lang.*: A change or transformation in the form, shape, structure or character of anything.

"There are probable machines in epic poems, where the gods are no less actors than the men, but the less creditable sort, such as metamorphoses, are far more rare."—*Brown*: *On the Odyssey*.

II. *Technically*:

1. *Bot.*: A change, especially of an abnormal character, in an organ. It may be progressive or retrogressive. Calyx, corolla, stamens, and pistils are all transformed leaves. This interesting discovery—foreshadowed by Jung or Jungius in 1678, Linnæus in 1763, and Caspar Friedrich Wolff in 1759—was first clearly enunciated by Goethe in 1790. In the Peony, *Paeonia albiflora*, a whole series of connecting links may be observed between the form of the lower leaves and that of the petals, the higher leaves and then the bracts being the connecting links. In the White Water-lily, *Nymphæa alba*, a similar gradation may be observed between petals and stamens. In the double-flowered cherry the pistils will sometimes be found to have reverted to the appearance of leaves.

2. *Entom.*: A series of transformations which insects undergo in their progress from the egg to full maturity. Mæcley divided metamorphosis into oötect, as in Lepidoptera and Trichoptera; coarctate, as in Hymenoptera and Diptera; incomplete, as in Coleoptera and Aptera; and semi-complete, as in Orthoptera and Hemiptera. Now only two divisions are generally recognized—viz., perfect when the pupa is inactive, and imperfect when it is the reverse. In the Lepidoptera (Butterflies and Moths), the metamorphosis is complete. They may stand as types in this respect of the whole class. The animal emerges from the egg as a caterpillar with six legs, which will become the future legs of the perfect insect, and some prolegs, destined to disappear. Its function in the larval state is to eat, which it does with such vigor and persistency that its skin, time after time, becomes too small to contain its expanding body, and has to be renewed. When the caterpillar is full grown it ceases to eat, becomes quiescent, and has developed around it a horny case, in which it lies like a corpse in its coffin. In due time it makes its way out of its chrysalis as a fully-developed winged animal. There are analogous changes more or less complete in the other orders.

3. *Zool.*: Metamorphosis takes place in many other animals besides insects. Thus a barnacle (Lepas) or an acorn-shell (Balanus) is at first a free and swimming creature, which ultimately becomes sedentary and attached to rocks or ships' bottoms. Metamorphosis exists also in Annelids, in Molluscs, in Hydrozoa, &c. [METAGENESIS.]

* **mēt-a-mor-phōs-tic-al**, *a.* [Eng. metamorphosic]; *l* connecting, and suff. -al.] Pertaining to or produced by metamorphosis.

mēt-a-mor-phēt-ic-a, *a.* [METAMORPHOSIS.]

Entom.: An epithet applied to a system originated by Swammerdam for the classification of insects.

"The metamorphotic system divides insects into those that undergo complete and incomplete metamorphoses."—*Encyc. Brit.* (ed 9th), xiii, 142.

mēt-ām-ŷ-lēne, *s.* [Pref. met-, and Eng. anylene.]

Chem.: C₂₀H₃₀. A compound polymeric with anylene, contained in the higher portion of the distillate produced by heating anylic alcohol with sulphuric acid.

Mēt-ān-gis-mōn-ī-tæ, *s. pl.* [Gr. μετὰ (meta) = in; ἀγγεῖον (anggeion) = a vessel, a receptacle, and μόνος (monos) = alone, only.]

Church Hist.: A sect of heretics of the third century, who maintained that the union between the Father and the Son in the Trinity was effected by the Son entering into the Father, as a lesser vessel may be placed in a greater. (*Idem*.)

mēt-ān-tī-mōn-īc-a, *a.* [Pref. met-, and Eng. antimonic.] Derived from antimony.

metantimonic acid, *s.*

Chem.: SbO₂HO. A white powder obtained

by the action of nitric acid, containing a little hydrochloric acid on metallic antimony. It is sparingly soluble in water, and its solution reddens litmus.

mēt-a-pēc-tāte, *s.* [Eng. metpectic]; -ate. (*Chem.*.)

Chem.: A salt of metapectic acid.

mēt-a-pēc-tic-a, *n.* [Pref. meta-, and Eng. pectic.] Derived from pectic acid.

metapeptic acid, *s.*

Chem.: C₆H₁₄O₄ (?). Acide cellulosique. An amorphous mass obtained by boiling pectic acid with caustic alkali. It is deliquescent, soluble in water, and destitute of rotatory power. The metapectates, except the basic salts, are all soluble in water.

mēt-a-pēc-tin, *s.* [Pref. meta-, and Eng. pectin.]

Chem.: An isomeric modification of pectin (q.v.).

mē-tāph-ēr-ŷ, *s.* [Gr. μεταφέρω (metapherō) = to carry over, to transfer; pref. meta-, and Gr. φέρω (pherō) = to bear, to carry.]

Bot.: Displacement of organs.

mēt-a-phōr, * **met-a-phore**, *s.* [Fr. *metaphora*, from Lat. *metaphora*, from Gr. μεταφορά (metaphora) = a transferring of a word from its proper signification to another, from μεταφέρω (metapherō) = to transfer, to carry over; μετὰ (meta) = over, beyond, and φέρω (pherō) = to bear, to carry; Sp. & Ital. *metafora*.]

Rhet.: A figure of speech by which a word is transferred from an object to which it properly belongs to another, in such a manner that a comparison is implied though not formally expressed; a simile without any word implying comparison; a short simile. Thus, "that man is a fox," is a metaphor; but "that man is like a fox," is a simile. "He bridle his temper," is a metaphor, expressing that a man restrains or controls his temper, as a bridle serves to restrain or control a horse.

"Analogies are used in aid of conviction; metaphors as means of illustration."—*Coleidge*: *Aids to Reflection* (1839), p. 149.

mēt-a-phōr-ic, **mēt-a-phōr-ic-al**, *a.* [Fr. *metaphorique*, from Gr. μεταφορικος (metaphorikos), from μεταφορά (metaphora) = a metaphor; Ital. & Sp. *metaphorico*.] Pertaining to or of the nature of a metaphor; containing a metaphor; not literal; not to be understood literally.

"This does not, at the very first sight, appear to be a metaphorical expression."—*South*: *Sermons*, vol. v., ser. 7.

mēt-a-phōr-ic-al-ŷ, *adv.* [Eng. metaphorical; -ly.] In a metaphorical manner; in metaphors; not literally.

"I make bold thus to talk metaphorically for the ripening of the wits of young readers."—*Bunyan*: *Pilgrim's Progress*, pl. ii.

* **mēt-a-phōr-ist**, *s.* [Eng. metaphor; -ist.] One who makes or uses metaphors.

mēt-a-phōs-phates, *s. pl.* [Pref. meta-, and Eng. phosphatic.]

Chem.: The salts of metaphosphoric acid, obtained by igniting the dihydric phosphate of a fixed base.

mēt-a-phōs-phōr-ic-a, *a.* [Pref. meta-, and Eng. phosphoric.] Derived from phosphoric acid.

metaphosphoric acid, *s.*

Chem.: PO₃HO. A acid formed by dissolving phosphoric anhydride in cold water. It is very soluble in water, and its solution coagulates albumen.

* **mēt-a-phrāse**, *s.* [Gr. μεταφράσις (metaphrasis) = a paraphrasing, from μετὰ (meta) = denoting change, and φράσις (phrasis) = a saying, a phrase.]

1. A literal or verbal translation; a translation from one language into another, word for word, or phrase for phrase.

"His metaphrase of the Psalms is still in our hands."—*Sp. Hall*: *To Mr. S. Burton*.

2. A phrase replying to another; a rejoinder.

"I'm somewhat dull still in the manly art Of phrase and metaphrase."—*E. B. Bennett*: *Aurora Leigh*, vii.

* **mēt-a-phrāse**, *v. t.* [METAPHRASE, *s.*] To translate literally; to render word for word.

* **mēt-a-phrāst**, *s.* [Gr. μεταφράστης (metaphrastis) = one who translates from one language into another; Fr. *metaphraste*.] A literal translator; one who translates from one language into another word for word.

"George Sandys, Esq., the famous traveller and excellent poetical metaphrast."—*Wood*: *Fasti Ozoniensia*, p. 1285.

* **mēt-a-phrās-tic**, * **mēt-a-phrās-tic-al**, *a.* [Eng. metaphrast; -ic, -ial.] Closely or literally translated; translated word for word.

"Maximus Planudes, who has the merit of having familiarised to his countrymen many Latin classics of the lower empire, by metaphrastic versions."—*Barton*: *Hist. Eng. Poetry*, p. 169.

† **mēt-a-phrō-nōn**, *s.* [Gr. μετάρηρον (metarēron) (see det.), pref. meta-, and Gr. φρήν (phrēn) = the midriff.]

Anat.: The parts behind the midriff—i.e., the back from the neck to the loins.

† **mēt-a-phŷs-ic**, * **mēt-a-phŷs-ike**, *a. & s.* [Lat. *metaphysicus* = metaphysical; *metaphysica* = metaphysics, from Gr. μετα τα φυσικά (meta ta physika) = after physics; because the study of metaphysics was supposed fitly to follow that of physics or natural science.]

A. As adjective:

1. Of or pertaining to metaphysics; abstract, general; existing only in thought, and not in reality.

"By any metaphysick book."—*Greiv*: *Coma Sæcra*, bk. iv., ch. viii.

2. According to the rules or principles of metaphysics.

3. Supernatural, preternatural.

B. As subst.: Metaphysics.

"Of logic, of natural philoia, of metaphisike."—*Tyndall*: *Workes*, p. 304.

¶ The form metaphysic as a substantive is growing in favour, especially among the students of German philosophy.

mēt-a-phŷs-ic-al, *a.* [Eng. metaphysic; -al.] The same as METAPHYSIC (q.v.).

"Language more precise and luminous than has ever been employed by any other metaphysical writer."—*Mercall*: *Hist. Eng.*, ch. ii.

mēt-a-phŷs-ic-al-ŷ, *adv.* [Eng. metaphysical; -ly.] In a metaphysical manner; according to the rules or principles of metaphysics.

"Those who discourse metaphysically of the nature of truth."—*South*: *Sermons*, vol. vii., ser. 5.

mēt-a-phŷ-sī-cian, *s.* [Eng. metaphysic; -ian.] One who studies or is versed in the science of metaphysics.

* **mēt-a-phŷ-sī-cian-ism**, *s.* [Eng. metaphysicista; -ism.] The science of metaphysics.

"Phrenology and metaphysicismism."—*E. A. Poe*: *Insp. of the Poet*.

mēt-a-phŷs-i-cō, *pref.* [METAPHYSIC.]

metaphysico-theological, *a.* Embracing metaphysics and theology.

mēt-a-phŷs-ics, **mēt-a-phŷs-ic**, * **mēt-a-phŷs-icks**, *s.* [METAPHYSIC.]

1. *Hist. & Philos.*: A term popularly employed to denote a science dealing with subjects incapable of being dealt with by physical research. Broadly viewed, the Aristotelian metaphysic was the science of the first principles of being, the science of the first principles of knowing, and the science of God, as the beginning and ending of all things; and these three were the foundation of scholastic philosophy, which found its highest expression in Thomas Aquinas (circa 1225-1274). Metaphysics "is made by him conversant with being as such and its modifications. In itself each *ens* is *res* and *numm*; in distinction from others it is *aliquid*; as in harmony with the action of the knowing faculties, it is *verum*; and as harmonizing with the will, it is *bonum*." The Roman metaphysic of the present day is, to a great extent, Thomist, and is divided into General, or Ontology, and Special, embracing Cosmology, Psychology, and Natural (as distinguished from Moral and Dogmatic) Theology. The Leibnitzo-Wolffian metaphysic is noteworthy for its rationalistic tendency. Its ontology treats of the existent in general; its rational psychology, of the soul as a simple non-extended substance; its cosmology, of the world as a whole; and its rational theology of the existence and attributes of God. The Metaphysic of Kant was rationalist. Sum-

fāte, fāt, fare, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, pit, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = e: ey = ā; qu = kw.

marizing the remarks accompanying his notice of the course for 1765, Wallace says :

"In the course on Metaphysics the early lectures would deal with experimental Psychology, where, avoiding all mention of a soul, a reasoned account would be given of the facts or phenomena of the mental life. Going on next to the theory of living bodies (the Biology of the period), and thence to Cosmology, or the theory of the material world, he would come in the fourth place to Ontology, which expounds the general properties of things, and includes rational Psychology (where the idea of soul or spirit is brought in), and would terminate with rational Theology."—*Acad.*, v. 131.

Sir William Hamilton (1788-1856) gives the following definition :

"Science and Philosophy are conversant either about Mind or about Matter. The former of these is Philosophy properly so called. With the latter we have nothing to do, except in so far as it may enable us to throw light upon the former, for metaphysics, in whatever latitude the term be taken, is a science or exemplification of sciences, exclusively occupied with mind."—*Lect. on Metaphysics*, i. 721.

Auguste Comte, the founder of the Positivist philosophy, excluded metaphysics from his system, substituting for it the teachings of positive science. One of the latest authorities on the subject, Prof. Ferrier of St. Andrews, says (*Institutes*, pp. 36, 37) :

"Metaphysic is the substitution of true ideas—that is, of necessary truths of reason—in the place of the oversights of popular opinion and the errors of psychological sciences.

The three divisions of his philosophy—for he prefers that term to metaphysic—are, "(1) The Epistemology, or theory of knowledge; (2) the Agnology, or theory of ignorance, and (3) the Ontology, or theory of being."

"2. Supernatural arts. (*Uckerum*.)

*** mē-tāph-ŷ-sis**, *s.* [Gr. *μετά* (*metá*), denoting change, and *φύσις* (*phúsis*) = nature; *φύω* (*phúō*) = to grow.] Change of form or character; transformation; metamorphosis.

*** mēt-a-plāsm**, *s.* [Lat. *metaplasmus*, from Gr. *μεταπλάσμος* (*metaplasmos*), from *μεταπλάσσω* (*metaplassō*) = to transform, to change; *μετά* (*metá*), denoting change, and *πλάσσω* (*plássō*) = to form, to mould; Fr. *metaplasme*; Ital. & Sp. *metaplasmo*.]

Gram. : The change or transformation of a word by the addition, transposition, or taking away of a letter or syllable.

mēt-a-pō-dī-ŭm, *s.* [Pref. *meta-*, and Gr. *πούς* (*poús*), genit. *ποδός* (*podós*) = a foot.]

Zool. : The posterior lobe of the foot in the Mollusca. It is often called the opercular lobe, because it develops the operculum, when that structure is present.

mēt-a-pōph-ŷ-sis, *s.* [Pref. *met-*, and Eng., & *apophysis*.]

Ant. (*Pl.*) : Owen's name for the mammillary processes of the vertebrae.

mēt-ap-tēr-ŷ-gōld, *s.* [Pref. *meta-*, and Eng. *pterygoid* (q.v.).]

Ichthy. : A modification of the malleus bone in osseous fishes.

mēt-ap-tō-sis, *s.* [Pref. *meta-*, and Eng., & *phosis* (q.v.).]

Med. : Any change in the form or seat of a disease.

zāet-ār-a-bin, *s.* [Pref. *met-*, and Eng. *arabin*.]

Chem. : C₁₂H₂₂O₁₁. A substance obtained by heating arabin to 130-140°. It is insoluble in water, but swells up enormously in it. By treating it with a solution of potassic hydrate, or lime water, it forms the metallic derivatives of ordinary arabin.

mēt-ar-sēn-ic, *a.* [Pref. *met-*, and Eng. *arsenic*.] Derived from arsenic.

metarsenic-acid, *s.*

Chem. : As₂O₃H₂. A white nacreous mass, obtained by heating arsenic acid to 206°. It can only exist in the solid state. When dissolved, it is at once converted into ortharsenic acid.

mēt-a-sōme, **mēt a sō-ma**, *s.* [Pref. *meta-*, and Gr. *σώμα* (*sōma*) = the body.]

Zool. : The hinder portion of the body in a cephalopodous mollusc. It is enveloped in the mantle and contains the viscera.

mēt-a-stān-nic, *a.* [Pref. *meta-*, and Eng. *stannic*.] Derived from tin.

metastannic-acid, *s.*

Chem. : Sn₂O₃HO₂. An acid polymeric

with stannic acid, prepared by oxidizing tin with nitric acid, and drying the product at 100°. It is insoluble in water.

mē-tās-tā-sis, *s.* [Gr., from *μετά* (*metó*) = over, change, and *στάσις* (*stasis*) = a standing, position; *ἵσταναι* (*hístanaí*) = to place, to stand.]

1. *Med.* : A change in the seat of a disease, attributed by the Humorists to the translocation of morbid matter to a part different from that which it had previously occupied, and by the Solidists to the displacement of the irritation.

2. *Bot.* : A change produced upon a substance designed for the nutriment of a plant, to make its assimilation more easy. Thus, when the starch formed in the leaf of a potato has to be transferred to the tubers as a depot of nutritive material, it is first changed into a soluble substance—glucose.

mēt-a-stāt-ic, *a.* [METASTASIS.] Pertaining or relating to metastasis.

mēt-a-stēr-nūm, *s.* [Pref. *meta-*, and Gr. *στέρον* (*stéron*) = the chest.]

Ant. : The sixth segment of the sternum (breast-bone), generally remaining cartilaginous up to the period of puberty, and sometimes partially so even to an advanced age. Called also the ensiform process.

mē-tās-tō-ma, *s.* [Pref. *meta-*, and Gr. *στόμα* (*stoma*) = a mouth.]

Zool. : A post-oral plate or process homologous the hinder part of the aperture of the mouth in the various crustacea, as the lobster, the species of fossil Euryptera, &c.

mēt-a-stŷ-rōl, *s.* [Pref. *meta-*, and Eng. *strol*.] [METACINAMENE.]

mēt-a-stŷ-rō-lēnc, *s.* [Eng. *metastylol*; *-ene*.] [METACINAMENE.]

mēt-a-tar-sal, *a. & s.* [Mod. Lat. *metatarsus* (*us*); Eng. adj. suff. *-al*.]

A. As adj. : Of or pertaining to the metatarsus; as, the *metatarsal* artery, *metatarsal* articulations.

B. As substantive :

Ant. : Any bone of the metatarsus; as, the third *metatarsal*.

mēt-a-tar-sō-, *pref.* [METATARSUS.] Of or belonging to the metatarsus.

metatarso-digital, *a.* Of or belonging to the metatarsus and the digits. There are *metatarso-digital* articulations of the foot.

mēt-a-tar-sūs, *s.* [Pref. *meta-*, and Lat., & *tarsus* (q.v.).]

Ant. : That part of the foot situated between the tarsus and the toes. It corresponds to the metacarpus, and is composed of five parallel bones, one to each toe. It exists also in the higher vertebrates.

mēt-a-thēr-ŷ-a, *s. pl.* [Pref. *meta-* (here = intermediate), and Gr. *θηρία* (*théria*), pl. of *θηρion* (*thérion*) = a wild animal.]

Zool. : A name proposed by Prof. Huxley, and adopted by Prof. Flower in his article "Mammalia," in the *Encyclopædia Britannica* (ed. 9th), for a hypothetical group of early mammals, and their successors in time (the Marsupialia).

"We have the mammalian type in a higher stage of evolution than that presented by the Prototheria and the Metatheria."—*Proc. Zool. Soc.*, 1880, p. 657.

mēt-a-thēr-ŷ-a, *a. & s.* [METATHERIA.]

A. As adj. : Belonging to or possessing the characteristics of Huxley's mammalian group Metatheria (q.v.).

"There is no known mammal which has not far more widely departed from the Metatherian type."—*Proc. Zool. Soc.*, 1880, p. 657.

B. As subst. : Any individual of the group Metatheria (q.v.).

mē-tāth-ē-sis, *s.* [Lat., from Gr. *μετάθεσις* (*metathesis*), from *μετά* (*metá*), denoting change, and *θεσις* (*thesis*) = a placing; *τέθηκα* (*téthēka*) = to place; Fr. *metathèse*.]

1. *Gram.* : The transposition of the letters of a word; as, A.S. *ways* = wasp; *ascian*, *ascion* = ask; *bird* = bird, &c.

2. *Surg.* : An operation by which a morbid agent is removed from one place to another, where it may produce less disturbance; as, for instance, when a calculus in the urethra is pushed back into the bladder.

mēt-a-thēt-ic, **mēt-ā-thēt-ic**, *a.* [METATHESIS.] Pertaining to metathesis; formed by metathesis.

mēt-a-thōr-āx, *s.* [Pref. *meta-*, and Gr. *θώραξ* (*thōraξ*) = the breast.]

Entom. : The hindmost of the three rings or segments of which the thorax of an insect is composed.

mēt-a-tōme, *s.* [Gr. *μετά* (*metá*) = beyond, after, and *τομή* (*tómē*) = a cutting; *τεταω* (*tētaw*) = to cut.]

Dent. : The space between two dentils.

mēt-a-vōit-ine, *s.* [Pref. *meta-*; Eng., & *vōit* (*vōit*), and suff. *-ine* (*Mōn.*).]

Min. : A sulphur-yellow mineral occurring in aggregates of hexagonal scales at Madra Zaku, Persia. Dichroic. Hardness, 2.5; sp. gr. 2.53; composes : sulphuric acid, 46.99; sesquioxide of iron, 21.29; protoxide of iron, 2.92; potash, 9.87; soda, 4.65; water, 14.8. Much of the mineral called Misy belongs to this species.

mē-tāx-ite, *s.* [Gr. *μετάξα* (*metaxá*) = silk; suff. *-ite* (*Mōn.*); Ger. *metaxite*.]

Min. : A variety of serpentine, included by Dana with the variety Picroste (q.v.); colour, greenish-white, with weak and silky lustre. Found at Schwarzenberg, Saxony.

mē-tāx-ō-ite, *s.* [Gr. *μετάξα* (*metaxá*) = silk; suff. *-ite* (*Mōn.*); Ger. *metaxant*.]

Min. : A greenish-blue to nearly white variety of chomerte (q.v.). Sp. gr. 2.58 to 2.61. The oxygen ratio for bases, silica and water, is 5 : 6 : 3. Found near Luopikko, Finland. Named metaxoite from its nearness to metaxite.

mē-tā-yer, *s. & a.* [Fr., from Low Lat. *medietarius*, from *medius* = the state of being in the middle; *medius* = the middle.]

A. As subst. : A cultivator who cultivates the soil under an engagement with his landlord, not paying a fixed rent, either in money or in kind, but a certain proportion, generally one-half, of the produce, the landlord furnishing the whole or part of the stock, tools, &c.

B. As adj. : A term applied to the system of land-cultivation described in A.

mēt-a-zō-a, *s. pl.* [METAZOON.]

mēt-a-zō-ic, *a.* [Eng. *metazoön* (*on*); *-ic*.] Belonging to or characteristic of Prof. Huxley's division Metazoön. [METAZOON.]

"What distinguishes the *metazoön* aggregate is that its component blastomeres remain united into one histological whole."—*Huxley, A set Invert Animals*, p. 47.

mēt-a-zō-ōn, *s.* [Pref. *meta-*, and Gr. *ζῷον* (*zōōn*) = an animal.]

Zoology :

1. *Sing.* : Any individual belonging to the division Metazoön. [2.]

"It is quite possible to conceive of an adult metazoön having the structure of a sponge embryo."—*Huxley, Ant. Invert Animals*, p. 64.

2. *Pl.* : According to Prof. Huxley, the second and higher division of the animal kingdom, the first and lower being Protozoön. [Protozoön.] The whole of the metazoön may be regarded as modifications of one actual or ideal primitive type, which is a sac with a double cellular wall, enclosing a central cavity, and open at one end. This is what Haeckel terms a gastræa. The first change which takes place in the development of the embryo from the impregnated ovum is the division of the ovum, and the simplest form of division results in the formation of a spheroidal mass of blastomeres. The morula thus formed generally acquires a central cavity, and becomes a hollow vesicle, the wall of which is the blastoderm, the cells of which give rise to the histological elements of the adult body. Reproduction is normally sexual, and very generally the male element has the form of filamentous spermatozoön. The sponges are the lowest of the Metazoön, under which designation the Vertebrata are included, and those Invertebrata possessing a notochord, and having the trunk divided into segments in the adult state. (*Huxley, Ant. Invert Animals*.)

mēcte (l), *** meate**, *v.t. & i.* [A.S. *metan*, *mectan* = to measure; cogn. with Dat. *metō*; Icel. *meta* = to tax, to value; Sw. *mät* = to measure; Goth. *metan*; Ger. *messen*; from

1. *Literally*: A luminous body appearing for a few moments in the sky, and then disappearing, exploding or descending to the earth; a shooting star. On any clear night an occasional meteor may be seen, but the most brilliant displays are confined to particular dates. A very notable one is on Nov. 13 or 14. In 1864, Prof. H. A. Newton, of Yale College, predicted a display in 1866, and determined the length of the meteoric cycle, the annual period, and the probable orbit round the sun of the November stream. The display which came on Nov. 13, 1866, was splendid. It was seen all over Europe, at the Cape of Good Hope, and elsewhere. About eight thousand meteors were counted at Greenwich, and it is supposed that another thousand may have escaped observation. They came from a radiant point 149° 12' of right ascension, and 23° 1' of north declination, between γ and ϵ Leonis, just north of the bright star Regulus. On an average, each meteor was visible about three seconds, and drew a cord of silver radiance from twenty to forty degrees in length. In Nov., 1867 and 1868, considerable star showers were seen in the United States. Similar displays have been seen in the Nov. of the years 902, 931, 934, 1002, 1101, 1202, 1366, 1533, 1602, 1688, 1799, 1832, and 1833. That of Nov. 12, 1799, was one of the finest. It was seen by Humboldt and Bonpland at Cumana, in South America. Prof. Adams places the more magnificent displays at intervals of thirty-three and a quarter years apart, and brilliant showers were expected in 1899, but little was seen of them. It is believed that a ring of meteors revolves round the sun, portions of it very thickly studded with them, while at others they are only sparsely scattered. Every year the earth's orbit cuts through the ring, though only at intervals of about thirty-three years through the part where they are most crowded. The meteors themselves are of iron, which, striking the atmosphere of the approaching earth with planetary velocity, ignite and go to dust. Le Verrier considers that in A.D. 127 the attraction of the planet Uranus brought them into their present orbit. Heis and Alexander Herschel recognise about a hundred other meteor systems; hence it has been found needless to distinguish them by names. The November meteors coming from the constellation Leo are called Leonids. The next in importance appear about August 10, and come from the constellation Perseus. They are therefore named Perseids. Of old they were called the Tears of St. Lawrence. They appear generally much earlier in the evening than the Leonids. In 1866 Prof. Alexander Herschel, son of Sir John Herschel, studying the August meteors with a spectroscopic, found some of them to consist in large measure of sodium vapour, and to be "nothing else but soda flames." There are also Lyrids, Geminids, Orionids, Draconids, Aquariids, Andromedæ, &c. Prof. Schiaparelli, of Milan, has shown that the orbits of particular comets often wonderfully coincide with those of meteoric rings. A small comet, called Temple's,

invisible to the naked eye coincides with the orbit of the November meteors, and a large one, called Tuttle's comet, visible to the naked eye in 1862 with that of the Perseids.

¶ Viewing the term meteors as a generic word, the committee of the British Association on Luminous Meteors range under it what may be called the following species:

1. *Telescopical Meteors*, only rendered visible to the naked eye by the use of telescopes.

2. *Shooting Stars*, visible to the naked eye, and comparable to the different apparent magnitudes of the fixed stars in brightness.

3. *Bolides* and *Erebolids*, or very luminous meteors, comparable in brilliancy to the planets Jupiter and Saturn, and sometimes even rivaling the sun by appearing with much splendour in broad daylight, the term *bolides* being usually applied to the smaller, and *erebolids* to the larger kind.

4. *Detonating* or "*Arcolitic*" Meteors, fireballs which produce an audible explosion, like a distant cannon, a peal of thunder, or an earthquake shock, by their collision with the air, and which differ according to the last (as "forked" lightning often does from distant and "sheet" lightning only by the fluidity that not unfrequently pervades them from fireballs of the largest and brightest class, or, finally, as

5. *Streakfalling* and *Ironfalls* (the latter very rare occurrences), or the falls of meteors, either singly or in a shower, it may be of many thousands of fragments, from a fireball, and especially if seen in the day, almost always a large meteor of the last named description. (*Brit. Assoc. Report* (1875), p. 371.)

2. *Fig.*: Anything which transiently or momentarily dazzles, allures, or strikes with wonder.

"The meteor of conquest allured me too far." *Byron*: *Napoleon's Farewell*.

meteor-cloud, meteoric-cloud, s. An expanse of space thickly studded with meteors or meteoric particles.

meteor-current, s. The current or stream of meteors moving together in the same orbit.

meteor-like, *adv.* Like a meteor. "Though bent on earth, thine evil eye As *meteor-like* thou glitest by." *Byron*: *St. Iohn*.

meteor-powder, s. [METEORIC.]

meteor-ring, meteoric-ring, s. The orbit of a system of meteors.

meteor-shower, meteoric-shower, s. Showers of meteors when the earth in her orbit intersects that of a meteoric ring. [METEOR.]

meteor-spectroscope, s. A spectroscopic specially adapted for observing meteors.

meteor-steel, s. An alloyed steel which has a waxy appearance, resembling Damascus steel. An alloy of zinc, 80; nickel, 16; silver, 4 = 100, is placed in a lead-head crucible, covered with charcoal, and melted. It is rendered friable by pouring it into cold water, is reduced to powder, called meteor-powder, and is added to steel in a crucible.

meteor-streak, s. A streak of light which various meteors leave behind them for a few seconds after they have vanished.

meteor-stream, s. [METEOR-CURRENT.]

meteor-system, meteoric-system, s. A countless number of meteors moving together in a stream, though each is independently following out its own elliptic orbit.

meteor-track, s. The track of a meteor in the sky. It is probably from an ascertainable radiant point, or, at least, radiant region (q.v.).

mē-tē-ōr-ic, a. [Eng. *meteoric*; *-ic*.]

1. *Lit.*: Pertaining to a meteor or meteors; consisting of meteors; resembling or partaking of the nature or properties of a meteor; as, a *meteoric* shower.

2. *Fig.*: Flashing or appearing bright and illustrious for a brief time; transiently or irregularly brilliant.

meteoric astronomy, s. The branch of astronomy which treats of meteors.

"Some papers on *Meteoric Astronomy*."—*Brit. Assoc. Rep.* (1871), p. 27.

meteoric date, meteoric epoch, s. A date or an epoch in any year when meteors may be expected. The chief are, Jan. 1, 2, April 19-21, Aug. 5-12 (and especially 10th), Nov. 12-15, and Dec. 11-13. (*Brit. Assoc. Rep.* (1869), p. 217; (1870), p. 78.)

meteoric iron, s. Iron coming to the earth from a meteoric ring.

meteoric-paper, s. Sheets or layers of

fāte, fāt, fāre, amidst, whāt, fall, father: wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sīre, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, eüb, cūre, unite, cūr, rūle, fūll; trý. Sýrian, æ, œ = ē; ey = ā; qu = kw.

interwoven conferva, diatoms, infusoria, &c., found on the surface of rocks after an inundation. They sometimes fall from the air, and were at one time thought to be of meteoric origin. Now it is considered that they have been caught up from the ground by small whirlwinds, and then allowed again to fall. Aikin to Natural Phænomena. (Griffith & Henfrey.) [FLANSELL.]

meteoric shower, s. [METEOR-SHOWER.]

meteoric stones, s. pl. [AÉROLITE, METEORITE.]

* **mē tē-ōr-īc-ā-l, a.** [Eng. meteoric; -al.] The same as METEORIC (q.v.).

"I see a resemblance of that meteorical light which appears in moonish places, that seems fire, but is nothing but a flimsy glittering exhalation."—*bp. Wall's Alchemy*, 12.

mē tē-ōr-īsm, s. [Eng. meteoric; -ism.] *Met.*: The same as TYPANITIS (q.v.).

mē tē-ōr-īte, s. [Eng. meteoric; -ite; Fr. météorite.] A meteoric stone, a compound of earthy and metallic matter which has fallen to the earth; a meteorite. [METEOR. * 5.]

mē tē-ōr-īze, v. i. [Gr. μετεωρίζω (metēōrízō) = to raise to a height; μετεωρίζω (metēōrízō) = raised in the air; Fr. s. météoriser.] To take the form of a meteor; to ascend in vapour like a meteor.

mē tē-ōr-ō-graph, s. [METEOROGRAPHY.] An apparatus for registering meteorological phenomena. It was invented by an Italian, Father Secchi of Rome, who obtained a prize for it at the Paris International Exhibition of 1867.

mē tē-ōr-ō-graphic, a. [Eng. meteorograph(y); -ic.] Pertaining or relating to meteorography.

mē tē-ōr-ō-graphy, s. [Gr. μετεωρογραφία (metēōrōgraphía) = a meteor, and γραφή (graphé) = to write.] Meteorology; the registration of meteorological phenomena.

mē tē-ōr-ō-īd, a. & s. [Eng. meteor, and Gr. εἶδος (eîdos) = form, appearance.]

A. As adj.: Having the form or appearance of a meteor.

B. As substantiv:

1. *Gen.*: Any moving body in the sky which has the form or appearance of a meteor.

2. *Spec. (Pl.)*: Used by Schiaparelli for particles of a nebular mass or cloud destined ultimately to become a meteoric ring revolving round the sun. (*Brit. Assoc. Rep.* (1874), p. 45.)

mē tē-ōr-ō-līte, s. [Gr. μετεωρίτης (metēōrītēs) = raised in the air, and λίθος (lithos) = a stone.] The same as METEORITE (q.v.).

mē tē-ōr-ō-lōg-īc, mē tē-ōr-ō-lōg-īc-ā-l, a. [Eng. meteorology(y); -ic, -ical; Fr. météorologique.] Pertaining or relating to the atmosphere and its phenomena; pertaining to the science of meteorology; used in meteorology; as, meteorological instruments, meteorological observations, &c.

meteorological tables or register, s. A register or account of the state of the atmosphere in regard to temperature, dryness, moisture, weight, winds, &c., as ascertained by various meteorological instruments, such as the barometer, thermometer, anemometer, hygrometer, &c.

mē tē-ōr-ō-l-ō-gīst, s. [Eng. meteorology(y); -ist; Fr. météorologiste; Sp. meteorólogo.] One who studies or is versed in meteorology.

"The meteorologist observe, that amongst the four elements which are the ingredients of all sublimary creatures, there is a notable correspondency."—*Bowd's Wood Forest*.

mē tē-ōr-ō-l-ō-gy, s. [Gr. μετεωρολογία (metēōrōlogía), from μετέωρος (metēōros) = a meteor, and λόγος (logos) = a discourse, a treatise; Fr. météorologie; Ital. & Sp. meteorología.]

Phys. Science: That branch of science which observes, registers, classifies, and compares the various and varying phenomena of our atmosphere. It remarks, at the same time, the connection of those phenomena with heavenly bodies, and with the solid and liquid materials of the earth, in reference to their reciprocal and combined influence in determining the character of different climates, and with the view of learning the meteoric

history of every region of our globe, of ultimately investigating the laws of atmospheric change and the plan of meteoric action; the theory, in fact, of meteorological phenomena, on which depends essentially the fitness of the various portions of the earth's surface for the production of different vegetable and other substances, and for the support of animal life.

"In sunny animals we deny not a kind of natural meteorology, or minute presentation both of wind and weather."—*Bronne's Fauna Errans*, bk. III., ch. v.

* **mē tē-ōr-ō-mān-cy, s.** [Gr. μετεωρομαντία (metēōromantía) = a meteor, and μαντία (mantía) = prophecy, divination.] Divination among the Romans by meteoric phenomena, as by thunder and lightning.

mē tē-ōr-ōm-ē-tēr, s. [Eng. meteor; o connect, and meter.]

Telegr.: An apparatus for receiving, at a local station, transmitting to a central station, by telegraph-wires, and there recording the direction and velocity of the wind, condition of the barometer and thermometer, and amount of rainfall.

mē tē-ōr-ō-scōpe, s. [Gr. μετεωροσκόπος (metēōroskōpos) = raised in the air, and σκοπέω (skopéō) = to see, to observe.] An instrument used for taking angles, and making measurements of the heavenly bodies.

"With astrolobe and meteor scope."

Alhambrazar, 31. 5.

mē tē-ōr-ōs-cōp-py, s. [Eng. meteoroscopia(y); -y.] The taking of observations with the meteoroscope (q.v.).

* **mē tē-ōr-ō-sūs, a.** [Eng. meteor; -ous.] Having the nature of a meteor; resembling a meteor.

"The cherubim descended, on the ground Gliding meteorous, as evening mist."—*Milton's P. L.*, xii. 629.

mēt-ēr (1), * meēt-ēr, s. [Eng. met (1) v., -er.] One who or that which metes or measures; a measurer; a measuring instrument or apparatus. When used simply, it is equivalent to a gas-meter (q.v.), but it generally occurs in composition; as, coal-meter, &c.

"But the author, the weigher, the meter of grants, will not suffer us to acquiesce in the judgment of the prince."—*Burke's Letter to a Noble Lord*.

* **mēt-ēr (2), s.** [METRE (1).]

mēt-er, v. t. [METRE (1).] To measure or test by means of a meter.

* **mēt-ēr-āge, s.** [Eng. meter (1); -age.]

- 1. The act of measuring.
- 2. The measurement itself.
- 3. The price paid for measurement.

met-ēr-ēr, s. [Eng. meter (2); -er.] One who writes in metre; a poet.

mētē-stick, s. [Eng. met (1) v., and stick.] *Naut.*: A stick fixed on a board at right angles, to measure the height of the hold of a ship, and to level the ballast.

* **mētē-wānd, * met-wānd, s.** [Eng. met (1) v., and wand.] A measuring rod, staff, or pole.

"Now the same is called a yard, or a metwand, &c."—*Stow's Henry I.*, iii. 1021.

* **mētē-yard, s.** [Eng. met (1) v., and yard.] A yard, staff, or rod used for measuring.

"Take thou the bill, give me thy meteyard, and spare not me."—*Stokes's Truening of the Stream*, 15. 3.

mēth-ā-cryl-īc, a. [Eng. meth(y), and acrylic.] Derived from or contained in acrylic acid.

methacrylic acid, s.

Chem.: C₄H₆O₂. An acid isomeric with crotonic acid, obtained in the form of its ethyle salt by the action of phosphorus trichloride on the ethyle salt of hydroxy isobutyric acid. The free acid is a colorless oil, solid at 0°, having an odour of pyrogallol, and a strong acid reaction. Its salts are very unstable.

mēth-āl, s. [Eng. meth(y) ether, and alcohol.] [MYRSINE ALCOHOL.]

mēth-ānc, s. [Eng. meth(y); -ane.] [METHAN-GAS.]

mē-thōg-lin, s. [Wel. methylllyn = mead; lit. = mead-liquor, from meud = mead, and llyn = liquor.] The same as MILD (q.v.).
"O'er our parch'd tongue the rich methyllin fell."—*Guy's Tom a Lady*, Ep. 4.

meth-ēne, s. [Eng. meth(y); -ene.]

Chem.: CH₂. Methylene, a diatomic radical unknown in the free state. It forms ethers analogous to ethylene, but the series is much less complete. (See compounds.)

methene diacetate, s.

Chem.: CH₂(OC₂H₃O₂). It is prepared by acting on methene diethyl with argentic acetate and acetic acid. It boils at 170°.

methene dibromide, s.

Chem.: CH₂Br₂. Obtained by the action of bromine on iodide of methyl. It forms a heavy liquid, which boils at 80°. It has a sp. gr. of 2.904.

methene dichloride, s.

Chem.: CH₂Cl₂. Obtained by the action of chlorine on methyle chloride, CH₃Cl + Cl₂ = CH₂Cl₂ + HCl. It is a colorless and volatile liquid of a sweet and penetrating odour. It boils at 31°, and is nearly insoluble in water.

methene diiodide, s.

Chem.: CH₂I₂. Prepared by heating iodoforn for several hours with hydroiodic acid. It is a colorless sweet smelling oil, which boils at 182°, and crystallizes in the cold in brilliant leaves, which melt at 6°. Its sp. gr. is 3.315.

methene-dimethylate, s.

Chem.: CH₂(OCH₃)₂. Methylal. Formal. A product obtained by heating methyle alcohol with binoxide of manganese and sulphuric acid. It is a colorless liquid, boiling at 42°, and having a sp. gr. of .855. It dissolves in three parts of water, and in all proportions in ether and alcohol.

methene diphenyl, s.

Chem.: CH₂(C₆H₅)₂. It is obtained by the action of sulphuric acid on benzoic alcohol. It crystallizes in needles, which melt at 26° and boil at 261°. It has the smell of oranges.

methene sulphonic acid, s.

Chem.: CH₂(SO₃H)₂. Methionic acid. It is readily obtained by heating acetamide with Nordmann's sulphuric acid. It crystallizes in long deliquescent needles.

methene oxide, s. [FORMALDEHYDE, METHYLE-ALDEHYDE.]

mēth-īde, s. [Eng. meth(y); -ide.] (See the compound.)

methide-aluminic, s.

Chem.: Al₂Cl₃ = Al(CH₃)₃. A compound obtained by heating mercuric methide with aluminum in a sealed tube. It is a colorless mobile liquid, which congeals at 0° and boils at 130°. It takes fire on exposure to the air, and is decomposed by water with explosive violence.

methide boric, s. [METHYLE BORIDE.]

mē thīnks, imp. v. [A.S. me thynceþh, from me, dative of the personal pronoun I, and thynceþh (impers. v.) to seem.] [THINK.] It seems to me; it appears to me; I think, presume. (Only used in poetry or elevated writing.)

"Verily, methinks
Wisdom is ofttimes nearer when we sleep."—*Bowd's Henry's Education*, bk. III.

mēth-i-on-īc, a. [Eng. meth(y); Gr. θειον (theion) = sulphur, and Eng. sulf. -ic.] (See the compound.)

methionic acid, s. [METHENE-DISULPHONIC-ACID.]

meth-ōd, s. [Fr. méthode, from Lat. methodus, methadus, from Gr. μεθόδος (methōdos), from μεθ (meth), for μέτρο (metra) = after, and ὄδος (hōdōs) = a way. Pattenham in 1789 ranked this among the words of recent introduction into English.]

I. Ordinary Language:

1. A way, mode, or course by which an aim or object is or may be attained; a mode or manner of procedure; characteristic manner or mode of procedure.

"Let such persons as are not quarrel with the great physician of souls for having cured them by easy and gentle methods."—*South's Sermons*, vol. IX., ser. 4.

2. Systematic or orderly procedure; system; a manner of action based on rules, order and regularity of procedure.

"Where this habit of method is present and of things the most remote and diverse, the mind and outward circumstances are brought into their continuity and succession, the more striking, as the less expected."—*Coleridge's Method*, sec. 1.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Çenophon, exist. ph = f. -cian, -tian = çhan. -tion, -sion = shùn; -tion, -sion = zhùn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bəl, dəl.

II. Technically:

1. *Logic*: A logical or scientific arrangement of mode of procedure; the art of discussing or arranging well a series of thoughts either for the elucidation or discovery of truth, or for the proof of a truth already known.

"Method, which is usually described as the fourth part of Logic, is rather a complete practical Logic. Method is rather a power or spirit of the intellect, pervading all that it does, than its tangible product. Hence we put in the place of rules for Method as a part of Logic, an Applied Logic, which shows under what conditions in the several regions of inquiry the three sets of thought may be safely performed, and how far they are apt to direct the mind in the use of them to profitable or beautiful results. - Thomson *Lives of Thought* (Introduct.) § 44.

2. *Nat. Science*: A principle or system of classification. Used specially in connection with the two systems of botanical classifications - the Artificial, or Linnaean Method, and the Natural Method of Classification.

mē thōd-ic al, * mē thōd-ic, a. [Fr. *methodique*, from *methode* = method.]

1. Characterized by or exhibiting method; proceeding or based on a systematic and orderly disposition and arrangement; systematic, orderly.

"A man of methodical industry and honourable pursuits" - *Coleridge: Method*, § 2.

2. Acting on method or a systematic mode of procedure.

"Charles Reade was not methodic in the disposition of his papers." - *Pall Mall Gazette*, June 29, 1884

mē thōd-ic al lÿ, adv. [Eng. *methodical*; *-ly*] In a methodical manner; according to method; systematically.

"Let it be taught them systematically and methodically." - *Porteus: Sermons*, Vol. 1, ser. 2.

* **mē-thōd-ics, s.** [METHODIC.] The science of method.

Mēth-ōd-ism, s. [Eng. *method*; *-ism*.]

Church Hist. & Eccles.: One of the leading religious systems of English-speaking races. A religious society existed at Oxford in the year 1727, among the members of which were John and Charles Wesley and George Whitefield, young men studying for orders. They and their associates were half-derisively called the "Godly," or the "Sacramentarian Club" (because they went through a mocking crowd to communicate at St. Mary's), and, finally, Methodists, from the methodical way in which they performed their religious duties. John Wesley, the second son of the Rev. Samuel Wesley, was born at Epworth, in Lincolnshire, June 17, 1703. On Oct. 14, 1735, John and Charles Wesley sailed for Georgia as agents of the Society for the Propagation of the Gospel, but their mission was a failure. In 1736 Charles, and in 1738 John, returned to England. His friend George Whitefield had already on February 17, 1739, commenced open-air preaching near Bristol. Wesley followed at the same place; but, unlike Whitefield, organized his converts into societies, the first being formed in that year. The first meeting-house was built in Bristol in 1740; the Foundry in Moorfields, London, hired for a term of years, was fitted up as a preaching-house. In Wesley's absence, his schoolmaster, Thomas Maxfield, presumed to preach in the Foundry. Wesley hastened to London to silence him, but, by his mother's advice, he was persuaded to listen before he acted, was convinced that she was right, forbore to interfere, and consented to the rise of an order of lay preachers. In 1741, Wesley and Whitefield ceased to act together, their views on the decrees of God differing, Wesley being Arminian and Whitefield Calvinistic. Though Whitefield had not the organizing gift of Wesley, his preaching had the foundation of two denominations - Calvinistic Methodists (q.v.) and Lady Huntington's Connexion, (HETTINGTONS.) He died in America on Sept. 17, 1770. In 1744 the first conference was held; it was attended by six persons, all clergymen. At the conference held at Leeds in 1755, the separation between itinerant and local preachers was made broader: the former were to be supported by the contributions of the societies; the latter to support themselves by their ordinary callings, preaching during hours of leisure. By 1767 there were thirty-two of the former and some hundreds of the latter; in 1791 the former numbered 312.

Charles Wesley, who had rendered the Methodists, and the English Churches generally, great service by his hymns, died in 1788, and John, at the age of nearly eighty-eight, on March 2, 1791.

In 1784 John Wesley had executed a deed poll in Chancery, which, reserving his rights and those of his brother, provided that on his death his place should be supplied by a permanent body of one hundred ministers, meeting at the conference, and called the Legal Hundred. They still constitute the supreme governing body of the Wesleyan Methodists. When it meets, it fills up by co-optation all vacancies which may have arisen during the year. John Wesley strongly felt that a minister should not administer the sacraments unless he were duly ordained. In the absence of a bishop, he would sanction ordination by presbyters, and had himself, in 1784, ordained two ministers for America. With all his influence, he found it difficult to repress the desire of the preachers to administer the sacraments, and in 1795 the liberty was conceded wherever a congregation sought it for their pastor. In 1797 a schism took place, originating the Methodist New Connexion (q.v.). [NEW, C.] In 1810 arose the Primitive Methodists (q.v.). In 1815, the Bible Christians (q.v.); in 1828, the Protestant Methodists; in 1834, the Wesleyan Methodist Association; in 1840, the Wesleyan Reform Association (q.v.), the last three now combined together and called the United Methodist Free Churches. The annual conference, during the consideration of spiritual questions, is composed of ministers only; but during the discussion of financial matters it consists of 240 ministers and 240 laymen. A powerful Methodist church in the United States is under Episcopal Government.

mēth-ō dist, s. & a. [Eng. *method*; *-ist*.]

A. As substantive:

* **I. Ordinary language**:

1. Those philosophers who adopted a certain methodical manner in their speculations.

"The finest methodists, according to Aristotle's golden rule of artificial bounds, condemn geometrical precepts in arithmetic or arithmetical precepts in geometry as irregular and obsolete." - *G. Harvey: Purcell's Supererogation*, p. 117.

2. One who practises self-examination.

"All of us who have some or other tender parts of our souls, which we cannot endure should be merely touched; every man must be his own methodist to find them out." - *Jackson: Justifying Faith*, bk. IV., ch. V.

3. One of a sect of ancient physicians who practised by theory or method.

"Themison and his old sect of methodists resolved that the laxum and strictum were the principles and originals of all diseases in the world." - *Binetion: Works*, vol. IV., p. 57.

II. Church Hist. & Eccles.:

1. The name given in the seventeenth century to certain Roman Catholic controversialists, mostly French, who, in conducting disputes with Protestants, required from them express scripture for every attestation they made, refusing to allow them to establish any position by argumentation, inference, or necessary consequence. Among them were Francis Veron, a Jesuit, Bishop Barthold Nibsius, and his brother Waldenburg. (*Moshelm: Church Hist.*, cent. xvii., sec. ii., pt. i., § 15.)

2. A follower of Wesley or Whitefield, or one who adheres to the system of doctrine and church government called Methodism (q.v.).

B. As adj.: Methodistic (q.v.).

"Some of the elder ones who belonged to the methodist church." - *Mrs. Stone: Uncle Tom's Cabin*, ch. XXV.

mēth-ō dist-ic, mēth-ō dist-ic al, a. [Eng. *methodist*; *-ic*, *-ical*.] Pertaining to method or the Methodists; resembling the Methodists; following the strictness of the Methodists. (Frequently used in contempt or irony.)

"In connection with the *Methodist* revival." - *Isaac Taylor: Wesley & Methodism*, p. 106.

mēth-ō dist-ic al-lÿ, adv. [Eng. *methodistical*; *-ly*] In a methodistical manner.

mē thōd-i-zā tion, s. [Eng. *methodiz(e)*; *-ation*.] The act or process of methodizing; the state of being reduced to method.

mēth-ōd-ize, v.t. & i. [Eng. *method*; *-ize*.]

A. Trans.: To reduce to method; to arrange or dispose in order; to arrange systematically. (*Popr: Essay on Criticism*, 89.)

B. Intrans.: To act systematically or according to method; to follow a system or method.

"The Mind . . . is disposed to generalize and methodize to excess." - *Coleridge: Method*, § 1.

mēth-ōd-iz-ēr, s. [Eng. *methodiz(e)*; *-er*.] One who methodizes.

mēth-ōd-ō lōg-ic al, a. [Eng. *methodology*; *-ical*.] Of or pertaining to methodology.

mēth-ōd-ōl-ō gīst, s. [Eng. *methodology*; *-ist*.] One who treats of, or is versed in, methodology.

* **mēth-ōd-ōl-ō-ē-ēy, s.** [Gr. *μεθοδος* (*methodos*) = a method, and *λόγος* (*logos*) = a discourse, a treatise.]

1. A discourse concerning method.

2. The science of method of classification.

mē thōn i ca, s. [Latinised from the native Malabar name.]

Bot.: A genus of Liliaceæ, tribe Tulipææ, or, according to Dr. Wright, of Melanthaceæ. It is a synonym of *Gloriosa*, and *Methonia superba* is better known as *Gloriosa superba*. It is a climbing plant from India, cultivated in greenhouses in Great Britain, as are *M. grandiflora* and *M. virens*.

mē thought (ought as ât), pret. of v. [METHINKS.] It seemed to me; it appeared to me; I thought.

"And now the pensive Marmaduke, Methought, was yrebling inwardly." - *Wordsworth: White Doe of Lylstone*, II.

mēth-ōx-ÿ a-çēt-ic, a. [Eng. *methoxy*; *-oxy* (*gen*), and *acetic*.] Derived from or containing methyl and oxygen.

methoxyacetic acid, s.

Chem.: CH₃COOCH₃, Methyl glycollic acid.

A colorless liquid prepared by decomposing a chloroacetate with sodic methylate. It has a sp. gr. of 1.18, and boils at 198.

mēth-ōl mēne, s. [Eng. *meth(yl)*; *uhl(in)*, and *sufl*, *-ene*.]

Chem.: C₅H₁₂. A substance obtained, together with methulmic acid, by the action of sodium and methyl alcohol on chloroform. It is a brown microcrystallizable body, resembling one of the ulmic compounds, and is only known in combination.

mēth-ūl mīc, a. [Eng. *methulm(ic)*; *-ic*.] Derived from or contained in methulmic.

methulmic acid, s.

Chem.: C₅H₈O₂. A dark-yellow microcrystallizable substance, insoluble in water, but soluble in ether. By the action of bromine it is converted into a black semi-fluid, dibromomethulmic acid, C₅H₆Br₂O₂.

mēth-ÿl, s. [Gr. *μεθω* (*metho*) = wine, and *υλ(ή)* (*ulic*) = wood.]

Chem.: CH₃. The radical of methyl alcohol, known in combination as dimethyl, (CH₃)₂, a compound formed by heating zinc methyl and methyl iodide in sealed tubes at 150°.

methyl-aldehyde, s. [FORMALDEHYDE, METHEN-OXIDE.]

methyl-alizarine, s.

Chem.: C₁₅H₁₀O₄ = C₆H₄CO(C₆H₄)₂CO₂H. It is obtained by the action of nitric acid on methyl anthracene, and after-treatment with sulphuric acid and potash. It crystallizes in red needles, which sublime at 250°.

methyl-aniline, s.

Chem.: N(C₆H₅)₂CH₃H. Methyl-phenylamine. Obtained by the action of aniline on iodide of methyl, and after-treatment with potash. It boils at 192°.

Methyl-aniline green: [METHYL-GREEN.]

methyl-anthracene, s.

Chem.: C₁₅H₁₂ = C₆H₄CO(C₆H₄)₂CH₃.

It is formed by passing the vapour of difuryl methane through red-hot tubes filled with pumice. It forms yellow or colourless leafy crystals melting about 200°, and is only soluble in chloroform, bisulphide of carbon, and benzol.

methyl-anthraquinone, s.

Chem.: C₁₅H₁₀O₂ = C₆H₄CO(C₆H₄)₂CH₃. A crystalline substance obtained by the action of strong nitric acid on an alcoholic solution

fatc, fāt, fare, Ƴmidst, whāt, fāl, father, wē, wēt, hēre, camel, hēr, thēre; pine, pit, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūrc, unīte, cūr, rūle, fūil; trÿ, Syrian. æ, œ = ē; ey = ā; qu = kw.

of methyl antbraene. It crystallizes in needles and plates which melt at 162°-163°.

methyl-caproyl, s. [METHYL-HEXYL.]

methyl glycollic acid, s. [METHOXY-ACETIC ACID.]

methyl-green, s.

Chem.: $C_{20}H_{16}(Cl)_3N_3(CH_2Cl)_2H_2O$. Methyl-aniline green. A green dye, obtained by heating Paris violet with methyl-chloride. It is generally used in combination with zinc chloride, in which state it is very soluble.

methyl-guanidine, s. [METHYL-URAMINE.]

methyl-hexyl, s.

Chem.: $C_7H_{16}=CH_3\cdot C_6H_{13}$. Methyl-caproyl. An oily liquid obtained by the electrolysis of a mixture of acetate and cyanhydride of potassium. Its vapour density is 3.426.

methyl-hydride, s. [MARSH-GAS.]

methyl hydrobromic-ether, s.

Chem.: [METHYLIC-BROMIDE.]

methyl hydrochloric-ether, s.

Chem.: [METHYLIC-CHLORIDE.]

methyl-nitrophenidine, s. [NITRA-KISIDINE.]

methyl-phenylamine, s. [METHYL-ANILINE.]

methyl-phosphine, s.

Chem.: $P-\begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3$. One of the primary phosphines prepared by heating in a sealed glass tube a mixture of phosphoric iodide, zinc oxide, and methylic iodide, and afterwards decomposing the resulting compound with water. It is a colourless gas, which at -20°, or under a pressure of 2½ atmospheres, condenses to a mobile liquid. It possesses a fearful odour, and exposed to the air often inflames spontaneously. Dimethyl phosphine, $P-\begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} (CH_3)_2$ boils at +25°, and the tri-methyl phosphine, $P(CH_3)_3$, at +40°. Both compounds take fire on exposure to the air.

methyl-pyrocatechin, s. [GATACOL.]

methyl succinic acid, s. [PYROTARTARIC-ACID.]

methyl-uramine, s.

Chem.: $\begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{NH}(CH_3)_2 \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{NH}_2$. Methyl-guanidine.

It is prepared by acting on cyanamide with the hydrochloride of methylamine. It is strongly alkaline, and forms a crystalline deliquescent mass, having an ammoniacal taste.

mēth-ÿ-lāl, s. [Eng. methyl, and al(cohol).] [METHENE-DIMETHYLATE.]

mēth-ÿ-l-ā-mīne, s. [Eng. methyl, and amine.]

Chemistry:

1. $N \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3$. Monomethylamine. A compound in which one of the hydrogen atoms in ammonia is replaced by methyl. It can be prepared by boiling methyl isocyanate with potassic hydrate. It is a colourless gas, which becomes liquid a few degrees below 0°, and has somewhat the odour of putrid fish. It burns readily with a yellow flame, and is more soluble in water than any other gas. It behaves with metallic salts like ammonia. Dimethylamine $NH(CH_3)_2$, metameric with ethylamine, boils at 8°. Trimethylamine $N(CH_3)_3$, occurs readily formed in herring pickle, from which it can be separated by distillation with potash. It dissolves in water, boils at 9°, and smells of herrings.

2. (Pl.): [METHYLAMMONIUMS.]

mēth-ÿl-ām-mō-nī-ūm, s. [Eng. methyl, and ammonium.]

Chem.: [METHYLAMINES.] Organic bases formed on the type NH_4 by partial or total substitution of methyl (CH_3) for H. Tetramethylammonium $N(CH_3)_4$. The iodide of this base is produced by the action of iodide of methyl on trimethylamine. It is crystalline.

mēth-ÿ-lāte, v.t. [Eng. methyl; -ate.] To mix with methylated spirit.

mēth-ÿ-lāt-ād, pa. par. o. ca. [METHYLATE.]

methylated-spirit, s.

Chem.: A commercial product sold free of excise duty, and consisting of a mixture of one volume of crude wood-spirit, of sp. gr. 785, and nine volumes of spirits of wine, the latter being thus rendered so nauseous as to be unfit for use as a beverage. It is used largely in the arts as a solvent for resins, and for other purposes.

mēth-ÿ-lā-tion, s. [Eng. methylate(-); -tion.] The act of methylating.

mēth-ÿ-lā-tōr, s. [Eng. methylat(ion); -or.] One who makes methylated spirits.

mēth-ÿl-ōne, s. [Eng. methyl; -ene.] [METHENE.]

mēth-ÿ-lēn-it-an, s. [Eng. methylene(-); (mann)ite(-), and suff. -an.]

Chem.: $C_7H_{14}O_6$. A saccharine substance produced by the action of strong bases on di-oxy-methylene. It is soluble in water and alcohol, has a slight acid reaction, and is coloured yellow by alkalis. It does not ferment with yeast, has no rotatory power; but reduces an alkaline cuprous solution when heated with it.

mē-thÿl-i-a, s. [Latinised from Eng. methyl (q.v.).] [METHYLAMINE.]

mē-thÿl-ic, a. [Eng. methyl; -ic.] Derived from or contained in methyl (q.v.).

methylic-acetate, s.

Chem.: $C_3H_6O_2 = \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3 \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{COO}(CH_3)$. This substance occurs readily formed in crude wood spirit. It boils at 56°, and has a sp. gr. of 756 at 0°.

methylic-alcohol, s.

Chem.: $CH_4O = \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{H} \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{H}$. Carbinol. Pyro-

oxylic spirit. Wood-spirit. An alcohol obtained by the dry distillation of wood. The aqueous distillate is treated with lime to fix organic acids, and again distilled. The first tenth part which comes over is collected apart. This contains the methylic alcohol, mixed with acetone and other bodies. The distillate is added to fused chloride of calcium, which combines with the alcohol, and the whole is evaporated on a water bath. On mixing the residue with water, the alcohol is set free, and by repeated distillation from quicklime is obtained anhydrous. It is a colourless, mobile, spirituous-smelling liquid, boiling at 60°, and having a specific gravity of 814 at 4°. It mixes in every proportion with water, alcohol, and ether, in the first case with diminished volume, and agrees generally with common alcohol in its solvent power and other properties.

methylic-aldehyde, s. [METHYL-ALDEHYDE.]

methylic-amido-cyanurate, s. [METHYLIC-AMMELIDE.]

methylic-ammelide, s.

Chem.: $C_3H_2N_4O_2 = \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{OCH}_3 \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{OCH}_3 \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{NH}_2$. Methylc-amido-cyanurate. Obtained from methylic cyanurate by heating with ammonia. It crystallizes in rhombic tables which melt at 212°; is slightly soluble in cold water and ether; more soluble in hot water and alcohol.

methylic boride, s.

Chem.: $B(CH_3)_3$. Boric methide. Bor-methyl. A gaseous compound, prepared by the action of zinc methyl on borate of ethyl. Under pressure, at 10°, it condenses to a mobile liquid. It has a highly pungent odour.

methylic-bromide, s.

Chem.: CH_3Br . Methyl-hydrobromic ether. A colourless liquid, boiling at 15°, sp. gr. 1.664, and vapour density 3.293. It acts violently on caecodyl, forming bromide of caecodyl and bromide of tetramethyl-arsenium.

methylic-carbamate, s.

Chem.: $NH_2\cdot COO(CH_3)$. Produced by heating urea with methylic alcohol in sealed tubes. It forms hygroscopic tables, which melt at 55° and boil at 177°.

methylic-chloride, s.

Chem.: CH_3Cl . Monochloro-methane. Methyl-hydrochloric ether. A colourless gas, prepared by heating a mixture of sodium chloride, wood-spirit, and strong sulphuric acid. It is soluble in one-fourth its volume of water, has an ethereal odour, a sweet taste, and burns with a white flame, green at the edge. Its vapour density is 1.736, and it does not condense at -18°.

methylic-cyanide, s. [ACETONITRILE.]

methylic-ether, s.

Chem.: $C_2H_6O = \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3 \\ \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3$. Methylic oxide. It is prepared by distilling a mixture of wood-spirit and four times its weight of sulphuric acid, and passing the gas formed through a solution of potash into a freezing mixture. Below -21°, it is a mobile, colourless liquid, but at ordinary temperature it is an ethereal smelling gas. One volume of water dissolves thirty-five volumes of the gas.

methylic-iodide, s.

Chem.: CH_3I . Obtained by distilling methylic alcohol in presence of iodine and ammoni-phosphorus. It is a colourless, sweet-smelling liquid, nearly insoluble in water. It boils at 44°.

methylic mercaptan, s.

Chem.: $S-\begin{matrix} \text{---} \\ \text{---} \\ \text{---} \end{matrix} \text{CH}_3$. Sulph-hydrate of methyl.

It is obtained by distilling a mixture of methylic potassic sulphate with potassic sulph-hydrate. It is a mobile liquid having a garlic odour and boiling at 20°.

methylic-oxide, s. [METHYLIC-ETHER.]

methylic-salicylate, s.

Chem.: $C_9H_8(OH)CO\cdot O(CH_3)$. A colourless oil, occurring naturally in galantheria oil. It is formed by treating a mixture of salicylic acid, sulphuric acid, and methylic alcohol. It has an aromatic odour, boils at 224°, and gives a violet colour with ferric salts.

methylic-selenide, s. [SELESMETHYL.]

mē thÿs-ti çin, s. [Mod. Lat. methystic(um); suff. -in (Chem).]

Chem.: A crystalline substance obtained from Kawa-root, the root of *Piper methysticum*. [Watts: *Dict. Chem.*]

† mēt-ic, s. [Gr. μέτακος (metakos) = changing one's abode, emigrating; μετά (meto), denoting change, and οίκος (oikos) = a house; Lat. metacus; Fr. meteo, meteoque.] In ancient Greece a resident stranger in a Greek city or country; a sojourner.

mēt-ō pō-scōp-ic, **mēt-ō pō-scōp-ī-ēal**, *a.* [Eng. *metoposcopy* (*y*); *-ic*; *-ī-ēal*.] Pertaining or relating to metoposcopy (q.v.).

mēt-ō pōs-eō-pist, *s.* [Eng. *metoposcopy* (*y*); *-ist*.] One who is versed in metoposcopy or physiognomy.

mēt-ō pōs-eō-pŷ, *s.* [Gr. *μετρωπον* (*metrōpon*) = the forehead, and *σκοπεω* (*skōpō*) = to see, to observe; Fr. *metoposcopy*; Ital. & Sp. *metoposcopy*.] The study of physiognomy; the art or science of determining the characters of men by the countenance or features.

* Other signs [of melancholy] there are taken from physiognomy, metoposcopy, chronometry. — *Barton. Acad. of Metaphysics*, p. 38.

mēt-ra, *s.* [Gr. *ῥα*, of *μετρωπον* (*metrōpon*) = a measure.]

Phys. Science: An instrument, a combination of the thermometer, clinometer, goniometer, level, magnifying lens, measure for wine-gone, plummet, plumb scales, anerometer, &c., by which the temperature, direction, and dip of rocks, the angles of cleavage and crystallization, the level of workings, the latitude, &c., can be determined.

mē-tre (**tre as tōr**), * **mi-tre**, *v.t.* [METRE, *s.*] To write in metre or verse.

* [He] composed a whole book in vulgar verse, in which he *metred* all those things vulgarly spoken of this Wallace. — *Holshush. Hist. Scotland*, an. 1305.

mē-tre (**tre as tēr**), * **mec-ter**, *s.* [Fr. *metre*, from Lat. *metrum*; Gr. *μετρωπον* (*metrōpon*) = a measure, metrie. From the same root as **met** (1), *v.*]

1. Pros.: The rhythmical arrangement of syllables into verses, stanzas, strophes, &c.; rhythm, verse.

* *Hymn* is *metre*. . . but the invention of barbarous *metre* is set off with best matter and true *metre*. — *Milton. P. L.* (176.)

2. Measure: The French standard measure of length, being the ten-millionth part of the distance from the equator to the north pole, as ascertained by the actual measurement of an arc of the meridian.

* A *metre* is . . . 1000000 yards or 2937000 inches the standard *metre* being taken as correct at 10°C., and the standard yard as correct at 14°C. — *Encycl. C. G. S. System of Units*.

3. Mus.: A term used with various significations: (1) A foot, as a subdivision of a bar of measure; (2) the relation between two feet having the same subdivisions of time-units, but in a different order of succession; (3) the proper grouping of a number of consecutive feet.

metre seven, *s.* A method recommended by a committee of the British Association for writing 10⁷ metres. (See *extract*.)

* The approximate length of a quadrant of one of the earth's meridians is a *metre* or a centimetre. — *Keppel. Bed.*, 1866, (1874), p. 724.

mēt-ric, **mēt-rie al**, *a.* [Fr. *metrique*, from Lat. *metricus*; Gr. *μετρικος* (*metrikos*), from *μετρωπον* (*metrōpon*) = a measure, metrie; Ital. & Sp. *metrico*.]

1. Of or pertaining to measuring; employed in measuring.

2. Of or pertaining to metre, measure, or rhythm.

* *S*, varying still their needs, observe yet in all their quantities, their rests, then ceases *metrical*. — *Deighton. Polydoron*, s. 4.

3. Composed in or consisting of verse; rhythmical.

metrie system, *s.* The system adopted by the French convention in 1795, in which all measures of length, area, capacity, and weight are based upon the length of a quadrant of the meridian measured between the equator and the pole. The ten-millionth part of this quadrant arc was adopted to be the linear measuring unit, which they called "metre," applying it equally to superficial and solid measures, taking for the unit of the former the square of the decuple, and for that of the latter the cube of the tenth part of the metre. They chose also for the measuring unit of weight the quantity of distilled water equal in bulk to the same cube at a certain temperature. They also decided that the multiples and sub-multiples of each kind of measure, whether of weight, capacity, surface, or length, shall be always taken in the decimal or decuple proportion, as the most simple, natural, and easy for calculation. The metre is the basis of calculation; from it are derived: Of area: the *are*, 1 square decimetre; of capacity: the *litre*, 1 cubic decimetre; of weight: the *gramme*, 1 cubic centimetre of water. The names of the graduations below the unit are formed from the Latin, and above the unit are formed from the Greek.

mēt-rie al-ly, *adv.* [Eng. *metrical*; *-ly*.] In a metrical manner.

* **mē-tri-ēian**, * **me-tri-ēi-en**, *s.* [Fr. *metriéien*.] A writer or composer of verse; a poet, a metrist, a versifier.

* And in especially because he never beseege elix before, but either it was yielded, or taken, at the time of this siege a *metreian* made these verses. — *Holl. Henry VII.* (an. 23.)

mēt-ri-ēist, *s.* [Eng. *metrie*; *-ist*.] The same as **METRIST** (q.v.).

* It is singular that the only *metrieist* who ever attempted it was John Thelwall. — *Athenæum*, May 5, 184, p. 565.

* **mēt-ri-ēize**, *v. t.* [Eng. *metrie*; *-ize*.] To adapt to the metric system; to express in terms of the metric system.

* A graphic representation of the size of the different *metrie* measures as compared with the old ones is given in a chart at the end of the volume. — *Brit. Quarterly Review*, 184, 547.

mēt-ri-ēi-ā-tion, *s.* [Eng. *metrify*; *c* connective, and *suff. -ation*.] The act of metrifying or composing verses.

* Should I flourish a shade without a tumbler Through this *metrification* of a drollus. — *Temerson. Hindoo Cymbeline*.

* **mēt-ri-ē-er**, *s.* [Eng. *metrify*; *-er*.] One who composes verses; a versifier, a metrist.

* **mēt-ri-ē-y**, *v. t.* [Eng. *metrie*; *-y*.] To compose verses.

* Whereupon he *metrified* after his toynde. — *Shelton. Queen of Laurel*.

* **mē-trist**, *s.* [Eng. *metrie*; *-ist*.] A writer or composer of verses; a versifier.

* Such other blind popish poets and dirty *metrists*. — *Bate. Image*, pl. II.

mē-tri-tis, *s.* [Gr. *μήτρα* (*mētra*) = the womb, and *suff. -tis*, denoting inflammation.]

Pathol.: Inflammation of the perimetrium of the uterus, as distinguished from endometritis, catarrhal inflammation of its lining membrane. Other terms are Parametritis and Perimetritis.

mēt-rō chrōmē, *s.* [Gr. *μέτρον* (*metron*) = a measure, and *χρῶμα* (*chrōma*) = colour.] An instrument for measuring colour. It consists of three hollow wedges of glass, of exactly the same angle and capacity, and accurately graduated on the edge of the same number of equal degrees. These wedges are so arranged between two screens that any portion of their tapering sides may be presented at will to an aperture through which a direct view may be had, or a ray of light thrown.

mēt-rō-graph, *s.* [Gr. *μέτρον* (*metron*) = a measure, and *γράφω* (*graphō*) = to write.] An apparatus to be attached to a locomotive, indicating on a time-paper the speed with the number and duration of the various stoppages.

* **mē-trōl-ō-gŷ**, *s.* [Gr. *μέτρον* (*metron*) = a measure, and *λόγος* (*logos*) = a treatise, a discourse.]

1. A treatise on or account of weights and measures.

2. The art and science of mensuration.

* **mēt-rō mā-ni-a**, *s.* [Eng. *metrie*, and Gr. *μαρνα* (*marna*) = madness.] An immoderate eagerness for writing verses.

* **mēt-rō mā-ni-āc**, *a.* [METROMANIA.] Suffering from metromania; mad after metrical composition.

* With almost *metromane* eagerness. — *Taylor: Surrey Gemina Poetry*, i. 183.

mē-trōm-ē-tēr, *s.* [Gr. *μέτρον* (*metron*) = a measure, and Eng. *metrie*.]

1. Surg.: An instrument for measuring the size of the womb; a hysterometer.

2. Mus.: A metronome (q.v.).

mēt-rō-nomē, *s.* [Fr., from Gr. *μέτρον* (*metron*) = a measure, and *νομος* (*nomos*) = a law; It. *metronomo*.]

Mus.: An instrument for beating and dividing the time in music; a musical time-keeper. It has a small pendulum which, being set in motion by clock-work, beats audibly a certain number of times in a minute; and this number may be altered by moving a sliding weight so as to give it the speed required. To be correct, the metronome should beat seconds when set at 60. The invention of the instrument is claimed for John Maelzel, by whom it was patented in England on Dec. 5, 1815, but his claim to the invention rests on very doubtful authority; the principle he worked upon was that which had been carried out nearly 100 years before he was born. Small pocket metronomes have since been invented.

* **mē-trōn-ō mŷ**, *s.* [Eng. *metronome* (*y*); *-y*.] The act of measuring time in music by means of a metronome.

mē-trō-pēr-i-tō-ni-tis, *s.* [Gr. *μήτρα* (*mētra*) = the womb, and Eng. *peritonitis* (q.v.).]

Pathol.: Pelvic peritonitis, inflammation of the peritonæum covering the uterus and its appendages. Called also Pelvi-peritonitis, Perimetritis, &c.

* **mēt-rō-ple**, * **mēt-rō-pōle**, *s.* [METROPOLIS.]

mē-trōp-ō-lis, *s.* [Lat., from Gr. *μητροπολις* (*metropolis*) = a mother-state; ecclesiastically the city of a primate, from *μήτρα* (*mētra*), genit. *μητρος* (*metros*) = a mother, and *πολις* (*polis*) = a city; Fr. *metropole*.]

1. Ord. Lang.: The chief town or capital of a country, state, or kingdom, as London of Great Britain, Paris of France.

* We stopped at Pavia, that was once the *metropolis* of a kingdom, but at present a poor town. — *Addison. On Italy*.

II. Technically:

1. Eccles.: The seat or see of a metropolitan bishop.

* The precedence in each province was assigned to the Bishop of the *Metropolis*. — *Barrow. On the Pope's Supremacy*.

2. Geog. & Biol.: A point so situated within an area through which a genus is distributed, that in whatever direction from it one goes, the species diminish. — *C. F. Woodward. Melusina* (ed. 1875), p. 52.

mēt rô pól'-it an, a, & s. [Lat. *metropoli-tanús*; from *metropolis* = a metropolis; Fr. *metropolitain*; Ital. & Sp. *metropolitano*.]

A. As adjective:

I. Ordinary Language:

1. Of or belonging to a metropolis; residing in a metropolis.
"Groves . . . preferred to smoke, to the ecclipsis That metropolitan volcanoes make."
—*Empire, Task*, iii, 707.

2. Having the position or rank of a metropolitan; as, a metropolitan city.

II. Eccles.: Having the authority of a metropolitan; proceeding from a metropolitan.

"A bishop at that time had power in his own diocese over all other ministers there, and a metropolitan bishop sundry preeminences above other bishops."
—*Hooker, Ecclesiastical Polity*, bk. viii., § 5.

B. As substantive:

1. A bishop resident in a metropolis.
2. A bishop having authority over the other bishops of a province; an archbishop.

The Archbishopric of Canterbury, *Metropolitane*, and Primate of all England. —*Shaw, Kent's Antiquities* (ant. 466).

3. A metropolitan was at first one whose episcopal functions were extended over a metropolis and the country of which it was the seat of government. That metropolis, once the chief city of an independent state, might have sunk into a provincial capital — i. e., the capital of a province of the Roman Empire. When the bishops of that province met in a provincial council, the metropolitan presided. Under Constantine, the provinces over which they ruled were made as much as possible coterminous with those governed by civil rulers of corresponding rank. The leading metropolitans in the fourth century were those of Rome, Antioch, and Alexandria. The last two developed into patriarchs, and the first into the papacy. In England the Archbishops of Canterbury and York are the metropolitans of their respective provinces.

3. In the Greek church the title of a dignity intermediate between an archbishop and a patriarch.

4. A chief ruler.

"Let him your rubric and your feasts prescribe, Grand Metropolitan of all the tribe"
—*Cooper, Progress of Error*, 186.

Physiol.: A loss of blood during the intervals of regular menstruation, or of such an irregular nature that no monthly periodicity can be detected. A frequent cause is tumours, ulceration, &c.

mēt-rô scōpe, s. [Gr. *μήτρα* (*mētra*) = the womb, and *σκοπεῖν* (*skopēō*) = to see.]

Surg.: An instrument invented by M. Nache, for listening to the sounds of the heart of the fetus in uterogestation. The extremity was suggested by the stethoscope of Laënce, and is introduced through the vagina and applied against the neck of the uterus. It is used when the sounds and movements are imperceptible through the parietes of the abdomen.

inē-trô sid-ēr-os, s. [Gr. *μήτρα* (*mētra*) = a womb, the heart of a tree, and *σίδηρος* (*sīdēros*) = iron; so named from the hardness of its wood.]

Bot.: A genus of Myrtaceæ, tribe Leptospermeæ. It consists of plants, many of which climb, whilst the Myrtaceæ of other genera are erect. *Metrosideros polymorpha*, or some allied species, is supposed to furnish the

hard, heavy, dark-brown timber from which the South Sea Islanders make their clubs. *M. robusta* and *M. tomalosa* are used in New Zealand for shipbuilding.

mēt rô tōme, s. [Gr. *μήτρα* (*mētra*) = the womb, and *τομή* (*tomē*) = a cutting.]

Surg.: An instrument like a bistoury enche, which is introduced into the cavity of the uterus, where the knife is unsheathed and cuts on withdrawing. Its purpose is to divide the neck of the uterus; a hysterotomy.

mē trōx-ý lōn, s. [Gr. *μήτρα* (*mētra*) = . . . the path or heart of a tree, and *ξύλον* (*xy-lōn*) = wood.]

Bot.: A genus of Palmæ, tribe Calameæ. It is sometimes made a synonym of *Saguis* (q.v.), but Von Martius retains the name *Metroxylon*, and divides the genus into two subgenera, *Saguis* and *Pigafetta*. *Metroxylon* (*Saguis*) *breve* and *M. (Saguis) Rumphii* (Turkish *SAGO* (q.v.)). [SAGU-PALM.]

mēt tle, s. [The same word as METAL (q.v.).]

1. Metal.

2. Stuff, material; the substance of which a thing is composed.

"A certain critical hour, which shall more especially try what *mettle* his heart is made of."

*** mew-et, a.** [MUTE.]

mewl (ew as ū), v. t. [Fr. *mewler*.] [MEW (2), s.] To cry or squall as a child.

"The infant *mewling* and puking in the nurse's arms."
—*Shakespeare, As You Like It*, II, 7.

mewl (ew as ū), s. [MEWL (2), s.] The cry or squall of a child.

mewl-ēr (ew as ū), s. [Eng. *mewl*; *-er*; *-er*] One who mews, cries, or squalls.

mewş (ew as ū), * mewes, s. pl. [MEW (3), s.]

1. (*Ordn.:*) The royal stables in London; hence, a place where carriage-horses are stabled in towns.

"On the North side of Charing Cross stand the royal stables, called from the original use of the buildings on their site, the *mewş* having been used for keeping the king's falcons, at first from the time of Richard II." — *Strutt, London*, p. 451.

2. (*As a cogn.:*) A lane or alley in which mews or stables are situated.

mēx-çal, mēx i eal, s. [Sp.; cf. *me-x* = mixture, *mexela* = to mix.] [MEXAL.]

Mēx i-can, a, & s. [See def.]

A. As adj.: Of or pertaining to Mexico, or its inhabitants.

B. As subst.: A native or inhabitant of Mexico.

Mexican blue jay, s.

Ornith.: The popular name for (1) *Cyanocitta cyaneata*, and (2) *C. stelleri*, the latter being probably rather a variety than a species.

A process of engraving on copper. The smooth plate is abraded with a roughened file-like tool, and myriads of tiny points are raised over the surface of the plate. These points catch and hold the ink, and an impression taken from a plate in this condition would give a soft velvety mass of black without variety of light and shade. A burnisher is next used to get rid of the raised points where

half tones and lights are wanted. Sometimes where very brilliant high lights are required, they are cut away so as to ensure a smooth surface of copper. By means of this burnishing process, all gradations of light and shade are obtained from the white of the smooth copper to the black of the roughened plate. The process dates from about the middle of the seventeenth century.

The larvae live under the bark of trees, and develop organs similar to ovaries, in which larvae are produced; these, having literally devoured their parents, break out, leaving nothing but the empty skin. This process is repeated during the autumn, winter, and spring. In the summer the last generation undergoes a change to the pupa state, and from the pupa perfect males and females emerge; the latter, after impregnation, deposit their eggs, and the larvae produced commence a fresh series of organic broods.**miául (1 as y), vi.** [Fr. *miauler*.] To cry like a cat; to mew.**mi cá, s.** [Lat. *mica* = a crumb; Fr. & Sp. *mica*. Not related to Lat. *mico* = to shine, to glimmer.]*Min.*: A name originally given to the shining, scaly constituent of many rocks and earths. The great diversity of chemical composition and other characters led to its division into several species, which were supposed to have distinctive crystallographic and chemical characters. The word is now used to designate a group of minerals having certain characters in common, the most important of which is the eminently perfect basal cleavage, which affords very thin, tough, and shining laminae. The species hitherto distinguished are, Phlogopite, Lepidolite and Cryophylite (regarded as orthorhombic); Biotite (hexagonal); Lepidomelane (hexagonal-2); Astrophyllite and Muscovite (orthorhombic, but with monoclinic habit). Tschermak, who has recently optically investigated this difficult group of minerals, refers them all to the monoclinic system, his examinations showing that the axis of elasticity is inclined a few degrees to the normal to the plane of cleavage. Bauer contrasts these results. Tschermak divides the micas into two groups; those which are characterized by having the optic-axial plane perpendicular to the plane of symmetry, which includes Anomite, Lepidolite, Muscovite, Paragonite, and Margarite; and those which have the optic-axial plane parallel to the plane of symmetry, and which embraces Merxene, Lepidomelane, Phlogopite, and Zinnwaldite. Ramsdelsberg, as the result of a chemical investigation of this group, divides them into the alkali micas, magnesium mica, iron-magnesium mica, lithium-iron mica, and barium mica. The species and varieties belonging to this important group are, Anomite, Astrophyllite, Biotite, Cryophylite, Euchlorite, Fuchsite, Haughtonite, Lepidolite, Lepidomelane, Margarite, Margarone, Merxene, Muscovite, Ocellachene, Paragonite, Phengite, Phlogopite, Siderophyllite, and Zinnwaldite. (See these words.)**mica-basalt, s.***Petrol.*: Any basalt rich in mica, those of the normal type having it only in small quantity, and as a mere accessory.

mica chlorite, s.

Min.: The same as RUPIDOLITE (q.v.).

mica schist, micaceous-schist, mica slate, s.

Geol. & Petrol.: A slaty metamorphic rock composed of mica and quartz. The micas are usually muscovite (potash mica), though sometimes it is biotite (magnesian mica). The rock usually splits along the micaceous folia. Occasionally mica seems to constitute the whole mass of the rock. Next to gneiss, mica-schist is the most common metamorphic rock. It sometimes passes gradually into others of the same series. The addition of felspar making it become gneiss, and a decrease in the amount of quartz with an increase of chlorite makes it chlorite schist. Sorby has seen traces of ripple rocks. Various imbedded minerals occur, as quartz, garnet, &c.

mica-syenite, s.

Petrol.: A rock consisting of orthoclase, sometimes more or less plagioclastic felspar, biaxial magnesian mica, hornblende, occasionally with anarite, &c. Occurs in veins or dykes, chiefly in Calabria. (*Rutley*.)

*** mica-trap, s.**

Petrol.: A name of a volcanic rock, now distinguished into two: viz., Minette and Kersantite (q.v.).

mī-cā-ce-ō- (ce as shē), prof. [MICACEOUS.]

† **micaceous calcareous, a.** Calcareous with mica in layers.

mī-cā-ceous (ce as sh), mī-cā-clous, a. [*Eng. mic(a) + -ceous*]. Pertaining to or of the nature of mica; containing or resembling mica; hence, sparkling.

"The sparkling or *micaceous* [style] possessed by Hezlett."—*Saunders The Actor*, interl. xxv.

micaceous-felstone, s. A felstone having much mica in its composition. It closely approaches some of the fine-grained granite.

micaceous iron-ore, s.

Min.: A variety of hematite (q.v.), occurring in thin tables or as aggregated folia, mica-like.

† **micaceous rocks, s. pl.** Rocks having mica in layers, or interspersed—as mica-schist and gneiss.

micaceous sandstone, s.

Petrol. & Geol.: Sandstone with thin silvery plates of mica arranged in layers parallel to the planes of stratification, making the rock slaty. It was formed under running water, and is occasionally ripple-marked and sun-cracked. (*Lyell*.)

micaceous-schist, s. [MICA-SCHIST.]

mī-ca-fī-līte, s. [MICAPHILITE.]

Mī-cah, s. [Heb. מִיכָה (*Mikah*), for מִיכָה (*Mikayyāhū*) = Who is like Jehovah? Sept. Gr. Μιχαῖος (*Michaios*).]

1. *Script. Biog.*: Various persons with their names spelled Micah, Michah (1 Chron. xxiv. 24, 25), or Micha (2 Sam. ix. 12), are mentioned in the Old Testament. Specially: (1) A priest (Judges xvii., xviii.) believed to have been a descendant of Moses, written Manasseh (xviii. 30). (2) The prophet called Micah the Morastite, perhaps to distinguish him from Micaiah, the son of Imlah, who lived in the reign of Ahaz. Morastite means of Moresheth, probably Moresheth-gath (Micah i. 14). Scarcely anything is known of him, except what may be gathered from his prophecies.

2. *Old Test. Canon*: The sixth in order of the "minor prophets," i. e., of the minor prophetic books. The title states that "the word of the Lord came to Micah the Morastite in the days of Jotham, Ahaz, and Hezekiah, kings of Judah." The visions seen, however, were concerning Samaria and Jerusalem, the capital of the ten tribes, it will be observed, standing before that of the two (i. 1). Jeremiah attributes at least the prophecy in Micah iii. 12 to the reign of Hezekiah (Jer. xxvi. 18, 19). The corruptions of the ten tribes and of the two are denounced; and the prophet foretells the destruction of both Samaria and Jerusalem (i. 5, 6; iii. 8-12); the captivity in Babel (iv. 10); the world-wide spiritual influence to be ultimately exercised by Jerusalem and Zion, and the rise of a ruler to be born in Bethlehem, "whose goings forth have been from of old,

from everlasting" (v. 1, 2). The most natural division of the book is into three sections, ch. 1-3, 4-5, and 6, vii., each beginning with a formula calling on the people to hear (i. 2, iii. 1, vi. 1). Passages in Micah resemble others in Isaiah (cf. Micah iv. 1-5 with Isa. ii. 1-5). Micah is quoted or alluded to in Matt. ii. 5, 6, x. 35, 36; Mark xiii. 12; Luke xii. 53; John vii. 42. The canonical authority of the book has never been doubted.

mī-ca-phī-līte, mī-ca-fī-līte, mī-ca-phyl-līte, s. [From *Eng. mica*; Gr. φιλῶς (*philōs*) = friend, and suff. -ite (*Min.*).]

Min.: The same as ANDALUSITE (q.v.).

mī-ca-phyl-līte, s. [MICAPHILITE.]

mī-ca-rēlle, mī-ca-rēl-līte, s. [*Eng. mica*; suff. -elle, -ellite (*Min.*).]

Mineralogy:

1. A name used to designate the original mineral (which is at present unknown), from which the mine of Stolpen, near Neustadt, was derived.

2. The mica which is pseudomorphous after soapstone from Arendal, Norway. Color greenish-white; hardness, 2 to 3; sp. gr. 2.837; it is a potash mica, containing from 57 to 67 per cent. Occurs embedded in quartz.

mī-ca-rēl-līte, s. [MICARELLE.]

* **mice-eyed, a.** Keen-eyed.

"A legion of *mice-eyed* disciplinarians."—*Nashe*: *Lenten Stage*.

mīçh, v. l. [MICHIE.]

mī-chael, s. [See def.] A fine variety of sweet orange, from the island of St. Michael, one of the Azores.

mī-chael-īte, s. [Named from St. Michael, Azores, where it was found; suff. -ite (*Min.*).]

Min.: A variety of siliceous sinter (q.v.), occurring as capillary or fibrous snow-white encrustations; somewhat pearly in lustre.

Mīch-ael-mas, * Mīch-el-messe, Mych-el-messe, s. [From the proper name Michael; Fr. *Michel*, from Heb. מִיכָה (*Mikah*) = Who is like unto God? *Eng. -mas, -messe*; A.S. *masse* = mass (q.v.).]

1. The feast of St. Michael the Archangel, which is celebrated on September 29. It is one of the regular quarter-days in England.

2. Autumn.

Michaelmas daisy, s.

Bot. & Hort.:

1. A gardener's name for *Aster Traubelanti* and other species of *Aster*.

2. *Aster Trifolium*, the Sea Starwort, a plant frequently found wild in some salt-marshes in Britain.

Michaelmas head court, s. The annual meeting of the freeholders and commissioners of supply of a county, held at Michaelmas, for various county purposes. (*Soubth.*)

Michaelmas term, s.

Law: A term beginning on the 2nd and ending on the 25th of November.

mī-chael-sōn-īte, s. [Named after Michaelson, who analyzed it; suff. -ite (*Min.*).]

Min.: An orthite-like mineral grouped by Dana with manganite (q.v.). It appears to be a silicate of lanthanum, didymium, cerium, lime, zirconia, glauca, sesquioxide of iron, and a little alumina. Found with melnophane near Brevig, Norway.

mīçhe, *mīçh, *meççh, *mīçh, mooch, mouch, s. [Fr. *mouch, mouche, mouchier* (Fr. *mouche*) = to lude, to lark about.]

1. To lude, to skulk, to retire or hide from notice.

"Struggle up and down the country, or *mouch* in corners amongst their friends idly."—*Spencer*: *Views of the State of Ireland*.

2. To play the truant. (*Local*.)

3. To be guilty of anything done in secret, as an illicit amour, &c.

mī-chēl i a, s. [Named after Pietro Antonio Micheli, a Florentine botanist, who died in 1757.]

Bot.: A genus of Magnoliaceae, tribe Magno-

lieae. It is akin to Magnolia, but has axillary flowers, lesser carpels, and more numerous stamens. *Michelia Champaca* or *Tsampea* is the *Champaca* (q.v.). All parts of it are strongly stimulant. The latter aromatic bark has been used in low-interrupted fevers. It is a good substitute for guaiacum. The bark of *M. grandis* has properties like cascarilla-bark, but is less bitter. That of *M. quercifolia* has a strong smell of camphor. *M. Indisapa*, a tree growing in Nepal, has fragrant wood much used in that country for building.

mīçh-ēl in i a, s. [Latinised from a French proper name, *Michel*.]

Palaont.: A genus of tabulate corals, from the Devonian and Carboniferous formations. The corallum is very like that of Favosites, but the epitheca is often furnished with root-like prolongations, the tabulae arched, and the mural pores very irregularly distributed.

mīçh-ēr, meççh cr, *much arc, s. [*Eng. mich*; *cr*]. One who miches, skulks, or hides out of sight; a truant, a petty thief, a pilferer.

harriers and the goshawks. It inhabits forests in Mexico.

mī crā thō ūc, *s.* [Pref. *micro*, and Gr. Ἀθήνη (*Athēnē*) = the goddess Minerva, to whom the owl was sacred.]

Ornith.: A genus of Strigidae erected by Coles. It has but one species, *Micrathya whitneyi*, the smallest owl known. Length about six inches, wingspan from fourteen to sixteen inches. Above, grayish olive-brown, with pale rusty spots, whitish nuchal collar. Beneath, white, with large rusty blotches. Habitat, Colorado and Western Mexico.

mī crō, *pref.* [Gr. μικρός (*mikros*) = little, small.]

1. A prefix denoting smallness or littleness.
2. Among electricians and on the C. G. S. system, division by a million. (*Brit. Assoc. Report*, 1873, p. 224.)

micro-lepidoptera, *s. pl.* A division of the Lepidoptera with regard to size; it is of little or no scientific value.

mī crōbe, *s.* [Fr., from Gr. μικρός (*mikros*) = small, and βίος (*bios*) = life.]

Biol.: A term proposed by Sedillot, in 1878, for any minute organism, vegetable or animal. Microbes, collectively, are equivalent to the Microzymes (q.v.) of Bichamp.

"We shall make use of the term *microbe* as the general designation of all the minute organized beings which are found on the borderland between animals and plants."—*E. L. Trouessart: Microbes, Ferments, & Moulds*, p. 6.

mī crō-brōm'ite, *s.* [Pref. *micro*, and Eng., &c. bromine (q.v.)]

Min.: A variety of enochite (q.v.), containing a small amount of bromine compared with the chloride of silver. [MEGABROMITE.]

mī crō cāch' rŷs, *s.* [Pref. *micro*, and Lat. *caryx* = patched barley; a catkin.]

Bot.: A genus of Pinaceae, tribe Abietæ. [HOL-PINE.]

mī crō-çé-phāl'ic, *a.* [Pref. *micro*, and Eng. cephalic.]

Anthrop.: A term applied to skulls having a capacity below 1,350 cubic centimeters.

mī crō çéph'-a lous, *a.* [Pref. *micro*, and Eng. cephalous.] Having a small or imperfectly-developed head; hence, deficient in intellect. [*Black: Adv. of a Phacton*, ch. XXV.]

mī crō chir' õp tēr' a, *s. pl.* [Pref. *micro*, and Eng., &c. *chiroptera*.]

Zool.: A name proposed by Dobson for a sub order of Bats. [ISSUDIVORA, 1. (2).]

mī crō chrō nôm' è-tēr, *s.* [Pref. *micro*, and Eng. *chromotero* (q.v.).] A micronometre (q.v.).

mī crō-clāse, *s.* [Pref. *micro*, and Gr. κλάσις (*klasis*) = cleavage; Ger. *mit. klasses*.]

Min.: A name given by Wink to a potassium-soda felspar, from the St. Gotthard, Switzerland. Crystallization trichine. Occurs inter-crystallized with orthoclase in a singular manner to that of albite with microcline. (See these words.)

mī' crō cline, *s.* [Pref. *micro*, and Gr. κλίω (*klīō*) = to bend, to incline; Ger. *microklin*.]

Min.: A name originally given by Breithaupt to a felspar which gave the angle of 90° 22' to 90° 23' between the two cleavage planes instead of 90°. Des Cloizeaux has referred this felspar, however, to orthoclase, but has adopted the name for a new species of felspar, having the following characters. Crystallization trichline, with polysynthetic twinning. A section cut parallel with the base shows a peculiar reticulated structure, due to the regular intergrowth of twin lamellæ; it encloses irregular bands of albite compound. Silica, 64.30; alumina, 19.70; sesquioxide of iron, 0.74; potash, 15.00; soda, 0.48; loss on ignition, 0.35 = 101.17; represented by the formula, K₂(Mg)Si₂O₆. A large part of felspar, hitherto regarded as orthoclase, is included in this species, as also much of the amazonstone and chesterite (q.v.).

mī crō-cōc' cūs, *s.* [Pref. *micro*, and Gr. κοκκος (*kokkos*) = a berry.]

Bot.: A genus of Schizomyces, distin-

guished by the minute organisms being globular instead of linear. The species have been divided into three groups: (1) Chronogenous; (2) Zymogenous, producing various kinds of fermentation; and (3) Pathogenous, producing contagious diseases. (*Griffith & Beaufrey*.)

mī crō cōñ' chūs, *s.* [Pref. *micro*, and Gr. κοκκη (*kokkhe*) = a shell.] [STRIMOUS.]

mī crō cōsm, *s.* [Fr. *microcosmos*, from Lat. *microcosmos*, from Gr. μικροκόσμος (*mikrokosmos*) = a little world, from *kosmos* (*kosmos*) = small, and *kosmos* (*kosmos*) = a world.]

1. A little world of cosmos; a term facetiously applied to man, as supposed to be an epitome of the macrocosm or universe. It was used by Paracelsus.

"There were some said, that stand not here; but want neither aid, nor help; but if the spirit of man (whom they call the *microcosm*) do give a bit touch to the spirit of the world, by strong imaginations and beliefs, it might command nature."—*Bacon: Nat. Hist.* § 502.

2. A little community or society.

nī crō cōş' mic, **mī crō cōş' mic al**, *a.* [Eng. *microcosm*; -ic, -al.] Pertaining to man or the microcosm.

"This opinion continued would much advance the improvement of man."—*Bacon: False Propos.*, bk. ii, ch. iii.

microcosmic salt, *s.*

Chem.: (NH₄)₂NaHPO₄·4H₂O. Ammoniosodic phosphate, used as a flux in blowpipe experiments. [STRACONITE.]

mī crō cōş' mōg' rā phŷ, *s.* [Gr. μικροκόσμος (*mikrokosmos*) = a microcosm, and γραφή (*graphē*) = to write, to describe.] The description of man as a microcosm.

mī crō cōus'-tic, *a. & s.* [Pref. *micro*, and Eng. *crustic*.]

A. *As adj.*: Serving to increase small or indistinct sounds; of or pertaining to a microcosmic. [B.]

B. *As subst.*: An aural instrument for collecting sounds for the partially deaf; an auricle or speaking trumpet.

mī crō crith, *s.* [Pref. *micro*, and Eng. *crith* (q.v.).]

Chem.: The weight of an atom of hydrogen.

mī crō-crŷs'-tal-line, *a.* [Pref. *micro*, and Eng. *crystalline*.]

Metall.: The name given by Rosenbusch to the parts of porphyritic ground matter which are aggregates of elements mineralogically recognizable. It is opposed to cryptocrystalline, in which they are unrecognizable.

mī crō-dēr'-mā tōus, *a.* [Gr. μικρός (*mikros*) = small, and δερμα (*derma*) = skin, δερματός (*dermatos*) = the skin.]

Pathol.: Of, belonging to, or consisting of minute portions of skin.

mī crō dis'-cūs, *s.* [Pref. *micro*, and Gr. δίσκος (*diskos*) = a disc.]

Palæont.: A genus of Trilobites, family Agnostidae (sometimes referred to the Frinclidæ) from the Upper Cambrian. There are no facial sutures or eyes; four body rings are present, and the tail is segmented.

mī crō-dōn, *s.* [Pref. *micro*, and Gr. ὀδώντος (*odontos*) = small, ὀδώντος (*odontos*) = a tooth.]

Palæont.: A genus of fossil teeth, believed to belong to Pycnodont fishes. Prof. Morris, in 1854, enumerated three species from the Chalk and one from the Purbeck beds.

mī crō dōn' tā, *s.* [Microton.]

Entom.: A genus of Moths, family Notodontidæ. *Microdonta hudsoni*, a snow-white moth, with orange spots on the fore wings, is rare in England.

mī crō far'-ād, *s.* [Pref. *micro*, and Eng., &c. farad.]

Electro-magnetics: The millionth part of a farad. The farad being too large for practical purposes, the microfarad is employed in its room. (*Leitch: U. S. System of Units: London* (1875), p. 79.)

mī crō fcl' site, *s.* [Pref. *micro*, and Eng. *felsite*.]

Pathol.: The name given by Rosenbusch to a colorless, grayish, or brownish substance, made up of minute scales or fibres occurring at the bases of some porphyries.

mī crō fcl' sit' ic, *a.* [Eng. *microfelsitic* (q.v.); suff. -ic.] Of, belonging to, or consisting of microfelsite.

microfelsitic basis, *s.*

Pathol.: An alternative name given by Rosenbusch to microfelsite (q.v.).

microfelsitic matter, *s.*

Pathol.: Matter consisting of microfelsite (q.v.). (*Reilly*.)

mī crō gās' tēr, *s.* [Pref. *micro*, and Gr. γαστήρ (*gastēr*) = the belly.]

Entom.: A genus of Entomophaga, family Ichneumonidæ. *Microraster glauciventris* parasitic on the caterpillars of the common white butterfly. The larva burst forth from the body of the caterpillar when it is ready to change, and form round its empty skin a little heap of yellowish cocoons.

nī crō gē' ô lōg' i cal, *a.* [Eng. *microgeology* (q.v.); -ic.] Of or pertaining to microgeology; derived from the use of the microscope in relation to geology.

mī crō gē' ôl' ô gŷ, *s.* [Pref. *micro*, and Eng. *geology* (q.v.).]

That department of geology whose facts are ascertained by the use of the microscope.

mī crō glōs' sūs, *s.* [Pref. *micro*, and Gr. γλῶσσα (*glōssa*) = a tongue.]

Ornith.: A genus of Psittacidæ, from the Papuan district and North Australia. John Mclellivray (*Journal of the Raffles Club*, i, 321) speaks of the *Micropopsittacus crinitus* as "an enormous black parrot with crimson cheeks. At Cape York it feeds upon the cabbage of various palms, stripping down the sheath at the base of the leaves with its powerful, acutely-hooked upper mandible." It is popularly known as the Black Cockatoo. An excellent detailed description of the bird has been given by A. R. Wallace (*Malesy Archæology*, 1872, pp. 446-448).

mī crō graph, *s.* [Gr. μικρός (*mikros*) = small, and γραφή (*graphē*) = to write, to draw.]

An instrument invented by Mr. Webb of London, for executing extremely minute writing and engraving; its general principle is that of the pantograph.

mī crō graph' s. [Gr. μικρός (*mikros*) = small, and γραφή (*graphē*) = to write, to draw.]

An instrument invented by Mr. Webb of London, for executing extremely minute writing and engraving; its general principle is that of the pantograph.

mī crō graph' s. [Gr. μικρός (*mikros*) = small, and γραφή (*graphē*) = to write, to draw.]

An instrument invented by Mr. Webb of London, for executing extremely minute writing and engraving; its general principle is that of the pantograph.

mī crō grā-phēr, *s.* [Eng. *micrograph*; -er.] One versed or skilled in micrography.

mī crō graph' ic, *a.* [Eng. *micrograph* (q.v.); -ic.] Pertaining or relating to micrography.

mī crōg' rā phŷ, *s.* [Eng. *micrograph*; -y.]

The description of things too minute to be seen without the aid of the microscope.

"A curious description and figure of the sting seen in Mr. Hook's *micrography*."—*Beccar: Mastom*.

mī crō hī' èr-āx, *s.* [Pref. *micro*, and Gr. ἕραξ (*herax*) = a hawk, a falcon.]

Ornith.: A genus of Falconidæ, sub-family Falconinæ. It contains the Falconets. [FALCONET.]

mī crōhm, *s.* [Pref. *micro*, and Eng., &c. *ohm* (q.v.).]

Electricity: The millionth part of an ohm.

mī crōl' a bis, *s.* [Pref. *micro*, and Gr. λαβῆ (*labē*) = a pair of pincers.]

Palæont.: A carboniferous genus of Arachnida; it is believed to be most nearly allied to the Pseudoscorpionidæ (q.v.).

mī crō læ' nā, *s.* [Pref. *micro*, and Gr. ἄσπρος (*aspros*) = wool; so called from the small woolly flower-stalk.]

Botany:

1. A genus of Byttneriaceæ. The fibrous tissue of the bark of *Microrhiza spectabilis* is suitable for cordage.

2. A genus of grasses, tribe Oryzæ.

mī crō lēs' tēs, *s.* [Pref. *micro*, and Gr. ἄσπρος (*aspros*) = a pirate, a buccaner; ἄσπρον (*aspron*) = to be a robber or pirate.]

Palæont.: A genus founded on the remains of *Microlestes antiquus*, the earliest known mammal. Only a few teeth have as yet been discovered. "The earliest horizon on which *Microlestes* occurs is in a bone-bed in the Keuper [Upper Trias] of Württemberg; but it has also been detected in the higher Rhætic beds." (*Nicholson*.) It is impossible to decide whether *Microlestes* was placental or marsupial. Most probably it was marsupial; and

it appears to be closely allied to the recent Australian banded Ant-eater. [MACROPTER, MYRMICOMORPHUS.]

mī-crō-lite, s. [Gr. μικρός (mikros) = small, and λίθος (lithos) = a stone.]

Min.: A mineral occurring in exceedingly small octahedral crystals, hence the name. It has lately been found in well-defined crystals up to an inch and a half in diameter, and larger imperfect ones up to 4 lbs. in weight. Crystallization, isometric; hardness, 6; sp. gr. 5.536; lustre, resinous; colour, wax-yellow to brown; streak, pale ochreous yellow; fracture, conchoidal; brittle. Compos.: a columbo-tantalate of lime, with some glucina, oxide of tin, magnesia, sesquioxide of uranium, yttria, thorine, &c. Probable formula 2(Ca₂Ta₂O₇) + 6H₂O. Found with albite, &c., at Chesterfield, Massachusetts; Uto, Sweden; and at the mica mines, Annela Co., Virginia.

mī-crō-lith, s. [Pref. micro-, and Gr. λίθος (lithos) = a stone.]

Crystallography: One of the microscopic stony bodies rendering the material in which they occur all but crystalline.

mī-crō-lith-ic, a. [Pref. micro-, and Eng. lithic.]

1. *Ord. Lang.*: Composed of small stones.

2. *Anthrop.*: A term applied to a particular style of funeral monuments, in which extremely small stones are used. They are nearly always squared or hexon, and the builders sought to produce effect by construction, not by the exhibition of mere force.

The cognate examples in the microlithic styles afford us very little assistance."—*Ferguson, Antic Stone Monuments*, p. 47.

mī-crōl-ō-gy, s. [Gr. μικρός (mikros) = small, and λόγος (logos) = a word, a discourse.]

1. *Lit.*: Micrography; that part of science depending upon the use of the microscope.

2. *Fig.*: Undue attention to insignificant or unimportant matters; minuteness about words; hair-splitting.

"There is less microscopy in his evolution."—*Roberts, Life of W. Taylor*, i. 146.

mī-crō-mēr-i-a, s. [Pref. micro-, and Gr. μέρις (meris) = a part.]

Bot.: A genus of Labiatae, tribe Melissae. *Micromeria capitata*, a small plant growing in the Neelgherry Hills, the Western Ghats, &c., has the properties of Peppermint.

mī-crōm-ē-tēr, s. [Pref. micro-, and Eng. mētr.] An instrument used with a telescope or microscope to measure small distances, or the apparent diameters of objects which subtend very small angles. Micrometers are variously constructed. The field of the telescope may be provided with a graduated scale, or a metallic ring, or a diaphragm having parallel and intersecting spider-lines or fine wires. The micrometer with a graduated scale is used for measuring distances by direct comparison.

See also *Double-image micrometer*, *double-reticula micrometer*, *linear-micrometer*, *position-micrometer*, *ring-micrometer*, *scale-micrometer*. [FLUAR.]

micrometer-balance, s. A balance for ascertaining minute differences in weight.

micrometer-microscope, s. An instrument used for reading and subdividing the divisions of large astronomical and geodetical instruments.

micrometer-screw, s. A screw attached to optical and mathematical instruments as a means for exact measurement of very small angles. The great space through which the lever of the screw passes, in comparison with the longitudinal motion due to the pitch, affords the means for a positive motion which is imperceptible on the object moved, though appreciable in its results. If the thread of a micrometer-screw in an instrument has 50 threads to an inch, and carries a pointer which traverses a graduated circle divided into 20 equal parts, the revolution of the micrometer-screw for a distance equal to one of the divisions will move the object to which the screw is attached $\frac{1}{1000}$ of an inch; that is, $20 \times 50 = 1,000$.

mī-crō-mēt-ric, **mī-crō-mēt-ric-al**, a. [Eng. micrometer, -s, -al.] Of or pertaining to the micrometer; as, *micrometric measurements*.

mī-crō-mēt-ric-al-lý, *adv.* [Eng. micrometrically; lý.] By means of a micrometer.

"The area within which the Prayer was micrometrically written by H. J. Woodward, United States Army, who found that it and the inscription were contained within a space $\frac{1}{16}$ of an inch square."—*Knight, Dictionary of Mechanics*.

mī-crōm-ē-trý, s. [Eng. micrometer; -try.] The act or art of measuring minute objects or distances by means of a micrometer.

mī-crō-mýs, s. [Pref. micro-, and μύς (mys) = a mouse.]

Zool.: A genus of Muridae, constructed to contain the Harvest Mouse (q.v.).

mī-crō-nī-sus, s. [Pref. micro-, and Lat. Nisus; Gr. Νίσος (Nisos) = a king of Megara, tilled to have been charged into a sparrow-hawk. (*Quid? Met.* viii. 8, *sup.*)]

Ornith.: A genus of Falconidae, sub-family Accipitrinae (q.v.). *Micronisus bolinus* is the Shikra, found in India, where it is trained for purposes of falconry.

mī-crō-nóm-ē-tēr, s. [A contraction of *microchronometer* (q.v.).] A species of watch intended for measuring short intervals of time, as the flight of a projectile, &c. After being wound up in the ordinary way, it is set in motion by pressing a spring with the finger, upon withdrawing which it is instantaneously stopped.

mī-crō-pán-tō-graph, s. [Pref. micro-, and Eng. pantograph (q.v.).] An instrument invented in 1852 by Mr. Peters, an English banker and microscopist, for minute writing. By means of it the Lord's Prayer, containing 223 letters (amen being omitted), has been written on glass within the space of $\frac{1}{330000}$ of a square inch.

mī-crōph-ō-lis, s. [Pref. micro-, and Gr. φολίς (pholis) = a horny scale.]

Ichthyol.: A genus of Labyrinthodonts, family Baeophopina. It was founded by Huxley on remains from the Karoo-bed at the foot of Rhenosterberg, South Africa. He called the single species *Micropholis Swolvi*, after its discoverer. (*Quar. Jour. Geol. Soc.*, xv. 642-49.)

mī-crō-phōne, s. [Gr. μικρός (mikros) = small, and φωνή (phōnē) = sound; Fr. microphone.] An instrument for increasing the intensity of low sounds by communicating their vibrations to a more sonorous body which emits a more audible sound. It is variously constructed, the most usual method being with a piece of charcoal held loosely between two other pieces in such a manner that it is affected by the slightest vibrations conveyed to it by the air or any other medium. The two external pieces are placed in connection with a telephone, and, when the ear is placed at the ear-piece of the telephone, the slightest sound on the wooden support of the microphone is so magnified that even the tread of a fly appears as loud as the tramp of a horse. [TELEPHONE.]

mī-crō-phōn-ics, s. [MICROPHONE.] The science or art of augmenting weak or small sounds.

mī-crōph-ō-nous, a. [Eng. microphone(-); -ous.] Having the property or power of augmenting weak sounds; microconstric.

mī-crōph-ō-ný, s. [MICROPHONE.] Weakness of voice.

mī-crō-phō-tóg-raphý, s. [Pref. micro-, and Eng. photography (q.v.).] A photographic process by which an object is reduced in size, while its exact form is retained. By means of this instrument letters can be reduced to a minute space, and afterwards either enlarged by photography or read with a microscope. Practical use of the process was made during the siege of Paris in 1870, in order to communicate with those inside that city by means of messages conveyed by carrier-pigeons, the transcript being taken on paper of extreme thinness, so that the pigeons were able to carry a considerable number of messages.

mī-crōph-thál-mi-a, **mī-crōph-thál-mý**, s. [Pref. micro-, and Eng. ophthalmia, ophthalmia.]

Pathol.: A morbid smallness of the eye.

mī-crō-phýl-lit, s. [Gr. μικρός (mikros) = little, and φέλλον (phallon) = a leaf; Ger. mikrophyllit.]

Min.: One of two inflexible minerals enclosed in labradorite. [MICROPHYLLIT.] It occurs in crystalline scales from 0.01 to 1 mm. in length.

mī-crōph-ýl-lóus, a. [Pref. micro-, Gr. φάλλον (phallon) = a leaf, and Eng. adj. suff. -ous.]

Bot.: Having small leaves.

mī-crō-phýte, s. [Pref. micro-, and Gr. φυτόν (photon) = a plant.] A microscopical plant, especially one parasitic in its habits.

mī-crō-plak-it, s. [Gr. μικρός (mikros) = little; πλαγή (plagi), genit. πλαχός (phalos) = flat, and suff. -ite (Min.).]

Min.: A mineral occurring in thin minute rectangular tables, enclosed in labradorite (q.v.). Colour by transmitted light grayish-yellow to brownish, by reflected light reddish-green to green and blue. The nature of these tables is yet uncertain, but most of their characters resemble those of magnetite (q.v.).

mī-crō-pō-gōn, s. [Pref. micro-, and Gr. πωγων (pogon) = the beard.]

Ichthy.: A genus of Serranide (q.v.), closely allied to Pogonias, but with conical pharyngeal teeth. Two species are known, from the western parts of the Atlantic.

mī-crōp-tēr-ús, s. [Pref. micro-, and Gr. πτερον (pteron) = a wing.]

Ornith.: A genus of Anatide. *Micropodius hutchingsi* is the Steamer-duck or Race-horse. Found in the Straits of Magellan, &c.

mī-crōp-tēr-ýg-i-dæ, s. pl. [Mod. Lat. *micropterygia*, genit. *micropterygi(s)*; Lat. fem. pl. adj. suff. -idæ.]

Entom.: A family of moths, group Tineina. The head is rough; the antenna shorter than the anterior wings, these and the hinder ones somewhat transparent. Larva without feet, mining so as to produce blotches in leaves. Only one genus, *Micropteryx* (q.v.).

mī-crōp-tēr-yx, s. [Gr. μικροπτερός (mikropteros) = with small wings; pref. micro-, and Gr. πτερός (pteros) = a wing, a fin.]

1. *Entom.*: The typical and only genus of the family Micropterygidae. There are twelve British species.

2. *Ichthy.*: A genus of Carangide (Horse-Mackerel). The body much compressed; no detached finlets. Small teeth on vomer and palatine bones. *Micropteryx chequensis* is a semi-pelagic fish, very common in the tropical Atlantic, less so in the Indian Ocean.

mī-crō-pūs, s. [Pref. micro-, and Gr. πούς (pous) = a foot.]

1. *Ichthy.*: A genus of Acanthopterygians, family Scopelogadide. They are exceedingly small, about an inch and a half in length. Two species are known, from the neighbourhood of the coral reefs of the Pacific.

2. *Ornith.*: A genus of Baeophopina, short-toed Thrushes, founded by Swainson.

mī-crō-pýlc, s. [Pref. micro-, and Gr. πύλι (pyli) = an opening.]

1. *Animal Physiol.*: (See extract.)

"In the Gossion Fishes it has been shown by Dr. Dawson that the spermatozoa pass through a minute opening in the external membrane of the ova, termed the *micropyle*. A similar opening has been observed by Muller and others in insects, cephalopods, molluscs, and in several echinoderata, and its use as Dr. Allen Thompson has suggested, is probably to facilitate the penetration of sea-water of very thick external coverings. A *micropyle* has not been seen in any of the mammalia."—*Carpenter, Human Physiol.*, p. 288.

2. *Fertilib. Physiol.*: The opening in a ripe seed. It is formed by the united exo- and endostome. It is always opposite the embryo. The position of the latter can therefore be determined by the inspection of the micropyle.

mī-crō-rhē-ō-mēt-ri-cal, a. [Pref. micro-, Eng. *rhēmatos*, and suff. -al.] A term applied to a method of determining the nature of bodies in solution, when flowing through small or capillary tubes.

mī-crō-sau-ri-a, s. pl. [Pref. micro-, and Gr. σαύρος (sauros) = a lizard.]

Palæont.: A group of Labyrinthodonts, founded by Dawson. Thoracic plates unknown; ossification of limb-bones incomplete. Dentine nearly or entirely non-placid. Jugal cavity large. Three genera. *Dendropteron* Hylonomus, *Hylepteron*.

bōl, **bōy**; **pōut**, **jōwl**: **cat**, **cell**, **chorus**, **chin**, **bench**: **go**, **gem**: **thin**, **this**: **sin**, **aç**: **expect**, **Xenophon**, **exist**. **ph = f**. **-cian**, **-tian = shan**. **-tion**, **-sion = shün**; **-tion**, **-sion = zhün**. **-cious**, **-tious**, **-sious = shüs**. **-ble**, **-dle**, &c. **bcl**, **dcl**.

mī crō schōrl itc (o as o), s. [Pref. *micro-* = little; Ger. *s* = schorl (q.v.) and suff. -*itc* (Mor).]

Min.: A name given to a kind of crystallite observed in the kaolinite of Thuringia, and which is probably tourmaline.

mī crō scope, s. [Gr. *μικρός* (*mikros*) = small, and *σκοπεῖν* (*skopēin*) = to see, to observe; Fr. *microscope*; Ital. & Sp. *microscopio*.]

Optics: An optical instrument by which objects so magnified that details invisible to the naked eye are clearly seen. In a simple microscope the magnifying power is interposed directly between the eye and the object, in the manner of a magnifying glass; and though the power may consist of several lenses, they combine as one. In a compound microscope, an aerial magnified image of the object is projected by one lens in the manner of a magic lantern, and this image is looked at and further magnified by a second power as in the simple microscope. The first lens is called the *object-glass* (q.v.), or *objective*; the second the *ocular* or *eye-piece*. The most important by far is the *object-glass*. The shorter its focus the larger is the image produced, and at one time objectives were constructed of as high power as 4th of an inch; but it was subsequently discovered that the power of separating minute detail depended far more upon the aperture of the lens than upon its power, and the best work is now done by objectives not less than 1/25th or 1/32nd in. focus, made with the utmost refinement so as to bear a further magnification by the eye-piece of thirty or forty times. The eye-pieces are also made of various powers. The instrument further requires a stage on which the objects can be placed and held, underneath which must be a mirror for directing the light to the object when viewed transparently. In using high powers, biomechanical movements are employed to adjust the object; and a finely-adjustable sub-stage, for the use of various illuminating apparatus, and especially for focussing accurately upon the object, by an achromatic combination called a *condenser*, an image of the flame, so that light-rays and image-rays may coincide. An instrument which presents an image to only one eye is called a *monocular microscope*; but there are several methods of doubling by prisms the pencil of rays from the objective into two sets, which diverge to eye-pieces so placed, that both eyes can be used; such an instrument is called a *binocular microscope*. In all the usual forms of microscope, the image of the object appears inverted, and for most objects this is of no consequence. For dissecting instruments are constructed which, by prisms or lenses, re-invert or right the object; such are called *erecting microscopes*. In the solar microscope a lens condenses the sun's rays upon an object, which is thus so intensely illuminated that the objective can project a greatly enlarged image upon a white screen. In the electric microscope the rays from the electric light are similarly used, and in this way microscopic photographs of long messages, on tiny slips of collodion, were enlarged and transcribed during the siege of Paris in 1870. The oxy-hydrogen microscope similarly employs the light from lime made incandescent by the oxy-hydrogen flame. Very lately this form of microscope has been so greatly improved that magnifications of 1,200 to 2,000 diameters can be obtained with it.

Microscopical analysis would enable us to decide this question. — *Phil. & London Phys. Journ.*, 11, 20.

2. Using a microscope; assisted by a microscope.

mī crō scōp ic al lŷ, adv. [Eng. *microscopical*; *adv.*] By means of a microscope; with minute investigation; in very minute size or degree.

mī crōs cō pist, s. [Eng. *microscopist*; *-ist*.] One skilled or versed in microscopy.

mī crō scō pi ūm, s. [A Latinised form of Eng. *microscope* (q.v.).]

Astron.: One of Lacaille's twenty-seven southern constellations. It is situated above *Grus* and *Indus*, at the junction of *Capricornus* and *Sagittarius*.

mī crōs cō pŷ, s. [Eng. *microscopist*; *-y*.] The act or art of using a microscope; investigation with a microscope.

mī crōs cŕ is, s. [Pref. *micro-*, and Gr. *σπερς* (*seps*) = a kind of endive, succory.]

Bot.: A genus of Compositae, tribe *Cichoraceae*. The fleshy fibres of the roots of *Microris* *Fischeri* are eaten by the natives of Port Philip in Australia.

mī crō sōm mīc, s. [Pref. *micro-*, and Eng. &c. *summit*.]

Min.: A mineral found in the bombs ejected from Vesuvius, and in basaltic lava, where it has been formed by sublimation. Crystals, hexagonal and exceedingly minute, with vertical striations. mī crō zŷmes, s. pl. [Pref. *micro-*, and Gr. *ζῷμα* (*zōma*) = yeast.]

Hannon & Comp. Physiol.: The smallest and least organized of living beings. They may be either globular, rod-shaped, egg-shaped, or filamentous; but the most common form is that of jointed rods moving with rapidity, in size about 1/100 of an inch. Many physiologists at home and abroad contend that infectious diseases depend on the presence of these organisms in the blood. They have been found in various blood, human and ovine, in human blood in scyph fever and measles, and, according to Dr. Koch, in cholera; and in the blood of sheep and cattle which have died of splenic apoplexy. Called also *Bacteria* and *Vibriones*. [GERM-THEORY.]

Experiments have proved that two of the most destructive epizootic diseases, sheep-pox and glanders, are also dependent for their existence and their propagation upon extremely small living solid particles, to which the title of microzoans is applied. — Huxley, Critique & Address (1873), p. 242.

† mī crŷ phān tēs, s. [Pref. *micro-*, and Gr. *ὑφαντός* (*hypphantōs*) = to weave.]

mī grā-tion, s. [Fr., from Lat. *migratio*, noun, accus. of *migratus*, from *migratus*, pa. par. of *migrare* = to migrate (q.v.); Ital. *migrazione*.]

I. Ordinary Language:
1. The act of migrating, or removing from one place of residence to another, especially from one country or state to another; change of abode or residence.

"Adventures that beguiled and cheered
Their gait migration."
Wordsworth. *Excursion*, bk. vii.

* 2. Change of place of position; removal.

"Such alterations, transitions, *migrations*, of the centre of gravity, and elevations of new islands, had actually happened." —Woodward. *Natural History*.

* 3. Residence in a foreign country; banishment.

"We are, too, too long banished from the Christian world, with such animosity, as if it were the worst of enemies, and meet to be adjudged to a perpetual migration." —By Hall. *Invisible World*. (The Epistle.)

II. Technically:

1. Zool., Ornith., &c.: A term applied to the periodical or irregular movements of all animals, especially to those of birds and fishes, but although the movements of some mammals correspond in some degree to those of birds, they are rather incursions than true migrations. In all the temperate parts of the globe there are many genera and species of birds which reside only a part of the year, arriving and leaving at tolerably fixed epochs. The fieldfare, red-wing, snow-bunting, and numerous ducks and waters visit England in the winter; and in the summer the cuckoo, the swifts and swallows, and numerous warblers appear, build their nests and rear their young, and then depart. Most of the birds that spend their spring and summer in the temperate parts of Europe pass the winter in North Africa and Western Asia; the winter visitants pass the summer in the extreme north of Europe and Asia, some of them breeding in Lapland. It is probable that what (for want of a better term) may be called "the instinct of migration" in such birds has arisen from the habit of wandering in search of food, greatly exaggerated by the powers of flight, and by the necessity for procuring a large amount of soft moist food for their unfledged young. Many sea-fishes migrate to a limited extent for the purpose of depositing their spawn in favourable situations. (Wallace; *Geog. Inst. Animals*, I. 19-34.)

2. Bot.: Many seeds have downy or feathery appendages which when wind blows influence their motion through the air; others are floated down rivers to alluvial sands near their mouths; the ocean may cast them on distant shores, or regions, now disconnected, may at a former geological period have been united. Their seeds may have been transported say from the Arctic circle to the tops of British highland hills, or they may have been eaten by birds, and, remaining undigested, have been voided at a distance from their original locality.

mī grā tor y, a. [As if from a Lat. *migrator*, from *migratus*, pa. par. of *migrare* = to migrate (q.v.); Fr. *migratoire*; Ital. & Sp. *migratorio*.]

I. Ordinary Language:
1. Removing or passing from one place of residence or resort to another; changing one's abode.
2. Wandering in haluts; roving, ro-mantic, unsettled; as, to lead a *migratory* life.
3. Pertaining or disposed to migration.

"This purpose is sometimes carried on by a sort of migratory instinct, sometimes by the spirit of conquest." —Barke. *Library of Eng. Hist.*, bk. ii. ch. iii.

II. Zool., Ornith., &c.: A term applied to animals, and more especially to birds, which reside in their ordinary habitat only during a period of the year, migrating at certain seasons to other countries where the temperature and surroundings are more in consonance with their general habits.

"The same species is often sedentary in one part of Europe, and migratory in another." —Wallace. *Geog. Inst. Animals*, I. 20.

migratory cells, s. pl. A term applied under certain circumstances to the colourless corpuscles of the blood.

"By means of the amoeboid movement of their protoplasm, the pale corpuscles under some circumstances pass the power of wandering or migrating from the blood-vessels, penetrating between the elements of their coats, and in this manner they find their way into the interstices of the tissues, and hence into the connectives of the lymphatics. Cells like these, which appear to be wandering independently in the tissues, and particularly in the connective tissue, are known as *migratory cells*." —Quater. *Antony* (1882), II. 1-20.

mil-dew, *mël-dew (ew as ü), s. [A.S. meldeaw = honey-dew, from the sticky, honey-like appearance of some kinds of lücht, e.g., on lime trees. Cf. O. H. Ger. mildeu = mildew; Goth. milittis = honey; Ir. mil = honey; mildeow = mildew; Lat. mel; Gr. μέλι (meli) = honey.]

I. Ordinary Language:

1. In the same sense as H. 1.

2. The dark spots appearing on linen kept in damp places. Berkeley believes that they are due to a fungus, *Cladosporium Leucocroton*.

II. Technically:

1. Vegetable Pathol.: Morbid appearances produced upon plants by the ravages of parasitical fungi or other cause, or the parasitical fungus itself which produces the morbid appearance. Such fungi are always minute, and sometimes microscopic. Different genera and species attack different plants. Thus, wheat mildew is *Puccinia graminis*; P. cornuta also attacks cereals. Another species injuring wheat is the Bunt or Pepperbrand, *Tilletia caries*. *Basillia coronata* attacks the ash, *R. borealis* the hawthorn, and *R. ovalata* the pear. These three are sometimes placed in the genus *Ecidium*. *Aspilota Tuckeri* constitutes the true mildew. *Aspilota fructivora* forms little concentric tufts on pears, apples, &c. These may be only early stages of some other fungus. Eriueum, a pseudogenus of Fungals is now known to be only a diseased state of the plants on which it appears; *Eriueum urvum* or *Taphira urvum* occurs on poplar leaves. All the foregoing are parasites which attack the plants internally, and then force their way to the surface. Other mildews are produced by fungi which grow on the surface of plants, as *Cylindrosporum concentricum* on the cabbage, *Erysiphe* (*Sphaerotheca*) *prunosa* is the Rose mildew; *E. prunosa* the Hop mildew. These fungi, growing on the surface of leaves, fruits, &c., do not establish themselves till the plant on which they grow has become unhealthily from other causes. [BRST, ERGOT, RST, SUT.]

"One talks of mildew and frost"

Cowper, *Yearly Distress*.

2. Bot.: The genus *Erycibe* and various *Kubigas*. (London.)

3. Script.: Mildew. Heb. מִלְדָּה (*mil'deh*), seems correctly rendered in the Authorized Version. It is always combined with blasting, and implies that plants are so blighted that they tend to assume the same pallid colour which a man does under the influence of fright (Deut. xxviii. 22, 1 Kings viii. 37, 2 Chron. vi. 28, Amos iv. 9, Hag. ii. 17).

2. Freedom from harshness, acidity, pungency, or acrimony.

3. Freedom from severity, harshness, or meanness; as, the mildness of a climate.

mîle, s. [A.S. mil (pl. milu, mile), from Lat. milia, milia (prop. = thousands) = a mile,

from mille (passus), mille (passuum) = a thou-

sand (passus); Ger. mil; O. H. Ger. mila; Dut. mijl.] A measure of length or distance in use in almost all European countries. The English statute mile contains 8 furlongs, or 320 poles, or 1,760 yards or 5,280 feet; in surveying it measures 50 chains. A geographical mile is 6,075 feet (nearly), or 1.15 statute miles. A square mile is 6,400 square chains, or 640 acres. The English statute mile = 1609.349 French metres. [METRIC.] A league is 3 miles. The nautical mile is 2,028 yards, or 1,014 fathoms. The Roman mile was 1,000 paces of 5 feet each, and the Roman foot being 1/162 English inches, the Roman mile was therefore = 1,634 English yards, or (about) 1/4 of an English statute mile. The old Scottish mile was = 1,784 yards, or 1.127 English mile. The Irish mile is = 2,240 yards, or 1.273 English mile. The German short mile is = 3,397 English miles. The German long mile is = 5,733 English mile.

mi li tia (ti as sh), s. [Lat. = (1) warfare, (2) troops, from *miles* (genit. *militis*) = a soldier; Fr. *militar*; Sp. *militaria*; Ital. *militaria*.]

I. Literally:

* 1. Military service; warfare.

2. The constitutional force of England, first formed A.D. 1285. Raised originally by the Lords-licutenants of counties, and considered a counterpoise to the standing army. Erupted by compulsory service by ballot, a law which is still in existence though not put in force. It was permanently embodied from 1742 to 1803, during the threat of French invasion; but it was afterwards considerably reduced, until 1852, when 80,000 men were raised by voluntary enlistment. During the Russian war it was a valuable source of recruiting for the line battalions on active service, and many militia regiments did duty in the Mediterranean garrisons. Later on it was placed more directly under the War office, and the first appointments of officers were taken away from the Lords-licutenants. Permanent staffs of regular soldiers and officers were also added, and the value of the force thus materially increased. Later on the command of the militia was transferred from the Lords-licutenants of counties, and placed directly under the command of the War Office. Permanent staffs of regular soldiers and officers were added, and greater attention paid to the training of both militia officers and men. By the Localisation of the Forces Act of 1872, the militia regiments were numbered as battalions of the county regiments. Recruits are now enlisted for six years, but they may be enlisted for further periods of four years at a time, until they attain the age of forty-five years. Of late years the bounty has been increased, and in 1902 special powers were granted the Secretary of State for the purpose of forming reserve divisions. In that year the strength was 109,800, and the cost of the force £625,000.

I. Ordinary Language:
1. & 2. In the same sense as H. 1, 2.
3. The white juice of certain plants.
4. An emulsion, made by bruising seeds; as, the milk of almonds.

II. Technically:

1. *Food, &c.:* The fluid secreted by all female mammals for the nourishment of their young. As an alimentary substance, it may

be regarded as a perfect food. It consists essentially of a solution of sugar, albuminous and saline matter, and holds in suspension a certain proportion of fat in the form of very minute globules. The same constituents are found in the milk of all the mammals, but they differ considerably in the proportion in which they are present in each kind. Mare's milk contains a larger proportion of sugar, while that of the ewe is very much richer in albuminous and fatty constituents, the milk of the cow having its composition more evenly adjusted. The non-fatty solids of cow's milk, which consist of casein, albumin, sugar, and mineral salts, vary from about 8 to 11 per cent., and the fat from 2 to 7 per cent.; 9 parts of the non-fatty solids consist on the average of 3 parts of casein, 1 of albumin, 42 of milk sugar, and 8 of mineral salts. The mineral matter consists chiefly of phosphates of lime and potash, with a little chloride of sodium. Milk spontaneously ferments, the sugar being converted into lactic acid, alcohol, and carbonic acid gas. When an artificial ferment has been used, a larger proportion of alcohol is generated, and the milk is converted into a product to which the name of koumiss has been given. The chief adulterant added to milk is water; but sugar, carbonate of soda, salt, salicylic acid, and borax are also occasionally used. These latter are obviously added, not to increase the quantity of the milk, but to cover the addition of water or in order to prevent the milk turning sour.

* Condensed milk consists of cow's or goat's milk which has been evaporated by the aid of steam pipes or a vacuum pan to one-fourth of its volume, refined sugar being added during the boiling in the proportion of 1 lb. in the quart of condensed milk produced. It is also prepared without sugar, but its keeping properties are much less than the sweetened article. Both kinds form a wholesome article of food.

2. *Human Physiol.:* Milk is the secretion of the mammary glands, whose activity begins at delivery, and continues for a period of nine months as a rule, but, if encouraged, may persist for a longer time. The fluid secreted contains all that is requisite for the nourishment and the development of the child. It contains 90 per cent. of water and 10 per cent. of solids (casein, fat, sugar, and a trace of salts). The first milk secreted is colostrum; it acts as a natural purgative to the child. That the mind exerts an influence both on the quantity and quality of secretion is certain. Violent emotions, as fear, rage, &c., render it unwholesome.

* (1) *Milk-and-water:* Tasteless, insipid, without character or distinguishing feature, wishy-wishy. (*Colloquial*.)

"A milk-and-water bourgeois."—Reade, *Clister & Blears*, ch. xxvi.

(2) *Milk of sulphur:*

Chem. & Pharmacol.: Precipitated sulphur. Five ounces of sublimed sulphur and three ounces of slaked lime are put into a pint and a half of water, and by adding hydrochloric acid, a precipitate is thrown down. Used as a stimulant, as a laxative, and as a coction.

* **milk-sickness, s.** *Med.*: A fatal spasmodic disease, peculiar to the western States of America, said to be owing to astringent salts contained in the soil and waters of these regions. It attacks cattle, but is often communicated to those who drink the milk or eat the beef of animals affected with it. (*Bartlett.*)

* **milk snake, s.** *Zool.*: *Tuphiobolus erimius*, a harmless snake of a grayish ash colour, with three rows of dark spots along the back and sides. It is found in the northern and middle United States. "Whining like a lovely and innocent milk-snake out of his grasp." - *First Part: Mrs. Skeggs's Husband.*

* **milk sugar, s.** *Chem.*: $C_{12}H_{22}O_{11}$. Lactin. An important and characteristic constituent of milk. It is obtained from the whey by evaporation, and, after having been purified by animal charcoal and recrystallized, it finally appears as hard, semi-transparent, trimetric crystals, having the same composition as cane-sugar, and nearly the same specific gravity, 1.52. It is soluble in water, but insoluble in absolute alcohol and ether. Milk-sugar has a rotatory angle of 59.5 (al), and a copper-reducing power seven-tenths that of dextrose. By boiling with sulphuric acid it is converted into a mixture of dextrose and galactose.

• **mil-lên-ni-âr-ism**, *s.* [MILLENNIUM.] Millenniumism.

• **mil-lên-nist**, *s.* [Lat. *milleannus* (ism); Eng. *mill*; -ist.] A millenniumist.

mil-lên-ni-ûm, *s.* [Lat. = a period of a thousand years, from *mille* = a thousand, and *annus* = a year.]

1. *Script*: A period of a thousand years, during which Satan shall be confined to the bottomless pit, having first been bound by an angel with a great chain (Rev. xx, 1-3), whilst the souls of those who have been "beheaded for the witness of Jesus," and have not worshipped the beast or his image, or received his mark upon their foreheads or their hands, shall live and reign with Christ for a thousand years (Rev. xx, 1-6).

2. *Church Hist.*: During the first three centuries, when Christians were at intervals in danger of martyrdom, and many actually suffered death, the millennium looked largely before their minds; the second advent of Christ, interpreted literally, was considered to be pre-millennial, and the millennium to be a literal reign of him and the martyrs. The Christian fathers, Papas, Justin Martyr, and Irenæus, with the heretical Centurians, Marcionites, Montanists, and Melitians, held these views, as did Papas and Irenæus with rather extravagant accompaniments. Towards the end of the second century, Cælius, a possessor of Rome, led the way in opposing their millennial conceptions, and, in the third, Origen considered the millennium as consisting of spiritual delights to be enjoyed by souls raised to perfection in the world to come. Jerome also gave a spiritual interpretation to the passage in Revelation. On the triumph of Christianity over Paganism, in the fourth century, the view gradually arose that mil-

lennial glory had already begun. The persecuted Christians had risen, and were spiritually reigning with Jesus unseen. His visible re-appearance would not be till the consummation of all things, when he would come to judge the world. From about the year 550 yet another opinion arose and gained extensive credence. The millennium, to be heralded by the coming of Jesus, began with his first advent, and was now about closing. Many landed proprietors, therefore, believed they should no longer require their estates, and might atone for their sins by giving them over to the church, the deed of bequest commencing with the words *Appropinquante mundi termino* (As the end of the world is approaching), and the estates were not returned when it was found that the world outlasted the year 1000. Two opinions are now held: one, that the advent of Christ will be pre-millennial, and that a literal reign of martyrs and saints shall take place with him on earth; the other is, that the millennium will be brought on by the blessing of the Holy Spirit on the means employed for the conversion of the world, and that during the continuance of the promised years Jesus shall reign in the hearts of nearly all mankind, and shall not return visibly till he comes as Judge. Many interpreters, holding that in prophecy a day stands for a year, consider that the 1,200 days mentioned in Rev. xii. 6, &c., mean 1,200 years; yet they deem the 1,000 years to be literal years. The reason probably is that they are influenced by the Jewish tradition that the seventh thousand years from the creation of man shall be a Sabbatic thousand. Hugh Miller, who accepted the view that a prophetic day means a year, and, being a geologist, was not startled by very large numbers, considered the millennium to be 260,000 years.

"We must give a full account of that state called the millennium."—*Barnes: Theory of the Earth.*

mil-lê-pêd, mil-li-pède, s. [Lat. *mille-pedi* = the woodhouse, or directly from *mille* = a thousand, and *pes* (genit. *pedis*) = a foot.]
Zoology:

1. The genus *Iulus*, or the family Iulidæ (q.v.).
2. (Fr.) The order Chilognatha (q.v.). So called from the numerous feet.

mil-lêp-ôr-a, s. [Lat. *mille* = a thousand, and *porus* = a passage, a channel.]
Zool.: The typical genus of the family Milleporidæ (q.v.). It consists of a calcareous skeleton with a foliaceous or laminar expansion, studded with minute apertures of two sizes. mil-lêr-ite (1), s. [Named after the eminent crystallographer, W. H. Miller; suff. *-ite* (*Mia.*).]

Mia.: A rhombic-hedral mineral, mostly occurring in small tufts and groups of interlacing capillary crystals, also in fibrous and radiating crusts. Hardness, 3 to 3.5; sp. gr. 4.6 to 5.65; lustre, metallic colour, brass to bronze-yellow, sometimes tarnished; streak, bright; brittle. Compos.: sulphur, 55.1; nickel, 64.9 = 100; corresponding to the formula, NiS. Found in crevices in the clay-tronstone of Merthyr Tydfil, South Wales, and in crusts at the Sterling mine, Antwerp, New York; also in small amount at a few other localities.

Mil-lêr-ite (2), s. [See def.]

Church Hist.: A follower of William Miller, an American pre-millennialist, who expected the immediate return of Jesus to reign upon the earth. Believing in the literal fulfilment of the prophecies, the Millerites asserted that the first judgment would take place in 1843. Subsequently other periods were named; and so firm was the faith of many that they disposed of all their worldly goods, provided themselves with "ascension robes," and waited with anxiety for the sounding of the last trumpet—the signal for their elevation. Many became insane through excitement and fear; others, finding that they were repeatedly disappointed, gave up their expectations, and the sect is nearly, if not quite, extinct." (*Bartlett*, ed. 1877.)

mil-lês-îm-al, a. [Lat. *millesimus*, from *mille* = a thousand.] Thousandth; consisting of thousandth parts.

mil-lêt, s. [Fr., dimin. of *ail* = mill, millet, from Lat. *milium*; A.S. *mil* = millet; Gr. *μικρον* (*micro*)]

2. The articles made and sold by a milliner, such as head-dresses, hats, bonnets, laces, ribbons, &c.

mill-îng, n. part. a., & s. [MILL (1), *v.*]

A. & B. As part. part. d. part. part. obj.: (See the verb.)

C. As substantive:

I. Ordinary Language:

1. **1. Lit.:** The act or process of grinding or passing through a mill.

2. A thrashing.

"The blood gives t'other blood a millin'"
—*Coleridge: De Spitz*, li. 2.

II. Technically:

1. Cutting: The term is applied:

(1) To an action such as that which upsets the edge of a coin, making the raised flanges which protect the ornaments in relief on the obverse and reverse sides of the coin. Milling in this sense is performed upon an object in a lathe by the pressure of a turnstone or wheel, which turns over or upsets an edge, as in the case of the feather-edge on a tube or bezel which holds a lens or a jewel in its seat or setting.

(2) To an action such as that which gives a fluting or ornament to the edge of the coin.

(3) The indented or milled edge on coins.

2. **Clath:** A filtering process which condenses and thickens cloth.

3. **Porcelain:** The mastication and grinding of slip for porcelain, giving it the final working to develop plasticity.

4. **Milling in the darkness:** Murder by night. (*Swedch.*)

"Men were men then, and fought 'em in the open field, and there was no *millin* in the darkness."—*Scott: Long Maner*, ch. xxxvii.

milling-machine, s.

Mach.: A machine for dressing metal-work to shape by passing it on a travelling-bed beneath a rotating serrated cylindrical cutter.

milling-tool, s. A small indented roller mounted on a stock and used to mould objects, such as the edges of screw heads, by pressure against the latter when they are rotating in a lathe; a mulling tool.

mil-lîng-tô-nî-a, s. [Named after Sir T. Millington, professor of botany at Oxford.]

Botany:

1. The typical genus of the order Millingtoniaceæ (q.v.). It is synonymous with *Meliosma*.

2. A genus of Bignoniaceæ. *Milingtonia tobinensis*, called also *Bignonia tobinensis*, is the cork tree of India.

mil-lîng-tô-nî-â-çê-æ, s. pl. [Mod. Lat. *millingtoniæ*; Lat. fem. pl. adj. suff. *-æ*.]

Bot.: An order of hypogynous exocorms, established by Wight and Arnott. The species are now referred to Salicaceæ.

mil lion (i as y), **mil lion**, s. [Fr. *mille*, from Low Lat. *mil*, 'thousand, a series, of milles, from Lat. *mil*, 'a thousand.]

I. I. 1. The number of a thousand thousands.

"O pardon, 't'is once a crooked figure may / At length in little place yield us / Shakspeare, *Henry V.* (Intro.)

II. Figurative.

1. An indefinitely great number.
2. With the definite article, the multitude, the public; the great body of the people; the masses.

"Arrived a night like noon she sees, / And herat the *outlook* him" / Cooper, *Queen's Visit to London.*

mil lion ar y (i as y), a. [Fr. *millionnaire*.] Pertaining to millions; consisting of millions.

mil lioned (i as y), a. [Eng. *million*; *ed*.] 1. Possessing millions; millionaire; exceedingly wealthy.

"The *millioned* merchant seeks her [Honor] in his gold" / P. Whitehead, *Humor* 1747.

2. Multiplied a million-fold; innumerable, infinite.

"Time, whose *millioned* accidents / Creep in *twain* yows" / Shakspeare, *Sonnet* 115.

mil lion ist (i as y), s. [Eng. *million*; *ist*.] A millionaire.

"A commercial *millionist*" —*Southey Doctor*, ch. cxxxvii.

mil lionth (i as y), a. & s. [Eng. *million*; *th*.]

A. As adv.: Constituting one of a million; a thousand thousandth.

B. As subst.: One of a million parts; the quotient of one divided by a million.

"The same seemed always the same, yet every *millionth* of a minute different." —*Mortimer Collins*, *Blackburne & Sobler*, ch. viii.

mil-li pède, s. [MILLEPED.]

mil-ló-crát, s. [From *mill*, on analogy of *aristocrat*, &c.] A wealthy mill-owner.

"The true blood-suckers, the venomous *millocrats*." —*Lytton*, *Cuztons*, bk. ii., ch. iv.

mil-ló-crát-ism, s. [Eng. *millocrat*; *-ism*.] Government by millocrats.

"The usury which accompanies the reign of *millocratism*." —*Lytton*, *Cuztons*, bk. xiii., ch. iv.

Millon (as *Mi-yón*), s. [From *Millon*, a Frenchman, its discoverer.] (See the compound.)

Millon's test, Millon's test liquid, s.

Chem.: A nitric and nitrous solution of proto-nitrate and proto-nitrite of mercury. It detects the presence of proteins or its allied compounds by the production of a more or less deep rose colour. The test liquid is made by dissolving metallic mercury in an equal weight of strong nitric acid. The substance to be tested is plunged in the liquid and heat applied. (*Woelffl's & Henfrey*.)

mil pond, s. [Eng. *mill*, and *pond*.] A pond or reservoir of water employed to drive a mill.

mil-raçe, s. [Eng. *mill*, and *race*.] The canal or beat by which water is conveyed to a mill-wheel. Below the wheel the water is conducted away by the mill-tail or tail-race.

mil réa, mill roc, s. [MILREIS.] A pseudo-singular form of milreis (q.v.).

mil-sail, s. [Eng. *mill*, and *sail*.] The sail of a windmill.

† **mil-sail shaped**, a.

Bot.: Having many wings projecting from a convex surface, as the fruit of some umbelliferous plants and of moringa. (*Lindley*.)

mill-stone, **myln stone**, **myl stone**, s. [Eng. *mill*, and *stone*.] One of a pair of cylindrical stones for crushing grain in grinding mills. The stone is peculiar, and comes mostly from France and from Georgia. (BROCKSTONE.) The stones are the bed and runner, the upper being usually the moving stone, the lower being stationary. The relation of bed and runner is, however, sometimes reversed.

"They had demolished houses, cut down fruit trees, burned stone beds, broken *millstones*." —*Mercutio*, *Hist. Eng.*, ch. xiii.

millstone balance, s. A weight so placed as to balance other inequalities of weight in a stone, so that it may run true.

millstone bosom, s. The sunken space in the centre of a millstone, round the eye.

millstone bridge, s. The bar across the eye of a millstone by which it is supported on the head of the spindle.

millstone draft, s. The degree of deflection of the furrows of a millstone from a radial direction. Thus in a 7-inch draft the track-edges are tangential to a 7-inch circle.

millstone dress, s. (*Grinding*.)

1. The arrangement and disposition of the furrows in the face of a millstone. The furrows lead from the bosom, around the eye, to the skirt of the millstone—that is to say, to its periphery.

2. The draft given to the furrows on a millstone.

millstone dresser, s. A machine for cutting grooves in the grinding-face of a millstone.

millstone grit, s.

Geol.: A coarse quartzose sandstone used for millstones. It underlies the coal-measures, and overlies the Carboniferous Limestone, constituting the second of the three divisions of the Carboniferous formations. It is well developed in South Wales; in many other places it is feebly represented. Its Scotch equivalent is the *Moat rock*. A bed of shale 400 feet thick, ranked with the Millstone-grit, is called by miners *Farewell rock*.

millstone-hammer, millstone-pick, s. A tool for furrowing millstones.

millstone-lava, s.

Petrol. & Geol.: A very vesicular kind of nepheline basalt, found on the Eifel, &c.

millstone-maker, s. A maker of millstones.

Millstone-makers' phthisis:

Pathol.: Phthisis produced in the makers of millstone, in masons, &c., by the inhalation of minute fragments of stone.

millstone-ventilator, s. An arrangement for conducting a blast through the eye of the runner and out at the skirt, to cool the floor and facilitate delivery.

mi-lord, s. [See def.]

1. A foreign corruption of the address "my lord."

2. A lord or notability: as, an English *mi-lord*. (*Continental English*.)

mil-ósch inc, mil-ósch-ite, s. [Named after Prince Miósch; suff. *-ite*, *-ite* (*Min.*)]

Min.: A compact mineral, having an indigo blue to a celadine-green colour. Hardness, 1.5 to 2; sp. gr. 2.131. Compos.: a hydrated silicate of alumina and sesquioxide of chromium. Found at Rudniak, Servia. The *Brit. Mus. Cat.* makes it a variety of Allophan (q.v.) and Dana calls it a chromiferous allophan, containing only half as much water.

mil-réis, s. [Port. *mil* = a thousand, and *reis*, pl. of *real*, a small coin.]

1. The unit of value in Portugal, gold, weight 1.7735 grammes, value 4s. 5½d.

2. The unit of value in Brazil, value 2s. 3d. (nearly.)

mil-seý, s. [A corrupt of *milk*, and *sieve*.] A sieve for straining milk. (*Sprockh.*)

milt (1), **milte**, s. [A.S. *milte*; cogn. with Dut. *milt*; Lecl. *milti*; Dan. *milt*; Sw. *mjolt*; Ger. *milt*.]

Anat.: The spleen (q.v.).

milt (2), **melt**, s. [A corrupt of *milk* (q.v.), from the milky appearance of the soft roe of fishes; Sw. *mjolt* = milk, *mjolt* = milt of fishes; Dan. *iskr-milt* = soft roe, lit. = fish-milk; Ger. *miltch* = (1) milk, (2) milt of fishes.] The soft roe of fishes; the spermatie organ of the male fish.

"You shall scarce, or never, take a male carp without a *milt*." —*Walton*, *Angler*, pt. I., ch. ix.

milt, *v.t.* [MILT (2), s.] To impregnate or fertilize the roe or spawn of the female fish.

"A female gave 146 eggs which were *milted* from a male of the same hybrid race." —*Field*, Dec. 6, 1884.

milt-cr, **melt-cr**, s. [Dan. *miltcr* = a male fish; Ger. *miltcr*.] A male fish; a fish having a milt.

"That they might do so [by breeding] he had, as the rule is, put in three *milters* for one spawner." —*Hutton*, *Angler*, pt. 2, ch. ix.

Mil-ton ic, a. [Eng. *Milton*; *-ic*.] Pertaining to Milton or his writings.

milt waste, s. [Eng. *milt* (1), and *waste*.] From being formerly supposed to be a remedy for wasting or disease of the spleen.

Bot.: A name for a fern, *Ceterach officinarum*. [CLEROD.]

mil va go, s. [Lat. = a flying fish.]

Ornith.: A genus of Polyborine, *Milvago chinensis* is a small hawk-like bird which frequents slaughterhouses in La Plata, feeding on carrion.

mil-vi-næ, *s. pl.* [Lat. *milvus*; fem. pl. adj. suff. *-næ*.]

Ornith.: Kites; a sub-family of Falconidae, with bills not so curved as in the Hawks. The wings, which are pointed, and the tail, which is forked, are both very long.

mil-vine, a. & s. [Lat. *milvianus*, from *milvus* = a kite.]

A. As adj.: Belonging to or resembling birds of the Kite family.

B. As subst.: A bird belonging to the Kite family.

mil-vu-lus, s. [Mod. Lat., dimin. of Lat. *milvus* = a kite, a glede.]

Ornith.: A genus of Muscipidae, or, according to Band of Tyranids, *Milvulus tyrannus*, the Fork-tailed Fly-catcher, is whitish-ash above, with black rump; tail leathers rose-white, tipped with black; shoulders and belly light vermillion. *M. forficatus*, the Scissor-tail or Swallow-tail Fly-catcher, has the head and tail black, the latter edged with white; back ash; under surface pure white. Both species are natives of Central America.

mil-vus, s. [Lat. = a kite.]

1. *Ornith.*: A genus of Falconidae, sub-family Aquilinae. Beak straight at base, curved from cere to point; nostrils oval, oblique; wings long, tail long, forked. Less short; toes short and strong, the outer united at its base with the middle toe. Claws moderately long and curved. Habitat, the Old World and Australia. Six species are known. *Milvus forficatus* is the Common Kite. [KITE (1), s.]

2. *Substr.*: Remains of this genus have been found in the Miocene beds of France and Central Europe.

mim, a. [Prob. a variant of *mann* = silent.] Firm; affectedly meek and modest; demure. (*Scott.*)

"See, up his got the word o' God, / An' meek an' *mim* has vied it" / *Scott.* *Body Fair*.

mim-moned, a.

1. Affectedly modest or demure in conversation.

2. Affectedly moderate in eating.

Mi-más, s. [Lat. & Gr. = a Trojan horn on the same night as Paris.]

Astron.: The first satellite of Saturn.

mim-bar, s. [Arab.] A pulpit in a mosque. [MHRAB.]

míme, s. [Lat. *minims*; Gr. *μῖμος* (*mimos*); Fr. *mime*.]

1. A kind of farce or dramatic representation among the Greeks and Romans in which incidents of real life were represented in a ludicrous or farcical fashion. They resembled the modern farce or vaudeville, but were often of a coarse and even indecent character.

"And this we know in Lucretius, that the *mimes* of Sophron were of such reckoning with Plato, as to take them nightly to read on, and after make them his pillow. Scaliger describes a *mime* to be a poem, imitating any action to stich up laughter." —*Milton*, *Apology for Suetonius*.

2. ANACTOR in such a performance; a buffoon.

"And when he tells us that scurrilous *mime* was a personated grim-looking fool, his foolish language unwittingly writes *Fool* upon his own friend." —*Milton*, *Apology for Suetonius*.

* **mime**, *v.t.* [MIME, s.] To act the mime or buffoon; to mimic.

"In the fit / Of *mining*, get th' opinion of a wit." / *Ben Jonson*: *Epig.* 115.

* **mim-ér**, s. [Eng. *mimic*(s); -er.] A mimic, a mimic, a bullhorn.

"Jugglers and dancers, anticks, mimmers, mimers."
—*Milton*, *Tragedy*.

mī-mō-sis, s. [Gr. = imitation.]

1. *Rhet.*: Imitation of the voice or gestures of another.

2. *Zool.*: The same as MIMICRY (q.v.).

mī-mēt-ēnc, s. [MIMETITE.]

mī-mēt-ēsē, s. [MIMETITE.]

mī-mēt-ēs-ite, s. [MIMETITE.]

mī-mēt-ic, **mī-mēt-ic-al**, a. [Gr. μιμητικός (*mimētikós*), from μιμητής (*mimētēs*) = an imitator, from μίμος (*mimos*) = a mimic.]

1. *Ord. Lang.*: Apt to imitate or mimic; given to imitation; imitative.

"If I were composing a dialogue in the old *mimetic*, or poetic form, I should tell you, perhaps, the occasion that led us into this track of conversation."
—*Burd.*, *An Foreign Travel*, Dial. 7.

II. *Technically*:

1. *Zool.*: A term applied to animals which resemble others not so liable to fall a prey to enemies, or which resemble their natural surroundings so closely as scarcely to be distinguished therefrom, as is the case with the Phasmidæ. [MIMICRY.]

2. *Bot.*: A term sometimes used of a plant belonging to one order when it has a certain superficial resemblance to a plant of another order. [MIMICRY.]

mī-mēt-ism, s. [MIMETIC.] The act or habit of imitating; mimicry. [MIMICRY, II.]

mī-mēt-ite, s. [Gr. μιμητής (*mimētēs*) = an imitator; suff. -ite (*Mim.*)]

Mim.: A mineral closely resembling pyromorphite (q.v.), and graduating into it. Hardness, 3.5; sp. gr. 7.0 to 7.25; lustre, resinous; colour, shades of yellow and brown, also white to colourless; streak, white. Compos.: arsenate of lead, 90.66; chloride of lead, 3.34; the arsenic acid is frequently partly replaced by phosphoric acid. Dana recognizes three varieties:—1. Ordinary; (c) in crystals; (b) capillary; (c) concretionary. 2. Calciferous; the same as PERRYPHANE (q.v.). 3. Campylite (q.v.), containing much phosphoric acid. Crystallization hitherto regarded as hexagonal, but according to Bertrand it is optically biaxial when pure, the angle diminishing as the amount of phosphoric acid increases, the pure phosphate of lead being uniaxial. Formerly found in exceedingly fine crystals at Johanngeorgenstadt, Saxony, in Cornwall, Cumberland, and in Pennsylvania, &c.

mim-ic, * **mim-ick**, a. & s. [Lat. *mimicus* = farcical, from Gr. μιμικός (*mimikós*) = pertaining to or like a mimic; μίμος (*mimos*) = a mime; Fr. *mimique*; Ital. & Sp. *mimico*.]

A. *As adjective*:

1. Inclined or given to imitation; imitative; inclined to imitate or ape.

"Oft in her absence mimic fancy wakes
To imitate her." *Milton*, *P. L.*, v. 119.

2. Consisting of imitation; done or made in imitation; imitating; counterfeit. (Generally applied to some insignificant or diminutive imitation.)

"Down in the wet streets
Sail their mimic fleets."
—*Longfellow*: *Even in Summer*.

B. *As substantive*:

I. *Ordinary Language*:

1. One who imitates, apes, or mimics; espcc., one who imitates or apes the manner, gesture, or voice of another so as to excite laughter.

"It [vanity] is the worst of vices, and the occasional mimic of them all."—*Burke*: *To a Member of the Nat. Assembly*.

2. An actor, a mime.

"Amo vis Thise must be answered,
And forth my mimic comes."
—*Shakspeare*: *Midsummer Night's Dream*, iii. 2.

* 3. A mean or servile imitator.

* 4. Anything made or done in imitation of something else.

"The mole which Hadrian reared on high,
Imperial mimic of old Egypt's piles."
—*Byron*: *Child Harold*, iv. 362.

II. *Nat. Hist.*: A plant or animal that mimics.

mimic-beetles, s. pl.

Entom.: Beetles of the sub-tribe Helocera, which, when alarmed, counterfeit death, as do some of the Byrrhida and Histerida.

mim ic, v.t. [MIMIC; a.]

1. *Ord. Lang.*: To imitate, to ape; to copy the manner, gesture, or voice of another in order to excite laughter; to caricature.

"Next her the bullhorn ape, as athletes use,
Mimick'd all sects, and had his own to choose."
—*London*: *Disc of Poets*, l. 10.

2. *Zool.*: To assume as certain animals do the dress of other species or a close resemblance to natural objects. It is to be borne in mind that there is no evidence that such action is voluntary. [MIMICRY.]

† **mim-ic al**, a. [Eng. *mimic*; -al.] The same as MIMIC, a. (q.v.).

"Mimic is of all creatures the most mimick."—*Reliquæ Botanicæ*, p. 23.

† **mim-ic al lŷ**, adv. [Eng. *mimical*; -ly.] In a mimic or imitative manner; by imitation or mimicking.

"True it is, indeed, which a great writer hath long before taught us, that *mimically* to imitate their neighbours' footstep."—*South*: *Sermons*, vol. V., ser. 3.

* **mim-ic al-ness**, s. [Eng. *mimical*; -ness.] The quality or state of being mimical.

mim-ick-er, s. [Eng. *mimic*, v., -er.] One who mimics; a mimic.

† **mim-ic-ry**, * **mim-ick-ry**, s. [Eng. *mimic*; -ry.]

I. *Ord. Lang.*: The act or habit of mimicking or imitating; imitating or aping for sport or ridicule; burlesque imitation.

II. *Technically*:

1. *Zool.*: A term introduced by Mr. H. W. Bates to denote that "close external likeness which causes things really quite unlike to be mistaken for each other," which exists in the animal kingdom; but it should be borne in mind that there is no evidence that such mimicry is in the slightest degree voluntary. It may be regarded as the highest form of protective imitation or resemblance, or as that imitation or resemblance earned to its extreme limits. Mr. A. R. Wallace, who has brought together probably the largest collection of facts on this subject in the language (*Westminster Review*, July, 1867, pp. 1-43), says, that the phenomena of mimicry "have been shown to follow certain definite laws, which again all indicate their dependence on the more general law of the Survival of the Fittest." These laws are:—

(1) That in an overwhelming majority of cases of mimicry, the animals (or the groups) which resemble each other inhabit the same country, the same district, and in most cases are to be found together on the same spot.

(2) That these resemblances are not indiscriminate, but are limited to certain groups, which in every case are abundant in species and individuals, and can be often ascertained to have some special protection.

(3) That the species which resemble or mimic these dominant groups are comparatively less abundant in individuals, and are often very rare.

† 2. *Bot.*: The term is sometimes used of plants belonging to one order when in their general features they resemble species belonging to another order; as, for instance, certain foreign Euphorbiaceæ which bear a close superficial resemblance, though no affinity, to Cactaceæ. Professor Thibault Dyer considers that there is no genuine mimicry in the Vegetable Kingdom, and terms the phenomenon now described Homoplasm.

mī-mī-næ, s. pl. [Lat. *mimicus*], from Gr. μίμος (*mimos*) = an actor, a mimic; Lat. fem. pl. adj. suff. -iæ.]

Ornith.: American Babbler, a family of Timelide. The bill is slender or long and arched, the feet strong, tail rounded and slightly graduated.

mim mā-tion, s. [See def.] An excessive or too frequent use of the letter m.

* **mī-mōg'-ra-phēr**, s. [Gr. μιμογραφος (*mimograpchos*), from μίμος (*mimos*) = a mimic, and γραφω (*grapō*) = to write.] A writer of mimes or farces.

"For the best idea that can now be formed of the manner of this famous *mimographer*, we must have recourse, I believe, to the fifth and sixth of Theophrastus."
—*Turner*: *Aristotle*: *Treatise on Poetry*, vol. I. (Notes).

mī-mōn, s. [MIMUS.]

Zool.: A genus of Phyllostomide, sub-family Phyllostomina, akin to the typical genus Phyllostoma (q.v.), from which it is mainly distinguished by the different form of the chin-warts. Two species are known from tropical America, *Mimus Bennettii* and *M. yagouletii*.

mī-mo-sq. [From Gr. μίμος (*mimos*) = an imitator, an actor, so named because some of the sensitive species mime annual sensibility.]

Bot.: The typical genus of the sub-order Mimoseæ and the tribe Mimosee. As constituted by Lamouris, it included the Acacia and nearly all the other genera of the modern sub-order Mimosa (q.v.). The stamens, which are definite, are not more than twice the number of the petals; the anthers are not tipped by a gland, and the valves of the legume, breaking into transverse joints or remaining entire, leave the rim persistent on the peduncle. About 200 are known, the majority from America, the rest from India and Africa. They are prickly herbs or shrubs, sometimes climbing; the leaves are bipinnate, and in some species sensitive. *Mimosa pudica* and *M. sensitiva* are the sensitive plants. The former is naturalized over India; the leaves are prescribed in plis and hysteria. The bristled leaves of *M. rubiculis* are applied to burns. Its root is cleared for gunpowder charcoal. The legumes of *M. saguana*, or *Acacia concinna*, are saponaceous and are an article of commerce in India.

"For not *Mimosa's* tender tree
Shrinks sooner from the touch than he."
—*Scott*: *Marmion*, iv. (Antrod.)

mī-mō-sē-æ, s. pl. [Mod. Lat. *mimosa*]; Lat. fem. pl. adj. suff. -æ.]

Bot.: A sub-order of Leguminosæ, equivalent in rank to Papilionaceæ and Casal-pinaceæ. The corolla is valvate in aestivation. The corolla is regular and often gamopetalous; the stamens, which are either coherent or free, are sometimes very numerous; the leaves are often replaced by phyllodes. Chiefly from Australia, the East Indies, Africa, and America. None are European. The genus *Acacia* is well represented in Australia, Mimosa not at all; its metropolis is America.

mī-mō-tān-nic, a. [Pref. Gr. μίμο (*mimos*) = imitating, resembling, and Eng. *tannic*.] Resembling tannic-acid.

mimotannic-acid, s. [*Catchu-tannic Acid*.]

mim-ū-lūs, s. [Lat. dim. of *mimus* (q.v.); so named from the shape of the flowers.]

Bot.: Monkey-flower, a genus of Scrophulariaceæ, sub-tribe Eugratiolæ. It consists of herbaceous plants, with opposite leaves, solitary axillary flowers; calyx, tubular, five-angled, five-toothed; corolla, two-lipped, the upper two-lobed the lower three-lobed, the throat with two swellings; capsule, two-celled; seeds, minute. *Mimulus luteus* is naturalized in parts of Britain. The leaves of *M. guttatus* are eaten as salad.

mī-mūs, s. [Lat., from Gr. μίμος (*mimos*) = a mimic actor, a mime.]

Ornith.: A genus of Turdida. There are short bristles at the base of the bill; nostrils oval. Tarsi with broad scales in front. Habitat, America, from Canada to Patagonia, the West Indies, and the Galapagos. Wallace says "twenty species are known." The most noteworthy is *Mimus polyglottus*, the mocking-bird (q.v.).

mī-mū-sōps, s. [Gr. μίμο (*mimō*) = an ape, and ὤψ (*ōps*) = the eyes, face, countenance; so named because the flowers were supposed to resemble an ape's face.]

1. *Bot.*: A genus of Sapotaceæ. Calyx, six to eight-parted; corolla with an outer row of six to sixteen and the inner of six to eight petals; ovary, six to eight-celled. *Mimusops Koki* has an astrigent bark, yields a gum, and bears a sweet fruit eaten by the natives of India. *M. Elengi* is a large evergreen tree largely cultivated in India. During the hot season it produces many small, fragrant flowers, which fall plentifully. The small, oval berries are eaten by the poorer Hindus. The sap-wood is large, whitish, and very hard, the heart-wood red. It is used for house-building, carts, and cabinet-work. That of *M. indica*, which grows only above sandstone, is used for sugar-mill beams, oil-presses, house-posts, and turnery. *M. littoridis*, which grows in the Andaman Islands, is used for bridges and house-posts. The berries of *M. hexandra* are eaten in India. Most species of the genus yield gums and their seeds oils. *M. Elengi* yields the Pagoda gum of India. *M. glabra* the American gum Batata. The bark of *M. Elengi* is used in India for tanning; boiled, it yields a brown dye used with myra-

bolans; that of *M. luteo-olea*, a red dye used by the Arabians. (*Abulatta Eshb., Rep.,* &c.)
 2. *Pharm.*: The barks of *Mimusops Elaeagn* and of *M. horrida* are astringent tonics; the decoction of the former is a gangle which produces salivation. Water distilled from the flowers is a stimulant medicine and perfume. The powdered seeds of *M. Kola* are used in ophthalmia, the bark in inflammation of the ear and conjunctivitis.

mī na (1), *s.* [Lat. *mina* (Gr. *μῆνα*)] A Greek coin and weight. As a weight it was equal to 100 drachme, or 17 oz. 8 1/2 grains. As a piece of money, the Attic *mina* was also equal to 100 drachme, or £4 18. 3d. sterling; the Ægean *mina*, to £ 148 7d. SIXTY *mina* went to the talent.

mī na (2), **mī nō, mī nāh**, *s.* [Native name.]
Ornith.; *Gen. et. islygiosa.* [GRACIA.]

mina *bird*, *s.* [MINA (2)]

min a ble, *a.* [Eng. *mine*, v., *able*.] Capable of being mined; fit or suitable for mining. "He began to undermine it (finding the earth all about very *minable*)." *Scott. Flotsch.*, p. 10.

mi na ceio ŝo (cel as **ch**), *adv.* [Ital.]
Missa: In a menacing, threatening manner.

mī nā-cious, *a.* [Lat. *minari* (gent. *minaces*), from *minare* = to threaten; *minare* = threats.] Threatening, menacing.

II. Special: In popular language mind is sometimes used as opposed to heart. Metaphysicians of the normal type, as a rule, contradicting it not from heart, but only from matter or body. They regard it as possessing emotions as well as intellectual powers; the former manifesting themselves in feeling, the latter in thought. Its existence is supposed to be established by the consciousness of the thinking individual, one notable school of psychology considering that it is not mind but external nature, the existence of which can be doubted. Till about the middle of the present century, mind was almost universally held to be possessed by none of the inferior animals; any apparent intelligence on their part was attributed to instinct. Herbert Spencer led the way in introducing new views on the subject. Availing himself not merely of the metaphysicians' chief mode of inquiry, his own consciousness, but of the facts accumulated by physicists and physiologists, he considered that in the case of each animal organism on earth, from the humble monad to man, there is an incessant interaction between the organism and its environment; a continuous adjustment of its internal to its external relations, the magnificent human understanding itself having resulted from their interaction or adjustment carried on through countless ages. Following in the same direction, Mr. Darwin declared that the intellect and even the moral powers of man did not differ in kind, though very greatly in degree, from the rudiments of them exhibited by the lower animals. Not denying the latter instincts, he sought to establish that they had reason too, and that the superiority was the result chiefly of natural selection carried on

* Wherefore kucke ye at my sacrifice and at *mine* offering, which I have commanded?—*1 Sam.* ii. 29.

* *Mine* was formerly used regularly before words beginning with a vowel or silent *h*, *my* before words beginning with a consonant.

Mine is, however, not now used adjectively with nouns except in poetry, its place being taken by *my*. *Mine* is used absolutely or independently, like *thine*, *his*, *yours*, &c., and may serve either as a nominative or an objective; as, This is *mine*; look at *mine*.

mine, * **mync**, *s.* [Fr. *mine*, from Low Lat. *minis*; Sp., Port., & Ital. *minis*.] [MINE, *v.*]

I. Ordinary Language:

1. Literally:

(1) A subterraneous passage from which coal, metals, and metallic ores are obtained.

"Whose virtue shines
On hills, when breches & planets are abroad;
Thine privately, like *miners* lumps in *mines*."
Darwin: Humboldt, iii. 5.

(2) Crude ironstone, known as raw-*mine*, green-*mine*, burnt-*mine*, &c.

* 2. *Fig.*: A source or store of wealth or anything precious.

"They are a rich *mine*, which the greatest wit and diligence may dig in for ever."—*South: Sermons*, vol. iii. ser. 6.

II. Fort.: An excavation toward or under the rampart of a fortress to contain an explosive charge, to destroy or effect a breach in an enemy's works. The place of deposit is the chamber, and the passage leading thereto the gallery. Military mines are known as, common; double; triple; defensive, or countermines; offensive; conjunct (several acting simultaneously); suffocating, or canoulet; undercharged (producing a crater whose radius is less than the line of least resistance); and overcharged or surcharged (producing a crater whose radius is greater than the line of least resistance).

"He used to hurn his *miners*, to thynkent that they should make a *mine* under all the walls."—*Berners: Froissart; Crueyke*, vol. i. ch. ex.

mine-captain, *s.* The overseer of a mine.

mine-chamber, *s.* The place of deposit of the charge.

mine-dial, *s.* A kind of magnetic compass used by miners.

* **mine-digger**, *s.* A miner.

* **mine-man**, *s.* A miner.

"The *mine-men* do not find any thing of that metal."—*Boyle: Works*, li. 99.

mine, **myne**, *v.t. & i.* [Fr. *miner*, from Low Lat. *monis* = to conduct, to lead along a lode or vein of metal; Ital. *minare*; Sp. & Port. *minar*.]

A. Intransitive:

I. Literally:

1. To dig a mine or pit in the earth, for the purpose either of obtaining minerals or of depositing gunpowder or other explosive material to blow up anything.

"The enemy *mined*, and they countermined."—*Lee: High. Hist. World*, bk. v. ch. liii. § 19.

2. To form a burrow or hole in the earth by scratching; to form a subterraneous tunnel, gallery, or hole; to burrow.

II. Fig.: One who tries to remove by underhand or secret means.

"As the bombardier levels his mischief at cities, the *miner* buses himself in razing private houses."
Tatter.

miner's asthma, *s.*

Pathol.: A kind of phthisis produced among miners by inhaling lamp smoke, and coal dust in the pit. Called also Carbonaceous Bronchitis and Black Phthisis.

min-ér-ál, * **min-ér-ál**, * **myn-er-ál**, *s. & a.* [Fr. *minéral*, from *miner*; to mine, Sp. *mineral*; Ital. *minerale*.]

A. As substantive:

I. Ordinary Language:

1. In the same sense as *II*.

* 2. A mine.

"Like some one
Among a *mineral* of metals base."
Shakesp. Hamlet, iv. 1.

II. Mineralogy, Geology, Petrology, &c.:

* 1. *Gen.*: Any stony substance, homogeneous or the reverse, constituting part of the earth's crust. The term was applied both to minerals in sense 2 and to rocks.

"All stones, metals, and *minerals* are real vegetables that is, grow organically from proper seeds, as well as plants."—*Luce: Elements Nat. Hist.* ch. viii.

* 2. *Spec.*: An inorganic body, homogeneous in structure, and having a definite chemical composition. It is sometimes called a simple mineral, and is distinguished from a rock, which in most cases is an aggregate of non-simple minerals than one.

B. As adjective:

1. Pertaining to or consisting of minerals.

"The lofty lines abound with endless store
Of *mineral* treasure."—*Blackmore: Creation*, iii.

2. Impregnated with minerals or mineral matter; as, *mineral* waters.

* **Mineral**-adiposive. *Mineral*-tallow = *Hellebottine*; *Mineral*-caoutchouc = *Elastite*; *Mineral*-oil = *Naphtha* and *Petroleum*; *Mineral*-pitch = *Pittosphalt* and *Asphaltum*; *Mineral*-resin = *Amber*, *Ambrite*, *Anthracosapich*, *Baccaratnaphth*, *Capivite*, *Happerte*, *Indolite*, *Isocite*, *Kraussite*, *Middletonite*, *Pyrroterite*, *Rossinite*, *Rocheberite*, *Schlaube*, *Schwarzite*, *Stenclite*, *Tasmanite*, and *Waldowite*; *Mineral*-tar = *Pittasphalt*.

mineral-acids, *s. pl.*

Chem.: Acids of inorganic origin. The term is chiefly applied to the stronger acids, sulphuric, hydrochloric, nitric, phosphoric, &c.

mineral-alkali, *s.*

Chem.: An old name for soda

mineral black, *s.* A native oxide of carbon.

mineral blue, *s.*

Chem.: A term sometimes applied to a mixture of Prussian blue and gypsum. It possesses a light-blue colour.

mineral candles, *s. pl.* Candles made of paraffin obtained from the native bitumens.

mineral caoutchouc, *s.* [Elastite.]

mineral carbon, *s.*

Min.: The same as *MINERAL-CARBONAL* (q.v.).

mineral chamelcon, *s.*

Chem.: Potassium manganate. When it is dissolved in water, its solution, at first green, passes gradually through all the coloured rays to the red. These changes of colour are very remarkable, and have procured for the manganate its popular name.

mineral charcoal, *s.*

Min.: A soft, fibrous, charcoal-like variety of coal found in layers in mineral-coal, and usually known as mother-coal.

bôu, bôy; pout, jôwl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, as; expect, Xenophon, exist. -ing, -cian, -tian = çhan. -tich, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = sius. -ble, dle, . . . bel det.

mineral coal, s.

M. Anthracite adapted by Dana for the whole of the true coals; by others regarded as a synonym of anthracite (q.v.).

mineral cotton, s.

A fibre formed by swelling a lot of steam to escape through a stream of liquid soap, by which it is blown into the white threads, sometimes two or three feet in length. These threads readily break up into small pieces, and the colour of the substance being white, the appearance is that of a mass of cotton. Being a poor conductor of heat, owing to the retention of air in its interstices, it is used as a covering for steam-borders and pipes.

mineral green, s. [Scheele's Green.]

mineral indigo, s.

Indigo. A term applied by Keller to the blue oxide of polyiodine, formed by the reducing action of tin or stannous chloride on recently-precipitated iodic acid. (Holtz.)

mineral kermes, s.

Kermes. An opaque strass-like of antimony

mineral kingdom, s.

Not. Hist. The rendering of the Latin words *Regnum Lapideum*, used by Linnæus in his *Systema Nature* for the "stony" or mineral kingdom of Nature. He included under it simple minerals, as mica; rocks, as granite; and fossils, as Mill-ore.

mineral oils, s. pl. [PETROLEUM.]

mineral pitch, s. [BITUMEN.]

mineral purple, s. A preparation of gold and tin used for coloring glass and porcelain. Called also the Purple of Cassius.

mineral salt, s.

Chem.: The salt of a mineral acid.

mineral solution, s. Aqueous liquor

(*Liquor solutionis aqueæ*.)

mineral surveyor, s. A surveyor of mines; one who is versed in the nature, value, and working of loles.

mineral tar, s. Bitumen of a tarry consistence.

mineral-veins, s. pl. [VEISS.]

mineral waters, s. pl.

1. Chem.: Waters so far impregnated with mineral matter as to give them a peculiar taste or smell, and specific medicinal properties. They are usually divided into four classes—carbonated, or those containing free carbonic acid gas; chalybeate, or those impregnated with iron; saline, such as our common table salt, or those containing sulphate of soda, or sulphate of magnesia, chloride of sodium, &c.; and sulphurous, or waters containing sulphuretted hydrogen. The sulphurous waters are readily recognised by their disagreeable smell, and their property of furnishing silver. Artificial mineral waters are frequently prepared in the laboratory, in imitation of the natural waters. The term mineral waters is also applied to artificial aerated waters, containing minute quantities of the salts of soda, potash, or lithia.

2. Med.: Natural mineral waters are generally connected with recent or extinct volcanoes, and they are most common in volcanic regions. Some are thermal.

mineral wax, s.

Min.: A name applied to Scheerite and to the wax-like minerals of the Parafin group. [PARAFFIN, 2.]

mineral yellow, s.

Chem.: A term sometimes applied to the yellow oxalhydrates of lead, used as pigments. Sometimes called Patent yellow.

min er al ist, s. [Eng. *mineralist*; -ish.] One

skilled in minerals; a mineralogist.

min er al i zā tion, s. [Eng. *mineralization*;

the act or process of mineralizing; the process or state of being converted into a mineral.

min er al ize, v. t. & i. [Eng. *mineralize*;

to convert into a mineral; to give mineral qualities or properties to; to impregnate with mineral substances or matter. Waters containing calcareous or silicious matter in solution can replace decaying animal or vegetable matter lying at the bottom of floating, by substituting for them calcareous or silicious matter, the latter especially not mining not merely the external and internal part of a shell, but even the medicinal rays of excrement wood.

B. Intensive: To make excursions for the purpose of collecting specimens of minerals; to go on mineralogical excursions.

min er al iz er, s. [Eng. *mineralizer*;

A substance which has the power or property of mineralizing; a substance which combines with a metal to form an ore.

min er a lög ic, min er a lög ic al, s. [Eng. *mineralogical*;

relating to mineralogy, or the science of minerals.

Mineral done to a beautiful object near this place by some mineralogical tourists. —*Saunders' Letters*, v. 430

min er a lög ic al ly, adv. [Eng. *mineralogically*;

According to the principles of mineralogy; with reference to mineralogy.

min er al ô gist, s. [Eng. *mineralogist*;

Fr. *minéralogiste*; Sp. & Ital. *mineralogista*.
1. Impl. Person: One who is versed in mineralogy; one who treats or discourses on the nature and properties of minerals.

2. These are also many authors that deny it, and the exactness of mineralogists have rejected it. —*Bowen's Vulgar Errors*, bk. ii. ch. i.

2. Zool.: A name given by collectors to the gastropodous mollusks of the genus *Phorus* (q.v.), which attach stones to the margin of their shells. (S. P. Woodward.)

min er al ô gize, v. t. [Eng. *mineralogize*;

to collect or study minerals.

He is botanizing or mineralogizing with O. Toole's chaplain. —*Miss Edgeworth's Emma*, ch. vi.

min er al ô gy, s. [Eng. *mineralogy*; Gr. *logos* (logos) = a discourse, a treatise; Fr. *minéralogie*; Ital. & Sp. *mineralogía*.]

Not. Hist.: A science treating of those natural inorganic products of the earth which possess definite physical and chemical characters. Its objects are to point out the various means to be adopted to ascertain the chemical composition and physical characters of inorganic substances, to determine their specific relations, to examine into their modes of occurrence, and their associations, with a view to establishing a systematic classification.

Simple minerals appear to have been known from very early times; but little or no progress, however, seems to have been made towards establishing any well-defined characters by which they could be recognised, till in 1669 Nicolaus Steno, a Dane, made the discovery that in crystals of quartz the angles of inclination of adjoining faces were constant, and that the number of faces and their grouping, notwithstanding variations in size, were always the same. In this year also the doubly refracting property of Iceland Spar was observed. In 1772, quartz, which had been already designated by the Archaic crystal (clear ice) was shown by Robert Boyle to be heavier than an equal bulk of water by more than two to one, ice being bulk for bulk lighter than water. In 1772 Rome de l'Isle announced that the various shapes of crystals of the same product were intimately related. He showed that all the forms then known could be derived from one of six, which he called primitive forms. The Abbe Hany in 1784 discovered that ten forms, including the six of de l'Isle, could be produced from various minerals by cleavage, and that these must be the true primitive forms. Hany also propounded a theory of the structure of crystals, as to the relations of the secondary planes to those of the primitive form. Prof. Weiss, of Berlin (1809-1815), established fundamental lines, which he called axes, and to which he showed how all the primitive forms and secondary planes were related. Subsequently, though independently, Mohs (1820-1825) arrived at a division of crystals into four systems of crystallization which coincided with the four axial groups of Weiss. He also announced two other systems of crystallization, in consequence of more precise measurements being obtainable by the use of the reflective goniometer. The discovery by Mohs in 1808 that a ray of ordinary light reflected at a certain angle from a glass plate possessed the same properties as that which emerged from Iceland Spar, enabled Brewster in 1810 to point out the intimate relation which

existed between the cleavage form of a mineral and its action upon light. Brewster's classification of crystals on optical grounds agreed with that of Weiss and Mohs on geometrical ones, with the exception of two of the systems. The existence of the two additional systems of crystallization formerly announced by Mohs was, however, now established through their difference in optical characters from the other systems. Thus, six natural systems of crystallization are shown to include all possible crystal forms. The early attempts at classification were very vague, and were founded on supposed external differences, being divided into Earths, Stones, and Metals. Cronstedt's *Essay* (1778) was the first foreshadowing of a principle in a system of classification. The earths he classed as Calcareous, Silicious, Argillaceous, and stony. Werner's last system, published in 1817, after his death, divided fossils (as minerals were then called) into four classes, viz., Earthy, Saline, Combustible, and Metallic. The system of Hany (1804), like that of Werner, was a mixed one, but it was the first to direct attention to the importance of crystallographic form to a system of classification. In 1816 Berzelius published a system founded on the view that all chemical compounds consisted of an electro-positive and an electro-negative part, the former being the metal and the latter the acid. The discovery of isomorphism by Mitscherlich eventually rendered this system unworkable. In 1820 Mohs published his *Natural History System of Mineralogy*, in which the chemical composition was ignored, and the arrangement based on crystalline form (together with cleavage), hardness, and specific gravity. Mohs selected a suite of ten minerals, which he numbered in their order of increasing hardness, and called it the Scale of Hardness, so that that quality in a mineral could be designated by 3, 4, 5, &c. This scale is still employed. [HARDNESS, II. 3.] The most perfect but mixed system is that published by Gustav Rose in 1852. It combines a chemical with a crystallographic arrangement. In this system natural groups of minerals, also the isomorphous, dimorphous, and trimorphous series, are brought together. It forms the basis of the systems of arrangement adopted in many large collections at the present time.

Mi nér va, s. [Lat., from the same root as

meus = *mihi*, *memini* = to remember, &c.]

Rom. Mythol.: The Latin goddess corresponding to, and frequently confounded with, the Grecian Pallas or Athene (q.v.). At Rome she had three temples: one on the Capitol, which she shared with Jupiter and Juno; a second on the Aventine; and a third on the Caelian mount. She was represented as a young woman, with a grave and noble countenance, clothed in armour, and having on her breast the ægis with a border of serpents, and the Medusa's head in the centre.

Minerva press, s.

Etymol.: The name of a printing-press formerly existing in Leadenhall Street, London; also the name given to a series of ultra-sentimental novels issued from this press at the close of the eighteenth and the beginning of this century.

mí nér val, s. [MINERVA.] A gift from a

scholar to a master.

The chief mineral which he bestowed upon that society. —*Blacket's Life of Wellington*, i. 96.

min er y, s. [Eng. *mineralogy*;

A collection or number of minerals; a mining district.

But churches, houses, and temples are free from this custom of the mining. —*Faller's Worthies; Derbyshire*.

mí nète, s. [Fr.]

Etymol.: One of the mica traps. It contains magnesium, mica, some fine quartz, and some hornblende or granite. It occurs in dykes. The term *minette* is applied especially to the more crystalline kinds. Others may be felstones. (*Etymol.*) A felsitic matrix, containing much mica, and sometimes distinct crystals of hornblende. (*Uttin*.)

min -é -vèr, s. [MINIVER.]

ming, myng, v. t. [A.S. *meungian*.]

1. To mix, to mangle (q.v.).

"The busy bee, her honey now she minges"
Surrey Descript. of Spring.

2. To admonish.

"To munge thy father's odious name"
Hall's Satires, IV. li. 80.

min' gle, * myn gell, v.t. & i. [A freq. from Mid. Eng. *ming, myng* = to mingle, to mix; A.S. *myngan, myngian, myngian* = to mix, to become mixed; cogn. with Dut. *myngelen* = to mingle; *myngan* = to mix; O. Fris. *mynga* = to mix; Icel. *myngja*; Ger. *myngan*. From the same root as *amang, mynger, myngel*.]

A. Transitive:
1. To mix up together, so as to unite in one whole; to combine, to compound, to blend.

"We take white, and mingling it with red, make a third distinct colour."—*South. Sermons*, vol. VII, ser. 1.

"2. To mix up; to confuse.
"Come on, let us descend, and mingell they bonge enim."—*Trinities* (1543).

"3. To join in society; to associate.
"The skipping king
Mingled his royalty with capering fools."
—*Henry VIII.*, act. II, sc. 2.

"4. To delude by mixture; to contaminate.

B. Intransitive: To be or become mixed, united, joined, or associated.

"But, oh, imagine Fate t' have waded long
An hour like this, and mingled in the throng."
—*Henry VIII.*, *Windsor Castle*.

*** min' gle, s.** [MINGLE, v.] A mixture; a confused mass or body; a medley.

"With brazen din blast you the city's ear,
Make mangle with our rattling tabourins."
—*Shakspeare, Antony & Cleopatra*, act. IV, sc. 3.

*** mingle mangle, * myngle mangle, s.** A medley, a hotch-pot; a confused mass.

"Let the matters that have in times past bene made a mangle-mangle, be called again to the true square of truth's words."—*Walsley, of True Theologies*, p. 37.

*** mingle mangle, v.t.** To confuse; to make a medley of.

"He either condemneth the live, in that it correcteth not by thines, or looketheth it as though it were to be mangle-mangled, and wallowyng."—*Widow's Tale*, p. 22.

*** mingle mangleness, s.** Confusion.

"I wish you could see what is done, which for oddity, mangle-mangleness, and out-of-the-wayness, may be with anything that has ever preceded it."—*Southey's Letters*, iv, 26.

*** min' gle a ble, a.** [Eng. *mingle*, v.; -able.] Capable of being mixed.

"Quicksilver runs in convenient vessels, be reduced (at least in great part) into a thin liquor like water, and minglable with it."—*Blythe's Works*, i, 326.

min' gled (gled as geld), pt. pres. or a. [MINGLE, v.]

min' gled ly (gled as geld), adv. [Eng. *mingled*; -ly.] In a mixed or confused manner; confusedly.

*** min' gle m'ent, s.** [Eng. *mingle*, v.; -ment.] The act of mingling; the state of being mingled or mixed.

min' gl'er, s. [Eng. *mingler*; -er.] One who mingles or mixes.

"Such brewers and mixers of wine."—*Harrison's Best*, p. 291.

min' gli'ng, pt. pres. or a. [MINGLE, v.]

A. & B. As pt. pres. or a. particip. adj. (See the verb).

C. As subst.: The act of mixing together; the state of being mingled or mixed.

"Sound is likewise indicated by the mingling of open air with put air."—*Bacon's Nat. Hist.*, § 222.

*** min' gli'ng ly, adv.** [Eng. *mingling*; -ly.] In a mingling or confusing manner.

Min' gr'e-li-an, a. & s. [See def.]

A. As adv.: Of or pertaining to Mingrelia. [B. 2.]

B. As substantive:

1. *Ord. Lang.*: A native or inhabitant of Mingrelia.

2. *Church Hist. (P.L.)*: Greek Christians, natives of Mingrelia, a part of Old Georgia, and followers of Cyrillus and Methodus. They do not baptize their children till the eighth year, and observe other peculiarities of ritual and discipline. (*Shapley*.)

*** min' iard (ias y), &c.** [MINIARD, &c.]

*** min' i ate, v.** [Lat. *minutus*, pa. par. of *minui*, from *minuere* = red lead or vermilion.] To paint or tinge with red or vermilion.

"The capitals in the body of the text are ornamented with a pen."—*Hutton's Hist. English Poetry*, vol. III.

*** min' i ate, a.** [MINIATE, v.] Painted or tinged with red or vermilion; illuminated.

boil, boy; p'ont, jowl; cat, gell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, sion = shùn. -tion, çion = zhùn. -ious, -tious, -sions = shùs, -ble, -dle, &c. = bel, dcl.

*** min i a t'or' è,** [Ital.] An illuminator, a miniaturist. [MINIATURE, s. A. 2.]

"The miniature Echeleddi"
—*T. B. Aldrich's Fear Jealous beautiful book*.

min' ia türe, s. & a. [Ital. *miniatura* = a miniature, from *minuere*, pa. par. of *minuere*.] = to dye or paint with red lead or vermilion; Lat. *minuere* = red lead; Fr. *minuature*.]

A. As substantive:

1. Red lead, cinnabar, vermilion.

2. Lettering in red lead or vermilion for distinctness; red letter; rubrical distinction.

"The names of other sorts are distinguished with minature, for the blessed Virgins sought to shine in gold."—*Hutton's Sermons*, p. 72.

"3. The art of drawing pictures in little, being done with red lead. (*Brown*.)

4. A painting, generally a portrait, of small dimensions, executed for the most part on ivory, vellum, or paper, of a thick and fine quality; a minute picture, whether delineating landscape or figures, or a copy of a larger picture.

5. Anything represented on a greatly reduced scale.

"Tragedy is the miniature of human life; an epick poem is the draught at length."—*Dryden's Virgil*; *Ewald's Ode*.

6. A greatly reduced scale, style, or form.

"We may reasonably presume it [the garden of Eden] to have been the earth in miniature."—*Bacon's Works*, vol. IV, dis. 2.

"7. Distinctive or particular trait of features.

B. As adv.: In miniature; on a very small scale; greatly reduced in size.

"Here shall the pencil bid its colours flow,
And make a miniature creation grow."
—*Gray's The Fan*, l.

*** min' ia-türe, v.t.** [MINIATURE, s.] To represent or depict in miniature or on a small scale.

*** min' ia-tür' ist, s.** [Eng. *miniaturer*; -ist.] One who paints miniatures.

*** min' i-büs, s.** [From Lat. *minor* = less, with suff. -bus, in imitation of *omnibus*.] A light sort of vehicle or carriage to accommodate four persons, and drawn by one horse.

min' ie, s. [From Captain Minie, an instructor of the French School of Musketry at Vincennes.] (See the compounds.)

minie bullet, minie ball, s. A form of bullet invented by Capt. Minie, in 1847. It was cylindrical, with an ogival point, with an iron cup placed in a cavity at its base, and was slightly smaller than the bore of the existing rifle; but by the explosion of the charge the cup was forced up into the hollow and thus expanded the lower part of the projectile, which pressed into the grooves of the rifling. It was afterwards applied to any rifle.

minie rifle, s. A rifled musket with a minie-bullet, cylindrical in form, was introduced into the British army in 1847. It weighed 11 lbs. 8 oz., had a bore of 7.02 inches, and was sighted up to 1,900 yards. [RIFLE.]

*** min' i fy, v.t.** [Lat. *minui* = less; Eng. suff. -fy.] To make little or less.

"Is now un-mind'd or un-ford'd"—*Southey's The Doctor*, ch. cxxvii.

*** min' i kin, a. & s.** [Prob. a dimin. from *minion* (q.v.); Dut. *minckyn* = a pupil.]

A. As adv.: Small, diminutive, dandy.

"And for one blast of thy minckin mouth,
Fly sheep shall take to harm."
—*Shakspeare's Lear*, III, 6.

B. As substantive:

I. Ostensive Language:

1. A darling, a favourite, a minion, a pet.

2. A small sort of pin.

II. Mus.: A small sort of gut string formerly used in the lute, viol, and other stringed instruments.

min im, * min ime, * min um, * min um, s. & a. [Fr. *minime*, from Lat. *minimus*, *minimium*, accus. of *minimus*, *minimus* = very small.]

A. As substantive:

I. Ostensive Language:

1. A little man or being; a dwarf, a pigmy.

"Minors of nature."—*Milton's P. L.*, vi, 42.

2. A MINNOW (q.v.).

3. A short poem.

"To make one minime of the poor handmaid."
—*Spenser's F. Q.*, VI, x, 23.

II. Technically:

1. *Arch. & Church H. (P.L.)*: The popular name of the Mamm-Hermit's founded by St. Francis of Paola (1161-1305). The rite and dress closely resemble those of the Franciscans, but the life led by the members is in great measure contemplative. They were called Minims by their founder to humble them below the Franciscans, who call themselves Friars Minor. The order consists of monks, nuns, and tertians (q.v.). (*Boyd's Arch. & Ch.*)

2. *M. d.*: The smallest liquid measure, generally regarded as equal to one drop. Sixty minims make one fluid drachm.

3. *Mus.*: A time character of the value of two crotchets. In modern music it is second in value to the semibreve now held to be the true standard, but in ancient music it was, as its name implies, of the shortest duration. Morley (*Histor. of Fiddling*, *Musical*, 1604) ascribes the first use of it to the invention of the minna to Philippo da Ariano, a musician of the fourteenth century, who is also credited with the invention of the crotchet.

4. *Print.*: A small kind of type; minion.

B. As adv.: Very little.

"Turned round each other pretences of love"
—*Lowndes's Aster Ebor.*, VI, 69.

*** min ime, s.** [MINIM]

min i mént (i), s. [MINIMENT]

*** min i mént (2), s.** [Lat. *minimus* = the least.] A jewel, a trinket, a trifle, a toy.

"Upon a day as she him late beside,
By chance he certain ornaments forth drew."
—*Spenser's F. Q.*, IV, vii, 6.

*** min im il' i-çence, s.** [Formed from Lat. *minimus* = least, in imitation of *ingeniositas*.] Little things.

"When all your magnificences and my minimeffices are finished."
—*W. Temple's Letters*, i, 122.

*** min' i mi n'ess, s.** [Lat. *minimus* = least; Eng. suff. -ness.] Extreme smallness.

"The very minimeous, as I may say, of it."—*Andrewes's Works*, i, 101.

min i m'ize, v.t. [Eng. *minimise*; -ize.] To reduce to a minimum; to make as little as possible in size, degree, or importance.

"It was a bold experiment, but every means was taken to minimise the experimental features in the designs."—*Inst. Quart. Review*, VIII, 21.

min i m'um, s. [Lat.] The smallest amount or degree; the least assignable quantity in a given case; opposed to *maximum* (q.v.).

minimum thermometer, s. A thermometer constructed to register the lowest point reached between observations. [THERMOMETER.]

*** min' i m'us, s.** [Lat. = least.] A being of the smallest size; anything very small.

"Get you gone, you dwarf,
You minimus, of hindering knot-grass made."
—*Shakspeare's Measure for Measure*, act. II, 2.

min' i'ng, * myn yage, pt. pres. or a. [MINE, v.]

A. As pt. pres. or a. particip. adj. (See the verb).

B. As adjective:

I. Literally:

1. Burrowing in the earth; forming mines.

2. Used in the construction of mines; used by miners; as, *mining tools*.

3. Occupied in the construction and carrying on of mines; as, a *mining company*.

4. Full of mines; as, a *mining district*.

II. Fig.: Working by underhand or secret means; mischievous.

"Hate, whose mining depths so intervene,
That they cannot be seen."
—*Byron's Childe Harold*, ch. vi.

C. As substantive:

I. Ord. Lang.: The act of constructing mines; the art or habit of burrowing in the earth.

II. Technically:

1. *Hist.*: Dr. Birch places the discovery by the Egyptians of a mine of "malak" (turquoise?) at Wady Mgana, in the Peninsula of Sinai, in the fourth Memphite dynasty, between 3,000 and 2,000 B.C. Tubal Cain was an instructor of every artifice in brass (copper) and iron. It was said of Canaan, "out of whose hills thou mayest dig brass" (copper) (*Deut.*, viii, 9), and Job refers to mining and metallurgy (*xxviii*, 1, 2, &c.). Herodotus says

that the Phoenicians had quite bored through a mountain in the Island of Theros (vi, 49, 47). As early as the fourth century B.C., the silver-mines of L. in Africa, were worked by the Athenians. The Romans, when they held Spain, worked the quicksilver mines of Alhambra. The Phoenicians of Gades (Cádiz), according to Strabo, traded with the Cassiterides (Scilly Island) in tin and lead. During the Roman occupation of Britain, mining was carried on; it afterwards declined, and, when revived, was chiefly in the hands of the Jews. In the reign of Queen Elizabeth, German miners were encouraged to settle in Britain, but soon native skill and industry rendered foreign aid unnecessary. About 1620, blasting rock by gunpowder commenced; in the next century the steam engine was introduced, and in 1845 these followed, for coal mines, the Davy lamp.

2. *Art & Operations:* Mining is presented with the view of obtaining metallic ores for smelting, or other mineral deposits, as coal, rock salt, diamonds, or other precious stones. Sometimes these are found on the surface, especially where cliffs are exposed; diamonds, gold-dust, &c., are sometimes obtained from gravels overlying the more solid rocks, but, as a rule, mining-operations cannot be presented successfully except by sinking shafts and carrying on subterranean operations. Coal seams, which were originally horizontal, and even now may dip at only a low angle, and even more easily reached than metallic lodes occurring in veins and fissures which, as a rule, descend at a high angle, or even vertically to the interior of the earth. (VIK.) In both cases a shaft or shafts must be sunk, the roof, when undermined supported, and galleries run to reach or follow the course of the vein or seam.

3. *Law:* Mines belong to the owner in fee simple of the land, except gold and silver mines, which are the sovereign's by virtue of the royal prerogative. A tenant for life may work old mines on the land he occupies, but not open new ones. If a man follows a lode from his own land under that of his neighbour, he commits a trespass.

mining companies, s. pl. The privilege given to the companies formed in Britain in 1827 for working mines in Mexico and South America, many of which came to a disastrous end. Afterwards it was extended to all companies of a similar kind.

min-ión (í as y) (1), s. & n. [Fr. *mineur*; Ital. *minatore*, from M. H. Ger. *mine*; O. H. Ger. *minna*, *minna* = memory, remembrance, love.]

- A. As substantive:**
1. *Ordinary Language:*
 - 1. A darling, a favourite (in a good sense). "Immortal *minions* in their Maker's side!" *Stirling, Domesday, Twelfth Hour*
 2. An unworthy favourite; a creature; a servile dependant. "The *minion* of Joffroy was as might have been expected, preferred by James—*His story, Hist. Eng., ch. 14.*
 3. A favorite fancy, liking, or disposition. "The particular *minion* of his affections was worldiness"—*South: Sermons, vol. III, ser. 6.*

II. Technical:

1. *Print.*: A size of type between nonpareil and brier.

This line is printed in Minion type.

2. *Gold.*: An old 4-pounder gun, about seven feet long. (*Barlow: 2 Toward Britain, III, 2.*)

B. As adj.: Dainty, small, delicate, fine, trim.

"On his *minion* harp full well plays he can"
Phœnician Embassy, Act, C. III

Minions of the moon: Highwaymen, foot-pads. (*Shakspeare: 1 Henry IV., i. 2.*)

min-ión (í as y) (2), s. [Ety. doubtful.] The sittings of a house after calculation at the iron furnaces. (*Webb.*)

***min-ión (í as y) (3), s.** [Lat. *minium*.] Red lead, vermilion, cinnabar.

"Let them *minion* their faces with *minion* and ceruse"
Burton: Ann. of Malabar, p. 67.

min-ión-étte (í as y), s. & n. [Eng. *minion*; dimm. suff. *-ette*.]

A. As substantive:

Print.: A small fancy type. (*Larriou.*)

B. As adj.: Delicate, effeminate.

"His *minionette* Eve."—*Walpole: Letters, i. 26.*

min-ión-lág (í as y), s. [Eng. *minion* (1); *-lag*.] Kind treatment.

"With sweet behaviour and soft *minioning*"
Marston: Malcontent, iv. 3.

min-ión-ize (í as y), vt. [Eng. *minion* (1); *-ize*.] To favour.

"Whom I *minionize*. His grace did *minionize*"—*Arden: Holy Books, p. 26.*

min-ión-like, min-ión-ly (í as y), adj. [Eng. *minion* (1); *-like*, *-ly*.]

1. Like a minion.
2. Humbly, meekly, affectedly.

"Hithert' with our sparkful youth both, a then great grandfathers' English, which had more care to do well than to speak *minionlike*."—*Cumden: Reminisc., p. 26.*

min-ión-ship (í as y), s. [Eng. *minion* (1); *-ship*.] The quality or state of being a minion.

"The favourite Lucius strengthened himself more in his *minionship*"—*Bowdell: Letters, bk. 1, § 1, let. 1.*

min-í-öp-ter í, s. pl. [MINIOPTERIS.]

Zool.: A group of bats, of the Vespertilionine alliance, family Vespertilionide (q.v.). It contains two genera, *Miniopterus* and *Natalus*, characterized by the great elevation of the crown of the head above the face-line, and by the separation of the upper incisors from the canines and from each other.

min-í-öp-tör-üs, s. [Mod. Lat. from Gr. *minios* (*minios*), assumed by grammarians as the root of *μινθη* (*minthē*) = to lessen, to cut, and *πτερον* (*pteron*) = a wing.]

Zool.: The typical genus of the group *Miniopterus* (q.v.). The crown of the head is amply raised from the face, the upper incisors in pairs, separated from the canines; ears separate, the outer margin extending forward nearly to the mouth; nostrils simple; tail as long as the head and body, and entirely enclosed within the interfemoral membrane. It has a wide geographical range, through the Eastern Archipelago to Australia, westward through Borneo and Ceylon, to Malagascar, Africa, Asia Minor, and Southern Europe, as far north as Switzerland and Austria. Brown, grayish or black to reddish-gray or reddish-brown. *Miniopterus schreibersii* is Schreibers' Bat, an inhabitant of caves; *M. tristis* is from the Philippine, *M. australis* from the Loyalty Islands, and *M. leopitis* is an eastern species.

min-í-ös, n. [Lat. *minium* = red-lead, vermilion.] Red.

"They hold the sea receiveth a red and *minious* tincture from sprizze, wax, and currents, that fall into it."—*Bacon: Vulgar Errors, bk. VI, ch. IV.*

min-ish, men-us-en, myn-ys-she, vt. [Fr. *minuscule*; to diminish, to enlame, from Low Lat. *minutio*, *minutio* = to reduce to fragments; Lat. *minutio* = fragments, from *minutus* = small, minute; Ital. *minuzicare*] To lessen, to diminish, to cut off, to reduce.

"Ye shall not *minush* ought from your backs of your duty task."—*King James, 19.*

min-ish-mént, s. [Eng. *minish*; *-ment*.] The act of diminishing; diminution, lessening.

"Elyda reputed as a *minishment*, and a withdrawal of the honor dewe to himself."—*Sir T. More: Works, p. 145.*

min-is-tél-lo, s. [MINISTER, s.] A petty minister.

"What pitiful *Ministello*, what pöny Presbyters!"—*Quenden: Tears of the Church, p. 94.*

min-is-tër, min-is-tre, myn-ys-tre, s. [Fr. *ministre*, from Lat. *ministerium*, accus. of *ministrare* = a servant, from the same root as *minister*, *ministrans*, *minum*; Sp., Port., & Ital. *ministro*.]

- I. Ordinary Language:**
1. A servant, an attendant; one who acts under the orders and authority of another. "He closed the book, and he gave it again to the *minister*, and sat down."—*Luke iv. 20.*
 2. A servant or messenger from God. "Angels and *ministers* of grace, defend us." *Shakspeare: Hamlet, i. 4.*
 3. One who is employed to a certain end; an agent, a medium, an instrument. "Demons accused, due *ministers* of woe." *Pope: Homer: Odyssey XI, 75.*

4. Anything employed or used as a means to an end; a medium, a means, an instrument; one who or that which supplies anything; a source.

"Much conversant with Heaven, she often holds, With those fair *ministers* of light to man Sweet conference"
Congreve: Task, v. 805.

5. One to whom is entrusted the administration or direction of affairs of state; one employed in the administration of a branch of the government.

"Very different training was necessary to fit a great *minister* for foreign affairs."—*Mercantile Inst. Eng., ch. 81.*

6. A delegate, an ambassador, the representative of a sovereign at a foreign court.

7. The pastor of a church, duly authorized or licensed to preach and administer the sacraments.

II. Ecles. & Church Hist. (PL): Five assistants to the General of the Jesuits, elected by the general congregation, and empowered to represent to the head of the Order anything irregular which they may have observed in his government.

¶ Ministers of the Sick:

Ecles. & Church Hist.: A congregation of priests and lay-brothers, founded by St. Camillus of Lellis in 1586, and raised to the rank of a religious order in 1791 by Pope Gregory XIV. Their special work is the care of the sick in hospitals. The dress is that of secular priests, with a large brown cross on the soutane and on the cloak. (*Abdis & Arnold.*)

minister-general, s.

Ecles. & Church Hist.: The title given to the head of the Order by the Franciscans and Capuchins.

minister-provincial, s.

Ecles. & Church Hist.: The head of a province among the Franciscans and Capuchins.

min-is-tër, min-is-tre, myn-is-tre, myn-ys-tre, vt. & i. [O. Fr. *ministrier*, from Lat. *ministrare*, from *ministrare* = a servant, a minister; Sp. & Port. *ministrar*; Ital. *ministrare*.]

A. Transitive:

1. To afford, to supply, to give, to present, to suggest.

"If you three will but *minister* such assistance"
Shakspeare: Much Ado About Nothing, II, 1.

2. To perform, to execute, to render.

"3. To humiliate, to direct.

"One alone *ministreth* all things."—*Chaucer: Boethius, bk. III.*

4. To administer medicinally.

"A poison which the friar subtly bath *ministered*"
Shakspeare: Romeo & Juliet, IV, 3.

minor canon, s.

Ecclesiol.: An official of a cathedral or collegiate church in priest's orders, ranking next to the prebendary or canon. In the "old foundation" cathedrals, with the name of priest vicars, or vicars choral, they have been corporations, and have held their own property; in the "new foundation" cathedrals, they have been and still are stipendiaries of the chapters, their incomes in both cases varying from £150 to £300 a year. Those cathedrals which have been created within the last few years have no such officials, with the exception of Southwell, which has one, the last remnant of the old collegiate foundation. Originally they were equal in number with the canons, and in the old foundations every prebendary had his own vicar. For more than two centuries, however, they were in all, throughout England and Wales, about 152 in number, till the Cathedral Act (3 & 4 Viet., c. 115) reduced them still further to 117. Their duty is to chant the daily services, and to preach occasionally; and as the preceptor or successor is chosen from them, they must also have an adequate knowledge of cathedral music. The office is much sought after, not only for the connection with a cathedral, but as certain to lead to preferment.

Minstrals in the middle ages were a class of men who lived by the arts of poetry and music. The minstrals or jongleurs only recited or chanted poems, but did not write or invent them; or perhaps accompanied on some instrument the troubadour who sang his own compositions. It was not an unusual thing for a troubadour to have several minstrals or jongleurs in his service. The minstrals in later times formed a separate guild, meeting for the purposes of mutual protection and support. They became exceedingly popular in England; their persons were sacred; their profession alone was a sufficient passport, and they were on all occasions welcome guests at the houses of the rich. With the decline of chivalry, the profession of the minstral also declined, and eventually sank so low that they are classed amongst vagabonds and beggars in statutes of the reign of Elizabeth.

"Wake us from your sleep of death."

1. *Arch.*: The sixtieth part of the lower diameter of the shaft of a column.

2. *Geog.*: The sixtieth part of a degree.

3. *Geom.*: The sixtieth part of a degree of a circle: it is denoted by the sign \prime .

minute-bell, *s.* A bell tolled regularly at intervals of one minute, usually to give notice of a death or a funeral. [*PASSING-BELL*.]

minute-book, *s.* A book in which the minutes of meetings are recorded.

minute-glass, *s.* The sand-glass running sixty seconds.

minute-gun, *s.* A gun fired regularly at intervals of one minute from a ship at sea as a signal of distress.

minute-hand, *s.* The hand pointing to minutes on the dial of a clock or watch, and traversing the circle in one hour.

minute-jack, *s.*

1. *Hoool.*: A fanciful little figure which strikes the gong in some clocks at the prescribed times.

* 2. *Fig.*: One who changes his mind every minute; a fickle person.

"Cap and knee slaves, vapours, and *minute-jacks*" — *Shakspeare*. *Timon of Athens*, iii. 6.

minute-men, *s. pl.* Soldiers enlisted for service wherever required, and ready to start at a moment's notice. (*American*.)

"Called *minute-men*, as they are to be ready at a minute's warning." — *Balph*. *Letters*, B. 2.

minute-tithes, *s. pl.*

Leav.: Small tithes such as usually belong to a vicar, as of wood, lamb, pigs, butter, cheese, honey, &c. (*Wharton*.)

minute-tringa, *s.*

Ornith.: *Scoly's* name for the Little Stint, *Tringa minuta*.

* **minute watch**, *s.* A watch on which the minutes are marked.

minute-wheel, *s.*

Hoool.: One of the wheels placed between the plate-plate of a watch and the dial. Also called a dial-wheel.

* **minute-while**, *s.* A minute.

"They walk'd about me every *minute-while*." — *Shakspeare*. *Henry VI.*, 1. 4.

† **minute** (as **mīn īt**), *v.t.* [*MINUTE*, *n.*] To set down in a short sketch or note; to write minutes of; to make a note of.

minutely, *a.* & *adv.* [*Eng.* *minutely*, *a.*; *-ly*.]

A. As adv. (as *mīn-īt-ly*): Happening every minute; constant, unceasing.

"Throwing themselves absolutely upon God's *minutely* providence for the sustaining of them." — *Newton*. *Works*, 1. 472.

B. As adverb:

1. In a minute manner; with close attention to details; nicely, exactly; with minuteness. (*Pron.* *mī-nū-īt-ly*.)

"He rather taxes Homer with painting them too minutely." — *Pope*; *Boiler*; *Odyssey*, (Post.)

2. Every minute; with little time intervening; constantly. (*Pron.* *mīn-īt-ly*.)

"As if it were *minutely* proclaimed in thunder from heaven." — *Newton*. *Works*, 1. 471.

mī nūte-nēss, *s.* [*Eng.* *minute*; *-ness*.]

1. The quality or state of being minute, or of very small size or bulk; extreme smallness, fineness, or slenderness; insignificance, diminutiveness.

2. Close attention to minutiae or details; critical exactness; precision.

mī-nū-ti-æ (t as sh), *s. pl.* [*Lat.*, from *minutus* = minute (q.v.).] Small, minor, or unimportant details or particulars.

"The unimportant . . . From mere *minutiae* can induce Events of a most important use." — *Cowper*. *To Lady Austen*.

* **mī-nū-ti-ōse** (t as sh), *a.* [*MINUTILE*.] Attending closely to minutiae or minor details: minute, precise, exact.

"An expression like *minutose* investigations." — *Fitz-Edward Hall*. *Modern English*, p. 168.

mīnx, *s.* [*Prob.* a corrupt. of O. Dut. *minneker* = my love, or *Eng.* *minion*.] [*MINNIX*, *MIXON*.]

1. A pert girl, a wanton woman, a baggage, a quean, a jade.

"Damm her, lewd *mīnx*! O, damn her." — *Shakspeare*. *Othello*, iii. 3.

* 2. A she puppy, a lap-dog.

"Little *mīnxes* or pupes." — *Chad*. *Apopth. of Erasmus*, p. 143.

3. A mink (q.v.).

mīnx-otter, *s.* The mink (q.v.).

* **mīn-ŷ**, *a.* [*Eng.* *mīn*(e), *s.*; *-ŷ*.]

1. Abounding with mines.

2. Of the nature of a mine or hollow in the earth.

"The *mīn* caverns, blazing on the day." — *Thomson*. *Autumn*, 79.

mīn-ŷ-a-dī-næ, *s. pl.* [*Mod. Lat.* *minyas*, genit. *minyadn*(is); *Lat.* fem. pl. adj. suff. *-inæ*.]

Zool.: A sub-family of Actinida. They do not fix themselves by their base, or foot, but by contracting it, form a hollow space, into which they take air, enabling them to float, which they do with their mouth and tentacles downward.

mīn-ŷ-ās, *s.* [*Lat.* = a fabulous herb with magical properties.]

Zool.: The typical genus of the sub-family *Minyadinae* (q.v.). *Minyas carulea* is found at the Cape of Good Hope.

mī ō ba sil ē ŷs, *s.* [*Gr.* *μείων* (*meiōn*) = less, and *πασίλειος* (*pasileios*) = a king.]

Tribut.: A genus of perissodactyle mammals, from the Miocene of North America. It is more or less synonymous with *Brontotherium*. [*BRYOTHERIIDE*.]

mī-ō cēnc, * **mēi-ō cēnc**, *s.* & *n.* [*Gr.* *μείων* (*meiōn*) = less, and *κακός* (*kakos*) = new, recent.]

A. As sub-family: *Geology*: A term introduced in 1835 by Sir Charles Lyell to designate the beds formerly called Middle Tertiary. The term *Miocene* denotes that only a minority of the shells

belong to recent species. [*Elym*.] He founded it on the *Faluns* of France, which, according to M. Deshayes, have seventeen per cent. of their shell species recent. Subsequent discovery has slightly modified the number, especially as other beds than the *Faluns* have their own proportions of recent and fossil shells. Beyrich separated from it its lower portion, and, combining this with the Upper Eocene, founded a new division, the *Oligocene* (q.v.). No British strata are unequivocally Miocene, Great Britain and Ireland having probably been dry land during the period. The *Hemstead* beds, those of *Downy Thury*, and the *lead* beds of the Isle of Mull, were classed by Lyell as late as 1871 as Lower Miocene, but the first of these are now considered *Oligocene*, and the second and third *Middle Eocene*. So also, perhaps, are the *lead* bearing beds of the *Giants' Causeway*. The foreign representatives of the Miocene are the *Faluns* of *Touraine*, those of *Bordeaux*, the freshwater strata of *Gers*, the *Cheningen* beds, and the *Marne Molasse* of *Switzerland*, the *Vienna* and *Majence* basins, the beds of the *Superior*, near *Turn*, the Miocene of the *Western Territories* in the *United States*, the *Marine Miocene* of *India*, *Egypt*, the *West Indies*, and *Australia*. The strata of the *Sivalik Hills*, in *India*, formerly deemed *Miocene*, are now considered to be of *Older Pliocene*. The shells of the *Miocene* show a somewhat warmer climate than that of the same parts of *Europe* now. Of vertebrates there are in the *Eastern Hemisphere*, *Duotherium gypsi-leanum*, *Mastodon angustidens*, *Ethovorus schleri-werheri*, *Machairodus cultridens*, &c. Of quadrupeds there are two genera, *Pluopithecus*, allied to the *Gibbon*, and *Dryopithecus*, allied to the *Gorilla*, to the *Chimpanzee*, and to *Man*. Among the *American mammals* are *Mesohippus*, *Miohippus*, akin to the *Horse*, *Perchoetus* and *Elotherrium* (Pigs), and *Hyacnodon* (a *Carnivore*). Abundant plants and insect remains have been found at *Chungking*, many of the former resembling modern *North American* plants more than those of *Europe*. *Volcanic rocks* of *Miocene* age exist in *Madeira*, the *Azores*, and *Australia*. (*Lyll*.)

B. As adv.: Of or belonging to the strata described under *A.*

"*Miocene* strata of Italy." — *Lyell*: *Student's Elem. of Geol.* (1855), p. 123.

mī ō-hip-pūs, *s.* [*Eng.* *Mio*(cene); and *Gr.* *ἵππος* (*hippos*) = a horse.]

Pulvart.: A genus of fossil Equidae, from the *Upper Miocene* of *North America*. The species are rather larger than a sheep. All the feet have three toes, nearly equal in size. As in *Mesohippus* the little finger is represented by a splint-bone.

mī ō-stēm-ōn-ōus, *n.* [*MEIOSTEMONOUS*.]

mīr, *s.* [*Russ.*] A communal division in *Russia*.

* **Mīr-a**, *s.* [*Lat.* fem. of *miris* = wonderful (suppl. *steli* = star).]

Astron.: A fixed star, α Ceti, or *Mira* Ceti, situated in the neck of *Cetus*. It is variable or periodic, sometimes reaching the second magnitude and then again diminishing to the twelfth. Its periodic time is 331.56 days, about two months of which it is invisible to the naked eye. Its variability was first discovered by *Fabricius* in 1576.

* **mī-rāb-il-ar-ŷ**, *s.* [*Lat.* *mirabilis*(s); = wonderful; *Eng.* adj. suff. *-ar-ŷ*.] One who relates wonderful stories; a work on wonders.

"To give contentment to the appetite of curious and vain will, as the manner of *mirabiliter* is to do." — *Bacon*: *On Learning*, 58, 11.

mī-rāb-i-lis, *s.* [*Lat.* = wonderful, from the handsome flowers.]

Bot.: A genus of *Nyctaginaceae*. The corolla is tubular; the fruit one nut-like seed, invested with the inflated tube of the corolla. *Mirabilis Jalapa* was once erroneously supposed to be the true jalap plant. *M. alchibania*, the *Mayal* of *Peru*, called in the *West Indies* the *four o'clock flower*, and *M. longiflora* are very drastic. *M. salsola* is a species having the flavour of anise, is given in *Mexico* against diarrhoea and rheumatism.

mī-rāb-i-lite, *s.* [*Lat.* *sul* *mirabilis* = strange or wonderful salt, an expression said to have been used by *Clavier*, because of the unexpected result of an experiment with sulphuric acid and common salt.]

Min.: A monoclinic mineral, rarely observed in crystals (except artificially), but usually in efflorescent crusts. Hardness, 1½ to 2; sp. gr. 1.481; lustre, vitreous; colour, white; taste, cool, feebly saline, and bitter. Compos.: soda, 19.3; sulphuric acid, 24.8; water, 55.9 = 100. Occurs abundantly at Karlsbad, Bohemia, in the water of the hot springs, at the salt mines of Ischl and Hallstadt, Austria, and as efflorescences at several places in the United States.

***mir-a-ble**, *a.* [O. Fr., from Lat. *mirabilis* = wonderful, from *miror* = to wonder, to admire; Ital. *mirabile*.] Wonderful, admirable.

Not Neoplatonism's mirabile
Shakesp.: *Titulus & Cressida*, iv. 5.

Mir-ach, *s.* [Corrupt. Arab.]

Astron.: A fixed star, β Andromedæ.

mir-a-cle, *s.* [Fr., from Lat. *miraculum* = something wonderful, from *miror* = to wonder at; *mirus* = wonderful; O. Sp. *miraclo*; Ital. *miracolo*.]

1. A wonder, a wonderful thing; anything which excites wonder, surprise, or astonishment; a marvel.

"I have beheld the Ephesian's *miracle*—
Its columns strew the wilderness."
Byron: *Thales Herold*, iv. 153.

*2. A miracle-play; a dramatic performance based on events in the life of Our Lord, or of the saints.

3. An act or effect sensibly deviating from the known laws of nature, wrought or supposed to be wrought by the direct interposition, aid, or permission of a supernatural being; a supernatural event or act.

"A *miracle* I take to be a sensible operation, which, being above the comprehension of the spectator, and in his opinion contrary to the established course of nature, is taken by men to be divine."—*Locke*: *A Discourse of Miracles*

*4. *The Contrivance regarding miracles*:

Maudsl. Phil., Theol., & Church Hist., &c.: This was commenced by David Hume, who, in 1750, published, as the tenth section of his *Inquiry Concerning Human Understanding*, an essay headed, "Of Miracles," and asserted that:—

"A miracle is a violation of the laws of nature, and, as a firm and unalterable experience has established these laws, the proof against a miracle from the very nature of the fact is as entire as any argument from experience can possibly be imagined. *Acad.*, "That no testimony is sufficient to establish a miracle, unless the testimony be of such a kind that its falsehood would be more miraculous than the fact which it pretends to establish, and, even in that case, there is a mutual destruction of arguments, and the superior only gives us an assurance suitable to that degree of force which remains after deducting the inferior." (*Works*, ed. 1807, pp. 125-126.)

Many replies were given on the Christian side to Hume's argument, one of the most noted being *A Dissertation on Miracles*, by George Campbell, D.D., F.R.S., Principal of Marischal College, Aberdeen. His contention (*Works*, ed. 1840), i. 29-39, in which he was supported long afterwards by Archbishop Whately, was, that there was a want of precision in Hume's use of the word experience. Whately showed that the word may have three meanings; personal experience, which would not be important for Hume's purpose; universal experience, regarding which it would be a *petitio principii* to assert that it was against the occurrence at any period of the world's history of miracles; or something intermediate between the two, viz., the experience of the generality, which is not enough to establish Hume's proposition. (*Whately's Logic* [Appendix I. viii.], *Experience*.) Some now hold the view that a miracle is not a violation of the laws of nature, but the operation of a higher law overriding that of a lower, as what may be termed the law of life suspends the chemical action of the gastric juices on the stomach itself during life, leaving them free to act at death.

***miracle-monger**, *s.* An impostor who pretends to work miracles.

These *miracle-mongers* have alarmed the world round about them to a discernment of their tricks."—*South*: *Scenarios*, vol. iii., ser. 11.

miracle play, *s.* [MIRACLE, *s.*, 2.]

***miracle proof**, *a.* Not to be persuaded even by miracles.

"He is *miracle-proof*, and beyond the reach of persuasion; and to like to be convinced till it is too late."—*South*: *Scenarios*, vol. iii., ser. 8.

***mir-a-cle**, ***myr-a-cle**, *v.t.* [MIRACLE, *s.*] To make into a miracle; to render miraculous.

"I'm not their father, yet who this should be
Both *miracle* itself, lovelier before me."
Shakesp.: *Cymbeline*, iv. 2

***mi-rac-u-lize**, *v.t.* [Eng. *miracle*; -ize.] To represent as a miracle; to attribute any event to supernatural intervention.

mi-rac-u-loüs, *a.* [Fr. *miraculeux*; Sp. & Port. *miraculoso*; Ital. *miracoloso*.]

1. Of the nature of a miracle; exhibiting, involving, or performed by a power more than natural; effected by the direct intervention or agency of God.

"Again, there is nothing in the world, but what is indeed doubly *miraculous*—*tree* *Thomas*, *Street*, bk. iv., ch. v.

2. Wonderful, marvellous, extraordinary, exceedingly surprising, almost incredible; as, a *miraculous* feat, a *miraculous* escape.

miraculous gifts, *s. pl.* [GIFT.]

mi-rac-u-loüs-ly, *adv.* [Eng. *miraculous*; -ly.]

1. By means of a miracle; by power above that of nature.

"Some cheats have pretended to cure diseases *miraculously*."—*Porteus*: *Works*, vol. u., lect. 14.

2. In a miraculous manner or degree; wonderfully, extraordinarily.

"Muscle and nerve *miraculously* span."
Croquer: *Rétirement*, 59.

mi-rac-u-loüs-ness, *s.* [Eng. *miraculous*; -ness.] The quality or state of being miraculous; the state of being effected by miracle.

"The *miraculousness* of such appearances will be no longer used as an argument against their possibility."—*West*: *In the Description*, § 13.

mir-a-dor, *s.* [Sp., from *mirar* = to look.] A balcony; a belvedere or gallery commanding an extensive view.

"Mean thou thy valiant son, who had before
Gaul'd him, rode round to every *mirador*."
Dryden: *A Conquest of Granada*, l. v.

mi rage (*ge as zh*), *s.* [Fr., from *mirer* = to look at, from Low Lat. *mirra* = to behold,

from Lat. *miror* = to wonder at.] An optical illusion by which images of distant objects are seen as if inverted, below the ground or raised in the atmosphere. The phenomenon is best observed in the Egyptian or other deserts, though occasionally seen elsewhere, and the inverted images so much resemble those made in water as to create the illusion that a lake is really near. The soldiers of Napoleon I., when in Egypt, were much tantalized by the mirage; and Monge, who accompanied the expedition, was the first to explain the illusion. The layers of air in contact with the heated soil are rarefied and expanded more than those immediately above them; a ray of light from an elevated object has to traverse strata of air less and less refracting, and the angle of incidence continually increases in amount till refraction gives place to internal reflection. According to the varying density of the several strata of air the mirage varies its character. In 1822, Captain Scoresby, sailing in the Polar regions, saw the mirage of a ship inverted in the air. He recognised it as his father's vessel, the *Fame*, and found afterwards that she was at the time thirty miles off. The mirage is sometimes reflected sideways. By this means the French coast has at times been made to appear in comparative proximity to our own. The mirage was known in ancient Jewish times; it is mentioned in Isaiah xxxv. 7, "And the parched ground shall become a pool and the thirsty land (Heb. שָׁרְיָה *sharaya*) = the mirage) springs of water." The Fata Morgana, what sailors call the "looming," the Flying Dutchman, the Enchanted Island, Cape Fly-away, &c., are all produced by the mirage.

mir-bänc, *s.* [Ety. doubtful.] [NITRO-BENZOL.]

mir-bél-i-a, *s.* [Named after C. F. Brisseau Michel, a botanical physiologist, director of the Jardin de Roi, at Paris.]

Bot.: The typical genus of the sub-tribe Michelieæ (q.v.).

mir-bél-i-é-æ, *s. pl.* [Mod. Lat. *mirbel(e)* (q.v.); Lat. fem. pl. adj. suff. -eæ.]

Bot.: A sub-tribe of papilionaceous plants, tribe Podalyrieæ.

mir(e) (i), ***myre**, *s.* [Erv. *myr*, *myr* = a bog, a swamp; cogn. with Sw. *myr* = a bog; Dan. *myr*, *myr*; O. Dut. *meer* = mud, mire; O. H. Ger. *myr*, M. H. Ger. *myr* = moss, swamp.] Wet, clayey soil; mud, dirt.

"Thy feet are sunk in the *mire*, and they are turned away back."—*Jeremiah* xxxviii. 22.

mire crow, *s.* The sea-crow, laughing-gull, or pewee-gull, *Larus ridibundus*.

mire drombylle, ***mire drombylle**, ***myre drommylle**, ***myre dromble**, *s.* The luteen, from its note, and habit of frequenting miry places.

mire (1), *v.t. & i.* [MIRE, *s.*]

"Move numerous, wonder-working, and *mirific*."
Cryphart: *Rabelais*, bk. iii., ch. iv.

***mi-rif-i-cent**, *a.* [Lat. *mirus* = wonderful, and *ficio*, *ip. par.* of *facio* = to do, to make.] Wonder-working; causing wonder; wonderful.

"Enchantment *Agrippa* deems to be nothing but the conscious exercise of certain *mirific* power into the thing enchanted."—*H. More*: *Mystery of Iniquity*, bk. i., ch. xviii., § 3.

mir-i-ness, *s.* [Eng. *miry*; -ness.] The quality or state of being miry; dirtiness, mudiness.

mi-rif-uid-ite, *s.* [Named after the old Miriquid Forest, Saxony Erzgebirge; suff. -ite (*Miri*); Ger. *miriquidit*.]

Min.: A rhombohedral mineral, occurring in very minute crystals, and sometimes massive. Colour of crystals, blackish-brown; of massive varieties, yellowish to reddish-brown; streak, ochre-yellow; lustre, vitreous; brittle; hardness, 4½. Contains arsenic and phosphoric acids, sesquioxide of iron, protoxide of lead, and water. Found at Schneeberg, Saxony, associated with various other minerals.

mirk, **mürk**, ***merke**, ***mirke**, *a. & s.* [A.S. *myr*, *myr*, *myre*; Icel. *myrke*; Dan. & Sw. *mirk* = murky (q.v.).]

A. As adv.: Dark, murky, gloomy.

***Pit-mirk**: A corruption of *pitel-mirk* = as dark as pitch.

"It's *pit mirk*; but there's no an ill turn on the road."—*Scott*: *Guy Mannering*, xi.

B. As subst.: Darkness, gloom.

"A werroon that were wys, desceyt suld ener drede,
Well more on the mycht, than upon the day,
To *mirk* withouten sight w' the enmys make atrye."
Robert de Brunne, p. 176.

***mirk-i-ness**, *s.* [Eng. *mirky*; -ness.] Darkness, gloominess, gloom.

***mirk-söme**, **mirke-söme**, *a.* [Eng. *mirk*; -some.] Dark, gloomy, darksome, murky.

"Through *mirkesome* aire hir ready way she makes."
Spenser: *F. Q.*, i. v. 25.

***mirk-söme-ness**, *s.* [Eng. *mirkesome*; -ness.] The quality or state of being mirk-some; gloominess, gloom, darkness.

"Clearly comprehend all the darkest *mirk-some-ness* therein."—*Meadows*: *Appendix to Uxar*, ch. viii.

mirk-y, ***merk ic**, *a.* [Eng. *mirky*; -y.]

Dark, gloomy, murky.

"Upturned
His nostril wide into the *merke air*."
Milton: *P. L.*, x. 250.

mir-li-göcs, *s. pl.* [Ety. doubtful.] Dizziness, inebriety in the head.

"My head's sea dizzy w' the *mirli-göcs*."—*Scott*: *Old Mortality*, ch. xxviii.

***mir-oir**, *s.* [MIRROR.]

mir-rör, ***mir-oir**, ***mir-our**, ***mir-rour**, ***myr-our**, ***myr-oure**, ***myr-ror**, ***myr-rour**, *s.* [O. Fr. *mirroir* (Fr.

fäte, fät, färe, ämidst, whät, fäll, father; wē, wēt, hère, camél, hër, thère; pine, pit, sirc, sir, marine; gö, pöt, or, wöre, welf, wörk, whò, sòn; müte, cüb, cüre, uníte, cür, rüle, full; try, Sýriau. æ, œ = ö; ey = ä; qu = kw.

miroir), from a Lat. *mirrorantem*, from Low Lat. *mirro* = to behold; Lat. *mirari* = to wonder at; Ital. *miratore*, *miradore*.]

I. Ordinary Language:

1. Lit.: A looking-glass, a speculum; any glass or polished substance which forms images by the reflection of the rays of light. Amongst the ancients, mirrors were made of various metals, as bronze, steel, silver, &c. Mirrors of polished metal are now called specula. [SPECULUM.] The date of the invention of glass mirrors is not certainly known. From the account of Pliny, it would seem that they had been formerly made at the celebrated glass-houses of Sidon. The method of coating with tinfoil was known as early as the sixteenth century, at Murano, where it was first practised. Mirrors are either plane, concave, or convex. Plane mirrors represent objects of their natural size; concave mirrors, or those having a hollow surface, collect the rays, reflecting them to a focus in front of the mirror, and consequently enlarge the image of the object; convex mirrors disperse the rays, and therefore diminish the size of the image of the object.

"In her hand she held a mirror bright,
Wherein her face she often viewed again."
—*Spenser's Faerie Queene*, l. iv, 10.

2. Fig.: That on which we ought to fix our eyes; that which presents a true image or representation; a pattern, an example, an exemplar, a model.

"Mirror of faith, reveal and nourish it."
—*Mirror of Justice*, l. 229.

II. Arch.: A small oval ornament cut into deep moldings, and separated by wreaths of flowers.

* mirror stone, s. A stone which reflects as a mirror; a kind of transparent stone.

mir-ror, v.t. [MIRROR, s.]

1. Lit.: To furnish or provide with a mirror or mirrors.

2. Fig.: To reflect, as in a mirror.

* mir-rour, s. [MIRROR, s.]

mirth, * merthe, * mirthe, * murthe, s. [A.S. *myrth*, *myrth*, *myrth*, *myrth*, *myrth*, allied to *mercy* = merry. From a Celtic source; cf. Gael. *mirceadh* = play, mirth, *mirce* = mirth; Ir. *mirceog*; Gael. *mirceog* = a frolic.] [MERRY.]

1. Merriment, jollity, gaiety, hilarity, social amusement.

"Go to now, I will prove thee with mirth, therefore enjoy pleasure."
—*Eccles.* ii, 1.

2. A subject of merriment.

"I'll use you for my mirth."
—*Shakspeare's Julius Caesar*, iv, 3.

* mirthe-less, a. [MIRTHLESS.]

mirth-fül, a. [Eng. *mirth*; *fül*(l).]

1. Full of mirth; merry, gay, jovial, festive.

"When round the mirthful board the harp is borne,"
—*West. Obyaque Odes of Pindar*, ode 1.

2. Exciting or causing mirth or merriment.

"The rest . . .
Tell mirthful tales in course that fill the room
With laughter."
—*Ben Jonson's & Fletcher's Maid's Tragedy*, l. 1.

mirth-fül-ly, adv. [Eng. *mirthful*; *-ly*.] In a mirthful manner; merrily, jovially, jollily; in mirth or joke.

mirth-fül-ness, s. [Eng. *mirthful*; *-ness*.] The quality or state of being mirthful; mirth, merriment, festivity.

* mirth-less, a. [Eng. *mirth*; *-less*.] Devoid of mirth or merriment; joyless, cheerless.

"Whist his garbless cut-throat
With his harmless noose plays."
—*Deighton's Shepherd's Sirena*.

* mirth-less-ness, s. [Eng. *mirthless*; *-ness*.] The quality or state of being mirthless; cheerlessness, joylessness.

mir-ý, * mier-ic, * myr-ic, a. [Eng. *mire* (l), s.; *-ic*.]

1. Full of mud or mire; muddy; deep in mud.

"Thou shouldst have heard in how miry a place,
How she was benighted."
—*Shakspeare's Tempest*, iv, 1.

2. Consisting of mire or mud.

"They are staid like newlows, yet not dry,
With miry slime left on them by a flood."
—*Shakspeare's Titus Andronicus*, iii, 1.

3. Covered with mire or mud; muddy.

I. Opt. Lat.: A mistaking one thing for another; mistake, misconception, misunderstanding.
 "There is some *misprision* in the prices."—*Shakespeare: Much Ado About Nothing*, IV, 1.
II. Law: Misprisions are all such high offences as are under the degree of capital, but nearly bordering thereon; and it is said that a misprision is contained in every treason and felony whatsoever; and that, if the crown so please, the offender may be proceeded against for the misprision only. Misprisions are either negative, which consist in the concealment of something which ought to be revealed; or positive, which consist in the commission of something which ought not to be done. Of the first or negative kind, is what is called *misprision of treason*, consisting in the bare knowledge and concealment of treason, without any degree of assent thereto, for any assent makes the party a traitor. The punishment of this offence is loss of the profits of lands during life, forfeiture of goods, and imprisonment during life. *Misprision of felony* is also the concealment of a felony which a man knows, but never assented to, for if he assented, this makes him either principal or accessory. The punishment is imprisonment and fine at the royal pleasure. The concealing the treasure-trove is also a misprision, which was formerly punishable by death, but now only by fine and imprisonment. Misprisions, which are positive, are generally denominated contents or high misdemeanors, of which the principal is the mal-administration of such high officers as are in public trust and employment.

miss ĭon (as as sh), *s. & a.* [Lat. *missio* = a sending, from *missus*, *pt. par. of mitto* = to send.]

A. *As substantive:*

I. Ordinary Language:

1. The act of sending; a sending, a despatching.

* 2. Dismissal, dismissal, discharge.

3. The state of being sent or delegated by authority.

4. Persons sent or delegated by authority to perform any service or commission; spec., persons sent on political business, or to propagate religion.

"There should be a *mission* of three of the fellows, or brethren of Solomon's House."—*Bacon: New Atlantis.*

5. The business on which a person or agent is sent; that duty with which the persons sent are charged; a commission; a charge or duty entrusted.

"Pronounce—what is thy *mission*?"
Byron: Manfred, III, 4.

6. The duty or object which one has to fulfil in life; the object of a person's or thing's existence.

"How to begin, how to accomplish best
His end of being on earth, and *mission* high."
Milton: P. R., II, 114.

7. A station or residence of missionaries; the missionaries connected with such station.

II. Ecclcs. & Church History:

1. Singular:

(1) The act of appointing to the cure of souls by a lawful superior. In the Roman Church the mission of a priest is derived from his bishop, who receives his mission from the Pope. There are two views as to mission in the Anglican Church: (1) that mission is conferred with consecration; and (2) that it is derived from the Crown. The former view is the one more generally held; though the supporters of the latter might effectively quote the words in which an Anglican bishop does homage to the sovereign for his see. Among non-episcopal denominations, mission is generally the act of a governing body.

(2) A quasi-parish. In countries not in communion with the Roman Church, priests are appointed to missions, and are removable at the will of the bishop. Since the establishment of the Roman hierarchy in England in 1550—known at that time as the "Papal Aggression"—the charge of certain important missions has centered quasi-parochial rights. [MISSIONARY, *PAROCH.*]

(3) The holding of special services in any particular district with the view of stirring up the inhabitants to a more active spiritual life.

2. Plural:

(1) *Foreign Missions:* The injunction of Jesus which renders the duty of instituting missions imperative on the Christian Church is found in Matt. xxviii, 18-20 and Mark xvi, 15-18. The latter version of the command belongs to that portion of the last chapter of Mark which is of doubtful authenticity [MARK]. The Acts of the Apostles narrate the Pentecostal descent of the Holy Spirit accompanied by the gift of tongues, this miraculous endowment being evidently designed for missionary purposes (Acts ii, 5). They tell also how Peter and John (ii, 14, v, &c.), and subsequently Saul, or Paul, fulfilled the final command of Jesus (xiii, xxviii). The revelation made to Peter that no man, Gentile or Jew, was common or unclean, having removed the prejudice against the propagation of the gospel among the Gentiles (x, 1), St. Paul became their special apostle, while St. Peter

had for his chief charge the Jews. Tradition is probably correct in making every apostle a missionary, though details as to their several spheres are not trustworthy. In ante-Nicene times a series of zealous missionaries laboured to spread the gospel. A certain tacit compromise with the prior faiths took place in various respects. The pagan festivals in particular showed intense tenacity of life, and as a rule it was found needful to give them a Christian varnish, and adopt them into the new religion. On the establishment of Christianity under Constantine in the fourth century, the civil power concerned itself about the spread of Christianity, and early in the ninth Charlemagne effected the conversion of the Saxons by a series of bloody wars. But genuine missionaries appeared. Thus, St. Patrick, who laboured in the fifth century, is called the "Apostle of Ireland"; Winifred, or Boniface, in the eighth century, the "Apostle of Germany." Christianity had reached Britain in Roman times, but the early British churches having been trampled out by the pagan Anglo-Saxons, Augustine and forty monks were sent to Canterbury. He became the "Apostle of England," and the first English primate. In the East, the Nestorians, from the eighth to the thirteenth centuries, prosecuted missions in Tartary and other parts of Asia, their zeal and devotion eliciting the admiration of Gibbon. The first Spaniards in America and the Portuguese in India made it a prominent object to spread Christianity, using, however, force for the purpose. In the sixteenth century, the order of Jesuits was established, to spread the Roman Catholic faith abroad as well as defend it at home. This order established missions in India, China, Japan, and South America. The greatest name was Francis Xavier (1506-1552), the "Apostle of the Indies." The zeal of the Jesuits stirred up the Dominicans, the Franciscans, and other orders. The Society of Propaganda Fide was instituted in 1622. The Protestant churches, whilst in conflict with Rome during the sixteenth and seventeenth centuries, had little energy to spare for missions. In 1701 there arose the Society for the Propagation of the Gospel; about 1722 the Moravian brethren were very zealous for missions; in 1786 the Methodist Missionary Society, in 1792 the Baptist Missionary Society, in 1796 the Glasgow, and in 1796 the Scottish Missionary Society; in 1799 the Church Missionary Society, and in 1830 the Church of Scotland mission, and in 1843 that of the Free Church came into being, with several others. The Church of England has various missionary bishops, the first ordained being the Bishop of Jerusalem, in 1841. The Scottish Missions are conducted by the churches without the intervention of societies. America has largely aided in the work of missions, one of the agents it has sent forth, Adoniram Judson, being sometimes called the "Apostle of Burmah." The Evangelical body in Germany have by means of many institutions sent forth a large number of missionaries.

(2) *Home Missions:* The taunt, "Why send so much money abroad when there are practically so many heathen at home?" helped to create home missions, which are now prosecuted with ardour in nearly every city and town in Britain. One of the earliest was the London City Mission, established in 1836.

(3) *Jewish Missions:* The London Society for promoting Christianity among the Jews was founded in 1809; the Church of Scotland Mission to the Jews began in 1827; the Free Church mission in 1843.

mitrailleur, *s.* [MITRAILLEUR.]

mitrailleuse (as *mi-trā-yéz*), * **mitraille**, *leur* (as *mi-trā-yér*), *s.* [Fr.] [MITRAILLE, *s.*]

Ord.: A weapon designed to fire a large number of cartridges in a short time. The name is given chiefly to those which are intended for use against men, firing, therefore,

ordinary rifle bullets; but weapons of higher calibre, designed to discharge heavier projectiles against "material," are usually called "machine guns." In each instance, however, the weapon is a breech-loader, and the shot is carried in a metal cartridge. The earliest forms were the French mitrailleuse and the Belgian Montigny mitrailleuse, both being composed of a number of barrels fastened in a group surrounded by a metal casing, the cartridges being contained in steel blocks, which are dropped successively into a "slot" or opening in the breech, and replaced, when discharged, by a fresh plate. The rate of firing of the Montigny was about 444 shots per minute, of the French piece 300 per minute. The Gatling, with ten revolving barrels, and the light Nordenfeldt and Gardner patterns, with fixed barrels, are fed from a drum containing cartridges, which is placed over a slot on the upper surface of the case covering the barrels. A scattering arrangement is usually fitted to the mitrailleuse, which causes the barrels to move from side to side while the piece is being discharged. The machine guns firing shot large enough to penetrate even thin iron plates are the Gatling (calibre, .65-inch), the Nordenfeldt (calibre, 1-inch), and the Hotchkiss (calibre, 1.46-inch), and all these have fixed barrels without any scattering machinery. The first mentioned fires 200 rounds a minute; the Nordenfeldt, 100 rounds in the same time. In the Hotchkiss there is a single lock for all five barrels; and the motion of the barrels is intermittent. The Nordenfeldt pattern consists of four barrels fastened side by side horizontally in a frame. It is fed from a carrier on top of the breech of the machine, which is filled by hand as the barrels, five in number, revolve, and in addition to solid cast-iron and steel shots, it fires explosive shells and canisters, at the rate of 25 per minute. This weapon will penetrate 7-inch steel plates up to 2,000 yards range. The Maxim gun is of the same nature, but is not so liable to jam as the others.

* **mi-tral**, * **mi-trall**, *a.* [Fr.] Pertaining to a mitre; resembling a mitre.

"Shall we have this dialogue between the fool and the soldier? Come, bring forth this counterfeit *modèle*."—*Shakspeare: All's Well that Ends Well, iv. 3.*

II. Arch.: A measure of proportion by which the parts of an order or of a building are regulated in classical architecture; considered generally as the diameter or semi-diameter of the lower end of the shaft of the column; in other words, semi-diameter of the column, or thirty minutes.

mōd-ŭ-le, v.t. [Fr. *moduler*.] [MODULE, s.]

1. To model, to shape.

"O would I could my father's cunning use! And souls into well model'd clay infuse!"—*Shakspeare: Metastasio's Phoenix 1.*

2. To modulate, to regulate, to adapt, to adjust.

"That charmer of the night That modulate her times so admirably rare."—*Brayton: Poly-Olbon, s. 13.*

mōd-ŭ-lēt, s. [A dimin. from *module* (q.v.).]

A little model or pattern.

"The little world's admired *moduler*."—*Sylvester: Seventh Day, First Week, 747.*

mōd-ŭ-lize, v.t. [Eng. *model*; -ize.] To model.

"To his toward sight did *modulize* His Tabernacles admirable form."—*Sylvester: The Lamer, 1, 115.*

mōd-ŭ-lūs, s. [Lat., dimin. of *modus* = a measure.]

Math. & Physics: A term denoting some constant multiplier, co-efficient, or parameter involved in a given function of a variable quantity, by means of which the function is accommodated to a particular system or base.

¶ (1) *Modulus of a system of logarithms:* A number by which all the logarithms in one system of notation must be multiplied to adapt them to the same number in another system.

(2) *Modulus of elasticity:* The measure of the elastic form of any substance, expressed by the ratio of a pressure on a given unit of the substance to the accompanying compression. Or an expression of the force which would be necessary to elongate a prismatic

body of a transverse section equal to a given unit, or to compress it within the limits of its elasticity.

(3) *Modulus of a machine:* A formula expressing the work which a given machine can perform under the conditions involved in its construction.

(4) *Modulus of rupture:* The measure of the force necessary to break a given substance. (*Hooker.*)

mō-dūm-ite, s. [Named after Modum, Norway; suff. -ite (*Min.*).]

Min.: The same as SKUTTERBITE (q.v.).

mōd-ūs, s. [Lat. = a measure.]

1. Law:

(1) The arrangement or expression of the terms of a covenant or contract.

(2) A modification; a variation or departure from a general form or rule in the way of either restriction or enlargement, as in an agreement between parties, the will of a donor, &c.

(3) An abbreviation of *modus decimandi*, a peculiar custom by which lands become exempted from payment of tithes on paying some composition or equivalent.

"One terrible circumstance of this bill, is turning the title of tax and hearth-tax what the lawyers call a *modus*, or a certain sum in lieu of a tenth part of the product."—*Swift.*

2. Music:

(1) A scale, as Dorian mode, &c.

(2) One of the three divisions of mensurable music. *Modus major* was the division of a maxim (*notula maxima*) into longs; *modus minor* the division of a long into breves. The *modus major* was perfect when the maxim contained three longs, imperfect when it contained two. The *modus minor* was perfect when the long contained three breves, imperfect when it contained two.

modus operandi, phr. The plan or method of working or operating.

modus vivendi, phr. A means or manner of living on terms of an agreement with others.

mōd-wāl, mūd'-wāl, s. [Eng. *mod*, and *wall* (?).]

Ornith.: The bee-eater (*Merops apifester*). &

mōd-y, a. [Eng. *mod*(e) (l), s.; -y.] Fashionable, modish.

"You make me too rich and too *mody*."—*Richardson: Pamela, l. 128.*

mōe, a. [Mo, MORE.]

mōe, s. [Mow, s.] A grinnace.

mōe, v.t. [Mow (2), v.] To make faces or grinnaces.

mōeh-rin-gī-a, moh-rin-gī-a (o as e), s. [Named by Linnæus after Paul Henry Gerard Moehring, a physician, author of *Herbar Proprius*, A.D. 1736.]

Bot.: Formerly regarded as a genus of Caryophyllaceæ, tribe Alsineæ. Now the British species *Moehringia trinervis* is called *Arenaria trinervis*.

mō-ēl-lōn, s. [Fr.]

Build.: Rubble stone filled in between the facing walls of a structure, or between the sandpiers of a bridge. It consists of clean, broken stone, and where it holds an important position, as in the latter-mentioned case, it is laid in mortar, and by hardening becomes equal to a solid mass of stone.

mōeñ-chī-a, s. [Named after Conrad Moench, Professor of botany at Marburg.]

Botany:

1. A genus of Caryophyllaceæ, sub-order Alsineæ. It has four sepals and petals, and four or eight stamens, while *Cerastium* has five sepals, five petals, and ten stamens. One British species, *Moenchia creta*. (*Hooker & Arnott.*)

2. A sub-genus or section of *Cerastium*. The sepals are acuminate, longer than the entry petals. There is one British species, *Cerastium quaternellum*, a small plant two to six inches high, dichotomously branched. (*Sir Joseph Hooker.*)

Mōe-sō, pref. [Lat. *Moesicus* = of or belonging to *Mæsia* or *Mysia*, a region of ancient

Europe, bounded on the north by the Danube, on the east by the Euxine, and on the west by Pannonia.] (See *etym.*)

Mœso goth, a. [GOTH.]

Mœso gothio, a. & s. [GOTH.]

mōff, s. [Native name.] A silk stuff manufactured in Caucasus.

mō fūs-sil, mof fūs sil, s. [Hind. *mofussil* = the county, as distinguished from the town.] An Anglo-Indian term for any part of India, except the three capitals, Calcutta, Bombay, and Madras.

mō-gar, s. [Native West Indian.] The dried stick of the sugar-cane.

"The stick or body of the cane after pressure was dried, and, under the name of *mogara*, was used to feed the bees."—*Morning Chronicle, March 13, 1854.*

mōg'-cŕ-a, s. [Etym. doubtful; perhaps from Gr. *mogeros* (*mogeros*) = wretched, distressed; or a corruption of the native name.]

Zool.: A genus of Talpide, established by Pomel for the Weingura Mole, *Talpa weingura*, from Japan. It resembles the European Mole in form and habits, but the fur is of a dingy tawny hue, the nose prolonged, and it has two incisors less in the lower jaw than *T. europæa*.

mōg-gan, s. [Gael. & Ir. *mogan*.] A stocking without the foot, worn over a boot. (*Scotch.*)

Mō-grā-bī-an, a. & s. [Arab. & Turk. *moghrab* = the west, North-west Africa.]

A. As adj.: Of or pertaining to North or North-west Africa.

B. As subst.: A native or inhabitant of North or North-west Africa.

Mō-gūl, s. [Pers. *Moghol* = a Mongolian.] A Mongolian.

¶ *The Great Mogul:* The popular name for the sovereign of the empire which was founded in Hindustan by the Mongols under Babur in 1525, and lasted till 1856.

Mō-gūn-tine, a. [Jal. *Moguntia*, *Moguntinæ*, the ancient name of the town.] Of or pertaining to Mentz, in Germany.

mō-ha, s. [Fr. *moha*; remoter etym. doubtful.]

Bot.: *Setaria italica*.

mō-hair, mo-haire, s. (l. Fr. *moivre* (Fr. *moire*), *moiers*, *moichaire*, from Arab. *mohayyar*.)

1. The hair of the Angora goat.

2. A fabric made from the fine, white, silky hair of the Angora goat and allied species. Sometimes called camel. The hair is said to be produced in perfect quality in no place excepting Angora in Asia Minor, and has long been a valuable article of export from that place.

3. A wool and cotton fabric made in imitation of the above, in mixed colours or plain.

mohair-shell, s.

Zool.: A species of *Voluta*, with a finely reticulated surface like mohair.

Mō-hām-mé-dan, a. & s.

¶ For this word and derivatives, see MEHAMMADAN, &c.

Mō-hāwk, Mō-hōck, s. [North-American Indian.]

1. The name of a tribe of North-American Indians.

2. A name given to certain ruffians who infested the streets of London towards the end of the seventeenth century.

mō-hōc, mō-haut, s. [The West Indian name.]

Bot.: *Hibiscus arboreus*, called also *Parrotia tinctorum*. In the days of slavery the negroes were flogged with whips made of its fibres.

mōhr-i-a, s. [Named after Mohr, a botanical writer.]

Bot.: A genus of ferns, order Polypodiaceæ. The sori, which are few, are situated near the revolute margins of the pinnales. Only known species *Mohria thuyifolia*. It smells of benzoin. It is found in South Africa and the Mascaren Islands.

them thickly laminated. The strata seem to have been deposited in a freshwater lake holding carbonate of lime in solution. The great salamander, at first mistaken for human remains, and described in sober seriousness by Seheultzer as "Homo diluvii testis," was found in one bed. Camper discovered its reptilian character, and Cuvier recognised it as a salamander. Other fossils are the fossiliferous of Eningen (*Calcepinus eningensis*), *Mastodon taprodes*, a fish of the genus *Leuciscus*, 844 species of insects with many plant remains, including *Liquidambar*, *Cinnamomum*, and various *Proteacea* (?), &c.

(2) The Middle or Marine Miocene Molasse, corresponding in age to the *Faluns* of Touraine. It contains a *Dryopithecus*.

(3) The Lower Molasse of Switzerland (Aquitainian). Most of the beds are freshwater. More than 500 species of plants have been found, including *Ficus populina*, the palm genera, *Elophellaria* and *Phoracites*, the pine genus *Sequoia*, &c. The flora has an American facies.

mô-làs-sēs, * mô-lôs-sēs, s. [Port. *melaço* = molasses, from Lat. *melliferus* = made with honey, from *mel* = honey; Sp. *melaço*.]

Food: Treacle. The brown uncrystallizable syrup obtained in the refining of sugar. This term is now more generally applied to the syrup imported from sugar-producing countries, whilst that produced by the home manufacturer is called treacle. Molasses consists, on the average, of 29 per cent. water, 36 per cent. crystallizable sugar, 36 per cent. inverted sugar, 5 per cent. organic acids and extractive, and 3 per cent. mineral matter.

môld, v.t. [MOULD, v.]

* **môld** (1), * **melde, s.** [MOULD (1), s.]

môld (2), s. [MOULD (2), s.]

* **môld** (3), s. [MOLE (1), s.] A mark, a spot. "A little purple môld." "That like a rose her silken leaves did fore unfold." *Spenser: F. Q., VI. xli. 7.*

môl da vite, s. [From Moldavia, Hungary; suff. *-ite* (Moa.).]

Min.: A name given to the bottle-green mineral formerly referred to obsidian (q.v.). It is now shown to be an artificial glass.

môld-wârp, * môld-wêrp, * mould-wârp, s. [Mid. Eng. *molde*, *molde* = mould, earth, and *wearpen* = to throw, to cast; hence, the animal that casts up mould or earth; O. Dut. *moldwarp*; Dut. *mol* = a mole; feel, *moldwarp* = a mole.] A mole. [MOLE (5), s., 1.] "Telling me of the moldwarp and the snail." *Shakespeare: A Henry IV., III. 1.*

môle (1), * **mold, s.** [A.S. *mâl*, *mael* = a spot; cogn. with Dut. *mol*; Sw. *mål*; O. H. Ger. *meil*; Ger. *mol*; Goth. *mail*; Lat. *molcula*.] A spot, mark, or small permanent protuberance on the body; spec., a dark-coloured patch on the skin, covered with hair. "The random pencil happily hit the mole." *Whitehead: On Eviden.*

* **môle** (2), s. [Lat. *mola* (*molis*) = the (sabbath) cake used in sacrifices.] A cake used in sacrifices. "She weth the *mole* all in her hands devoute." *Spide near the altar.* *Surrey: Virgile: Æneid IV.*

môle (3), s. [Lat. *mola* = a false conception.] **Med. Juris., Physiol., &c.:** A shapeless mass of fleshy substance in the uterus. Moles are of two kinds: (1) True, enveloped in a membrane, generally filled with blood, though occasionally dry. On cutting into the true mole, parts resembling an imperfect fetus will be observed. It is always the result of conception. (2) False, a term applied to the coagula which sometimes accompany menstruation. They are not the products of conception, nor have the enveloping membrane or the fleshy texture of the true mole.

môlc (4), s. [Fr. *mole* = a pier, a breakwater, from Lat. *molem*, accus. of *mole* = a great heap.]

1. *Maritime Engin.:* (1) A jetty or structure erected before a port so as to partially enclose a harbour or anchorage, and protect it from the violence of the waves in the offing. (2) A pier of masonry; one is described by Herodotus as extending around the harbour of Samos.

"With asphaltic slime the gathered beach They fasten'd; and the mole immense wrought on." *Milton: P. L., X. 200.*

2. *Roman Antiq.:* A mausoleum of peculiar

MOLE. (St. Angelo, Rome.)

form, as the Mole of Hadrian, now known as the Castle of St. Angelo, Rome.

môle (5), * **moule, s.** [An abbreviation of *moldwarp* (q.v.).]

1. **Zoology:**

(1) *Sing.:* The genus *Talpa*, and specially *Talpa europæa*, the Common Mole, though the name is sometimes loosely applied to any underground-burrowing mammal. The Common Mole is about six inches in length (including the tail, rather more than an inch); the body cylindrical, muzzle long and pointed, eyes minute; no ear-cochlea; the fore-feet broad and fossorial, hind-feet long and narrow. Fur, black, soft, and velvety, with grayish tinge; but lighter shades often occur, and pure white individuals have been observed. The normal food of the mole is the earthworm. It is very voracious, and no kind of flesh seems to come amiss to it, but it will not touch vegetables. It takes readily to the water. Geographical range, from England to Japan. In Britain it occurs as far north as Caithness, but is unknown in Ireland. [GOLDEN-MOLE, TALPA, WATER-MOLE.]

(2) *Pl.:* The family *Talpidae* (q.v.).

2. *Husbandry:* A cylindrical plug of iron, three or four inches in diameter, and with a sharp point, drawn or driven through the subsoil to make a drain.

mole amblystoma, s.

Zool.: A tailed amphibian (*Amblystoma talpoides*), family *Amblystomidae*, from the islands on the coast of South Carolina.

mole-bat, s.

Ichthy.: A popular name for *Orthogoriscus mole*, the Short Sun-fish. Common round the British coasts. They generally appear floating on one side, presenting the broad surface of the other to view. (*Verrell*)

mole-cast, s. The mould thrown up by a mole; a mole-hill.

"In spring let the mole-casts be spread, because they hinder the mowers."—*Hortmer: Husbandry.*

mole-catcher, s. One whose occupation is to catch moles.

"Get molecatcher cunningly roused for to kill, And burrow and cast abroad every hill." *Tusser: Husbandrie.*

mole-cricket, s.

Entom.: Any individual of the genus *Gryllotalpa* (q.v.), especially *Gryllotalpa vulgaris*, which may be taken as a type. It is about an inch and a half long, dark brown in color, and has six legs, there being a pair of (the parts emerging) being

flattened to the axis of the body, and terminated by processes. by the mole-cricket, which is yellow and withered, from the roots being eaten off by the insect in its burrowing operations—not for food, as its diet is chiefly

underground insects and worms. It flies occasionally in the evening, and its stridulation produces a note somewhat like that of the Goat-sneaker. The larvæ, when first hatched, are white, and they are said to be three years in arriving at maturity.

mole-eyed, a. Having very small eyes; having imperfect vision.

mole-hill, s. A little hill or hillock of mould thrown up by a mole when burrowing underground; hence, figuratively used for any very small hill, or anything of very slight importance as compared with something larger or more important.

"To make a mountain out of a mole-hill: To exaggerate some very trifling matter."

mole-hole, s. The burrow of a mole.

mole-plough, s. The mole-plough has a pointed iron shoe, which is attached to the end of a standard and drawn along underground, making a track like that of a mole, establishing a duct to lead water from the subsoil, pressing the earth away without disturbing the surface.

mole-rat, s.

Zoology:

1. *Sing.:* *Spalax typhlus*, a mouse-like rodent, found in the south-east of Europe, ranging eastward into Asia. The eyes are rudimentary and covered with skin, so that the animal is quite blind; the tail is also rudimentary. The toes are furnished with powerful claws, which the animals use in excavating their burrows. Colour, yellowish-brown, tinged with ashy-gray, the lower surface with white streaks and spots.

2. *Pl.:* The family *Spalacidae* (q.v.).

mole-shrew, s.

Zool.: *Urotrichus*, a genus of *Desmans* (*Myogalidae*). The Hairy-tailed Mole-shrew (*Urotrichus talpoides*) is found in Japan, and Gibbs' Mole-shrew (*U. gibbsii*) in North America.

mole-track, s. The course of a mole underground.

"The pot-trap is a deep earthen vessel set in the ground, with the brim even with the bottom of the mole-track."—*Hortmer: Husbandry.*

mole-tree, s.

Bot.: A popular name for the Caper-spurge (*Euphorbia Lathyris*), an escape in Britain.

mole-warp, s. [MOLDWARP.]

* **môle, v.t.** [MOLE (5), s.]

1. To clear of moles or mole-hills.

2. To burrow in; to form holes in, as a mole.

* **mô-lêch, s.** [MOLECH.]

mô-lêc-û-lar, a. [Eng. *molecule* (e); -ar.] Of or pertaining to molecules; consisting of molecules.

"The spectra of those variously constituted molecules are very definite, and, for the same degree of molecular complexity, have a strange family likeness to each other."—*Times*, April 29, 1875.

"The solid, the liquid, and the gaseous states are considered to be molecular states of bodies."

molecular-attraction, s.

Physics: An attraction tending to draw together molecules of the same body. It is exerted only at infinitely small distances, and produces cohesion, affinity, or adhesion.

molecular-combination, s.

Chem.: The combination of molecules without the alteration of the active atomicity of any of their constituents. Water of crystallization contained in any salt is a combination of this nature.

molecular forces, s. pl.

Physics: Certain attractions and repulsions which keep molecules of matter together without touching each other.

molecular-formula, s.

Chem.: A formula in which the atomic composition of a molecule is expressed, without reference to the manner in which the elements are combined with each other. Thus the molecular formula of ferric hydrate is $Fe_2(H_2O)_6$. [FORMULA.]

molecular motion, s.

Physics: Motion seen to take place when

1. *Doris roccina* (enlarged). 2. *Eolis glitensis* (enlarged). 3. *Thracera pennicera* (enlarged). 4. Red Phyllirhoe (enlarged). 5. *Sepia officinalis*, Common Sepia (much reduced). 6. Three-lined Phylidium (reduced). 7. *Helix aspersa*, large Garden Snail (reduced). 8. *Lymnaea stagnalis*, Freshwater Snail (half life size). 9. *Lymnaea stagnalis*, Great Brown Slug (half life size).

MOLLUSCA.

ginea (q.v.). It consists of inconspicuous plants with dichotomous stems, verticillate leaves, and cymes of small flowers. Found in the warmer parts of both hemispheres. According to Dr. Hymok, the species are bitter and expel bile. The dried plant of *Mollium hirta* is prescribed in Sind in cases of diarrhoea.

mōl lūsē, *mōl lūsēk, s. [MOLLUSCA.] *Zool.*: An animal of the class Mollusca.

mōl lūs ca, s, pl. [Nont. pl. of Lat. *molluscus* = soft, from *mollis* = soft.]

1. *Zool.*: According to Lamarck, an order of Vermees, distinct from Testacea, which immediately follows it. He placed under it a miscellaneous assemblage of genera which he described as naked, not included in a shell, furnished with limbs. They were: Actinia, Ascidia, Limax, Holothuria, Sepia, Aphrodita, Nereis, &c. (*Système Naturel* (ed. 1765), i. 1, 672.) Cuvier made the Mollusca one of the four great "divisions" or sub-kingdoms of the Animal Kingdom, of equal rank with the Vertebrata, the Articulata, and the Radiata. He subdivides it into six classes: Cephalopoda, Pteropoda, Gasteropoda, Acéphala, Brachnopus, and Cirrhopoda. (*Animal Kingdom* (ed. Griffith), i. 61, xii. 4-5.) Except that the last class has now been merged in Crustacea, and placed with the Articulata or Annulosa, the essential features of Cuvier's arrangement have still been preserved. In 1843 Prof. Owen arranged the Mollusca in an Acephalous division, containing the orders Tunicata, Brachnopus, and Lamelibranchia, and an Enecephalous division, with the orders Pteropoda, Gasteropoda, and Cephalopoda. (*Compar. Anat. Invert. Animals* (ed. 1843), p. 298.) Mr. S. P. Woodward recognised six classes: Cephalopoda, Gasteropoda, Pteropoda, Brachnopus, Conchifera, and Tunicata. (*Manual of the Mollusca* (ed. 1851, 6-8.) Prof. Huxley separates from the already limited class Mollusca a class Molluscoidea (q.v.). (*Introd. to Classif. of Animals* (ed. 1869), p. 82.) Dr. Henry Woodward defines the Mollusca as animals with a soft body, without segments, naked or covered with a shell of one or two valves composed of carbonate of lime secreted by a fold of the skin, the mantle. They have a brain mass, and foot and mantle ganglia. Some have an internal hard shell or cartilage. The symmetry of the body is bilateral. Example, the cuttle fish, the snail, the oyster, &c. He makes Tunicata and the Molluscoidea an "intermediate group," and divides the sub-kingdom into four classes: Cephalopoda, Gasteropoda, Pteropoda, and Conchifera. (*Cuvier's Nat. Hist.*, v. 157-4.) Many thousand recent Mollusca are known, distributed throughout every climate and nearly every part of the world.

2. *Palæont.*: The shells of the Mollusca being all but indestructible, and easy of identification, afford us a reliable means for ascertaining the relative age of strata. As some, moreover, inhabit fresh water, others the land, besides the large numbers which find their home in salt water, they often settle the fresh-water or marine origin of a stratum. The marine ones being distributed also in certain zones of salt water, they frequently afford materials for sounding a sea which passed away ages ago. Next to the Protozoa, the oldest fossils known are Mollusca. They have abounded from Cambrian times till now. The longevity of molluscous species (not individuals) is much greater than that of the Mammalia. Hence, Lyell's arrangement of the tertiary formations in accordance with the relative percentage of recent and fossil species must not be extended beyond the Mollusca.

mōl lūs-ĉan, n. & s. [Mod. Lat. *mollusc(a)*; Eng. suff. *-an*.]

A. As adj.: Of or belonging to the class Mollusca.

B. As subst.: A mollusc.

mō. lūs-ĉoid, s. & n. [MOLLUSCOIDEA.]

A. As substantive: *Zool.*: A member of the group Molluscoidea. "The connecting link between the molluscs proper and the molluscoidea" — Wood *Nat. Hist.*, i. 663.

B. As adjective: —

mōl lūs-ĉoid ĉ a, mōl lūs-ĉoid q, n. [Lit. *mollusc(um)*, and Gr. *ĉōs* (q. d. os) = form.]

1. *Zool.*: A branch of the animal kingdom instituted in 1844 by Henry Milne Edwards for certain animals which were formerly classed with the Mollusca, and some of which had certain resemblances, chiefly external, to them. The name has been used by many writers, and in different significations. At first it included the Brachiopoda, or Lamp Shells, the Polyzoa or Bryozoa, and the Tunicata. Then it was restricted to the Polyzoa and the Tunicata, but in 1846 the Vertebrate affinities of the latter were recognized. The name was next given to a group containing the Brachiopoda and the Polyzoa; and now it is generally restricted to the Brachiopoda.

2. *Palæont.*: The Brachiopoda range from Cambrian times till now.

mōl lūs-ĉoid-ĉ-ān, n. & s. [MOLLUSCOIDEA.]

A. As adj.: Belonging to the Molluscoidea.

B. As subst.: Any individual of the Molluscoidea (in any of the senses of that word).

mōl lūs-ĉōūs, n. [Eng. *mollusc*; *ous*.] Pertaining to the mollusca; having the qualities or characteristics of the mollusca.

"Among the molluscous or soft bodied animals." — *Patterson Zoology*, v. 27.

1. *Orn. Lang.*: A mollusc (q.v.).

"May prove that man is only the evolution of a mollusc." — *London Lectures on Art. Phases*, i. 72.

2. *Pathol.*: A skin disease, consisting of one or more small tumours, from the size of a pea to that of a pigeon's egg. There is a true molluscum, which is contagious, and a false, which is non-contagious.

mōl lūsēk, s. [MOLLUSC.]

mōl lūs kiĉ-ĉr-ōūs, n. [Eng. *mollusk*; *i* connective, and Lat. *gero* = to bear.] Producing molluscs. Used by Huxley to denote the elongated tubular sacs sometimes found attached to an intestinal vessel of *Strongyloides*, and containing ova or embryos of a parasitic mollusc.

"The cavity of the mollusciferous sac" — *Huxley Anat. Invert. Animals*, ch. viii.

mōl lūsēk-īte, s. [Lat. *mollusc(us)*; suff. *-ite* (*Palæont.*)]

Palæont.: Black carbonaceous animal matter occurring in contrast with other colours in some kinds of marble.

Mōl lŷ (l) s. [See def.] A familiar form of the name May, formerly in general use.

Molly Maguires, s, pl.

History, &c.:
1. A secret society formed in Ireland, in 1843, to intimidate landlords or process-servers demanding for rent, or others impeding the cattle of those who were unable or unwilling to pay rent. The members of the association were young men dressed up in female attire, and having their faces blackened.

"These *Molly Maguires* were generally stout active young men, dressed up in women's clothes, with faces blackened or otherwise disguised, sometimes they wore caps over their countenances, sometimes they swathed themselves in the most fantastic manner with burnt cork about their eyes, mouth, and cheeks. In this state they used suddenly to surprise the most obstinate goppers, keepers, or process-servers, and other dark fiends in log-holes, or beat them in the most unmerciful manner, so that the *Molly Maguires* became the terror of all our landlords." — *French Relations of Irish Life*, ch. vi.

2. A similar society formed in 1877 in the mining districts of Pennsylvania. The members sought to effect their purpose by intimidation, carried in some cases to murder. Several were brought to justice and executed.

Mōl-lŷ (2) s. [MALLETORKE.]

2. *Lit.*: Some dread of irresistible influence or passion, at the shrine of which everything would be sacrificed.

II. *Religious Language*:
1. *Compar. Relig.*: The distinctive god of the Ammonites (1 Kings xi. 7). The commonest spelling of the word is Moloch (Lev. x. 2, 3; Jer. xxiii. 36). Amos has Moloch (v. 26).

To show that Moloch and Molech are the same, et. 1 Kings xi. 5, 7. The Midham of Zeph. i. 5 much resembles Moloch: an Hebrew it means "then king." Perhaps it means Molech in 2 Sam. xii. 30, and Jer. xlix. 1, 3. Molech was the Ammonite god. He had a connection with the planet Saturn (the Chan ζ) of Amos v. 26. Though the offering of children to Moloch was forbidden in the Mosar law (Lev. xv. 2, 3), it was introduced not later than the reign of Solomon. Its special seat during the Hebrew monarchy was in the Valley of Hinnon, (Gehenna, Torni.) Probably at first the children were placed in the fire, and left there till they were consumed (Lev. x. 2, 3; Jer. vii. 21), then after humanity, perhaps at the instance of the mothers, began to assert itself over cruel superstition, the children were passed hastily through the fire, so as to give them at least some hope of life (Lev. xviii. 21; Jer. xxiii. 35). [SEEDEFIRE.]

2. *Zool.*: A genus of lizards, family Agamidae. It contains but one species, *Moloch hebraicus*, from Australia. It is about six inches in length, aimed on the head, body, limbs, and tail, with spines of large size, whence its popular name, Thorn-legs.

Mō lō kǎn (pl. Mō lō ka ni), s. [Russ. *molok* = milk.] Milk-drinker, one of a sect in Russia who observe the laws of Moses regarding meat, forbid the use of images or the sign of the cross, and consider all wars unlawful. They derive their name from the quantity of milk-took eaten by them.

mō lō pēs, s, pl. [Gr. *μολοπή* (*molōpē*), genit. *μολοπῆς* (*molōpēs*) = the mark of a stripe, a veil.]

Pathol.: Petchie (q.v.).

***mō lōs-ĉēs, s.** [MOLASSES.]

mō lōs-si, s, pl. [MOLASSES.]

Zool.: A group formed by Dr. Dobson, "for the reception of three genera of Emballonidae: Molossus, Nychinomus, and Chelonioides." (*Proc. Zool. Soc.*, 1876, pp. 702-733.)

mō lōs-si-næ, s, pl. [Mod. Lat. *molluscus*]; Lat. fem. pl. adj. suff. *-ina*.]

Zool.: A sub-family of Emballonidae. It contains two groups, Molossini and Mystarini.

mō lōs-sūs, s. [Gr. *Μολοσσος* (*Molossos*) = belonging to Molossia, a district of Epirus, celebrated for producing a kind of wolf-dog used by shepherds.]

1. *Gr. & Lat. Prossody*: A foot of three long syllables.

2. *Zool.*: The typical genus of the group Molossini. Ears close, or united at base of inner margin; tarsi very short; extremity of muzzle broad, obtuse or obliquely truncate; lips smooth, or with very indistinct vertical wrinkles; back of toes covered with long curved hair. Range — tropical and sub-tropical regions of America. Dr. Dobson enumerates nine species.

mōl ô thrūs, s. [ETYM. doubtful; Agassiz gives Gr. *μολοξ* (*molox*) = toll, and *θηρ* (*thēr*) = a confused noise; McNeill gives *μολαξ* (*molax*) to translate. Oudemans suggests that *mollithrus* is a mistake, and that Gr. *μολοβαν* (*moloban*) = a glutton, was intended by Swainson.]

Ornith.: A genus of Icteriide, with species

mō-mēnt'-ūm, s. [Lat. for *momentum*, from *moerō* = to move.]

I. *Ordinary language:*

1. An impulse, an impetus.

"That *momentum* of ignorance, restlessness, presumption, and lust of plunder which impels, has been able to resist." —*Gautier, On the French Revolution.*

2. A constituent or essential element.

II. *Mech.:* The force possessed by matter in motion; the product of the mass by the velocity of a body. Thus a ball of four pounds weight moving uniformly at the rate of eighteen feet in a second would have double the momentum that one of three pounds weight moving at the rate of twelve feet per second would possess, for 4×18 is 72, and $3 \times 12 = 36$, or half as much. The force of percussion, that is, the force with which a moving body strikes an object, is the same in amount as the momentum of the former.

"If L stands for length, T for time, and M for mass, then momentum is $\frac{ML}{T}$." —*Feylett, C. G. S. System of Units*, 1873, ch. i, p. 6.

Angular momentum: The product of moment of inertia by angular velocity, or the product of momentum by length. If M stands for mass, L for length, and T for time, then angular momentum is $\frac{ML^2}{T}$. Called also

Moment of Momentum. (*See* *System of Units* (1873), ch. i, p. 6.)

mō mīn' ēr, s. [Fr., from O. Fr. *momer* = to maim, to mawk oneself.] A name given in contempt or ridicule by the French and Swiss Calvinists, in 1818, to cert in persons, chiefly Swiss, who seceded from their communion.

*mōm-ish, n. [Eng. *monach*(y); -ish.] Foolish. "Discovered eyes to *mōmish* mouths." *Veres prefixed to Guogio's Eglaris.*

*mōm-mēr-ŷ, s. [MCMERY.]

mō mor' dī cā, s. [From Lat. *mordeō* (perf. *mororūti*) = to bite, because the seeds look as if bitten.]

Bot.: A genus of Cucurbitaceæ, tribe Cucurbitæ. The leaves are lobed or compound, the flowers white or yellow, unisexual or dioecious. Males with three stamens and zigzag anthers, two of them two-celled, the third one-celled. Fruit fleshy, prickly, or warty. Found in the hotter parts of both hemispheres. *Momordica Charantia* has a bright orange-yellow fruit, one to six inches long. It is cultivated throughout India. Two varieties of it are known in Bengal. After being washed in hot water to diminish its bitterness, it is eaten by the Hindoos in their curries. It is used in India internally as a laxative, and as an ointment for sores; the juice as a mild purgative for children; the astringent root in hemorrhoids. The fruit and leaves are used as an anthelmintic, also in piles, leprosy, and jaundice. The former is tonic, stomachic, and given in diseases of the spleen and liver. *M. dioica* grows wild in India, where the young and tender fruit is eaten by the natives with the tuberous roots of the female plant. The root is used also to stop bleeding from piles, and in bowel complaints. Ainslie says that when mixed with cocunut, pepper, and red sandal-wood and applied in the form of a liniment it relieves headache. *M. cochinchinensis* is eaten. The fruit of *M. balsamina* has a smooth orange or yellow fruit, one to four inches long. Pickled or steeped in oil, it is a vulnerary. *M. Elaterum*, called also *Echallium apricote*, is the Squint-cucumber (q.v.). *M. operculata* is a drastic purgative. The fruit of *M. monadelphæ*, called also *Cocinia India*, is eaten by the natives of India in their curries.

mō-mor-dī-cīne, s. [Mod. Lat. *momordica*(s); suff. -īne (*Chem.*.) The same as ELATERIN (q.v.). (*See* *Verol*.)

mō-mōt, s. [MOTMOT.]

mō-mōt-i-dæ, s. pl. [Mod. Lat. *momotides*; Lat. fem. pl. adj. -īdæ.]

Ornith.: Motmots; a family of hsirostral pccarian birds, ranging from Mexico to Paraguay, and to the west coast of Ecuador, but having their head-quarters in Central America. Six genera are known.

mō-mō-tūs, s. [Latinised from *motat* (q.v.).] *Ornith.:* Motmot, the typical genus of the family Motmotidae (q.v.). Ten species are known,

ranging from Mexico to Brazil and Bolivia, one species extending to Tobago, and one to Western Ecuador. The general plumage is green, and most of the species have the strange habit of denuding the central rectrices of the web with their beaks. [*See* *Verol*, 2.]

mō-mūs, s. [Gr. *μῦθος* (*mūthos*) = (1) ridicule, (2) see def.]

I. *Gr. Myth.:* Ridicule personified; the critic god, the son of Night. (*See* *Verol*: *Thous*, 21.) He blamed Vulcan for not having placed a window in the human breast.

2. *Ord. Lang.:* One who carps at everything; a querulous person.

**Momus' lattice:* An imaginary window in the human breast that the thoughts might be seen.

"Were *Momus' lattice* in our breasts, My soul might look to open if more widely Than thou." *Byron, Werner*, iii. l.

mōn, mōn' ō, pref. [Gr. *μόνος* (*monos*) = alone, sole.] A common prefix in words derived from the Greek, and signifying unity or singleness.

mō-nā, s. [Sp. & Ital. = an old woman.]

Zool.: *Cercopithecus mona*, a monkey from Senegal. It is remarkable for its brilliant coloration; the head being olive-yellow, with a black stripe on the forehead; yellowish whiskers and a purple face. The back is chestnut-brown, and there is a white spot on each side near the root of the tail, which is black. (*See* *Verol*.)

mōn-a-cān-thūs, s. [Pref. *mon-*, and Gr. *ἀκανθα* (*akantha*) = a spine.]

Ichth.: A genus of plectognathous fishes, family Sclerodermati, group Balistina. There is only one dental spine, and the rough scales are so small as to give the skin a velvety appearance. Adult males of some species have minute spines arranged in rows on each side of the tail, or the spines of the scales developed into bristles. Common in the Atlantic, sometimes wandering to the British coasts. Fifty species are known.

mōn-āc-ē-tin, s. [Pref. *mon-*, and Eng. *netin*.]

Chem.: C₃H₅(OH)₂(OC₂H₅)₂. Glyceryl dihydrate acetate. A colorless oily liquid obtained by heating glycerine with glacial acetic acid for some time, to a temperature of 100°. It is miscible with a small quantity of water, but is decomposed by a large quantity.

mōn-a-chal, n. [Eccles. Lat. *monachalis*, from *monachus* = a monk (q.v.); Fr. & Sp. *monial*; Ital. *monachale*.] Pertaining or relating to monks or monastic life; monastic.

mōn-a-chīsm, s. [Fr. *monachisme*, from Eccles. Lat. *monachus* = a monk.] The system of monastic life; monkery, monkishness.

"What labour is to be endured turning over volumes of rubbish in the pest, Florence of Worcester, Huntingdon, Simon of Durham, Hoveden, Matthew of Westminster, and many others of obscure note, with all their *monachisms*, is a penance to think." —*Millon, Hist. Eng.*, 18, iv.

"The ultimate fact on which monachism rests is that many people are born with a tendency to contemplation rather than to active exertion, and, if pious, consider that they will be more free from temptation to sin by retiring from the ordinary world. Hot climates tend to strengthen these feelings, and monachism has flourished more luxuriantly in Asia, Africa, and Southern Europe, than in the colder north.

(1) *Ethnic Monachism:* The most gigantic development of monachism the world has ever seen was that of Buddhism (q.v.), and it was the earliest in point of date. The Jain system is also monastic. Brahminism possessed it to a less, but still to a considerable extent. Of the Hindoo Triad the worship of Brahma scarcely exists; connected with that of Vishnu and Siva there are many monastic orders or sects. Of the former, Dr. Horace Hayman Wilson enumerates nineteen, and of the latter eleven, with fourteen others, some subdivided (*Verol* (1862), i. 12). Curiously enough, most of them arose about the same dates as the leading religious orders of Christendom were instituted, as if Oriental and Western minds advanced equally, or some cause had operated simultaneously both in the East and the West.

(2) *Jewish Monachism:* The Nazirites were an ascetic sect temporarily under vows, but

not bound to celibacy, which is nowhere enjoined even on priests under the Mosaic Law. Elijah and John the Baptist had monastic tendencies (1 Kings xiii. 5, 4. xix. 1-9, 2 Kings i. 8; Matt. iii. 4). But genuine Jewish monachism, with its celibacy as well as its asceticism and seclusion from society, seems to have begun with the Essenes (q.v.), and to have been continued by the Therapeutæ (q.v.).

(3) *Christian Monachism:* In the second century certain persons who aimed at stricter piety than their neighbours, often held converse together without quite separating from society. They were called ascetes, and were the successors of the Therapeutæ, who prepared the way for the rise of monachism. In the third century Paul ranged through the desert of Thebais in Upper Egypt during the 46-year persecutions. He and others who acted similarly were called Anachorets or Anachorites, or persons who retire from society, recluses, solitaries [ASCETIC], also eremites or hermits, that is, persons who live in the desert. [*See* *Verol*.] They frequently resided in caves. In 305 Anthony, an Egyptian monk, collected many of the eremites into communities. These were called cenobites from their living in common. In this he was largely assisted by his disciple Pachomius. The same discipline spread through Western Asia and Europe. From among the Ermites who lived apart from each other sprung the Sarabaites and Gyrovagi (Vagabond monks), respectable races, the Stylites, or Pillar Saints, associated forever with the name of Simeon, who died in 411, with other ramifications. At first all the monastic establishments followed the rule of Pachomius, but in the early part of the sixth century St. Benedict introduced new regulations, and all the monastic orders for some centuries were Benedictine. Many ordinary monks becoming corrupt, the new Order of Cinos was instituted in the twelfth century, and, as the great wealth which their communities had acquired was believed to be one of the main causes of that corruption, there arose, in the beginning of the thirteenth century, different mendicant orders, the members of which vowed poverty. [MONASTIC ORDERS.] At first all the monks were laymen; now they consist of three classes: (1) priests; (2) choir monks, in minor orders; and (3) lay-brothers, who act as servants and labourers. Originally they were under the jurisdiction of the bishop, but ultimately they were exempt from all authority except that of the Holy See. The influence of the mendicant orders was on the wane at the Reformation, and the Jesuits took their place. At that date many monasteries in England and elsewhere were deprived of their endowments and suppressed. Those of France were swept away in the first Revolution. Though since restored, they have not attained their former importance. [MONASTERY, MONK, NUN.]

mōn-a-chūs, s. [Lat., from Gr. *μοναχός* (*monachos*) = a monk.]

Zool.: A genus of Phocidæ, called by F. Cuvier Pelagius. *Monachus albicinctus* is the Monk-seal (q.v.). *M. tropicalis*, a Jamaican species, is probably distinct.

mōn-āc-tin-ōl-lī-dæ, s. pl. [Pref. *mon-*; Mod. Lat. *actinella* = a little ray, and Lat. fem. pl. adj. suff. -īdæ.]

Zool.: A name usually given to a sub-order of Siliceispongia, more properly called Monaxoidea (q.v.), since they are characterized by being uni-axial, not by being one-rayed.

mōn-ād, s. [Lat. *atomus* (gent. *atomatis*) = a unit, from Gr. *αἰῶνος* (*atomos*) = a unit, from *αἰῶν* (*atomē*) = alone, single; Sp. *atomada*; Ital. *atomale*.]

I. *Ord. Lang.:* An ultimate atom or molecule; a simple substance without parts, a primary constituent of matter.

"But that which is of more moment yet, we have the authority of Epiphanius a famous Paphlagonian Father, that Pythagoras his monads, so not to be divided, were nothing else but corporeal atoms." —*utworth: Intel. system*, p. 14.

II. *Technically:*

1. *Chem.:* Univalent element. A name given to those elements which can directly unite with, or replace, one atom of hydrogen in a compound. The monad elements are hydrogen, chlorine, bromine, iodine, fluorine, lithium, sodium, potassium, ruthenium, cesium, and silver.

bōl, bōy; pōut, jōw1: cat, çell, chorus, çhin, bench: go, çem: thin, this: sin, aç: expect, Xenophon, exist. ing. -cian, -tian = çhan. -tion, -sion = çhun: çion, çion = zhun. -cious, -sious çhus. -ble, dle, &c. = çel. del.

- 1. The system of government in which the supreme power is in the hands of a single person.
- "The first, the most ancient, most general and most approved, was the government of one ruling by just laws, called *monarchy*." — *Raleigh Hist. World*, bk. 1, ch. 18, § 2.
- 2. A state or government in which the supreme power is in the hands of a single person.
- "Our theory affords a presumption, that the earliest governments were *monarchical*, because the governments of families and of states, from which, according to our account, civil government derived its institution, and probably its form, is universally monarchial." — *Polity Not. Philosophy*, bk. VI, ch. 3.
- 3. A kingdom, an empire.
- "This small inheritance Contenteth me, and so with a monarchy," — *Shakespeare*, 2 *Henry VI*, iv. 10.
- * 4. Supreme power.
- "There Alex under just their ruler / Which would of times may a wonder / So that the monarchic life / With treakes," — *Greene*, *U*, 1 (Prol.).
- *(1) *Absolute monarchy*: A government in which the monarch is invested with absolute or despotic power.
- (2) *Despotic monarchy*: The same as *Absolute monarchy*.
- (3) *Elective monarchy*: A government in which the choice of the monarch or ruler is vested in the people.
- (4) *Fifth monarchy men*: (Fifth).
- (5) *Hereditary monarchy*: A monarchy in which the sovereignty descends directly from the holder to the heir by blood.
- (6) *Limited monarchy*: [LIMITED, * (3)].

mon-ar-da, s. [Named after Nicolas Monard, a physician of Seville, in the sixteenth century.]

Bot.: The typical genus of the menthacous tribe. Monard, an American species, are used for tea. [OSWICO-TEA.] Its flowers are a brilliant scarlet. *Monarda fistulosa*, an American herb with a sweet scent, is a febrifuge; *M. punctata* yields a kind of camphor.

monarda-camphor, s.

Chem.: C₁₀H₁₄O. The camphor or stearoptene of *Monarda punctata*. It forms shining crystals, which melt at 48°, and resolubilize at 78°.

monarda-oil, s.

Chem.: (C₁₀H₁₄)₂O. The essential oil of *Monarda punctata*. It is a yellowish-red liquid, having an odour of thyme, boiling at 224°, and easily acquiring the consistency of resin by oxidation.

mon ar dô æ, s. pl. [Mod. Lat. *monardæ*]; Lat. fem. pl. adj. suff. -*æ*.]

Bot.: A tribe of Labiatae. It is divided into three families: Salvidae, Rosmarinidae, and Homnidae.

mon-ās, s. [Gr. *μονάσις* (*monasís*) = a unit.]

Zool.: A genus of Flagellata, sub-order Pantostomatata. *Monas ballingieri*, 2.5-3.5 inch in length, has one flagellum, flexible at first, and becoming rigid towards the base in old specimens.

mon-as-tēr-ī-ā-l, a. [Lat. *monasterialis*, from *monasterium* = a monastery (q.v.); Ital. *monasteriale*.] Of or pertaining to a monastery.

* **mon as tēr ī al lŷ**, adv. [Eng. *monasterially*.]

* "Many being monasterially accounted." — *Cephairt*; *Boetius*, bk. 1, (Prol.).

mon as tēr-ŷ, s. [Lat. *monasterium*, from Gr. *μοναστήριον* (*monastērion*) = a nunnery, or monastery, from *μοναστής* (*monastēs*) = dwelling alone, from *μονάζειν* (*monazēin*) = to be alone; *μονός* (*monos*) = alone, single; Fr. *monastère*; Ital. *monastero*, *monasterio*; Sp. *monasterio*.]

Comparative Religions:

- 1. *Ethnic*: For details as to the Buddhist and Jain monasteries, see the articles *Buddhist Architecture*, *Jain Architecture*, also *Buddhism* and *Jainism*.
- 2. *Christian*: The ecclesiastical Latin *monasterium* = the home of a religious community of men, was in general use in the Church for several centuries, when it was displaced by *conventus* = a community (of men or women), bound by rule, and practising the commands of perfection. By Roman ecclesiastical writers the word *monastery* is usually restricted to Benedictine houses, and houses of Orders practising some modification of the Benedictine rule; as, a Carthusian *monastery*, a Cis-

tercian *monastery*; but a Flemish or a Dominican convent.

"There is a monastery two miles off, / And there we will abide," — *Shakespeare*, *Merchant of Venice*, iv. 1, 2.

mō nās-tic, a, & s. [Gr. *μοναστικός* (*monastikós*) = living in solitude, from *μοναστικός* (*monastikos*) = dwelling alone; Fr. *monastère*; Low Lat. *monasterium*; Ital. & Sp. *monasterio*.]

* **A.** *Adj.*: Of or pertaining to monasteries, their rules, life, or occupants; pertaining to monks or religious seclusion.

"Where he at Maynard led / A strict *monastic* life, a saint alive and dead," — *Brayton*, *Poly Othello*, v. 24.

* **B.** *As subst.*: A monk, a recluse.

monastic vows, s. pl. The vows imposed under monastic life. They are three in number—poverty, chastity, and obedience.

mō nās-tic al, a. [Eng. *monastic*; -*al*.] The same as **MONASTIC**, *A* (q.v.).

mō nās-tic al lŷ, adv. [Eng. *monastic*; -*ly*.] In a monastic manner; like a monk or recluse; in seclusion.

mō nās-ti-çism, s. [Eng. *monasticism*; -*ism*.] Monachism (q.v.).

mō nās-tic-ōn, s. [Gr. *μοναστήριον* (*monastērion*) = living in solitude.] A book giving an account of monasteries, convents, and other religious houses. As, Dugdale's *Monasticon Anglicanum*.

mōn-a-tōm-ic, a. [Prof. *mon-*, and Eng. *atomic*.] Containing one atom.

monatomic alcohol, s.

Chem.: An alcohol containing only one atom of replaceable hydrogen, in the oxytylic position of the radical.

monatomic element, s.

Chem.: An element containing one monatomic molecule. The monatomic elements are mercury, cadmium, and zinc.

mō nāl, s. [Native name.]

Ornith.: [IMPEYAN-PHEASANT.]

mōn-ax-ōn-ī-āis, s. pl. [Prof. *mon-*; Gr. *ἄξων* (*axōn*), genit. *ἄξωνος* (*axōnos*) = an axis, and Lat. fem. pl. adj. suff. -*āis*.]

Zool.: A sub-order of Silicispongiae, distinguished by the presence of uniaxial, and the absence of tetractinellid and hexactinellid spicules. Schmidt divides the sub-order into five families: Renieridae, Desmaquidae, Suberitidae, Chalmodonidae, and Chalmeae.

mō-nā-zite, s. [Gr. *μόναζω* (*monazō*) = to be solitary; suff. -*ite* (*Min.*)]

Min.: A rare mineral, occurring only in isolated crystals. Crystallization, monoclinic. Hardness, 5 to 5.5; sp. gr. 4.9 to 5.26. Lustre, somewhat resinous; colour, various shades of brown to brownish yellow; transparent to opaque; brittle. Compos.: a phosphate of cerium and Lanthanum; with sometimes thorium and didymium. Occurs in the Hinen Mountains, Orichong, in granite; and at various localities in the United States. Also in some gold washings.

mō nāz-ī-t-ōid, s. [Eng. *monazite*, and Gr. *εἶδος* (*eidos*) = form.]

Min.: A mineral resembling monazite in crystallization and external characters. Hardness, 5; sp. gr. 5.281; colour, brown. Compos. (according to Hermann): phosphoric acid, 17.94; protoxide of cerium, 49.55; protoxide of lanthanum, 21.30; lime, 1.59; water, 1.36; tantalum (?), 6.27; and traces of magnesia and sesquioxide of iron. Found in the Hinen Mountains, Oregon.

* **monche**, v. [MUSCH.]

Mōn-day, * **Mon-en-day**, * **Mone day**, s. [A.S. *monandæg* = the day of the moon, *mōnan*, genit. of *mōna* = the moon, and *dæg* = day.] The second day of the week.

mond, s. [Fr. = world, from Lat. *mondi*.] A globe used as an ensign of royalty; a mound.

* *The beau monde*: [BEAU-MONDE.]

* **mōnc** (1), s. [MOAN.]

* **mōnc** (2), s. [MOAN, s.]

* **mōnc**, v. l. [MOAN, v.]

mō nō-ctān, **mō nō-ctous**, a. [MOON-CYCLE, MONOTHOUS.]

mōn-ēm-bry-ār-ŷ, a. [Gr. *μῆνος* (*mēnos*) = embryo, single, and *ἐμβρυοτικός* (*embryotikos*) = having a single embryo.] Having a single embryo.

mōn-er-ā, s. [MONK-RO.]

mōn-er-al, a. [Mod. Lat. *moneræ*; Eng. adj. suff. -*al*.] Belonging to or having the characteristics of Monk-RO.]

* "To give a kind of general stability to the *Moneræ* organs." — *Prof. J. B. Dana*, in *Clark's Nat. Hist.*, vi. 47.

mōn-ēr-on (pl. **mōn-ēr-ā**), s. [MOON-BIOLOGY & ZOOLOGY.]

1. Any individual of Haeckel's Protista-class Monera. [2.]

"This wonderful *moneræ* lives in the deepest parts of the sea." — *Haeckel*, *Evolution of Man*, p. 67.

2. (Pl.) The first class of Haeckel's sub-kingdom Protista (q.v.). It is divided into three orders, Leobaniera, Rhizomonera, and Taehymonera, and he describes the individuals as "organisms without organs" (*organismen ohne Organ*). The entire body, in its fully-developed condition, consists merely of a small piece of star-shaped plasma or primitive slime (*Urschleim*), not differentiated into protoplasm and nucleus. Movement is effected by means of lobes, filiform, or flagellate pseudopods. Reproduction asexual. Marine and also parasitic. (*E. Haeckel*: *Das Protistenreich*, p. 86.) [PROTOPLASM.]

mōn-ēr-u-lā, s. [Mod. Lat., dimin. of *monerum* (q.v.).]

Biol.: A simple protoplasmic body in which no true nucleus is to be found.

"We shall call this simplest non-molecular stage the *Monerula*." — *Haeckel*, *Evolution of Man*, p. 179.

mō nē-sēs, s. [From Gr. *μόνος* (*monos*) = alone. So named from the solitary flowers and combined petals. (*Hoeber & Arnold*.)]

Bot.: Formerly regarded as a genus of Ericaceae. Sir Joseph Hooker reduces it to a sub-genus of *Pyrola*, thus defined: "Flower solitary, petals slightly adherent at the base, spreading anther cells with tubular tips, stigmatic lobes long, valves of capsule free." *Moneses grandiflora* is now called *Pyrola nana* - *flora*. It is found in Britain in low woods chiefly in the north of Scotland.

mō nē-šī-a, s. [A Spanish American word.] (See the compound.)

monesia bark, s.

Bot.: A kind of astringent bark said to belong to *Chrysophyllum glycyphorum*. It comes from South America.

mōn-ōs-in, s. [Mod. Lat. *monesia*; -*in*.]

Chem.: A compound resembling sapro, extracted from the bark of *Chrysophyllum glycyphorum*.

* **mōn-ēsto**, v. l. [MONISH.] To warn, to admonish.

"Therefore we warn message for Christ as if God were with us, we beseech you, Christ be gloriously and to God - 2 *Gal*, 2 *Corinthians*." — *2 Cor.*

mōn-ē-tar-ŷ, a. [Lat. *moneta* = money (q.v.); Fr. *monétaire*.] Of or pertaining to money; consisting of money.

monetary convention, s. There are two groups of European nations, between whose members an agreement has been entered into for the regulation of their coinage. They are called the "Latin Monetary Convention," and the "Scandinavian Monetary Convention." The former includes France, Belgium, Italy, and Switzerland, the agreement having been made in December, 1865, in virtue of which the coinages of those countries are of the same weight and fineness. Greece subsequently joined the convention, and assimilated her drachma to the franc. Spain, Austria and Hungary, Finland, Roumania, Servia, Bulgaria, and Monaco have also entered into amounts of either or both gold and silver. The money, of weight, fineness, and value, exactly proportionate to, or identical with, that of the countries included in the convention. The "Scandinavian Monetary Convention" dates from 1873, and includes Norway, Sweden, and Denmark.

monetary unit, s. The standard of currency, as, pounds in England, dollars in America, francs in France, &c.

1. Philosophy :

(1) The doctrine of the Unity of Substance; in this respect, it may be considered a form of Pantheism. (Hist. Phil., p. 10, n. 1.)

(2) See extract :

" Scientific materialism, which is pleated with a narrow, attitude in reality to monism than that existing in the world goes on naturally. But every effort has its cause and every cause its effect. If there are no causes, no causal law—that is, the law of a necessary connection between cause and effect—its place is taken by the entire series of phenomena that can be known. At the same time, it positively negates every belief in the miraculous and every conception, in whatever form it appears, of supernatural processes. Accordingly, nowhere in the whole domain of human knowledge does it recognize metaphysics, but throughout only physics; though at the inseparable connection between matter, form, and force becomes self-evident. —Booker : Hist. Criticism, p. 10.

môn ô carp-ôus, môn ô carp ic, u. [Pref. *mono*-, and Gr. *karpos* (*karpos*) = fruit, and Eng. suff. *-ous, -ic*.]

Bot.: Bearing fruit but once, and dying after fecundation. Some are annuals, some biennials, a few, like the *Apricot americana*, live many years before flowering, and then, after blooming once, die. [De Candoille, Lindley, &c.]

môn ô cên tris, s. [Pref. *mono*-, and Gr. *kestris* (*kestris*) = a prickle.]

Ichthyol.: An acanthopterygian genus, family Berycida. Snout obtuse, convex, short; eye of moderate size; villiform teeth on palatine bone, none on vomer. Scales very large, bony, forming a rigid carapace. Ventrals reduced to a single strong spine, and a few rudimentary rays. One species known, *Monocentris japonicus*, from the seas off Japan and the Mauritius. It is not common, nor does it attain any size. [Lacépede.]

môn ô cêph-á loîs, u. [Gr. *μοροκεφαλος* (*monoképhalos*).]

1. *Science*: Having one head, but two distinct, or sometimes blended, bodies.

2. *Bot.*: Having a single head of flowers.

môn ô cêph-á lûs, (pl. môn ô cêph-á li), s. [Gr. *μονος* (*monos*) = single, and *κεφαλή* (*kephalê*) = the head.] A compound monster, having one head and two bodies united more or less intimately.

mô nõc-êr-ôs, mô nõc-êr-ôt, s. [Lat., from Gr. *μονοκερας* (*monokeras*), from *μονος* (*monos*) = single, and *κερας* (*keras*) = a horn.]

1. *Bot., Faun.*: A one-horned creature, a unicorn.

2. *Mechanically*: A one-horned creature, a unicorn.

II. *Technically*:

1. *Archit.*: The Eucorn, one of the corollations introduced by Hevynus. It is surrounded by Hybla, Catus Major, Orion, and Catus Minor. All the stars in it are small.

2. *Zool.*: Eucorn shell, a genus of proto-branchiate gastropods, division Siphiostomatida, family Eucornidae. The genus is peculiar to the west coast of America, whence eighteen species have been brought. The shell resembles that of Purpura (q.v.), but with a spiral suture on the whorls, ending in a prominent spine, or tooth, at the lower or anterior end of the outer lip.

mô nõc-êr-ôt, s. [MONOCEROS.]

môn ô chlà myd-ê-â, s. pl. [Pref. *mono*-, and Lat. *chalybis*, (genit. *chalybis*)] a cloak of mail; and fem. pl. adj. suff. *-icæ*.]

Bot.: The name introduced by Professor Peleb in 1838 for a class of Eryogens having the perianth simple, incomplete, or wanting. Hooker and Arnott adopt the name, making the dicotyledonous or exogenous plants a class and Monochlamydeæ a sub-class.

môn ô chlà myd-ê-ous, u. [Mod. Lat. *monochlamyd(u)*; Eng. suff. *-ous*.]

Bot.: Having but one floral envelope; having a calyx but no corolla.

môn ô chlôr-á cêt ic, u. [Pref. *mono*-, and Eng. *chloricæ*.] Derived from chlorine and acetic acid.

monochloroacetic acid, s.

Chem.: C₂H₃ClO₂ = CH₂ClCOOH. Produced by the action of chlorine on boiling glacial acetic acid in sunlight. It boils at 186°, but solidifies on cooling to a crystalline mass which melts at 64°, and dissolves easily in water.

môn ô chlôr-hỹ-drin, s. [Pref. *mono*-, and Eng. *chlorhydrin*.]

Chem.: C₃H₅(OH)₂Cl = $\begin{cases} \text{CH}_2\text{Cl} \\ | \\ \text{C}_2\text{H}_4\text{OH}, \\ | \\ \text{C}_2\text{H}_5\text{OH} \end{cases}$ Obtained by heating glycerin saturated with hydrochloric acid to 100° for 30 or 50 hours.

It is a thick, sweet, and sharp-tasting liquid; sp. gr. 1.4, and boiling at 230-235°.

môn ô chord, s. [Gr. *μονοχορδον* (*monochordon*), from *μονοχορδος* (*monochordos*) = having only one string; *μορος* (*mosos*) = alone, single, and *χορδή* (*chorde*) = a string, a cord; Fr. *monochorde*.]

Music:

1. An ancient instrument with one string which was played as a guitar. It grew into a monochord, in which numerous strings were played by quills.

2. A single string stretched across a board or sound-board, under a moveable bridge can be moved at pleasure. By placing under the string a diagram of the proportionate lengths of string required for the production of just intervals, the ear can be trained and experiments can be made. It was also called, or rather the results obtained from it were called, the harmonical canon. It is said to have been invented by Pythagoras.

môn ô chôr-í-á, s. [Gr. *μονος* (*monos*) = alone, and *χορος* (*choros*) = a dance.]

môn nôp ô lỹ, *môn ô po lé, s. [Lat. *monopolium*; from Gr. *μονοπωλιον* (*monopoliion*) = the right of monopoly; *μονοπωλια* (*monopoliia*) = monopoly; *μῦνος* (*monos*) = single, and *πωλεω* (*poleo*) = to sell, to traffic; Fr. *monopole*.]

I. Ordinary Language:

1. An exclusive trading right over; the exclusive right or privilege of production, sale, or purchase of any commodity; the sole right or power of selling any commodity; the exclusive right or privilege of trading in any commodity, or with any country; hence from the proper authority to any person or company to make, sell, export, import, buy, or otherwise deal in any commodity or number of commodities. Thus, a patent for an invention gives the patentee the exclusive right of making or dealing in the article patented.

"He thinks he can never trade to his advantage, unless he can have the monopoly of every thing he values." South, *Speeches*, vol. 1, ser. 10.

2. That which is the subject of a monopoly; as, Opium is a government *monopoly* in India.

3. The assuming or claiming right to or possession of anything to the exclusion of others; as, He claims a *monopoly* of the conversation.

II. Law: Some of our early sovereigns assumed to themselves the right of granting to certain favored subjects the *monopoly*, or sole right of selling and dealing in particular commodities. This pretended prerogative was carried to a most injurious length in the reign of Queen Elizabeth, and led to the passing of the Statute of Monopolies, 21 Jac. 1, c. 3; which, while declaring the illegality of such grants of exclusive trading in general, contained an exception in favour of new and original inventions in manufacture; and enacted that the declaration against *monopolies* should not extend to letters-patent and grants of privilege, for the term of fourteen years or under, of the sole working of any manner of new manufactures within the realm, to the true and first inventor thereof, provided such manufactures were not in use by others at the time of granting the letters-patent. Upon this exception, which, to a certain extent, recognizes the royal prerogative, the modern law of patents for inventions in manufactures may be considered to rest.

Mô-noth-ê-lit-ism, s. [Eng. *monothelitism* (v.); -ism.]

Church Hist.: The doctrine of the Monothelites, that Christ had but one will in His two natures.

The Greek emperor Heraclius, having consulted Sergius, patriarch of Constantinople, a Syrian, descended from Monophysite parents, as to how that sect could be reconciled to the Church, the prelate gave it as his opinion that it might be held, without prejudice to the truth or to the authority of the Council of Chalcedon, which had condemned the Monophysites, that, after the union of the two natures in Christ, there was but one will and one operation of will. In 630 Heraclius issued an edict, requiring the acceptance of this tenet, and to a while he secured success; but in 633 Sophronius, a monk of Palestine, opposed Monothelism at the Council of Alexandria, and the following year, being made Patriarch of Jerusalem, he assembled a council and condemned it. Sergius of Constantinople still maintained his old opinion, and in 639 drew up, in the name of the emperor, an *Ecthesis*, or formula of faith. The same year Pope John IV., in a council held at Rome, rejected the *Ecthesis* and condemned the Monothelites. They were again condemned in the sixth Œcumenical Council (Constantinople), 680-681. The Maronites of Lebanon embraced Monothelism, but were reconciled to the Church in 1182.

môn-ô-trêm-a-ta, s. pl. [Pref. môn-, and Gr. *τρήμα* (*tréma*) = a hole, from *τετραίω* (*tetraîô*) = to bore through, to pierce.]

Zool.: An order or sub-class of mammals called by Prof. Huxley Prototheria (q.v.). They have only one aperture for the urinary, genital, and intestinal canals. The nictitating membrane, or third eyelid, well developed as are the mammary glands; there are no nipples. Teeth, if present, consisting of four horny plates. There is an outer clavicular bone, and the coracoid bones are extended to the anterior end of the sternum. In various respects they approach birds. They to a certain extent connect mammals with reptiles. Darwin believes that the earliest mammals in some respects resembled Monotremata. It contains two genera, Ornithorhynchus (Duckmole), and Echidna (Porcine Ant-eater) both Australian forms. (On Tuesday, Sept. 2, 1884, a telegram was received from Sydney, from Prof. Liversidge, by the British Association, then at Montreal, intimating that Mr. Caldwell, the Ballour student sent out to Australia, had discovered the Monotremes to be oviparous. The development of these eggs bore a close resemblance to that of the Reptilia, proving, as Prof. Moseley said, that the Monotremes were more closely connected with the Saurapsida than with the Amphibia. *Brit. Assoc. Rep.*, 1884, p. 775.)

môn-ô-trêm-a-tous, a. [Mod. Lat. *monotrematous* (v); Eng. aff. suff. -ous.] Of or pertaining to the Monotremata (q.v.).

Monroe-doctrine, s.

Hist.: A term applied to the declarations made by the United States during the second presidency of James Monroe (1821-1825). The first had John Quincy Adams for its author; it assumed that every spot of the Old World was covered by the flag of some civilized power, and so would be free from American encroachment, and asserted

"That the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power."

The second declaration related to the apprehended attempt of the Holy Alliance (q.v.) to subjugate the Spanish American States which had revolted. In his annual Message of 1823 President Monroe declared that the United States would consider any

"attempt of the Allied Powers to extend their system to any portion of this hemisphere as dangerous to our peace and safety."

môn-rô-lite, s. [From Monroe, New York, and Gr. *λίθος* (*lithos*) = a stone.]

môn soôn, **mon son**, **mon-zoon**, s. [Ital. *monsone*, from Malay *musim* = a season, a monsoon, from Arab. *mawsim* = a time, a season; Fr. *monsoon*, *monçon*, *monsson*; Port. *monção*; Sp. *monzon*.]

- I. Ordinary Language:**
1. In the same sense as II. 1, 2.
 2. A breed of race-horses, descended from a horse so named.

II. Meteorology:

1. (Pl.): A modification of the trade winds, operative from the Tropic of Cancer to Lat. 7° S., and from the coast of Africa through the Indian Ocean and the Bay of Bengal to Japan and the Western Pacific. There are two monsoons, the South-western and the North-eastern. The latter prevails from October to April, and the former from April to October. The bursting of the monsoon comes the rainy season in India, the south-western bringing that of Bombay and Central India, and the north-eastern that of Madras and other parts of the east coast. [RAINY-SEASON.] The monsoons are caused by the unequal heating of the land and water and of the several land masses themselves in the regions which they affect. Independently of their great use in bringing rain to countries which otherwise would degenerate into deserts, they are useful for navigation. As in the case of the trade winds, navigators can so plan their voyages as to take advantage of the monsoons, though powerful steamships can now achieve the feat of running in the teeth of the monsoon, but not without some discomfort to those on board.

2. Any similar wind blowing half the year in one direction and half in the other.

môn-stêr, **mon-stre**, s. & v. [Fr. *monstre*, from Lat. *monstrum* = a divine omen, a monster, from *moneri* = to warn, to admonish; Sp. *monstra*, *monstrar*; Port. *mostrar*; Ital. *mostrare*.]

môn-strôs-i-tÿ, **môn-strôç-i-tÿ**, s. [MONSTROSITY.]

- I. Ordinary Language:**
1. The quality or state of being monstrous or out of the ordinary or common course of nature.
"We desire no records of such enormities; sins should be accounted new, that so they may be esteemed monstrous. They omit of *monstrously* as they fall from their rarity; for men count it venial to err with their forefathers, and foolishly conceive they divide a sin in its society."—*Brown: Volupté Errors*, bk. vi, ch. XIX.
 2. That which is monstrous; a monster; a monstrous or unnatural production.
"We shall tolerate flying horses, black swans, hydras, centaurs, harpies, and satyrs; for these are *monstrous rarities*, or else perfect fancies."—*Brown: Volupté Errors*, bk. v, ch. XIX.

II. Animal & Vêpl. Physiol.: A character appearing in an individual animal or plant, which is very rare in the species to which it belongs. It is abnormal in the sense of being exceptional, but not in the sense of being produced as a mere sport of nature independent of law. "By a monstrosity," says Mr. Darwin, "I presume is meant some considerable deviation of structure, generally injurious or not useful to the species." (*Orig. of Spec.*, vol. 6th, p. 33.) They arise in man, in the inferior animals, and in plants. Biocery, hermaphroditism, albinism, the possession of an unusual number of fingers or toes, more than two, two heads, or no head at all, physical union by flesh, cartilage, or bone to any other individual, &c., are cases of human monstrosity. Monstrosities which graduate into slight variations are so similar in man and the lower animals, that the same classifications and the same terms, as has been shown by Isidore Geoffroy St. Hilaire, can be used for both. (*Queria: Dissert. of Man*, p. 20.) Among some of the many monstrisities of the lower animals may be mentioned that discoidal shells occasionally become spiral, and fossil porcupines from the Newgate Crag are often distorted. (S. P. *Woodward: Med. Insect* (ed. 1875), p. 37.) All cases of monstrisity are to be accounted for by law. In most cases they are caused by an act of de-

velopment, in some by reversion to the character of a remote ancestor, in others by hypertrophy of a particular part.

mon strous, **môn stru ôus**, a. & v. *old* [O. Fr. *monstrous*, from Lat. *monstrum*, *monstrum*, from *monstrum* = a monster (q.v.). Sp. & Port. *monstruoso*; Ital. *monstruoso*, *monstruoso*.]

Môn-tan-ism, s. (See def.)
Church Hist.: The religious system of Montanus, an inhabitant of a Phrygian village, called Pepusa, who, about 171 A.D., proclaimed himself the Episcopo of Ephesus, and promised by Jesus (PARVULI), and pro-

to utter prophecies. Amongst others he was supported by two ladies, Pisca, or Priscilla, and Maximilla, who also claimed the gift of prophecy. He multiplied fasts, forbade second marriages, did not permit churches to give absolution to those who had fallen into great sin, forbade all female ornaments, required virgins to be veiled, and would not sanction flight in persecution. He was ultimately expelled from the church. Tertullian, in the year 204, joined the Montanists, but did not forfeit the respect of the church catholic, as the Montanists held the fundamental doctrine of Christianity, and differed from others more in their rigid practice than in their faith, Jerome wrote against the Montanists, who continued till about the sixth century.

Môn tạn ist, *s.* [MONTANISM.]

1. *Astronomy*:
(1) Properly the time in which the moon makes one complete revolution round the earth, or appears to return to precisely the same point in the heavens from which it started. This may be from change to change, from full moon to full moon, or in an indefinite number of other ways. The time of the revolution now described is properly 29 days, 12 hours, 44 minutes, and 3 seconds. Twelve periods, called lunar months, fall short of a year by about 11 days. Lunar months were used by the ancient Jews, as they still are by their modern successors and by the Muhammedans.
(2) A solar month; the period required for the passage of the sun through one of the signs of the zodiac. Twelve of these periods constitute a year.
2. *Calendar*: Any one of the calendar months, called also usual, natural, civil, or political, though the last is by far the most common term. As an aid to memory with respect to the number of days in each month, the following rhyme rhymes have been employed at least from A. D. 1606.

"Thirty days hath September,
April, June, and November;
All the rest have thirty one,
But February, twenty eight alone,
Except in leap year, once in four,
When February has one day more."
3. *Law*: Formerly, the word month in a statute meant a lunar month, but by 13 Viet., c. 21 it was made to signify calendar month, unless otherwise expressly designated. It does so also in ecclesiastical law, but by common law and equity it is 28 days.

1. *Comm.*: A calendar month, except in contracts for stock in which it is lunar. [TWELVEMONTH.]
2. (1) *Anomalistic month*:
Astron., &c.: The time taken by the moon in passing from one perigee to the next, viz., 27 days, 13 hours, 18 minutes, and 37.4 seconds.
(2) *Nodal month*:
Astron., &c.: The time taken by the moon in revolving from one node to the same node again, viz., 27 days, 5 hours, 5 minutes, and 36 seconds.
(3) *Synodal month*: (See extract).
"Among the other experiments that had been suggested in this convention by Chartist Delegates held in London in August, 1848, was that of observing what was called a *synodal month*, during which the working classes throughout the whole kingdom were to abstain from every kind of labour, in the hope of compelling the governing classes to concede the Charter."—*Noblesworth Hist. Eng.*, ii. 281.

(4) *Sideral month*:
Astron., &c.: The time taken by the moon in passing from one star to the same star again, viz., 27 days, 7 hours, 43 minutes, 11.5 seconds.
(5) *Synodical, or prosper lunar month*: [MONT, 1.]

(6) *Tropical or periodic month*:
Astron., &c.: The time taken by the moon in passing from any point of the ecliptic to the same point again, viz., 27 days, 7 hours, 43 minutes, 47 seconds.

moon, * moõc, * moõno, s. [A.S. moond; cogn. with Dan. måne, Sw. måne; Dut. maan; D. H. Ger. maan; Ger. moõn; Goth. man; Gr. agyō (civō).] [MONTE.]

1. A Moon. : The single satellite-attendant of the earth. Its diameter is 2,160 miles, that of the earth (which is 7,928 miles) being nearly four times as great. Its superficial extent is about a thirteenth part of the earth's surface; its bulk is 1/81 that of the earth, but as the earth is relatively heavier, its weight is about eighty times that of the moon. As the moon revolves round the earth it manifests phases. After absence for a few nights it reappears as a delicate crescent of white light in the western sky after sunset. Night after night it moves farther to the east, the illuminated portion of its disc continually increasing till the moon becomes full and rises about sunset. When the light of the moon has again so diminished that it is in its last quarter, it is seen high in the heavens in the morning. When it becomes full, the sun and the earth are so nearly in a straight line that the moon narrowly escapes being eclipsed; when new moon is again reached, the sun is nearly undergoing similar obscuration. [ECLIPSE.] The moon shines only by the light of the sun reflected from its surface. To equal the brilliancy of the sun 600,000 full moons would be required. The moon appears at all times nearly of the same size, showing that its orbit cannot be far from circular. Its average distance is 240,000 miles, varying at times between 220,000 and 260,000, but the ordinary fluctuations do not exceed 40,000 miles on either side of the mean value. The moon performs a complete revolution around the earth in 27 days, 7 hrs., 43 min., and 11.461 secs. This is called its sidereal period. The lunar month is longer than the sidereal period by 2 days, 5 hrs., 51.41 secs., because of the advance of the earth in the orbit between two successive conjunctions of the moon. As the moon revolves on its own axis nearly in the same time as it completes its orbit round the earth, it presents to us at all times nearly the same side of its surface. No clouds appear on it; apparently there is no water to send them forth into an atmosphere in which they may float. The whole surface is studded with volcanoes, apparently extinct. Their craters are broad, beyond anything existing on the earth. Tycho is 50 miles across, so is Aristotle, Theophrastus is 64, and Ptolemy 78. Some are 16,000 or 17,000 feet deep. From the absence of an atmosphere the moon must be unhabitable by any life analogous to that with which we are acquainted.

2. A satellite of any planet.
"Jupiter is attended by four moons or satellites," — Br. coner : Moon Worlds, ch. ii.
* 3. A month; the period of a revolution of the moon round the earth.
"Thirteen moõns see smoothly rim
The Neva's large laden wave"
Chaucer : Bill of Mercuriale, 157.

4. Anything resembling the moon in shape; a crescent; speck, in fortification, a crescent-shaped outwork; a half moon.

* (1) A blue-moon : An expression equivalent to the Greek kalends, never.

* (2) Beyond the moon; beyond reach; extravagantly; out of depth.

"Now in the tents of grace of the meek *Moravian* Hussites." -Longfellow, *Evangeline*, ii. 4.

B. As substantive: 1. *vul. Long.*: A native of Moravia.
2. *Ecclesiast. & Church Hist. (PL)*: A religious sect, called at first Bohemians, and constituting a branch of the Hussites, who, when the Catholics came to terms with the Council of Basle, in 1433, refused to subscribe the articles of agreement, and constituted themselves into a distinct body. Their tenets were evangelical. In 1522 they made advances to Luther, who partially recognized them, but they ultimately adopted Calvinistic views as to the Lord's Supper. Their discipline was very strict. They supervised the conduct of their members in their private or secular affairs, as well as in their ecclesiastical relations. They refused to bear arms. Driven by persecution, they scattered abroad, and for a time their chief settlement was at Fulnek in Moravia, whence they were called Moravian Brethren, or Moravians. On May 26, 1709, was born Nicolaus Ludwig, Count von Zinzendorf, son of the chamberlain and state minister of Augustus II., Elector of Saxony and King of Poland. From early life the son was devoted to religion, his piety being of the mystic type. Having met with a Moravian refugee, who told him of the persecutions to which his sect was exposed in Austria, Count Zinzendorf offered him and his co-religionists an asylum in his estate. The man, whose name was David, accepted the offer, and in 1722 settled, with three other men, at a place called by Zinzendorf Herrnhut (= the Lord's guard). Under his fostering care, the sect greatly increased in strength, and were often called, from their place of settlement, Herrnhutters. Till his death, on May 9, 1760, he travelled, largely spreading their views. Small Moravian churches arose on the Continent, in England, in Ireland, and in America. Though they have never been numerous, yet in the latter part of the eighteenth century and the beginning of this, they acquired great reputation from having a larger proportion of their membership engaged in foreign missions than any Christian denomination since apostolic times. Cowper, Dr. Chalmers and others wrote of them with high admiration. Called also the United Brethren.

mō-rā-vi-ān-ism, s. [Eng. *Moravian*; -ism.] The tenets or practice of the Moravian Brethren.

mōr-bid, a. [Fr. *moribide*, from Lat. *morbo* = sickly, from *morbosus* = disease; Ital. & Sp. *morbido*.] 1. Diseased; not healthy, not sound; sickly, unhealthily.

mör-i bünd, a. & s. [Lat. moribundus, from morior = to die.]

A. As adj.: In a dying state; doomed to a very speedy death or dissolution.

B. As subst.: One who is apparently doomed to a very speedy death; one in a dying condition.

mör ic, a. [Lat. mor(us) (q.v.); Eng. suff. -ic.] Contained in or derived from Morus tinctoria.

moric-acid, s. Chem.: C₁₃H₁₁O₄H₂O. An acid found in the aqueous extract of old fustic, Morus tinctoria. It crystallizes in needles mostly grouped in tufts, slightly soluble in water, but very soluble in alcohol and ether, the solutions having a deep yellow colour. The barium salt, Ba(C₁₃H₁₁O₄)₂·BaO·2C₁₃H₁₁O₄H₂O, is a reddish-brown powder, produced by boiling moric acid with recently precipitated baric carbonate. Morate of calcium exists readily formed in fustic. It is deposited from its alcoholic solution in yellowish crystals, which lose their water at 100°.

mör-ice, s. [MORRIS.]

mör rig-er äte, a. [Lat. morigeratus, part. pass. of morigerare = to comply; mos (genit. moris) = the temper, disposition, and gerere = to manage; Ital. morigerare; Sp. morigerar.] Compliant, obedient.

"From the armies that went fro Rome, were as well disciplined and subordinate, as the schools of the philosophers, that were in Greece."—Gualtero's, let. 2.

mör rig-er ä tion, a. [MORRIGERATE.] Compliance, obedience.

"Not that I can tax or condemn the mörriegeration or application of learned men to men of fortune."—Bacon: Of Learning, bk. 1.

mör rig-er öus, a. [Lat. morigerus, from mos (genit. moris) = temper, manners, and gerere = to manage.] Obedient, obsequious.

mör il, s. [MORILL, (2).]

mör il-li form, a. [Fr. morille = a mushroom, and Lat. forma = form, shape.] Having the form or shape of a moril; resembling a moril.

Mör-in, s. [General Arthur Jules, Director of the Conservatoire Imperial des Arts et Metiers of Paris.] (See compound and etym.)

Morin's apparatus, Morin's machine, s.

Mech.: An apparatus or a machine to demonstrate experimentally the laws of falling bodies. A descending weight causes a cylinder to revolve around its axis with a velocity proportioned to that of the descending weight. A pencil attached to the cylinder records the result, showing that a falling body descends with velocity proportioned to the squares of the time.

mör-rin'-da, s. [Altered from Lat. Morus indica = Indian mulberry, because of its country and the shape of its fruit.]

Bot.: A genus of Umbriferae, family Guttiferæ. The bark of Morinda toona is a febrifuge. M. citrifolia is sometimes called the Indian mulberry; it is wild or cultivated in India and Ceylon. The typical variety, supposed to be wild in Malacca, furnishes various dyes, from reddish yellow to dark brown; the variety M. elliptica yields a scarlet dye, and M. gaudichaudii a good yellow. M. tinctoria is also a dye plant, and the green fruits are eaten by the Hindus in their curries.

mör rin din, s. [Mod. Lat., &c. morind(a); Eng. suff. -in (Chem.).]

Chem.: C₂₂H₁₆O₈. A yellow colouring matter, extracted from the root of Morinda citrifolia by boiling alcohol. It forms crystals having a fine yellow colour and satin lustre, very soluble in boiling alcohol and water, but insoluble in ether. It is used in the East Indies as a dyeing material. When boiled with dilute sulphuric acid, morindin is converted into an impure alizarin.

mör rin dônc, s. [Eng., &c. morind(in); suff. -on.]

Chem.: A name given by Anderson to the yellowish-red crystals formed when morindin is heated in a glass vessel. These crystals are now proved to be alizarin.

mör inc, s. [Lat. mor(in)s; Eng. suff. -in.]

Chem.: C₁₄H₁₀O₆. A crystalline body obtained from the boiling aqueous extract of fustic. It forms yellow needle-shaped crystals, difficultly soluble in cold water, but very soluble in alcohol and ammonia. Sulfuric amalgam converts it into piculogenin.

mör i nêl, s. [Gr. μωρος (mōros) = stupid, foolish.] The doctored, Chamantrius muriculus, from its supposed stupidity.

mör rin'-ga, s. [From marlaga, the Malabar name of the plant.]

Bot.: The typical genus of the order Moringaceæ (q.v.). The fruits are long, whip-like beans. The root of Moringa pterygosperma tastes like horse-radish, and has a pungent odour. The leaves, flowers, and young seed-vessels are eaten by the natives of India in their curries. The seeds are the Ben nuts which furnish the Oil of Ben (q.v.). The plant is used by the Hindus as a stimulant and as a rubefacient. It is used by Indian calico-printers. The bark yields a coarse fibre from which mats, paper, or cordage may be prepared. M. indica, a native of India, long naturalised in the West Indies, also yields ben-oil. The unripe fruits of M. carolinensis are eaten by the natives of India in their curries.

mör rin-gä-çë æ, s. pl [Mod. Lat. morind(a), Lat. fem. pl. adj. suff. -æra.]

Bot.: Moringads; an order of Hypogynous Exogens, alliance Violales. It consists of trees with doubly or triply pinnate leaves, the leaflets of which easily drop off. The stipules are thin, deciduous and curled. The flowers, which are white, are irregular, in loose panicles. Sepals five, petaloid, the petals five, unequal, the uppermost ascending. Stamens eight or ten, arising from the top of a fleshy disc inside the calyx, four sometimes sterile; ovary stalked, superior, one-celled, with three parietal placentae, ultimately becoming a pod-like capsule with many seeds; sometimes winged, buried in the fungous substance of the valves. Found in the East Indies and Arabia. One known genus with four species.

mör rin-gäd, s. [Mod. Lat. morind(a); Eng. suff. -ad.]

Bot. (U): The name given by Lindley to the order Moringaceæ (q.v.).

mör rin-gic, a. [Mod. Lat., &c. morind(a); Eng. suff. -ic.] (See the compound.)

moringic acid, s.

Chem.: C₁₂H₁₆O₄. A colourless oily acid, homologous with oleic acid, obtained by the saponification of the oil of ben. It has a mawkish taste, a faint colour, and a density of 908. It is very soluble in alcohol, soluble at 0°, and is decomposed by heating with sulphuric acid. [MORINGA.]

mör rin gu a, s. [Etyim. doubtful; Latinised from native name (2).]

Ichthy.: A genus of Muræide (q.v.).

Body cylindrical and scaleless; trunk much longer than tail. Pectorals none, or small, vertical fins little developed, limited to tail, Gill-openings narrow, inferior. Six species, from fresh water, brackish water, and the coasts of India to Eur. (Günther.)

mör in tän-nic, a. [Lat. mor(e)-; suff. -n, and Eng. -tan (2).] Derived from Moris tuberosus. [U-110.]

mörintannic acid, s. Chem.: C₁₄H₁₀O₆. One of the constituents of old fustic, Morinda citrifolia, extracted from it by boiling water. It crystallizes in light yellow microscopic prisms, slightly soluble in cold water, very soluble in boiling water, in alcohol, and in ether, but insoluble in oil of turpentine. It melts at 290°, and undergoes complete decomposition at 250°, yielding carbonic anhydride, phenol, and pyrocatechol. Its ethereal solution is greenish by reflection, and brown by transmitted light.

mör i ön (1), s. [From a supposed Latin moricon (a misreading of moricorion), in Phny (H. N., xxxvii. 10, 63).]

Moa. : The same as SMOKY-GRAVETZ (q.v.).

mör i ön (2), mör-ian, mür ri ön, [Fr., from Sp. moricón, from morra = the crown of the head, morra = a hillcock; Ital. morione; Port. morião.] A kind of helmet of steel head-piece, shaped like a hat, and having no beaver or visor. It was introduced into England about the beginning of the sixteenth century. It is often surmounted with a crest or comb.

"With antique pike, and morion,

1. *Old Lang.*: A bugbear.

"To have liv'd our constancy, courage, conscience and all, in Indian sacrifice to a spirit or *mormo*."—*Hemans*: *Works*, vol. IV, p. 57.

2. *Entom.*: A genus of Moths, tribe Noctuidæ. *Mormo mormo* is a dark gray moth with blackish bands, which often flies into houses on summer evenings.

mor mël y-cë, *s.* [Gr. *μορμολύκειος* (*mormolukios*) = a bugbear, a hobgoblin.]

Entom.: A genus of Carabide (q.v.), from the Malayan peninsula and the adjacent islands, with three, or perhaps four, species. The best known is *Mormolucæ phyllodes*, which has the side borders of the wing-cases greatly expanded and abnormally prolonged in a curve. It probably preys on larvæ and pupæ of insects infesting the boleti with which damp bark is generally covered.

mor môn (1), *s.* [Mormo.]

Ornith.: A genus of Alcidæ, sub-family Alcinae. The bill is short and very high, the culmen strongly arched, the lip hooked, the wings and tail very short, the former fitted for flight. *Mormon fuscicollis* is the Common Puffin.

Mor-môn (2), *s.* [Named from a mythic personage, Mormon, who, according to Joseph Smith, led a Jewish immigration into America in early times.]

Ecclesiast., *Church & Civil Hist.* (Pl.):

The popular name for the members of a religious body calling themselves "The Church of Jesus Christ, of Latter-day Saints," or more briefly, the Latter-day Saints. Their founder was Joseph Smith, a farmer's son, born in Sharon, Windsor County, Vermont, Dec. 25, 1805. He asserted that on Sept. 21, 1820, as he was praying, a supernatural light shone in his room, and an angel appearing made revelations to him, and next day gave him certain engraved plates, with an instrument called the Urim and Thummim (cf. Exod. xxviii. 30; Lev. xiii. 8), by the aid of which he translated them, publishing the result in 1830 as the Book of Mormon. On this, the Rev. Mr. Spalding, a Presbyterian preacher, declared that, having some time before written a work of fiction which no publisher could be induced to print, his rejected "copy" had been lost or stolen, and had reappeared as the angelically revealed Book of Mormon. To silence Spalding, both the faithful and the unbelievers clamoured for a sight of the plates. After eight of the former had obtained a look at them, Smith asserted that he had handed them over to the custody of an angel, and they were seen no more. On April 6, 1830, the first Mormon church was founded in the town of Manchester, in Ontario County, New York State. Others followed in quick succession. Persecution driving the Mormons from place to place, in 1839 they commenced to build a city. This was called Nauvoo, and was adorned with a fine temple. On June 24, 1844, Smith was arrested and imprisoned in Carthage State jail on a charge of treason and sedition; and on the 27th, he and his brother Hyrum were shot dead by a brutal mob which broke into the jail. Brigham Young was appointed to succeed him as prophet and revelator. In 1847 he removed with many Mormons to a secluded valley called that of the Salt Lake, then Mexican Territory, but afterwards ceded to the United States. The industry of the Mormons soon made it like a garden; but when it was found to be exactly on the route to the Californian gold-diggings it ceased to be secluded. On Oct. 17, 1874, Brigham Young was convicted by the United States' Divorce Court of polygamy and imprisoned. In 1890 President Woodruff and a conference of elders renounced polygamy, and in 1891 Mr. Joseph Smith, son of the founder of Mormonism, headed the party opposed to polygamy, and its suppression was generally adopted in 1894.

Mor-môn ism, *s.* [Eng. *Mormon*; -ism.]

Eccles., *Church Hist.*: The tenets or practice of the Mormons (q.v.). They believe in the Bible and the Book of Mormon. They hold the doctrine of the Trinity, the atonement, baptism by immersion, the Second Advent, and the restoration of Israel; they deny original sin. They recognise Joseph Smith and his successors as prophets and revelators, and claim for some of their number marvellous gifts.

Mor-môn ite, *s.* [Eng. *Mormon*; -ite.] A Mormon (q.v.).

mor-mô pës, *s. pl.* [MORMORS.]

Zool.: A group of Emballonurine Bats, family Phyllostomidae (q.v.). It was erected by Peters, and is co-extensive with Dobson's sub-family *Lobostomina*.

MORMOPS.

mor-möps, *s.* [Gr. *μορμω* (*mormô*) = a bugbear, and *ὄψ* (*ops*) = the face, the countenance.] [MORMO.]

Zool.: The typical genus of the group *Mormops* (q.v.), from South America and the West Indies. It is most grotesque in appearance, and was never rivalled by the most ingenious inventor of pantomime masks. There are two species; the best known is *Mormops Blainvillæ* (Blainville's Bat). Nothing is recorded as to its habits, but it is probably nocturnal.

mor-mÿr-ÿ-dæ, *s. pl.* [Mod. Lat. *mormyrus* (ns); Lat. fem. pl. adj. suff. -idæ.]

Ichthy.: A family of physostomous fishes characteristic of the freshwater fauna of tropical Africa. Body and tail scaly, head scaleless; no barbels. No adipose fin or pseudobranchie; gill-openings reduced to a small slit. Two genera, *Mormyrus* and *Gymnarchus*.

mor-mÿr-ÿs, *s.* [Gr. *μορμύρος* (*mormyros*) = a kind of sea-fish mentioned by Aristotle.]

Ichthy.: The typical genus of the family *Mormyridæ* (q.v.). There are two sub-genera, *Mormyrops* and *Hyperopisus*; and fifty-one species are known of which eleven occur in the Nile. Some attain a length of from three or four feet; others remain small. The flesh is said to be excellent eating. *Mormyrops bay-chinchus* was venerated by the ancient Egyptians (*Jarvis*, xv. 7), and frequently occurs in emblematic inscriptions. On each side the tail in this genus there is an oblong capsule, with numerous compartments, and containing a gelatinous substance. It has no eletic functions, but evidently represents a transitional condition from muscular substance to an electric organ. The extent of the dorsal and anal fins varies greatly; in some species the snout is short and obtuse, in others long and decurved, with or without appendage.

morn (1), ***morne** (1), *s.* [A contract of Mid. Eng. *morceen* = morning, from A.S. *morgæn*.] The first or early part of the day; the morning. (It is only used in poetry.) [MORNING.]

***morne** (2), *s.* [Fr. *morne* = dull, because a lance so treated has a dull appearance as compared with one bright and sharpened for actual service.] The head of a tilting-lance, having its point rebated or turned back, so as not to cause injury to the opponent.

morne, mor-ine, *a.* [MORNE (2).]

Her.: A term applied to a lion rampant when depicted on coat-armour with no tongue, teeth, or claws.

morn-ing, ***morn-ÿng**, ***mor-wen-ing**, *s. & a.* [A contract of Mid. Eng. *mornwening* = morning, from A.S. *morgæn* = morning; cogn. with Dut. *morgæn*; Eccl. *morgæn*, *morgæn*; Dan. *morgæn*; Sw. *morgæn*; Ger. *morgæn*; Goth. *morgains*. "Morgæn" means properly a dawning or a becoming morn; formed with the substantival (not participial) suffix -ing (A.S. -and), from Mid. Eng. *mornwæn*; A.S. *morgæn*.] (*Skelt.*)

A. *As substantive*:

1. *Lit.*: The first part of the day, beginning at twelve o'clock at night and extending to twelve noon. Thus we speak of one, two, three, &c., o'clock in the morning. In a more limited sense, morning is used for the time extending from sunrise to breakfast, and amongst people of fashion and business men for the whole time to the hour of dining. The dawn; the morn.

"The *morn*, we know, is commonly said to be a friend to the Muses."—*South: Sermons*, vol. IV, ser. 5.

II. *Figuratively*:

1. The early part; the first part: as, the morning of life.

2. A morning dram or draught. (*Scott.*)

B. *As adj.*: Of or pertaining to the morning or the early part of the day; as, morning dew, morning service, &c.

***morning gift**, *s.* A translation of the Ger. *Morgengabe* = the gift given by a husband to his wife on the morning after the marriage-day.

morning glory, *s.*

Bot.: Various species of Ipomœa and Pharbitis, convolvulaceous genera.

morning gown, *s.* A gown worn in the morning.

"Seeing a great many in rich morning-gowns, he was amazed to find that persons of quality were up so early."—*Addison*.

***morning land**, *s.* The East, as the point where the sun rises. (Cf. Ger. *morgens-land*.)

"Where through the sands of morning-land The eagle bears his space."—*Alcock: Prophecy of Cypri*, xxxi.

morning-star, *s.*

1. *Astron.*: The planet Venus when it is visible in the morning.

"The morning star that guides The stargazer."—*Milton: P. L.*, v.

2. *Old Arm.*: A weapon used in ancient times, and as late as by the train-bands of London in the time of Henry VIII. It consists of a ball with spikes, mounted by a chain to a staff. Called also Holy-water Sprinkler.

***Morning Star** of the *Belorodion*: John Wycliffe (A.D. 1324 (? to 1384).

***morning stead**, ***mornung sted**, *s.* Morning. (*Sylvester: Morden's Blush*, 1,176.)

morning tide, *s.*

1. *Lit.*: Morning-time; the morning; the early part of the day.

2. *Fig.*: The morning; the early or first part.

morn ite, mourn-itë (u silent), *s.* [Named after Mornic or Mourne, co. Antrim; suff. -itë (Mitt.).]

Min.: The same as LABRADORITE (q.v.).

morn lÿ, *adv.* [Eng. *morn*; -ly.] In the morning. (*Sylvester: Babylon*, 327.)

mör-ö, *s.* [Lat. *morus* = a mulberry.]

Med.: A small abscess resembling a mulberry.

Mö roc can, *a.* [Eng. *Morocco* (o); -an.] Of or pertaining to Morocco or its inhabitants.

mö roc cö, *s.* [Named from Morocco in North Africa, whether the Somæns, on their expulsion from Spain, carried with them their art of preparing leather; Fr. *moroguin*.] A fancy leather tanned with smnack and dyed. Used for bookbinding, ladies' shoes, upholstering furniture, cushions, &c. True morocco leather is prepared from goat-skins, but sheep-skins are extensively used in the preparation of an inferior quality. The coast of Barbary yet yields a large supply of goat-skins for the manufacturers of France and England. For some centuries the principal supply was from the Levant, which still yields a large quantity of goat-skins and morocco leather.

mör ö lög ie al lÿ, *adv.* [As if from an Eng. *morological*, with suff. -ly.] In the way of morology.

"Morologically speaking, the production's no richer or siller."—*Lord Strongford: Letters & Papers*, p. 14.

***mö röi-ö-ÿy**, *s.* [Gr. *μορολογία* (*mōrologia*), from *μωρος* (*mōros*) = foolish, and *λογος* (*logos*) = speech.] Foolish talk; folly, nonsense.

mö rone, *s. & a.* [Lat. *morus* = a mulberry.]

A. *As subst.*: The colour of the ripe mulberry; a deep crimson colour.

B. *As adj.*: Of a deep crimson colour.

mor-ön-ö-bë-a, *s.* [From *moronoba*, the native name.]

Bot.: The typical genus of the tribe Moronebœe (q.v.). *Moronoba coccinea* is said by some to furnish Hog gum (q.v.).

mor-ön-ö-bë-æ, *s. pl.* [Mod. Lat. *muronobœæ* (en); Lat. fem. pl. adj. suff. -æc.]

Bot.: A tribe of Clusiaceæ.

fäte, fät, fare, ameldst, what, fall, father: wë, wët, here, camel, hër, there; pine, pit, sire, sir, marine; gö, nö't, or, wöre, wolf, work, whö, sön: müte, eüb, cüre, unite, eür, rüle, füll; trÿ, Sÿrian. æ, œ = ë: ey = ä: qu = kw.

mör-ô nô-lîte, s. [Gr. μάρον (máron) = the mulberry, and λίθος (lithos) = a stone.]

Min.: A variety of the mineral species Jaspéite (q.v.), occurring in concretionary or mulberry-like forms, and containing somewhat less alkali. Found at Monroe, Orange Co., New York.

mör-ô pôd ì dæ, s. pl. [Mod. Lat. moropus, genit. moropod(is); Lat. fem. pl. adj. suil. -ant.]

Palæont.: A family of Eboritata, found in the Miocene of the North American Pacific coast.

mör-ô pûs, s. [Gr. μωρός (mōros) = dull, sluggish, and πούς (pous) = a foot.]

Palæont.: The typical genus of the family Moropodidae (q.v.), with two species.

mör-ô sâu-rûs, s. [Gr. μωρός (mōros) = dull, sluggish, and σαύρος (sauros), σαύρα (saúra) = a lizard.]

Palæont.: A genus of Peirosauria, sub-order Sauripoda. Found in the Jurassic rocks of North America.

mô rose, n. [Lat. morosus = self-willed, obstinate, peevish, from mos (genit. moris) = habit, manner, self-will, moroseness; Fr. morose; Ital. & Sp. moroso.]

1. Peevish, sullen, austere; sour in temper; surly, ill-humoured.

"The forage-land cattle . . . will not fail to proclaim him a morose, ill-conditioned, ill-tempered lion."—Smith. Sc. Trans., vol. VI, ser. 3.

2. Characterized by peevishness or sullenness.

"His learning produced not a morose self-complacency, but a lovely affability."—Boswell. Works, vol. IV, disc. 26.

3. Morbidly brooding over and indulging in evil, and especially in impure thoughts.

morose delectation, s.

Manit. Theol.: A term used by Roman theologians to denote pleasure taken in the remembrance of sins committed against purity.

mô rōsc-ly, adv. [Eng. morose; ly.] In a morose manner; sullenly, gruffly, peevishly.

"Too many are as morosely positive in their age."—Government of the Tongue.

mô rōse nēss, s. [Eng. morose; -ness.] The quality of state of being morose; peevishness, sullenness.

"Many . . . have . . . chosen retirement, not out of any moroseness of temper or misanthropy."—Boswell. Works; On St. John the Baptist, vol. VI.

mô rō sis, s. [Gr. μωρός (mōros) = foolish.]

Med.: Foolishness, folly, fatuity, idiocy.

* mô rōs-î tÿ, s. [Fr. morosité, from Lat. morositas.] Moroseness, peevishness, sullenness.

"With silent morosity he hands her into her victuals."—Roheti Broughton. Second Thoughts, pt. II, ch. vii.

* mô rô sôph, s. [Gr. μωρός (mōros) = foolish, and σοφός (sophos) = wise, cf. Sophomore.] A learned or philosophical fool.

* mô rô sôus, a. [Lat. morosus = morose (q.v.).] Morose, peevish, sullen.

"Daily experience either of often humors, or morosous desires."—Selden. Mercurus of Autochast (1646), p. 20.

* morowe, * morwe, s. [Morrow.]

* morowc - tide, * morwe - tide, s. Morning, morrow.

"Whanne the morowetide was come, alle the priens and prestis and the chere men of the purple tokou counsail ofgenis drestis."—W. Wicliffe. Matthew. xxxv.

mô rōx îtc, s. [Lat. moronites = a precious stone of the colour of a leek. (Pliny; H. N., xxxvii, 19, 66.)]

Min.: A name given by Abildgaard to a green Apatite (q.v.), from Arendal, Norway.

mör-ôx yl ic, n. [Lat. & c. mox(us); Eng. atlatl, and suil. -ic.] Contained in or derived from the mulberry-tree.

moroxylie acid, s.

Chem.: A volatile crystalline acid, said by Klapproth to exist as a calcium salt in the stems of the mulberry tree (Morus alba). Landerer found the same calcium salt in the gum which exudes from mulberry stems.

mör-phē-an, n. [See def.] Of or pertaining to Morpheus, the god of sleep.

* mör-phē-ic, a. [MORPHĒUS.] Pertaining to sleep, sleepy. (Miss Buryng; Cœcilia, bk. II, ch. IV.)

mör-phē-tinc, s. [MORPHĒA.]

Chem.: A body produced by boiling morphine with dilute sulphuric acid and peroxide of lead. It is a brown, amorphous, slightly bitter substance, and is soluble in water, but sparingly soluble in alcohol.

Mör-phē-ūs, s. [Lat. Morpheus, from Gr. Μορφή (Morphē) = the son of Sleep, and the god of dreams; lit. = the fashioner or former, from Gr. μορφή (morphē) = shape, form; from the shapes or forms which appear to persons in their sleep; μορφήω (morphēō) = to fashion, to shape.]

Gr. Myth.: The god of sleep and of dreams.

mör-phow (ew as ū), s. [Fr. morphoe; Ital. morfo = leprosy.] A scurl on the face; any scaly eruption.

"In taking away the morphoea in the neck."—Ben Jonson. Discoveries.

* mör-phow (ew as ū), v. t. [MORPHĒW, s.] To cover with morphew.

"Whose hand-lease bouquet veils his overgrown clow. And sudden rags before him unphosphor skin?"—By Hall. Satires, bk. IV, sat. 6.

mör-phī-a, s. [MORPHĒA.]

mör-phī-a mā-nī-a, s. [Eng. morphic, and nitate.] An uncontrollable passion for taking morphia or opium as an anæsthetic.

"The extent to which morphinomania prevails in our midst."—Full. Med. Gazette, March 29, 1852.

mör-phī-a mā-nī-æ, s. [Eng. morphic, and nitate.] One addicted to taking morphia or opium.

"A habitual drunkard is less under the thudion of alcohol than the morphinomania under that of morphia."—Full. Med. Gazette, March 29, 1852.

mör-phī-dæ, s. pl. [Mod. Lat. morphic(s); Lat. fem. pl. adj. suil. -idæ.]

Entom.: In some classifications a family of Diptera, characteristic of the Malayan and Mollecan districts, and of tropical America, with a few species extending to the Himalayas on the west and to Polynesia on the east. Ten genera, with 106 species. (Walters.)

mör-phī-næ, s. pl. [Mod. Lat. morphic(s); Lat. pl. adj. suil. -næ.]

Entom.: In some classifications a sub-family of Nymphalide (q.v.), but sometimes elevated to the rank of a family. [MORPHINÆ.]

mör-phinc, mör-phī-a, s. [MORPHĒUS.]

Chem.: C₁₇H₁₉N₃O₅. Morphium. The most important of the opium bases, discovered by Serturner in 1816. It is obtained by decomposing an aqueous extract of opium by chloride of barium, and allowing the chloride of morphia to crystallize out. The crystals, which contain water, are dissolved, and the morphine is then precipitated by ammonia, and finally purified by recrystallization. It crystallizes from alcohol in colourless, lustrous, triclinic prisms, soluble in 500 parts of boiling water, easily soluble in alcohol, but insoluble in ether and chloroform. Morphine is also soluble in caustic alkalis, but scarcely at all in ammonia. Solutions of morphine are coloured blue with ferric chloride; and ochreous acid is reduced by morphine and its salts, free iodine being liberated. By the aid of starch solution this reaction affords a highly delicate test for its detection. Morphine forms well-defined salts with mineral and organic acids. The most characteristic and best defined salt is the hydrochloride, which crystallizes in slender, colourless needles arranged in stellated groups, soluble in 20 parts of cold water, and in its own weight at the boiling heat.

mör-phō, s. [Gr. Μορφή (Morphē), an epithet of Venus, as the bestower of beauty.]

Entom.: The typical genus of the family Morphide or the sub-family Morphina. Forty species are described from the Neotropical region and the Brazilian and Central American sub-regions. The male of *Morpho cypris* is probably the most brilliant butterfly known; it is of dazzling sky-blue, with a white band across the centre of the wings, which have an expanse of five inches; the female is often orange or fawn. Some of the species fly near the ground, but the largest and most gaily-coloured fly at a great height. The scales from the wings of *Morpho Menippe* are sometimes used as test-objects for the microscope.

mör-pho-log-ic-äl, mör-pho-log-ic, n. [Lat. morphologic(us), -ic(us), -ia.] Of or pertaining to morphology.

mör-phō-lōg-ic-äl-ly, adv. [Eng. morphologic(us), -ic(us).] In a morphological manner; with reference to the principles, rules, or facts of morphology.

"In descriptive languages morphologically."—Miss Muller. Select. Lectures, p. 121.

mör-phō-lō-gist, s. [Eng. morphologic(us), -ic(us).] One who is versed in morphology; one who writes upon morphology.

mör-phō-lō-gÿ, s. [Gr. μορφή (morphē) = form, shape, and λογος (logos) = a word, a discourse; Fr. morphologie.]

1. Nat. Science: That branch of science which treats of the laws, form, and arrangement of the structures of animals and plants, treating of their varieties, homologues and metamorphoses; the science of form.

2. Darwin defined it as "The law of form of structure, independent of function," and considered it to be one of the most interesting departments of natural history, and, indeed, almost its very soul. Morphology teaches that most organs of a plant, including the funnels, sepals, petals, stamens, and pistils, are modifications of leaves. With regard to animals, it investigates the tissues of which their structures are composed (Histology), the states through which each animal has to pass before reaching maturity (Anatomy), and the modifications of form which the same organ undergoes in different animals. For instance, the hand of a man, the forefoot of a mole, adapted for digging, the leg of the horse, the paddle of the porpoise, and the wing of the bat are all only modifications of one type. [COMPARATIVE ANATOMY] Darwin accounts for this by the hypothesis of selection by successive slight modifications. Morphology treats also of serial homologues in the same animal, and of what Ray Lankester calls homologous and homoplastic homologues of organs (Darwin; Orig. Species, 6th ed., pp. 382-86).

2. Theol.: (See extract.)

"Hence it is evident in what sense alone there can be a science of morphology of the adaptations and modifications of articulate signs to the uses and changes of thought."—Whitney. Life and Growth of Language, p. 141.

mör-phōn-ō-my, s. [Gr. μορφή (morphē) = form, shape, and νόμος (nomos) = a law.]

Form; The law or laws regulating morphological development.

mör-phō-sis, s. [Gr.]

Bot.: The order or mode of development of any organ.

mör-pi-ôn, s. [Fr., from mordre (Lat. mordere) = to bite, and pion (Low Lat. pedionem, acc. of pedis; Lat. pedis; Ital. pedone) = a foot.] A crab-louse.

mör-rhū-a, s. [Mod. Lat. morrhua, Low Lat. morrhia; Fr. morra.] Said by Belon and Lattre to be from *morhul*, *morhul*, an English word of the twelfth century = a stock-fish, a cod. Not in Strutt's Dictionary.

Ichth.: A genus of Fishes, family Gadide. *Morrhua oxyphras* is the Haddock (q.v.), and *M. vulgaris* is the Common Cod. They are more frequently called *Gadus oxyphras*, and *G. morrhua*. [GADUS.]

* morrhua oil, s. Cod-liver oil (q.v.). (Calcutta Libr. Rep., v. 186.)

mör-riçc, s. [MORRIS.]

* mör-riçc-ër, s. [Eng. morrice(s); -er.] A Morris-dancer.

"Their morrice, with bell at head, And blade of hand, their mores wheel."—Scott. Lady of the Lake, v. 22.

* mör-rim-äl, n. [MORRIS.]

mör-ris (D), mör-riçc, s. [Spelled *marrische* dance by Holland and his countrymen, as having been introduced into England from the Moriscos, or Moors of Spain; Sp. *marrisco* = Moorish.] [MORRIS.]

1. A dance borrowed or imitated from the Moors, usually performed by a single person, with caskets or rattles in the hands, a morrice.

2. A rustic dance performed in spring and summer time. There are many varieties of it to prove the universal popularity of this dance, both in the parish accounts of several

powder. The pestle should possess the same character.

"In Greece they have a *crab* by themselves, to temper and beat in mortars. The mortar made of lime and sand."—*P. Willant. Plonic*, bk. XXVI, ch. XXIII.

2. A calcareous cement. It differs in its characteristics according to the nature, proportions, or treatment of its constituents. The proportions vary from 1 1/2 to 4 or 5 of sand to 1 of lime. Hydraulic mortar is made from certain limestones which include in their composition so large a proportion of iron and clay as to enable them to form cements which have the property of hardening under water, and are called hydraulic limestones. The proportions of clay vary in different quarries, and often in the same from eight to twenty-five per cent.

"They had brick for stone, and slime for mortar."—*Genesis* XI, 3.

3. Short pieces of ordnance used to force shells at high angles, generally 45°, the charge varying with the range required. They are distinguished by the diameter of the bore, such as 13in., 10in., and 5in., which are the commonest forms of smooth-bore mortars. They are made of cast iron or bronze; but, recently, rifled mortars,

MORTAR.

resembling short howitzers, have been tried, and these are of wrought iron or steel. The bronze mortars are usually of small calibre, and are called "Royals" or "Cochons," with 3 1/2 in. and 4 1/2 in. calibre. They are employed in the advanced trenches because of their portability. All mortars have the muzzles at the breech of the piece, and are mounted in a rigid bed of wood or iron so that they always fire at the same angle of elevation, and have little or no recoil. They are extensively employed in the bombardment of towns or forts, as the projectiles reach the interior of such places well, have great penetrative power because of the height to which they are thrown, and hold large bursting charges which afford a great volume of flame. Smooth-bore mortars are very inaccurate in their fire, as the projectile travels somewhat slowly, and is much affected by wind. The German rifled mortars give excellent results at 2,200 yards range.

4. A kind of small chamber lamp. "By that *quarry*, which I see breune."—*Chaucer. Troilus & Criseide*, bk. IV.

5. A short, thick candle.

6. The same as MORTAR-BOARD (q.v.).

mortar bed, s. The frame on which a mortar rests for firing.

mortar-board, s. A slang term for the teacher or square academic cap worn at the universities and at certain schools.

mortar engine, s. A machine for grinding and combining materials into mortar.

mortar-man, s. A mason.

mortar-mill, s.

1. A mill in which the sand, lime, and mortar are compounded by rakes attached to the arms of a revolving wheel that moves round in a circular bed.

2. A mill consisting of two heavy drums running in a circular trough that turns on a vertical axis. The materials for the mortar are placed in the trough, and ground to fineness under the edges of the drums, as under the runners of a Chilian mill.

mortar-piece, s. The same as MORTAR (q.v.).

"They raised a strong battery, and planted upon it a mortar-piece that cast stones and granades of sixteen inches diameter."—*Baker's Charles I.* (p. 164).

mortar-vessel, s. A small vessel having a relatively wide beam for carrying a heavy mortar amidships. Formerly the vessel used was a ketch; hence, bomb-ketch.

mortar wagon, s. A vehicle to transport a mortar and its bed.

***mor-tar, v.t.** [MORTAR, s.] To fasten or close with mortar.

"Electricity cannot be . . . mortared, ended like London monument."—*Everson. English Traits*, ch. XIII.

***mor-ter, s.** [MORTAR, s.]

mort gage (t silent), mor gage, s. [Fr. *mortgage*, *mortgage*, from *mort* = dead (Lat. *mortuus*), and *gage* = a pledge.]

Int.: The grant of an estate or other immovable property in fee in security for the payment of money, and on the condition that if the money be duly paid the grant shall be void, and the mortgagee shall reconvey the property to the mortgager. The term is applied: (1) To the act of making such grant; (2) To the deed by which such grant is made; (3) To the rights thereby conferred on the mortgager. If the mortgager fail to pay the money in the manner and at the time specified the mortgagee by common law acquires the absolute title to the property. But the mortgager may at any time within twenty years of the mortgager's entry upon the property, or of his last written acknowledgment of the mortgager's interest in it, re-enter upon the property upon payment of the sum due and interest. This is called the Equity of Redemption. The mortgagee, on the other hand, may, upon the failure of the mortgager to fulfil the conditions of the mortgage, call upon him, by filing a bill of foreclosure, either to redeem his pledge or to forfeit the equity of redemption.

"But *mortuum vadium* a dead pledge, *mortgage* (which is much more common than the other), it is when a man borrows of another a specific sum (e.g. £200) and grants him an estate in fee, on condition that if he, the mortgager, shall repay the said sum of £200 on a certain day mentioned in the deed, that then the mortgager may re-enter on the estate so granted in pledge."—*Blackstone's Comment.*, bk. III, ch. 10.

* **mort -ling,** *s.* [MORLING.]

mort māin, *mort mayn, *s.* [Fr. *mort-main* = from Lat. (*m*) *ortus* *manus*.]

Law : Such a state of possession of lands or tenements as makes it incapable of being alienated when it is vested in dead hands, that is, in persons who cannot alienate, as a corporation; an unalienable possession.

"All purchases made by corporate bodies being said to be purchases in mortmain, to mortmain, for the persons of which application Sir Edward Coke offers many conjectures, but there is one which seems more probable than any that he has given us, viz. that these purchases being usually made by ecclesiastical bodies, the mortmain of which being possessed was reckoned dead persons in law, and therefore, hidden by them, might with great propriety be said to be held in mortmain." — *Blackstone*, *Comment.*, bk. ii., ch. 17.

* *Alienation in mortmain :* [ALIENATION.]

mort mā, *s.* [Fr. *mort* = dead, and *ma* = evil.] A bad sore; a nominal (q.v.).

† **mortne, n.** [MORNE.]

mort pay, *s.* [Fr. *mort* = dead, and *Engl.* *pay* (q.v.).] Dead pay; the taking of exceeding pay or wages for more soldiers than were actually serving, some being dead or discharged, or for more days than they had really served.

"The severe punishing of mortpayes, and keeping back of soldiers wages." — *Bacon*, *Henry VII.*, p. 194.

mort rēss, s. [MORTAR, *s.*] A dish composed of meat or fish of various kinds beaten together.

"A mortress made with the brains of capons, stamped, strained, and mingled with like quantity of almond batter." — *Bacon*, *Nat. Hist.*

* **mort rews, mort-reux,** *s.* [MORTRESS.]

mort-stone, *s.* [Eng. *mort*, and *stone*.] A stone by the wayside, between a distant village and the parish church, on which the bearers of a dead body rested the coffin.

"What is that?"
"Oh! me! the mortstone!"

"The mortuary-guinea is the parson's due at burials, for teaching the service, church-yard fees, &c." — *Hill*, *Memorie Letters*, n. 199.

mōr -ū la, *s.* [Mod. Lat., dimin. of Lat. *morum* = a mulberry; a blackberry.]

Bot. : The globular mass of cleavage cells resulting from the repeated bisection of the ovum (q.v.). The cells lie as close together as the drupes of a mulberry or blackberry, so that the entire surface of the round mass appears jagged. (*Haeckel*: *Evolution of Man*, i. 189.)

mōr -ūs, *s.* [Lat., from Gr. *μωρα* (*mōra*) = the mulberry-tree; from *μωρον* (*mōron*) = the black mulberry.]

Bot. : Mulberry; the typical genus of the order Moraceæ (M-rads). The fruits of the several species are eatable, but cause diarrhoea if taken in excess. *Morus alba*, the White Mulberry, is the one most frequently used in Europe for feeding silkworms. It has a sub-acid succulent fruit; *M. nigra*, the Black Mulberry, is also used for silkworms. The juice is a remedy for sore throat, and a good refrigerant in fever. The bark is purgative and a vermifuge. Nine kinds of mulberry tree—some of them species, others only varieties—occur in India. *Morus alba*, *M. atropurpurea*, *M. cuspidata*, *M. indica*, *M. longicaulis*, *M. serrata*, *M. multicaulis*, *M. nigra*, and *M. perriflora*. *M. serrata* is valued by the Simla wood-carvers. *M. indica*, wild in the sub-Himalayas, is cultivated through India. The larva of the Assam silkworm, *Bombyx mori*, is fed upon its leaves. Its stem yields a gum. Its root is anthelmintic and astringent. The fruit has an agreeable, aromatic, and acid flavor, is cooling and laxative, allays thirst, and is grateful in fevers.

mor -vant, *s.* [Etyim. doubtful.] A species of sheep.

mor -vén -īte, *s.* [Named after Morven, Argyleshire; suff. -ite (*M*).]

Mō sã īc (1). * **Mō sã -īc -al** (1). *n.* [Lat. *Mosaicus*.] Pertaining or relating to Moses, the Jewish leader and lawgiver.

"The *Mosaic* law, as it was planned by unerring wisdom, and ingeniously and admirably well contrived for the great purposes for which it was intended." — *By*, *Horsley*, *Sermons*, vol. ii., ser. 21.

Mosaic law, s.

Script. : The law as given by or through Moses. It consisted of three portions, the Moral, the Ceremonial, and the Judicial law, the last constituting the civil and criminal code of the Jews.

mō sã -īc (2) * **mō sã -īck,** * **mō sã -īc -al** (2). *n.* & *s.* [Fr. *mosaïque* = mosaic work, from Low Lat. * *mosaicus*; Gr. *μουσαϊκός* (*mousaïkós*), from *μουσαϊός* (*mousaïós*) = mosaic work; neut. sing. of *μουσαϊός* (*mousaïós*) = pertaining to the Muses; hence, artistic, ornamental; Lat. *mosaicum* or *mosaicum opus* = mosaic work; Ital. *mosaico* = mosaic; Sp. *mosaico obra* = mosaic work; Port. *mosaico* = mosaic.] [MOSAIC, *s.*]

A. *As adjective :*

1. A term applied in its widest sense to any work which exhibits a representation on a plane surface by the joining together of minute pieces of hard, colored substances, such as marble, glass, or natural stones united by cement (plastic), and which served as floors, walls, and the ornamental coverings of columns. Roman mosaic consists of pieces of artificial enamel, in place of natural stone. The enamel is drawn out into rods of various sizes, cut into lengths, and arranged in cases something after the manner of painting.

MOSAIC.

The Tunbridge wood-mosaic of England is made of coloured parallelograms of wood glued together so as to show a pattern at their ends or sections. The oldest and simplest form of mosaic work is the dice-shaped pavement, or *mosaicum opus*, of the Romans. The *opus tessellatum* was a tessellated geometrical pavement. The *opus sectile* was formed of slices of marble. The mosaics which we may term modern were commenced in the latter part of the fifteenth century, and are attributed to the two brothers Zuccati, of Treviso, who executed them by means of cartoons drawn by the best artists of the day, and from copies furnished by Titian and Tintoretto, and in Italy the copying of celebrated pictures by Raphael, Domenichino, and others is continued to the present day. A finer kind is applied to the production of brooches, &c.

2. Variegated like mosaic work.

"The tunic box
Wove in mosaic mode of many a curl,
Around the figured carpet of the lawn
— *Mason*, *English Garden*, bk. i.

B. *As substantive :*

1. *Lit. :* Mosaic work. [A 1.]
"The liquid floor is wrought with pearls divine,
Where all his labours in mosaic shine."
— *Swage*, *Wanderer*, v.

2. *Phro. :* A pyrotechnic device consisting of a surface with diamond-shaped compartments, formed by two series of parallel lines crossing each other. The effect is produced by placing at each intersection four jets of fire which run into the adjoining ones. The intervals between the jets must be associated with the discharge of others, so as to keep up a succession of fires in the spaces.

mosaic floor, *s.* A floor laid in colored woods, tiles, or marbles, systematically arranged, either symmetrically or pictorially.

mosaic glass, *s.* Mosaic glass is formed by the association of various coloured opaque or transparent rods of glass, so arranged that the ends may form patterns. Sections being removed, the pieces are arranged for the pro-

duction of a recurring pattern, or a general combination is formed by the association of a variety of separate ornaments.

mosaic gold, s.

Chem.: SnS₂. Bismuthide of tin. Prepared by exposing a mixture of 12 parts of tin, 6 of mercury, 6 of sal-ammoniac, and 7 of flowers of sulphur, to a low red heat. It forms brilliant gold-colored scales, and is used as a substitute for gold powder.

Mosaic Ministry, s.

The name given by Burke to the mongrel coalition which took office in July, 1766.

"Pitt undertook the formation of that Mosaic Ministry which Edmund Burke has so emphatically described."—*Collier, British Empire*, ch. IV, p. 399

mosaic tile, s.

A tile mended with different coloured slays, arranged in patterns in imitation of the associated pieces of coloured stones in a true mosaic.

mosaic wool, s.

A form of rug or mat made from coloured wool, arranged so that the ends of the wool present a definite pattern. Threads of wool of equal length are placed horizontally in a frame, close together, to form a compact mass. They are of different colours, and the colours are arranged in conformity with a pattern. The threads, being held firmly in the frame, are then cut across to form cubical masses, all the threads in each cube being kept rigidly in their places. The cube is then placed in a frame with the threads vertical, and a clean cut made across the top. The smooth surface is then wetted with a solution of rubber, and a piece of canvas firmly attached. When dry, a machine cuts off a slice of such thickness as is desired for the length of the pile. A rug or mat of a velvety finish is thus produced. Other slices can be cut off in the same way until the wool is exhausted.

Mō-sā'-īc-al (1), a. [Eng. Mosaic (1); -al.] The same as MOSAIC (1).

mō-sā'-īc-al (2), a. [Eng. mosaic (2); -al.] The same as MOSAIC (2).

"The trees were to them a pavilion, and they to the trees a mosaic'd flower."—*Salatyre, Arcadia*, bk. I, l. 143.

*mō-sā'-īc-al lŷ, nŷ. [Eng. mosaic (2); -al; -ly.] After the manner of mosaic work. "They mixed in works mosaic'dly stow."—*Stirling, Dunsinny*, Twelfth Navee.

Mōs-ā-īsm, s. [Eng. Mos(es); -ism.] The Mosaic system; adherence to Mosaic system or doctrines.

"Christianity, being the offspring of Judaism, was rejected by the Jews."—*Mac Miller, Science of Religion*.

mō-sān'-drite, s. [After the Swedish chemist, Mosander; suff. -ite (Min).] Min.: A monoclinic mineral, occurring in long prisms in syenite, sometimes massive and fibrous. Hardness, 4; sp. gr. 2.93 to 3.04; lustr., vitreous to resinous; colour, reddish-brown when fresh, thin splinters translucent; compos., a hydrated silico-titanate of cerium, lanthanum, thulium, and calcium, with some soda and sesquioxide of iron. Found, associated with various other minerals, at Brevig, Norway.

mōs-ā-sāu'-rī-dæ, s, pl. [Mod. Lat. *mosasaurus*]; Lat. fem. pl. adj. suff. -ior.] *Palaont.*: Mosasauridae; a family of Reptiles, believed by Sir Richard Owen to be Lacertilian, but arranged by Prof. Cope in a new order Pythonomorpha, and placed near the Ophidia. The teeth are rootless and solid throughout; they are joined to the jaw by a broad bony base, and not inserted in sockets, as in the crocodiles. The palate has also teeth. There were paddles instead of feet.

mōs-ā-sāu' rōid, a. & s. [Mod. Lat. *mosasaurius*]; and Gr. εἶδος (eidos) = form. A. *As adj.*: Belonging to or characteristic of the Mosasauridae (q.v.). B. *As substantiv.*: *Palaont. (Pl.)*: The Mosasauridae. "It was early conjectured that the mosasaurius were marine and aquatic in their habits."—*Nicholson, Paleontology*, v. 206.

mōs-ā-sāu' rūs, s. [Lat. *Musa* = the river Meas or Meuse, and Gr. σαύρα (saurus), σαύρα (sauris) = a lizard.] *Palaont.*: The name given by Conybeare to a gigantic marine Saurian, called by Wagner Saurochampsia. It is now made the

type of a family, Mosasauridae (q.v.). *Mosasaurus Gampel* was discovered in the Maas, tricht chalk in 1780, and was named by Sommering *Lacerta quadrata*. It came into possession of the French at the fall of Maas tricht (1794). Another species, *M. pr. exim.*, is believed to have been seventy feet long.

mōs char i a s. [Gr. κάρως (karsch) = musk; Lat. neut. pl. adj. suff. -ior.] *Bot.*: A genus of Composites, sub-order Labiatifloræ, sub-tribe Truxaleæ. *Moscharia pumiliflora* has a smell like musk.

mōs chà tsel, s. Fr. *mosothelle*, from Lew Lat. *muscatiss* = having the smell of musk (q.v.). *Bot.*: The genus *Aloxa* (q.v.). *Aloxa Moschotelensis* is the Tiberous Moschotel. It is a small plant, with broadly triangular-ovate leaves and yellowish-green flowers; found in Britain.

mōs chà-tin, s. [Mod. Lat. *moschatell*], fem. sing. of *moschatellus* = musky; Eng. suff. -in (Chem.).] *Chem.*: C₁₀H₁₂NO₂. An aromatic nitrogenous substance contained in the ivy plant, *Achillea moschata*. It has a bitter taste, is insoluble in water, but slightly soluble in absolute alcohol. It melts under water at the heat of the water-bath, and separates in the pulverulent form on cooling.

*mōs chà-tōus, a. [Mod. Lat. *moschatellus*]; Eng. suff. -ous. *Bot.*: Having the smell of musk. (*T. ros.* of *Bot.*)

mōs chi dæ, s. pl. [Mod. Lat. *moschites*]; Lat. fem. pl. adj. suff. -ior.] *Zool.*: A family of Ruminantia, including the Chevrotains and the Musk-deer. The former now constitute the family; the latter either forms a separate genus, *Moschus* (q.v.), or is, as Prof. Garrod suggests, considered as an aberrant member of the Bovidae.

mōs chinc, a. [Mod. Lat. *moschus*]; Eng. adj. suff. -ous.] Of or pertaining to the Moschidae (q.v.).

mōsch-ōs mā, s. [Gr. μσχος (moschos) = musk, and ὀσμή (osmi) = a smell.] *Bot.*: The typical genus of the family Moschomidae.

mōs chōs mi dæ, s. pl. [Mod. Lat. *moschomidae*]; Lat. fem. pl. adj. suff. -ior.] *Bot.*: A family of Labiate, tribe Oenior.

mōs chūs, s. [Gr. μσχος (moschos) = musk.] *Zool.*: A genus of Cervide, with a single species, *Moschus moschiferus*, the Musk-deer (q.v.). It differs in many important structural characters from the cervine type; there are no horns in either sex, and the canines are prolonged three inches below the gum. The presence of a gall-bladder would seem to indicate relationship with the Antelope. It is an alpine animal, inhabiting the mountains of Central Asia to China and Siberia.

*mōse, v. i. [Etyim. doubtful; cf. *moses*.] A word only occurring in the phrase, *to moss in the chime*, where it refers to a disorder in horses, by some called humming in the chime. (*Shakespeare, Twelfth of the Strews*, in. 2.)

"Of *Moslem* hath I fame."—*Byron, The Corsair*. mōs lings, s. pl. [Etyim. doubtful.] The thin shavings or scrapings of leather shaved off by the currier in dressing skins. They are used in wiping off metals while grinding and polishing.

mōs ô-sāu-rūs, s. [MOSASAUURS.]

mōsquo (quo as k), *moskhe, *mosk, s. [Fr. *mosquée*; from Sp. *mezquita*, from Arab. *mosk*, *mosque*; or a mosque, a temple, from *mosk* = to adore, to prostrate on s. self; Pal. *mosk*; *mosk*; Port. *mosquita*.] A Muhammadan temple or place of worship. The design is not normal, and consequently the main form is not a settled one. But they have three essential parts, which must never be wanting. These are the Mihrab, or Hall of Prayer, which marks the direction of Mecca (Kaba'ah), and which must consequently have held a different position in different countries; then a place for the ablutions, which precede prayer; and finally a large space for the entry and departure of the faithful, for the reading of the Koran and prayers. In this space are the Makbara, or seat of the Cadi, when one was required; as also a place for the preservation of the Koran, and finally the Mimbab, or kind of pulpit. A further requirement is the Minaret, a kind of tower, from which the Imam calls the hour of prayer, and of which the larger mosques generally possess four or six. [MIDRAB, MIMBAR, MINARET.]

"The females do oblige, and sit on a ledge. With trembling infant to the *compas* pair."—*Rowley, Tasso, Jerusalem Delivered*, bk. iii.

Entom.: The popular name of various two-winged insects, having a long proboscis, with which they attack man, sucking his blood. They belong chiefly to the genus *Culex*, or at least the family Culicidae; though Humboldt says that those of South America are species of *Simulium* (q.v.). The mosquito of the West Indies and parts of America is *Culex Mosquito*. Mosquitoes abound also in the tropical parts of the Eastern World, and are troublesome too in the Polar Regions. The number of species and their geographical distribution have not yet been perfectly determined. The adult insect feeds on vegetable juices, the males, with few exceptions, exclusively so; in addition to a vegetable diet, the females of most species suck the blood of mammals, birds, &c. It has been discovered that the mosquito, especially the genus *Anopheles*, is the host of the embryonic stage of malarial and other parasites, and that the female injects the parasite into the blood of man, giving rise to malarial and other fevers. The insect is very prolific; each female may lay hundreds of eggs many times in a season, and one pair of mosquitoes can propagate millions in a summer. [CULEX, CULICIDE.]

mosquito bar, s. A net to ward off mosquitoes, gnats, and other flying insects. It is usually a canopy, surrounding the bed, but is sometimes applied to the windows and doors to exclude outdoor insects from a room.

mö-të-la, *s.* [Mod. Lat., from *Genezan motabile*, or *motabile*, prob. from Lat. *mutabile*.] (*Lit.*)
Ichthy.: Rockling; a genus of Gadidae. The body is elongate, covered with minute scales. Two dorsal fins, one anal, and caudal separate. A band of teeth in the jaws and on the vomer. Eight species are known, from the coasts of Europe, Iceland, Greenland, Japan, the Cape of Good Hope, and New Zealand. They are of small size, and chiefly distinguished by the number of their barbels. The Five-bearded Rockling (*Motellus mutabile*), the Four-bearded Rockling (*M. cinabria*), and the Three-bearded Rocklings (*M. tricirrhata*, *macrophthalma*, and *maculata*), are British. Günther considers *M. glauca*, the Mackerel Mulge, to be the young of *M. macrophthalma*. Yarrell makes it a separate species, and it is sometimes placed in a separate genus.

mö-tët, *mö-tëtt*, *s.* [Fr., from Ital. *molto* = a ditty, a verse; dimin. of *molto* = a motto (q.v.), from Lat. *mutum* = a mutter, a groan.]
Musical: A vocal composition in harmony, set to words generally selected from the Scriptures, or to paraphrases of the sacred writings. The motett was, at one time, a varied treatment of a given theme similar to the poem called in Spanish a "mota." Like the madrigal, the motett was at first set to words of a profane character, and there are ecclesiastical decrees extant forbidding its use in church. Metrical psalms and hymns, in which the several verses are sung to a varied setting, are called *mötetts* in the Roman Catholic Church, and many sacred cantatas of unconnected movements are also similarly named.

möth, *^ mothe*, *^ moththe*, *^ mouthe*, *^ moughte*, *s.* [A.S. *moetha*, *moetha*; cogn. with *Dut. mot*; *Ind. moti*; *Sw. mott* = a mote; *Ger. motte* = a moth.]
I. *Ordinary Language*:
1. *Lit.*: In the same sense as *It.*
"Neglected heaps we in by corners lay,
Where they become to worms and *moths* a prey."
—*Keats: Act of Poetry*.

2. *Fig.*: Anything which gradually eats, consumes, or wears away anything.
"If I be left behind, a *moth* of peace."
—*Shakspeare: Othello*, I, 3.

II. *Entom.* (*Pl.*): Formerly a distinction was drawn between Moths called Phalioidea, or Lepidoptera Nocturna, &c., and Hawk-moths, Sphingidae, or Lepidoptera Crepuscularia, &c. Now both are united under the head Heteroptera (q.v.). The antennæ taper to a point. The insects fly during the night or during twilight. They are, as a rule, less brightly coloured than butterflies. Stanton divides them into nine groups: Sphingina, with four families; Bombycina, with twelve; Nocturna, with twenty-six; Geometrina, with seventeen; Pyralidina, with sixteen or seventeen; Tortricina, with nine or ten; Tineina, with fifteen; and Pterophorina and Alucitina, each with one. He estimates the known British species at 1920. They may be captured in nets, or by attracting them to sugar dissolved in water or beer and spread upon trees, or to a light, or they may be reared from the caterpillar state.

B. *As adj.*: Giving, imparting, or producing motion.

II. *Technically*:

1. *Ant.*: A fontanel or space occupied by a cartilaginous membrane situated at the angles of the bones which form the skull in a human foetus and a new born child.

2. *Building*: A frame to give shape to a structure, as in the building of houses in concrete, beton, clay, cement, &c.

3. *Foundry*: Moulds for casting are of several kinds: (1) Open moulds into which the metal is poured, the upper surface of the fluid metal assuming the horizontal position. Such are ingots and some other objects. (2) Close moulds of metal or plaster of Paris, with ingates by which the molten metal enters. Such are the moulds for inkstands, cannon-balls, bullets, tin, and various other articles made of lead, tin, zinc, and their alloys, which fuse at a moderate heat. (3) Close moulds of sand, in which articles of iron, brass, bronze, &c., are cast. This is the ordinary foundry work, and includes machinery, stoves, ordnance, and the multitude of articles of domestic and agricultural hardware.

4. *Gold-beating*: The package of goldbeater's skin in which gold-leaf is placed for the third beating. It is first enveloped in vellum, 1 1/2 leaves, with interposed ploughs of gold, one inch square, forming a kutch. The pieces, spreading to the size of the vellum, are cut into four pieces and interleaved with gold-beater's skin; 600 pieces and their skin form a shoder, for the second beating. Being again divided into four pieces, they are again interleaved with goldbeater's skin; making 2,400. These are divided into three packages of 800 each, called moulds, and receive the third beating.

5. *Paper-making*: Hand-made paper is made by a mould and deckle (q.v.). The mould is an open, square frame with a wire-cloth bottom, and a little larger all round than the required sheet of paper.

6. *Plastering*: A thin board cut to a pattern and used in forming cornices, &c.

7. *Ship-build*: A full-sized pattern of the same figure and dimensions as the moulding side of the piece which it represents. The mould may be of skeleton form, and may serve for several frames. It is usually a thin plank cut to the form of a ship-timber, and serving as a template for scaling the timbers for the workmen who saw, hew, and adze them into shape.

mould-ing, p.p. pres. a., & s. [MOULD (2), v.]

- A. & B.** *As p.p. pres. & particip. adj.*: (See the verb).
- C. As substantive:**
 - Ordinary Language:*
 - The act of forming or casting in a mould.
 - Anything cast or formed in or as in a mould.
 - Figuratively:*
 - Arch.*: A term applied to all the varieties of outline or contour given to the angles of

the various subordinate parts and features of buildings, whether projections or cavities, such as cornices, capitals, bases, door or window pediments and heads, &c. There are eight sorts of regular mouldings, viz., the ovolo, the talon, the cyma, the cavetto, the torus, the astragal, the scotia, and the fillet. These mouldings are not to be used at hazard, each having certain situations adapted to its reception, to which it must always be applied.

Thus, the ovolo and talon, from their peculiar form, seem intended to support other important mouldings or members; the cyma and cavetto, being of weaker contour, should only be used for the cover or shelter of other parts; the torus and astragal, bearing a resemblance to a rope, appear calculated to bind and fortify the parts to which they are applied; the use of the fillet and scotia is to separate one moulding from another, and to give a variety to the general profile. The ovolo and talon are mostly placed in situations above the level of the eye; when below it, they should only be applied as crowning members. The place for the scotia is invariably below the level of the eye. When the fillet is very wide, and used under the cyma of a cornice, it is termed a corona; if under a corona it is called a bond. The curved contours of mouldings are portions of either circles or ellipses. In Norman architecture the mouldings were almost universally round and hollows variously combined, and frequently broken up into zigzag lines. In English architecture of the Middle Ages the mouldings are lozier.

2. *Joinery:* A mode of ornamentation by grooving or swelling bands, or forms following the line of the object. There are numerous varieties, as the bead, the astragal, the ovolo, the egg, the cyma, the recta or reverse, the quirk, the bolection, &c. A moulding is said to be stuck on or laid on, according to whether it is made on the edge of the frame or on a detached slip.

3. *Min.*: The ore found on the top of veins near the surface of the ground.

4. *Shipbuild.*: Giving the correct outline and depth to ship's timbers, &c. It is one part of the operation of forming (q.v.).

mound-birds, *s. pl.*
Ornith.: The same as MOUND-BUILDERS, 2.
mound-builders, *s. pl.*

1. *Anthrop.*: The name given to a prehistoric race, formerly inhabiting the Mississippi Valley, who have left some very remarkable earthworks or their only memorials, for even tradition is silent on the subject. The best known group of mounds is near Newark, Ohio, and consists of "elaborate earthworks, in the form of a circle, octagon, and square, and enclose an area of about four square miles, on the upper terrace, between two branches of the Licking River. Scattered over the same plain, and crowning the neighbouring hills, are numerous tumuli or mounds, evidently erected by the same people that built the larger works." The human remains found in these mounds are usually so much decayed as to preclude the recovery of a single bone entire. This fact Squier and Davis regard as evidence of the great antiquity of the mounds, since in England, where the moist climate is much less favourable for the preservation of such remains, perfect skeletons have been found after being buried eighteen hundred years. (*Marsh, in Amer. Journ. Science*, July, 1866.) Wilson does not attribute to them so high an antiquity:

"But while the *mound-builders* are essentially prehistoric, according to all New World chronology, there is nothing in the disclosures hitherto made calculated to suggest for them an extremely remote era. . . . The probability rather is that the ruins of Clark's Work on Fort Ancient may match in antiquity with those of Eucland's Norman keeps, and even that their builders may have lingered on into centuries nearer the age of Columbus."—*Archæologic Man*, 321, 322.

2. *Ornith.*: (See extract).
 "The Megalopidae (or *mound-builders*) are another most remarkable and anomalous group of birds."—*Wallace, Geog. Dist. Animals*, i, 305.

mound (2), *s.* [Fr. *monde*; from Lat. *mundus* = the world.]

Her.: A ball or globe, the symbol of sovereign authority and majesty, and forming part of the regalia of an emperor or king. It is surmounted by a cross and encircled with a horizontal band, from the upper edge of which springs a semicircular band, both enriched with precious stones.

- 2. Something of very great bulk; something very large.
"I should have been a *mountain* of humanity."
Shakesp. Merry Wives of Windsor, iii, 5.
- 3. A kind of wine.

II. Technically:

1. *Geog.*: Mountains usually exist in chains, the highest being the Himalayas. Kuchlungga (28,176 feet) was considered the highest till the discovery, in Dec. 1841, of Mount Everest (29,000 feet). The Andes come next. Their highest peak is Sorata (25,267 feet). The Alps are the highest mountains in Europe, Mount Blanc (15,744 feet) being the loftiest peak. Ben Nevis (4,406 feet) is the highest mountain in Britain. Parallel to a leading mountain chain there are in some cases two others of inferior elevation, one on each side. Thus, parallel to part of the Himalayas are the Siwalik Hills, or Sub-Himalayas, of inferior elevation to the central chain. In studying the geography of a country, the mountains or hills claim attention first, for from them flow the rivers, and the direction of these regulates the position of the towns, the most powerful factors in political geography.

2. *Geol.*: In 1833 M. Elie de Beaumont published the hypothesis that a variety of independent mountain-chains have been thrown up suddenly at particular periods, and that all such chains which have risen contemporaneously are parallel to each other, though widely apart. Sir Chas. Lyell controverted these views, and proved that every great mountain is the result, not of one upheaval, but of many. (*Lyell, Prin. of Geol.*, ch. xi.) The composition of the different parts of a mountain regulate its form; trappan rocks, for instance, tending to make one or more table-lands with precipitous sides, and granito a rounded top. [Volcano.]

B. As adjective:

- 1. Of, or pertaining to, a mountain; existing, growing, or living on mountains; natural to mountains: as, *mountain* goats, *mountain* air, &c.
- 2. Full of or covered with mountains: as, *mountain* districts.

mountain leather, s. [MOUNTAIN-CORK.]

mountain-limestone, s.
Geol.: A term introduced by Mr. Wm. Smith, "the father of English geology," to designate a series of calcareous rocks called by Conybeare carboniferous limestone. The term mountain implies that, in England where, in one place, according to Prof. Hull, it is 4,000 feet thick, it rises high above the surface, constituting precipices, &c. It is often cavernous; it is well developed in Derbyshire, South Wales, and Somerset. Typically it is massive, well-bedded, light bluish gray, reddish, or black in colour, in some parts homogeneous, in others crystalline. In Scotland it separates into thin calcareous strata, alternating with yellow and white sandstone, dark shale, and seams of coal and limestone. In some places the mountain limestone is composed mainly of broken enclinites, in others of foraminifera, corals, bryozoa, &c. Of mollusca: 334 lamellibranchs, 206 gastropods, with various pteropoda and cephalopoda, have been found in it; and more than seventy species of fossil fish. It was deposited in an ocean which extended as far as the United States, Canada, and Arctic America. In addition to the value of mountain limestone for turning into lime, it contains valuable ores of lead, zinc, &c. It also receives a good polish, and makes a fine marble. [CARBONIFEROUS-SYSTEM.]

mountain linnet, s.
Ornith.: *Linna montana*, distinguished from the Common Linnet and the Redpolls by the greater length of its tail, and by its reddish tawny throat. A winter visitor to the southern parts of England; but it breeds in the north, in Scotland, and in the Scottish islands every season. (*Yarrell*.)

"Bing on his *mūble-fūbles*." — *Lily*: *Euphuism*.

muc-ām-ide, *s.* [Eng. *mucic*(*ic*), and (*acid*),]

Chem.: $C_6H_{12}N_2O_6 = C_4H_4(OH)_4 \llcorner \begin{matrix} CO(NH_2) \\ CO(NH_2) \end{matrix}$. Produced by the action of ammonia on mucic ether. It separates in microscopic crystals having the form of an octahedron, slightly soluble in boiling water, but insoluble in alcohol and in ether. It is tasteless; sp. gr. 1.589 at 13.5°. Heated with water to 149°, it is converted into mucate of ammonia.

mū-cāte, *s.* [Eng. *mucic*(*ic*), *-ate*.]
Chem.: A salt of mucic acid.

mucate of ammonia, *s.*

Chem.: $C_6H_4(HO)_4 \llcorner \begin{matrix} CONH_2 \\ CONH_2 \end{matrix} \cdot O \cdot NH_2$. The neutral salt is obtained by supersaturating a hot aqueous solution of the acid with ammonia. It crystallizes in colourless flat four-sided prisms, which dissolve sparingly in cold, but more freely in hot water. The acid salt, $C_6H_2(NH_4)O_6$, forms colourless needles or thin (HO)

prisms, and is more soluble in water than the neutral compound.

mucate of ethyl, *s.*

Chem.: $C_6H_2(C_2H_5)_2O_6$. Commonly called mucic ether. It is prepared by the action of mucic and sulphuric acids on alcohol of sp. gr. 834. On being left for some hours, the mixture solidifies into a mass which is shaken up and washed with alcohol. It is afterwards purified by recrystallization from boiling alcohol. It is obtained in transparent four-sided prisms, which melt at 150°. Insoluble in ether, but very soluble in boiling alcohol and in water.

mū-çē-din, *s.* [MUCUS.]

mū-çē-dine, *s.* [MUCOMYCES.] A fungus belonging to the sub-order Mucorales.

mū-çē-dī-nēs, *s. pl.* [Pl. of Lat. *mucos* = mucus (q.v.).]

Bot.: A sub-order of Hyphomycetous Fungi. They have a flocculent mycelium, bearing erect, continuous, or separate, simple or branched, tubular pedicelled filaments, ending in single spores or strings of them, which, separating, become the filaments of the mycelium. It contains moulds and mildews. Example, the genera *Aspergillus* and *Penicillium*, the yeast-plant, &c.

mū-çēd-i-noūs, *a.* [As if from a Lat. *mucos* = mucus, from *mucos* (genit. *mucos*) = mould.]

Bot.: Having the nature, character, or appearance of mould or mildew.

mūch, * **moche**, * **miche**, * **mych**, *a., adv.*, *s.*, & *v. t.*. The same as *michel* (= *mischel*), or *muckel*, with a different suffix; *Heb.* *mo* = much (*adv.*).] [MICKLE, MUCKLE.]

A. As adjective:
 1. Great in quantity or amount; plenty, abundant. (*Deuterone*; xxviii, 38.)
 *2. Great in size; large, bulky, big.
 **A much man*; *Phys. Phoenice*, vii, 70.
 *3. Many in number, numerous. (*Nos*; xx, 20.)

B. As adverb:
 1. In or to a great degree or extent; greatly. It is commonly used with adjectives and adverbs, especially in the comparative, as, much loved, much regretted, much later, much sooner, much wiser, &c.; and also with verbs, as, to boast much, to talk much, &c.
 2. Nearly, almost.
 **Much like a press of people at a door*; *Shakspeare*, *Rep. of Lear*, iv, 1201.

C. As substantive:
 1. A great deal or quantity.
 **You want much of meat*; *Shakspeare*, *Titus*, ii, 3.
 **Much*, in this sense, is really the adjective used without a noun, which may be supplied or understood from the context. It is thus qualified by *as, so, too, very*; too much, very much, &c.

2. Something uncommon or unusual; an extraordinary or unusual occurrence.
 **It was much that one that was so great a lover of peace should be happy to war*; *Johnson*; *Henry VIII*.

D. As interj.: An exclamation of contempt or derision.
 **(1) Much about it*: Pretty nearly equal.
 **(2) Much at one*: Nearly of equal value or influence.
 (3) *Much of a muchness*: So-so; very moderate; much the same.
 **Gentle or simple, they're much of a muchness*; *George Eliot*, *Jane Eyre*, ch. xxvii.

(4) *To make much of*: To treat as of great consideration or importance; to think highly of.
 **When thou earnest first, / Then strok'st, and wast of much of me*; *Shakspeare*, *Tempest*, i, 2.
 **Much* is largely used in composition; as, much-encouraging, much-loved, much-praised, &c., the meanings of which are sufficiently obvious.

***much ell, much el**, *n.* [MUCKLE]

mūch-ly, *adv.* [Eng. much; -ly.] Much, exceedingly. (*Shaks.*)

***mūch-nēss**, *s.* [Eng. much; -ness.] The state of being much; quantity.

***mūch-whāt**, *adv.* [Eng. much, and what.] Nearly, almost.

mū-ĉic, *n.* [Eng. muc(i); -ic.] Contained in or derived from gums.

mucic-acid, *s.*
Chem.: $C_4H_4(OH) \begin{matrix} \leftarrow (COOH) \\ \leftarrow (OH) \end{matrix}$ A dibasic acid isomeric with saccharic acid, discovered by Scheele in 1780. It is formed by the oxidation of milk, sugar, melitose, and various kinds of gum, by nitric acid, and is purified by recrystallization, or by decomposing the ammonia salt with nitric acid. It crystallizes in colourless tables with square base. Insoluble in alcohol, sparingly soluble in cold water, but soluble in five parts of boiling water. Sulphuric acid dissolves it, producing a crimson colour. Mucic acid forms numerous definite salts, of which the ammonia compound is the most important.

mucic-ether, *s.*
Chem. (Pl.): Compounds of mucic acid with an alcohol radical.

***mū-ĉid**, *n.* [Lat. *mucidus*, from *mucos* = to be mouldy.] Mouldy, musty.

***mū-ĉid-nēss**, *s.* [Eng. *mucid*; -ness.] The quality or state of being mucid; mustiness, mouldiness.

mū-ĉid-ōūs, *a.* [Lat. *mucidos*.]
Bot.: Musty; smelling of mouldiness. (*Treas. of Bot.*)

mū-ĉif-ic, *n.* [Lat. *mucos* = mucus, and *facio* = to make.]
Med.: Generating mucus.

mū-ĉi-form, *n.* [Lat. *mucos* = mucus, and *forma* = form.]
Med.: Having the character, form, or nature of mucus.

mū-ĉi-lāĝe, *s.* [Fr. from Lat. *mucilago*, mucus, in -state, from *mucos* = mucus, and *lagis* = slime, mucus.]

1. *U. S. J. J. J.*: A solution of gummy matter of any kind in water.
 **Decoction of ginseng roots and ad. F. extract almonds do not combine, the oil remaining on the top till they be stirred and make the decoction clear, what more liquid*; *Benoni*, *Pharmacop. Reform.*

2. *Chem.*: The gum of seeds and roots. It is present in large quantities in the root of the marsh-mallow and in linsed. To some extent it appears to be an almost universal constituent of plants, and is obtained by steeping the seeds or roots in hot water, when it assumes the character of a thick jelly. The soluble mucilage may be extracted by the action of agitated water on linsed and precipitating the impurities from a concentrated solution by alcohol. It is less transparent and less brittle than gum, and is precipitated from its aqueous solution by tincture of gold. The name is also given to commercial adhesive gum made from gum arabic or dextrin.

3. *Pharm. (Pl.)*: Watery preparations of substances dissolved in water, used to suspend insoluble ingredients or to bind them together in a mass. They also sheath irritated surfaces. (*Gerrol.*)

**Animal mucilage*: The same as MUCUS (q.v.).

mū-ĉi-lāĝ-i-nōūs, *a.* [Fr. *mucilagineux*, from *mucilage* = mucilage, from Lat. *mucilage* (sunt. *muciliginis*).]

1. Pertaining to or secreting mucilage; as *mucilagineous glands*.
 2. Of the nature of mucilage; resembling mucilage; slimy, moist, and slightly viscid.
 **There is a sort of magnetism in gum arabic, gum elastic, and in all other, not mucilagineous, but resinous gums*; *Merriv*, *Conn. Sacra*, bk. i, ch. i.

mucilaginous glands, *s. pl.*
Anat.: The name given by Dr. Clopton Havers, in 1691, to the fringed vascular folds of the synovial membrane.

***mū-ĉi-lāĝ-i-nōūs-nēss**, *s.* [Eng. *mucilagineous*; -ness.] The quality or state of being mucilaginous; sliminess, viscosity.

mū-ĉin, *s.* [Eng. &c. *mucos*; -in.]

Chem.: Vegetable Casein, Mucedin. Found in wheat, and forming one of the constituents of crude gluten. It is obtained from it by digestion with alcohol of 87 per cent., and the solution evaporated to one half, when a flocculent precipitate of mucin is formed. It is purified by solution in boiling alcohol, the mucin being precipitated on cooling the liquid. When treated with absolute alcohol, it dries up into a granular grayish-white substance. It has nearly the same percentage composition as albumin. Mucin is also a constituent of animal mucus.

mū-ĉip-a-roūs, *n.* [Lat. *mucos* = mucus, and *pario* = to produce, to bring forth.]
Med.: Producing or generating mucus.

***mū-ĉiv-ōr-a**, *s. pl.* [Lat. *mucos* = mucus, and *oro* = to devour.]
Entom.: Dipterous insects, feeding on the mucus or juices of plants. (*Brouss.*)

mū-ĉi-vōrc, *s.* [MUCIVORA.] An insect belonging to the family Mucivora.

mũ-cô cõcic, *s.* [Lat. *mucosus* = muens, and Gr. *κῆρα* (*kēra*) = a tumour.]

Pathology:
 1. An enlargement or protrusion of the mucous membrane of the lachrymal passage.
 2. Dropsy of the lachrymal duct. (*Dropsis*.)

mũ cõn ic, *a.* [Eng. *mucic* (l), and (*co*)*n*ic.] (See the compound.)

muonic acid, *s.*
 Chem.: C₂H₂O₄. A monobasic acid formed by the decomposition of dibromo-adipe acid by argentic oxide. It forms large crystals with numerous faces, which dissolve easily in water, alcohol, and ether, and melt at about 100°. By boiling with solution of hydrate of barium, it is decomposed into acetic, succinic, and carbonic acids.

mũ cõ pũr-ñ lænt, *a.* [Lat. *mucosus* = muens, and Eng. *puerulent* (q.v.).] Having the character and appearance of muens and pits.

mũ-cor, *s.* [Lat.]
 I. *Oral. Lang.*: Mouldiness, mustiness, mould.

II. *Technically*:
 1. *Bot.*: The typical genus of the sub-order Mucorini. The sporangium is globose, with many spores. It contains the common moulds on paste, decaying fruits, &c. The typical species is *Mucor mureto*, which has the spores, &c., first whitish, but afterwards blackish. It is very common.
 2. *Med.*: The same as Mucets (q.v.).

mũ-cõr ã-çẽ-æ, *s. pl.* [Lat. *mucor* (q.v.); fem. pl. adj. suff. *-mucor*.]
 Bot.: A name for the fungaceous order Physomycetes (q.v.).

mũ-cõr-ĩ-nĩ, *s. pl.* [Mod. Lat. *mucor* (q.v.); Lat. masc. pl. adj. suff. *-mucor*.]

Bot.: A sub-order of Physomycetes Fungals. Mycelium filamentous, forming floccs or clouds in or on decaying animal and vegetable substances, spore-bearing vesicles rupturing so as to discharge their spores. Allied to Mucorines, but in the latter sub-order the spores are free.

mũ-cõse, *a.* [MUCOUS.]

mũ-cõs-ĩ-tý, *s.* [Eng. *mucosus* (*o*); *-ity*.]
 1. The quality or state of being mucous; mucousness.
 2. A fluid containing or resembling muens.

mũ cõ-sõ-sãc-char-ine, *a.* [Lat. *mucosus* = mucous, and Eng. *saccharine*.] Partaking of the qualities or character of mucilage and sugar.

mũ cõus, **mũ cõse**, *a.* [Lat. *mucosus*, from (q.v.); *Sp. mucoso*, *mucoso*.]
 I. *Ordinary Language*:
 1. Of or pertaining to muens; resembling muens; slimy,ropy, viscid.
 "If hath in the tongue a mucous and slimy extremity."
 Beowulf; *Vulgar Frasers*, bk. III, ch. XMI.
 2. Secreting muens; as, the *mucous membrane*.

II. *Bot.*: Covered with a slimy secretion or with a coat that is readily soluble in water and becomes slimy, as the fruit of *Sol in Ferri-human*. (*Lindley*.)

mucous corpuscles, *s. pl.*
 Physiol.: Very transparent corpuscles with a cell wall, a nucleus, and a number of minute caving indenticles, in the mucous liquid of the mouth. (*Croftly & Welford*.)

mucous membranes, *s. pl.*
 Med.: Membranes consisting of prolongations of the skin, having their surface coated over and protected by muens. Their chief divisions are the gastro-pneumonic and genito-urinary muens membranes, the former covering the inside of the alimentary canal, the air-passages, &c.; the latter the inside of the bladder and the urinary passage. (*Quain*.)

mucous tissue, *s.*
 Med.: The jelly-like connective tissue containing muens. (*Quain*.)

mũ cõus nẽss, *s.* [Eng. *mucous*; *-ness*.] The quality or state of being mucous; mucosity.

mũ cõ vĩn-ic, *a.* [Eng. *mucic* (l); (*co*)*n*ic], and (*ic*).] Derived from or containing muenic acid and vinylic alcohol.

mucovinic acid, *s.*
 Chem.: C₂H₂(HO)₂CO(C₂H₃O)₂. Ethylmuenic acid. A crystalline substance formed as a secondary product in the preparation of muenic acid. It is white, and of asbestose appearance, the crystals having the form of a prism with rhombic base. They are moderately soluble in water, but only slightly in alcohol. It forms definite salts with the alkalis and the metals.

mũ crõ, *s.* [Lat. = a sharp point.]
 1. *Oral. Lang.*: A point.
 "The mucron point of the heart inclineth unto the cit."
 Beowulf; *Vulgar Frasers*, bk. III, ch. II
 2. *Bot.*: A hard, sharp point. [MUCRONATE.]

mũ-crõ-nãte, **mũ-crõ-nãt-ẽd**, *a.* [Lat. *mucronatus*, from *mucro* (genit. *mucronis*) = a sharp point.]
 1. *Oral. Lang.*: (See extract.)

"Muens are here shot into also, consisting of six sides, and mucronate for terminating in a point."
 Woodward, *On Fossils*.
 2. *Bot.*: Abruptly terminated by a mucro (q.v.).

mũ-crõ-nãte-ly, *adv.* [Eng. *mucronate*; *-ly*.] In a mucronate manner.

mũ crõn u-lãte, **mũ crõn-ũ-lã-tõus**, *a.* [Dimin. of *mucronate* (q.v.).]
 Bot.: Having small hard points, as *Banksia cœloglobata*.

mũ-cũ-lẽnt, *a.* [Lat. *muculentus*, from *mucosus* = slime, muens.] Shiny, ropy, and somewhat viscid.

mũ-cũ-nã, *s.* [From *Mucuna guana*, the Brazilian name of *Mucuna urans*.]

Bot.: A genus of papilionaceous plants, sub-tribe Erythrinæ. The legumes are covered with stinging hairs, which, if touched, come off upon the hand. *Mucuna purpurea* is the Cowitch or Cowage (q.v.). *M. monosperma* and *M. urens* are used in India as vegetables.

mũ-cũs, *s.* [Lat. = the viscous substance within the nose.]
 1. *Anat. & Pathol.*: Under this name various substances are included, consisting chiefly of honey-like substance, epithelium, detached from the muens surfaces, and floating in a peculiar viscid, clear fluid; in some cases these secretions are altered, becoming albumoid, &c. Muens affections are, muens, an inflammatory product; muens cysts; muens laryngitis; poly-pi, softening, tumours.

2. *Bot.*: Gummy matter, soluble in water. It also contains muens (q.v.).
 mũ-cũs-ine, *s.* [Eng. *mucosus*; suff. *-ine*.]
 Physiol.: The characteristic organic matter of animal muens.
 mũd, *s.* [O. L. Ger. *mudde*; O. Sw. *mudd* = mud; *mudde* = mother, lees; Dut. *mudde* = mud; Pan. *mudde* = mud; Ger. *mutter* = mother, lees; Lecl. *mudha* = (1) a large river,

(2) mud; *mudh* = refuse of hay; *mudhr* = muddy snowbanks, heaps of snow and ice.]

1. *Oral. Lang.*: Moist, soft earth; mire, slime; clay or earthy matter mixed with water.

"But between them and the enemy lay three broad rivers filled with water and soft mud."
 Woodward, *On Fossils*, ch. V.

2. *Geol.*: The finer particles left when rocks, stones, pebbles, &c., are ground against each other or disintegrated by other agencies. Sometimes, where sand, gravel, and mud or silt are brought down a river to the sea, the gravel, sand and mud are separated, the mud remaining mechanically suspended in the water, after the coarser gravels and then the finer sands, have sunk to the bottom. According to the composition of the rocks from which it was derived will be its chemical composition. Shale is hardened and compressed mud; slate is mud having undergone metamorphic action. [SHELL, SLATE.] Mud contains diatoms and other minute algae. When the surface of the fresh-water mud is red, that colour arises from the presence of a small worm, *Tubifer rivularum*.

mud bath, *s.*
 Theat.: A bath in which the body is immersed in mud, often with chemical ingredients. At Eger, in Bohemia, boggy earth is artificially converted into black mud, heated to 100° of temperature. It contains sulphate of soda, iron, lime, alumina, and ulmic acid. The body is immersed for fifteen minutes, after which the patient goes into water to remove the mud. Such a bath may be of use in chronic skin-diseases, chronic rheumatism, gout, &c., though fresh air, temperance, regularity of life, and relaxation from business may have great influence in effecting the cure.

mud-boat, *s.* A kind of barge for carrying off mud dredged from a river-channel or bar, and having convenient provision for discharge.

mud-burrower, *s.*
 Zool.: Callianassa, a genus of crustaceans which burrows in mud.

mud-devil, *s.* [MENOPONIE.]

mud-drag, *s.* A machine for raking up the mud of a river, in order that it may be carried off by the current.

mud-dredger, *s.* A dredging-machine.

mud-cel, *s.*
 Zool.: *Sipon leucinum*, a perennibranchiate amphibian, family Salamanders (q.v.). It abounds in the rice-swamps of North Carolina, and attains a length of three feet. The hinder limbs are wanting. [SALLEN.]

mud-eruption, *s.* [MOVA.]

mud-fish, *s.*
 Ichthyology:
 1. *Slug*: *Amia cœtera*, the sole species of the family Amiidae (q.v.). The colour is dull, often dark-greenish, with black spots and bands, and there is frequently a round black spot on the tail. It attains a length of about two feet; it feeds on fluviatile crustacea, and is sometimes eaten by the Indians. It is limited to rivers and lakes of the United States; abundant between the Rocky Mountains and the Alleghanes. Sometimes called the North American Mud-fish.

2. (*Pl.*): The order Dipnoi (q.v.).
 (1) *African mud-fish*: [PROTOSTERUS].
 (2) *North American mud-fish*: [MUD-FISH].
 (3) *Australian mud-fish*: [CERATODUS].

mud hen, *s.*
 1. The American coast, *Fulica americana*, a dusky-black wading bird common in the United States.

2. [MARSH-HEN.]

mud hole, *s.*
 Steam-car.: A covered opening in the bottom of a boiler for discharging the dirt and sediment.

mud-lamprey, *s.*
 Ichth.: The young of the Sand-pride, *Petromyzon branchialis*. [LAMPREY, PETROMYZON.]

mud lark, *s.* A man or boy who cleans out sewers, or fishes up pieces of coal, metal, &c., from the mud of tidal rivers.

mud pattens, *s. pl.* Broad wooden soleboards for travelling on mud. [MUD, *s.*, 1.]

mud-plug, *s.*
Steam-eng.: A tapered stopper, removed from a boiler to allow the mud to escape.

mud sill, *s.*
1. *It.*: The lowest sill of a structure, which may be in the mud or on the surface of the earth; specifically, longitudinal runners under the sleepers or ties in American railways.
2. *Fig.*: One of the dregs of society; the lowest of the low. (*American.*)

mud-sucker, *s.* Any bird which sneaks or silt the mud for the animals or organic matter on which it feeds.
"In all water fowl, their legs and feet correspond to the way of life; and in *mud-suckers*, two of the toes are somewhat joined, that they may not easily sink."—*Berlin.*

mud-tortoises, *s. pl.*
Zool.: The family Trionycides (q.v.). Called also Soft Tortoises, because the carapace is incompletely ossified, and covered with a leathery skin instead of with tortoiseshell.

mud-turtle, *s.*
Zoology:
1. *Sinu.*: *Chrysemys picta*, a small turtle, the male of which has claws on its front feet twice as long as those of the female. It is found in the United States.
2. *Pl.*: [MUD-TORTOISES].

mud-valve, *s.*
Steam-eng.: A valve by which mud is discharged from a steam-boiler.

mud-wall, *s.* A wall built of earth or clay; one of materials laid in clay as a substitute for mortar.
"The country about was thick set with trees, and otherwise full of gardens and mud-walls."—*Katech. Hist. World*, bk. v, ch. iv, § 14

mud-walled, *a.* Having the walls built of mud.
"As folks from mud-walled tenement
Bring landlords paper-curt for rent."

1. *Ichthy.*: The typical genus of the family Mugilide (q.v.). They frequent brackish waters, feeding on organic substances mixed with mud and sand. The organs of the pharynx are modified into filtering-apparatus, preventing the passage of large substances into the stomach. About seventy species are known; the majority attain a weight of four, but some grow to ten or twelve pounds. All are eaten; some are highly valued, especially when taken in fresh water. *Mugil octocephalus*, *M. capito*, *M. auratus*, and *M. septentrionalis* are abundant on the British coasts; *M. entus* is occasionally taken in the British Channel; *M. cephalus* is met with in the Mediterranean and the lakes and rivers of North Africa; *M. nepalensis* and some other species are confined to fresh water. *M. proboscideus*, a fresh-water species from Central America, has the snout pointed and fleshy, thus resembling the genus *Agonostoma*. (*Günther*.)

A. As *adj.*: Of or belonging to M. Muhammad or his system of belief or polity.

B. As *subst.*: A follower of Muhammad. [MUHAMMADANISM.]

Muhammadan-architecture. The style of architecture adopted by Muhammadan nations, as the Moors of Spain, the Arabs, &c. It was gradually developed out of the forms which were found ready to hand in the various countries over which they spread, and which belonged for the most part to early Christian art of the later Roman period, together with an admixture of Asiatic elements. In the earliest times Christian churches were utilized for the practice of the new religion; afterwards mosques were erected. In accordance with the Oriental manner of life, this style is internal rather than external, especially in palaces and dwelling-houses. Whilst the tasteless exterior of the buildings only displays to the eye high walls which are irregularly pierced by small windows, and the few in number, every thing in the interior is richly decorated. The richest ornamentation is lavished on the most essential part of these buildings, namely, on the porticoes which surround the open court. There are no fixed orders or proportions for the pillars, sometimes they are squat and heavy; at others slender and graceful, especially in the later period. Three different forms of arches are found, besides the circular arch, which is of rare occurrence. In Egypt and Sicily the pointed arch, resembling that afterwards adopted in the Gothic style, was used; in Persia and India the keel-arch (the ends of the curves are bent slightly upwards like the keel of a vessel); and in Spain the horseshoe arch, which consists of a larger segment of a circle than a semicircle. The walls over these arches, as all flat surfaces, were covered with embellishments in the shape of arabesques consisting of flat relief in stucco, or painted in brilliant colours. They are formed of the most multifarious entwinnings of straight or curved lines or belts. Domos are introduced freely, and are, for the most part, flat or plain externally, or ornamented with stripes like a gourd. Dwelling-houses are tasteless externally, but the interiors display wealth and luxury. Overhanging balconies are used in the upper stories, and the windows are small and elevated. The Arabian system of ornamentation is not so pure as the Moorish, and the Turkish style kept more closely to the Byzantine. The finest specimen of Muhammadan architecture and ornamentation is the Alhambra, at Granada.

Mu-ham-ma-dan-ism, Mo-ham-me-dan-ism, Ma-hom-et-an-ism, n. [Arab. *Muhammad*; Eng. suff. -an; -ism, Muhammad is from the Arabic root *hamd*=the Praised.]

Compar. Religions: The religion founded by Muhammad, the so-called Prophet of Arabia. He was born at Mecca, of good family, Aug. 29, 570, but, while an infant, lost his father, Abdullah, and, at the age of six, his mother, Anna. When a child he had a fit, probably epileptic. At the age of twenty-five he married Khadijah, a widow of forty, the first of his many wives, and was faithful to her while she lived. At the age of forty he often retired to a cave at the foot of Mount Hira for religious meditation. Three years later he began to proclaim his views, and, after a time, claimed to be a prophet. Among his early converts were his wife, Khadijah, Ali, his cousin, then a boy of fourteen, afterwards his adopted son and his son-in-law, and Abu Bakr, or Abubeker, his friend. On June 29, 622, he had to flee from Mecca to Medina. This date is the Moslem era of the Hijira (i.e.v.). At Mecca he had been an enthusiast, at Medina he became a fanatic. On Jan. 12, 624, at the head of 300 followers he defeated 950 of the Meccans. The victory was considered miraculous, and encouraged him in future to propagate his faith by the sword, and he was so successful that at his death (June 8, 632) he was virtual sovereign of Arabia. During the Caliphates of his immediate successors Abubeker (632-634) and Omar (634-646), the Arabs, or Saracens, conquered Syria, Persia, and Egypt, and established the new faith. Othman reigned next (644-657). Then the Arabs elected Ali, Mu-

hammad's son-in-law, strong, passed over to Ali; but the Syrians chose Mu'awiah, son of Abu Sufyan, an old enemy of the prophet. Civil War resulted, and the sects of the Sunnis and Shi'ah arose. Ali was assassinated in 661. Hassan and Hossain, his sons, soon after perishing. In 710, Laris, landed in Spain, the stunts where he had passed and the adjacent rock being ever afterwards called Gibraltar (q.v.). In 732 Charles Martel (= the Hammer) defeated the Arab Abd-Allah-man at Poitiers, saving Western Europe. The Saracen capitals had been successively at Medina, at Cufa, at Damascus, and at Bagdad, their dynasties were the Umayyads, Abbasids, &c. About the middle of the eighth century, the Saracen empire in the East began to be broken down by the Turks, then a savage Tartar tribe, who afterwards embraced Muhammadanism, and in 1453 took Constantinople, terminating the Greek or Eastern empire. Since the sixteenth century their power has been less dreaded. The Muhammadans of the world have been estimated at 250 millions, of whom 50 millions are in India, 40 millions directly under British rule, and 10 millions in allied or tributary states. The Koran (= that which is read or recited) is their sacred book and their code of law. Their faith is called Islam (= surrender of the will to God). Five duties are incumbent on the faithful Muhammadan—a confession of faith that there is but one God, and that Muhammad is his prophet, prayer, fasting, almsgiving, and a pilgrimage to Mecca. Friday is their sabbath and day of special worship. Raising the nations which have embraced it to a higher creed than their old idolatry, Islam has so far exceeded them as to render all further changes intensely difficult. No other faith offers so stubborn a resistance to the spread of Christianity.

müle, s. [A. S. *mul*, from Lat. *mulus*, Fr. *mule*.]

I. *Ordinary Language*:

1. *Lat.*: In the same sense as H 1.

2. *Lat.*: A stubborn, sulky person.

II. *Technically*:

1. *Zool.*: A term loosely used as synonymous with hybrid (q.v.), more usually applied to the produce of a male ass with a mare, the Mule proper (*Equus asinus*, var. 5), and to the Hinny (*E. asinus*, var. 6), the offspring of a stallion and a she-ass. The mule does not attain maturity so soon as the horse, but is useful for a much longer period. As a beast of burden it is in some respects preferable to the horse; it is easily fed, & equally good for carrying and drawing, its less sensitive skin enables it to support exposure to the weather; like the ass, it enjoys comparative immunity from disease, and it is as sturdy of as a goat. Mules have been known from the earliest ages, there are frequent references to them in Scripture, and in Greek (*mul*, var.) and Latin (*mulus*, A. S. m. 5, 21) literature. France is the most important mule-raising country in Europe; then come Italy, Spain, and Portugal, where they are used for pack and draught. Kentucky, Missouri, and Kansas take the lead in the United States, and the Mexican mule (by a male ass from a mustang mare) is a very useful animal. Mules are seldom used, and seldom bred, in England. They are largely employed as draught animals in warfare, probably for the first time in the English service in the Peninsula War, but they have since been used with great advantage in the Crimea, India, Abyssinia, South Africa, and Egypt. In the *Proceedings of the Royal Society* (1854) is a paper by Mr. A. D. Barlett, then superintendent, describing a remarkable

hybrid born in the Gardens. On Oct. 29, 1868, a female hybrid was born from a Gayal cow (*Bos javanicus*) and a Zebu bull (*Bos indicus*); from this female hybrid and a Bison bull (*Bis. americanus*) a second female hybrid was born on May 21, 1881, from which and a Bison bull a third female hybrid was born, March 12, 1884—the offspring of certainly three well-marked species, and, according to present definition, of three distinct genera.

"The hybrid, so general, that all hybrids of *mule* are barren and useless for breeding purposes, simply a stupid and ignorant prejudice" — *Proc. Zool. Soc.*, 1881, p. 44.

2. *Bot.*: A hybrid; a cross between two distinct species. They are produced by the application of the pollen of one to the stigma of the other. Mules between two different genera are called *h*-geners. They are rarely obtained.

3. *Faun.*: A disease in horses.
4. *Nomis*: A coin or token in which the obverse or reverse dies have no real connection.
5. *Spinning*: A spinning machine in which the rovings are delivered from a series of sets of drawing rollers to spindles placed on a carriage, which travels away from the rollers while the thread is being twisted, and returns while the rollers while the thread is being wound. It was invented by Samuel Crompton, and perfected in 1779. The combination which gave rise to the term *mule* was the junction of the drawing rollers of Arkwright with the spinning-jenny of Hargreaves. The object of the machine is to deliver the roving with the required degree of attenuation and twist it as delivered. For this purpose, the spindles, instead of being stationary, are placed on a movable carriage, which is wheeled out to twist the threads and wheeled in again to wind on the spindles.

mūl-lēt (1), mol-et, mul-ot, s. [*Fr. mulet*, from *Low Lat. mulus*; *Lat. mulus* = a mulett.]

Ichthy.: The popular name of the genus *Mullus* and of the family Mugilide. The former are distinguished as Red, and the latter as Gray Mulletts. Red Mulletts are ground-feeders, using their barbels in discovering their food; it was believed that they fed on putrid flesh, but probably they are attracted to decomposing bodies by the small crustaceans which feed thereon. Little is known of their habits; in winter they retire into deep water, in summer they approach the coasts, and are sometimes found in brackish waters. They are brilliantly coloured, and as food-fish should claim the attention of pisciculturists. The Gray Mullet is plainly coloured, greenish on the upper parts, and more or less silvery on the sides. The flesh is well-flavoured, and it is largely cultivated in the fish-farms of Western Italy.

mullet-hawk, s.
Ornith.: A popular name on the south coast of England for *Pardalinus (Falco) haliastur*, the Osprey (q.v.).

mūl-lēt (2), s. [*Fr. moulette*, *moulette* = the bowl of a spur; *O. Ital. mullotte* = a mullet, from *molla* = a wheel, from *Lat. mola* = a mill.]

1. *Oral Lang. (Fl.)*: Small pincers used for curling the hair.

"Here's a hair too much; take it off; where are thy mullets?" — *Ben Jonson*: *Cynthia's Revels*, v. 2.

2. *Her.*: A figure resembling the rowel of a spur, having five points in English heraldry and six in French. It is the filial distinction of a third son.

"And in the chief three mullets stood."
Scott: *Marmion*, iv. 2.

mũl leý, s. [Provenc. Eng. *mull* = a cow; dumm. suff. *-y*; cf. Gael. *mool* = bare, polled; without horns.] A cow.

mũl-li-çite, s. [From Mullica Hill, New Jersey; suff. *-ite* (Min.)]

Min.: A variety of Vivianite (q.v.), occurring in cylindrical aggregations of fibro-lamellar crystals in a friable ferruginous sand. These are mostly replacements of fossil bleminites. It is also pseudomorphous after other fossils.

mũl-li-dæ, s. pl. [Lat. *mull(us)*; fem. pl. adj. suff. *-æ*.]

Ichthy.: Red Mulletts, a family of teleostean fishes. Body low, rather compressed, covered with large thin scales, sometimes with a fine serrature; two long erectile barbels. Lateral line continuous. Mouth in front of the snout; teeth very terrible. Two short dorsals, remote from each other; anal similar to second dorsal; ventrals with one spine and five rays; pectorals short; branchiostegals four; stomach siphonal. Mullus, the sole genus of the family, is divided into several sub-genera, on account of slight differences of dentition. They are marine, but many species enter brackish water to feed on the animalcula abounding in the flora. About forty species are known; all esteemed for food, but none attain a large size. (Günther.)

mũl-li-ğatâw-ný, s. [MULLAGATAWNY.]

mũl-li-ğrũbş, s. [Etyim. doubtful.]

1. A pun in the stomach; colic.

mũl-lõ-dõş, s. [Lat. *mullus* (q.v.), and Gr. *eidõs* (*eidõs*) = form.]

Ichthy.: A sub-genus of the family Mullide, closely resembling the sole genus Mullus, as the name denotes.

mũl-lũs, s. [Lat.]

Ichthy.: The typical and only genus of the family Mullide. *Mullus barbatus* is, according to Dr. Günther, the sole species, of which he considers *M. surmuletus* to be the female. It was highly prized by the Romans, who paid extravagant prices for it, especially when it attained a considerable size, a circumstance often noticed by the satirists, especially by Martial (x. 31) and Juvenal (v. 92). It was the custom to bring the fish into the banqueting-room that it might die in the presence of the guests, its red colour becoming exceedingly brilliant in its death-struggles. Fishermen deepen the natural tint of the fish by sealing it immediately after capture, causing a permanent contraction of the chromato-phores containing the red pigment. [MULLET (1), s.]

mũl-mũl, s. [MULL (2), s.]

Fabrics: A thin, soft, transparent muslin of the finest quality.

mũl-qũf (q as k), [Arabic = a wind-conductor.] (See EXTRACT.)

"Perhaps the most ancient device for directing speedily constructed for that purpose, is the *mul-quf* which has been in use in Egypt for at least 3000 years, and is still to be seen attached to the modern houses of Cairo and other towns. It is a square of dry cotton of the prevailing wind, which is conducted down the descending chute and thence disseminated through the house. It consists of a long wooden framework, to which planks are nailed, according to the length and breadth desired. If height and velocity be required, the framework is covered with reed mats, plastered. They are common to all ancient oriental architecture, whose true presentation is in a study of New York towards the prevailing wind.—*Knapp's Dictionary of Mechanics*.

mũl-se, s. [Lat. *mulsim* (*ribum*) = sweetened (wine); *mulsis*, pa. par. of *mollis*; = to sweeten.] Wine boiled and mixed with honey.

mūl tī nō mī al, *a. & s.* [Lat. *multus* = many, and *nomen* (genit. *nominis*) = a name.]

- A.** As adjective:
 Ab.: Having many terms; as, a multinomial expression.
- B.** As subst.: A quantity consisting of several terms, as distinguished from a binomial or trinomial (q.v.).

multinomial theorem, s.

Alg.: A theorem discovered by Demorville for forming the numerical coefficients which are produced by raising any multinomial to any given power, without the trouble of actual evolution. It may be expressed by the following rule:

"The square of any multinomial expression consists of the square of each term, together with twice the product of every pair of terms;" or, "The square of any multinomial expression consists of the square of each term, together with twice the product of each term, by the sum of all the terms which follow it."

* **mūl tī nōm in al**, * **mūl tī nōm in ous**, *a.* [Lat. *multinominus*.] Having many names or terms. [MULTINOMIAL.]

* **mūl tīp ar ous**, *a.* [Lat. *multus* = many, and *parto* = to bring forth.] Bringing forth many at a birth.

"Animals feeble and tumorous are generally multiparous."—*Ray*: On the Creation.

* **mūl tī pēde**, * **mūl tī pēd**, *s. & a.* [Lat. *multipectus*; *multus* = many, and *pes* (genit. *pedis*) = a foot.]

- A.** As subst.: An animal having many feet, as a centipede.
- B.** As adj.: Having many feet.

mūl tī ple, *a. & s.* [Fr., from Lat. *multus* = many, and *plico* = to fold; cf. quadruple, triple, &c.]

- * **A.** As adj.: Manifold; having many parts or relations.
- B.** As substantive:
 Arith., & *Alg.*: A number which contains another number an exact number of times without any remainder. Thus, 20 is a multiple of 5.

* (1) *Comm.* of multiple of two or more numbers:

Arith.: Any number which contains each of these numbers an exact number of times without any remainder. As, 30 is a common multiple of 2, 5, and 6. The least common multiple is the smallest number which will do this; thus, 24 is a common multiple of 3 and 4, but 12 is their least common multiple.

(2) *Multiple point of a curve*:
 Geom.: A point in which two or more branches of a curve intersect each other. The analytical characteristic of a multiple point of a curve is, that at it the first differential coefficient of the ordinate must have two or more values.

multiple bolt, s. An arrangement by which a number of bolts are simultaneously moved. It was a common feature on the strong-boxes of other days, and has been revived upon safe-doors.

multiple echo, s. [ECHO.]

multiple fruit, s. A fruit resulting from the union of more flowers than one. (*Gray*.)

multiple images, s. pl.

Optics: A series of images produced when the image of a candle is looked at obliquely in a glass mirror. They do not arise when a metallic mirror is used. The latter consequently is more suitable for optical instruments.

multiple pointing, s.

Soots Law: A process by which a person holding money or other property, which is claimed by two or more persons, obtains an authoritative arrangement for the equitable division of it among the several claimants. It corresponds to an interpleader in English law.

multiple stars, s. pl.

Astron.: Stars in close proximity to each other and revolving round a common centre.

multiple values, s. pl.

Alg.: Symbols which fulfil the algebraical conditions of a problem, when several different values are assigned to them, as the roots of an equation.

mūl tī plēx, *a.* [Lat., from *multus* = many, and *plex* = a fold.]

- 1. (*Ord. Lang.*): Manifold, multiple.
- + 2. *Bot.*: In many folds or plaits. (Used of the petals of some plants in aestivation.)

* **mūl tī plī a ble**, *a.* [Fr., from *multiplier* = to multiply.] Capable of being multiplied; multiplicabile.

"Good deeds are very fruitful; and not so much of their nature, as of God's blessing multiplicably."—*Ep. Holtz*: *Meditations & Vows*, cent. 3.

* **mūl tī plī a ble nēss**, *s.* [Eng. *multipliable*; *-ness*.] The quality or state of being multiplicabile.

* **mūl tī plīc a ble**, *a.* [Lat. *multiplicabilis*, from *multiplier* = to multiply.] Capable of being multiplied arithmetically; multiplicabile.

"Those substances which are whole in the whole are by his own doctrine neither divisible nor multiplicably."—*Ap. Taylor*: *Of the Real Presence*, § 11.

mūl tī plī cānd, *s.* [Lat. *multiplicandus*, fut. pass. par. of *multiplico* = to multiply (q.v.)]

Arith.: The quantity which is to be multiplied by another called the multiplier.

"Multiplication hath the multiplicand, or number to be multiplied; the multiplier, or number given, by which the multiplicand is to be multiplied, and the product, or number produced by the other two."—*Wesley*: *Arithmetick*.

mūl tī plī cate, *a.* [Lat. *multiplicatus*, pa. par. of *multiplico* = to multiply.]

- 1. (*Ord. Lang.*): Consisting of more than one; multiple.
- "In this multiplicate number of the eye, the object seen is not multiplied, and appears but one."—*Berham*: *Physico-Theology*, bk. iv, ch. ii.

I. (*Ord. Lang.*): The act or process of multiplying or increasing in number by addition or production of the same kind; the state of being multiplied.

II. Technically:

1. *Alchemy*: An old name for the making of gold or silver by means of alchemy.

"Tom, you commanded multiplication and I contrived to be practised, thereby to abate the king's coin."—*Shoe*: *Lectures* 17, (art. 159).

2. *Arith.*: A rule or process by which the sum of a given number added to itself any number of times may be found; the operation or process of finding the product of two quantities. The product is the result obtained by taking one of the quantities as many times as there are units in the other. The quantity to be multiplied or taken is called the multiplicand, the quantity by which it is to be multiplied is called the multiplier, and the result of the operation is called the product. Both multiplicand and multipliers are called factors of the product. Multiplication is a simple and compound process of addition. Thus, 5 x 5 = 25 is the same as 5 + 5 + 5 + 5 + 5. Simple multiplication is when the terms are abstract numbers, and compound multiplication when the multiplicand is a concrete number, as pounds, shillings, and pence, miles, yards, and feet, &c.

multiplication table, s. A table showing the product of factors taken in pairs up to some assumed limit.

* **mūl tī plī cā tive**, *a.* [Lat. *multiplicatus*, pa. par. of *multiplico* = to multiply; Eng. adj. suff. *-tive*.] Tending or having the power to multiply or increase in number.

2. *Telegr.*: A frame with a number of repetitive windings of the same wire, in order to obtain their cumulative effect in deflecting a magnetized needle, when the wire is traversed by a current. An invention of Schweiger. Unless the current is sensibly diminished by the resistance of the wire, each convolution exerts an equal force on the needle, thus multiplying the defective force as many times as there are turns in the wire. Owing to the resistance, however, it frequently occurs in practice that a few turns of stout wire exert a greater influence on the needle than many convolutions of much finer wire.

mūl tī plī y, * **mūl tī plīc**, *ct. & i.* [Fr. *multiplier*, from Lat. *multiplico* = to make manifold, from *multiplus* (genit. *multiplus*) = manifold; Sp. *multiplicar*; Ital. *moltiplicare*.] [MULTIPLEX.]

II. Technically:
 1. *Archæol.*: The name given to animal remains chemically preserved from decay by various processes of embalming. By far the larger number of mummies that have been brought to light are human, for, according to

the religious law of ancient Egypt, some process of mummification was universally obligatory; but it was also the custom to embalm cats, crocodiles, ichneumons, and other sacred animals. Recent researches have established the fact that the practice was due to the belief in the necessity of preserving the body inviolate in readiness for the resurrection. The living man was supposed to consist of a body, soul, intelligence, and a shadowy *ka*, the mere aspect of the man. At death the intelligence was free to wander through space; the soul had to pass a probationary period in the under-world; the *ka* dwelt in the tomb with the mummified body, and, if this were destroyed or damaged, the *ka* suffered in like manner. Hence it was customary to deposit portrait statues of the wealthier Egyptians in their tombs to provide against the *ka* being left without a body. The British Museum has two statues of this description, from the tomb of Seti I., of the Nineteenth Dynasty. The Egyptian practice of mummification had a wide range in time. Miss A. B. Edwards (*Eng. Hist.*, (ed. 9th) xvii. 21) fixes its commencement at from 3800 to 4000 B.C., and Dr. Birch considers it to have continued till about A.D. 700. The ancient Peruvians practised a kind of mummification; and the Guanches, the aborigines of the Canaries, employed a method of embalming similar to that of the Egyptians, filling the hollow caused by the removal of the viscera with salt and an absorbent vegetable powder.

"It occurred many years ago to an intelligent inhabitant of Yorkshire that it would be possible to restore old rags to the condition of wool. He conceived his idea to a capitalist who said, 'That will not do.' The inventor applied in the Yorkshire district that man got *wools*, that must go. 'Very well said the capitalist, we will make trial of your scheme, and the first class of our industry shall be called *mungis*.'"—*Edin. Rev.*, Nov. 14, 1871.

mūn-goōs, **mōn goōsc**, s. [Mān dī a *mundugos*, *mundus*, Fr. *moulin*.] *Zool.*: *Beepetes ariseus*, an heliozoon, common in many parts of India, and closely akin to the Egyptian species, *B. laticornis*.

The mungoos is a weasel-like animal, every yellowish-gray, the head with reddish and yellow rings, the colours so disposed as to produce an iron-gray hue. Length of body sixteen or seventeen inches, of tail fourteen. It kills numerous birds, sucking their blood and leaving the body unscathed. It also with great audacity seizes and kills many snakes the formidable cobra included. Anglo-Indians have the notion that, when wounded by a venomous snake, it can heal itself by eating some remedial plant, (ORINORHIZA, ORINORHYZON), but this is an error.

mūn-grēl, s & a. [MONGRIE]

mū-nīç-i-pal, * **mū-nīç-i-pall**, s. [Fr. *municipal*, from Lat. *municipalis*, pertaining to a municipium or township which enjoyed the rights of Roman citizenship, while retaining its own laws; from *muni* (*municeps*) = a free citizen, one who undertakes office or duties; *palus* = a duty, and *caput* = to take; Sp. & Port. *municipal*.]

mūn jah, *s.* [MOONJAH.]

mūn jeēt, **mūn jeēth**, *s.* [Native Bengalee name.]
Bot. & Chem.: *Rubia Munjaca*, also called East India Madder, which is extensively culti-

vated in India. Its root furnishes a dye-stuff yielding colours somewhat similar to those of madder, the most important colour, alizarin, being absent. The principal colouring matters, purpurin and magdalin, are comparatively feeble, which renders mungget inferior to madder as a dye-stuff.

mūn jis tin, *s.* Mod. Lat. (*Indica*) *munjus*(?) = *indigo*.

Chem.: $C_{14}H_{10}O_4$. An orange colouring matter found in mungget. It is associated with purpurin ($C_{14}H_{10}O_4$) in the root, and is nearly related to it in composition. It is prepared by boiling the root with a solution of sulphate of alumina, decomposing the extract with hydrochloric acid and digesting the precipitated colouring matter with carbonic disulphide. It is obtained in the form of brilliant golden-yellow plates, which are moderately soluble in cold, but readily so in boiling water and hot alcohol. Boiled with alumina, it forms a beautiful lake of a bright orange colour, which is soluble in soda. The colours obtained are rendered moderately permanent by the use of mordants.

mūn niōn (i as y), *s.* [MELLION.]

1. A mullion.
2. A piece of carved work which divides the lights in a window of a stern or quarter gallery.

Corp.: A vertical piece between the panels of a double-panel door.

mūn ti ng i a, *s.* [Named after Abraham Munting, professor of botany, at Groningen, who died in 1682.]

Bot.: A genus of Tilliaceæ, tribe Tiliæ (q.v.). The flowers somewhat resemble those of the bramble, and the fruit that of the cherry. It grows in San Domingo, where the bark is made into ropes.

mūnt jác, **mūnt jäck**, *s.* [The Javanese name.]

1. *Zool.*: *Cervulus*, a genus of deer, indigenous in the southern and eastern parts of Asia and the adjacent islands. They are diminutive animals, with small and simple antlers in the males, which have the upper canines strongly developed and sharp, curving downwards, and capable of inflicting deep and dangerous wounds. Four species are known, *Cervulus muntjac*, *C. leucopygus*, *C. Reevesi*, and *C. crinifrons*, the hairy-fronted Muntjac, the latter species founded on a specimen deposited in the Gardens of the Zoological Society, in December, 1884. (See also *Proc. Zool. Soc.*, 1878, p. 898.)

HEAD OF *C. CRINIFRONS*.

2. *Paleont.*: (See extract.)
"Although the limbs of the modern genus *Cervulus* have attained a considerable degree of specialization, the characters of the cranium, antlers, and teeth are primitive, and almost exactly reproduce those of an extinct deer of the Miocene period, the remains of which are found abundantly at Sausen in the south of France, and Steinheim in Württemberg. — *Enge, Art. ed. Ath.*, xvii, 32.

Mūntz, *s.* [The name of the inventor.]

Mūntz metal, *s.*
Chem.: An alloy of six parts of copper and four parts of zinc. It is rolled into sheets, and is used for sheathing ships and for other purposes.

mu ræ na, *s.* [An old form of Lat. *marena*, from Gr. *μυρανα* (*muraina*) = a marine eel, a sea-serpent.]

Ichthy.: The typical genus of the family Murenidae (q.v.). Scaleless; the teeth well developed. Gill openings and clefts between the branchial arches narrow. No pectorals; dorsal and anal fins well developed. Two nostrils on each side of the upper surface of the snout. Eighty species are known, from the tropical and sub-tropical zones. *Murena murena*, from the Indian seas, attains a length of ten feet, and has the tail twice as long as the body. *M. Richardsonii* has the skin bled, so as to form pouches, and *M. undulata* is remarkable as not being able to close its mouth completely. The majority are armed with formidable pointed teeth; in a few species they are molar-like, and fitted for crushing crustaceans. Most of the Murenas are beautifully coloured. The species known to the Romans is *M. helena*, of a rich brown, marked with yellowish spots.

MURENA HELENA.

mu ræn ē sōx, *s.* [Lat. **muræna*(a), and *esox* = a pike.]
Ichthy.: A genus of Murenidae (q.v.). Four species are known, from tropical seas. *Muræna ciliaris* is very common in the Indian Ocean, and often attains a length of six feet. The jaws are furnished with canine teeth.

mu ræn ich thys, *s.* [Gr. *μυρανα* (*muraina*) = a marine eel, and *ἰχθυς* (*ichthys*) = a fish.]

Ichthy.: A genus of Murenidae, from the Indian Archipelago. The body is long and worm-like; there are no pectoral fins.

mu ræn i dæ, *s. pl.* [Lat. **muræna*(a); fem. pl. adj. suff. *-idæ*.]

Ichthy.: A family of physostomous fishes, with a very wide range in space. The body is elongate, cylindrical or band-shaped, naked or with rudimentary scales. There are no ventrals, and the vertical fins, if present, are confluent, or separated by the projecting tip of the tail. The family has two groups: (1) those with wide and (2) those with narrow branchial openings. Dr. Günther enumerates twenty-seven genera.

mu ræn ōid, *a.* [Gr. *μυρανα* (*muraina*) = a kind of eel, and *είδος* (*eidos*) = form.]

Zool.: Of or belonging to the Murenæ or the Murenidae (q.v.).

mu ræn ō lep is, *s.* [Gr. *μυρανα* (*muraina*) = a sea-serpent, and *λεπίς* (*lepis*) = a scale.]

Ichthy.: A genus of Gadidae, with one species, *Muræolepis marmoratus*, from Kerguelen's Land. The body is covered with lanceolate, epidermoid productions. Vertical fins confluent; no caudal discerible; an anterior dorsal fin is represented by a single filamentous ray; ventrals narrow, composed of several rays; a barbel; band of villiform teeth on jaws; palate toothless.

mu ræn ōp sis, *s.* [Gr. *μυρανα* (*muraina*) = a sea-serpent, and *ὄψις* (*opsis*) = appearance.]

Zool.: Another name for the genus *Amphiuma* (q.v.).

* **mūr āge**, *s.* [Fr. from *murer* = to fortify with a wall.] Money paid to keep walls in repair. [MERE.]

mür-ës, s. pl. [Nom. pl. of Lat. *mus* = a mouse.]

Zool. : A group of Murinae, having three series of cusps across each molar. It is composed of the following genera: *Mus* (typical), *Nesokia*, *Gomulna*, *Uromys*, *Haplotis*, *Mastacomys*, *Acanthomys*, and *Echinotrix*.

mür-ëx (pl. mür-i çës), s. [Lat.]

Zoology:
1. The typical genus of the family Muricidae (q.v.). It is of world-wide distribution, and 180 species are known. *Murex tenuispinus* is popularly known as Venus's Comb. The canal is produced to twice the length of the body of the shell, and fringed with three rows of long, slender spines, curved like the teeth of a harrow. In *M. adustus*, the spines somewhat resemble the branches of a holly-tree. *M. erinaceus*, common on the coasts of

Great Britain and the Channel Islands, is called 'strag winkle' by the fishermen, who say that it bores holes in other shell-fish with its beak. The celebrated Tyrian purple was obtained from a species of *Murex*. Heap of broken shells of *M. tenuis*, and other species in the rocks in which they were pounded, as in a mortar, may yet be seen on the Tyrian coast. *M. hercules* was used for a similar purpose in the Mæcæ.

2. Any individual of the genus, especially the species yielding the dye known as Tyrian purple. (*Herod. Solonon*, p. 11.)

mü-rëx-an, s. [Lat. & Gr. *murex*, *an* (q.v.).]

Chem. : $C_{12}H_{10}N_2O_6$. A substance formed by the decomposition of a boiling solution of nitroxyde by the stronger acids. The crystalline precipitate produced is purified by solution in cold sulphuric acid and precipitated by water. It is obtained as a white, heavy, lustrous powder, which is tasteless, infusible, and does not reddden litmus. It requires more than 10,000 parts of water to dissolve it. It is insoluble in alcohol, ether, dilute mineral and organic acids, but is soluble in aqueous alkalis. Its solution in ammonia turns purple by exposure to the air, nitroxyde being formed. With nitric acid, it forms nitrate of ammonium.

mü-rëx-ide, s. [Lat. & Gr. *murex*, *ide* (q.v.).] [PURPURATES.]

mü-rëx-öu, s. [Lat. & Gr. *murex*, *öu* (q.v.).]

Chem. : A product formed from amalic acid by the joint action of air and ammonia. It crystallizes from alcohol in four-sided prisms, having a vermilion colour. It resembles oxynitride, but is decomposed by potash instead of being turned blue.

mür-gëon, s. [Elym. doubtful. Cf. Fr. *murgon* = a wry face, a grimace.]

1. A grimace; a wry mouth. (Scott.)
2. A muttering, a grumbling.

muscular atrophy, s.

Pathol.: The name proposed by the Royal College of Physicians for a disease first recognised as distinct in 1853. It is a progressive degeneration, and consequent loss of volume and power, affecting the voluntary muscles. It commences with pain in the ball of the thumb, then affects one or both of the upper limbs, and sometimes the whole body. Called also Wasting-palsy, Peripheral-paralysis, or Lead-palsy without lead. (*Linnæus*.)

muscular Christian, s. [MUSCULAR-CHRISTIANITY.]

muscular Christianity, s. A term introduced by Charles Kingsley to denote that robust, healthy, religious feeling which encourages and takes an active part in the harmless and healthy amusements of life, as opposed to a puritanical, ascetic, or contemplative form of religion. Hence a muscular Christian is one who does not think it inconsistent with his religious feelings and duties to take an active part in the ordinary occupations of life, and to share its harmless and health-giving amusements.

muscular fibre, s.

Anat.: The fibrous portion of muscle. The fibres may be cylindrical or prismatic. They consist of a soft contractile substance in a tubular sheath.

muscular impressions, s. pl.

Zool.: The impressions left on the inferior bivalve shells by the muscles of the animal's body. They are those of the adductors, the foot and byssus, the siphons, and the mantle. (*P. S. Woodward: Mollusca* (2d ed.), p. 401.)

muscular motion, s.

Anat.: Motion produced by the action of the voluntary and involuntary muscles, or of both combined.

muscular-tissue, s.

Anat.: The tissue consisting of fine fibres, generally collected into muscles (q.v.) by means of which the active movements of the body are produced.

muscular-tumour, s.

Pathol.: A tumour in the abdomen, arising from various causes, and simulating disease, &c. Called also a phantom tumour.

* **mùs-cu-lâr-î-tý**, s. [Eng. *muscular*; -*ity*.] The quality or state of being muscular.

* The cuts of a steer, taken out and cut to pieces, will still move, which may depend upon their great thickness and muscularity.—*Greene: Museum*.

* **mùs-cu-lâr-ize**, v. t. [Eng. *muscular*; -*ize*.] To render muscular, strong, or robust; to develop the muscles or strength of.

* **mùs-cu-lâr-lý**, adv. [Eng. *muscular*; -*ly*.] In a muscular manner; strongly.

mùs-cu-lâr-tus, s. [Lat. *muscul(us)*; Eng. suff. *-atus*.] The whole muscular system.

* A detailed account of the *musculature* of the Nautilus.—*Encyc. Brit.* (ed. 9th), xvi. 675.

mùs-cu-lînc, s. [Lat. *musculus* = muscle; Eng. suff. *-anc*.]

Physiol.: (See extract).

* A semi-solid organic principle peculiar to the muscular tissue. It is always united with a considerable quantity of inorganic salts, in which the phosphates predominate. *Musculin*, in combination with inorganic substances, goes to form the *muscles*. . . . It is the great source of the fibrin and albumen of the blood of man and of the carnivorous animals.—*Frost: Physiol. of Man*, i. 26.

mùs-cu-lînc, s. [Lat. *musculus* = a muscle of muscle; Eng. suff. *-ite* (*Palæobot*).] A petrified muscle or shell.

mùs-cu-lô, prof. [Lat. *musculus* = muscle.] Pertaining to the muscles.

musculo-cutaneous, a.

Anat.: Of or belonging to the cutis, or true skin, and to the muscles. There is a *musculo-cutaneous* nerve of the arm, and another of the leg.

musculo-phrenic, a.

Anat.: Connected with the diaphragm and with the muscles. There is a *musculo-phrenic* artery.

musculo-spiral, a.

Anat.: Connected with the muscles and spiral in its winding. There is a *musculo-spiral* nerve.

* **mùs-cu-lôs-î-tý**, s. [Eng. *muscular*; -*ity*.] The quality of being muscular or muscularity.

* **mùs-cu-lôus**, a. [Lat. *musculosus*, from *musculus* = muscle; Fr. *musculaire*; Ital. & Sp. *musculosus*.]

1. Of or pertaining to a muscle or the muscles; muscular.

* The several *muscles* of the *muscular* members.—*P. Holland: Phytotech*, p. 595.

2. Having strong muscles; muscular, brawny.

mùsc (I), s. [Fr., from Lat. *musca*; Gr. *μύσκα* (*mysca*) = a musc; Sp., Port., & Ital. *mosca*.]

I. Ordinary Language:

1. In the same sense as II. 1.

* O lady mine, that called art Cleo, Thou be my spede to this forth, and my *Musc*.—*Chaucer: Treatise of Criseida*, bk. ii.

2. The inspiring goddess, deity, or divinity of poetry.

* Why weeps the *Musc* for England?

Cooper: Expatriation, 1.

3. A particular power and practice of poetry.

* 4. A poet, a bard.

* So may some gentle *Musc* With lucky words favour my destined urn.—*Milton: Lycidas*, 19.

II. Gr. & Rom. Myth.: One of nine nymphs or inferior divinities, distinguished as the peculiar protectresses of poetry, painting, rhetoric, music, and generally of the *belles lettres* and liberal arts. They were the daughters of Zeus and Mnemosyne (Memory). Originally there appear to have been only three of these divinities, and their names—Mneme, Melete, and Aoidê, or Memory, Reflection, and Song—sufficiently show the nature of the faculties over which they were supposed to preside. According as the fine and liberal arts were cultivated and expanded, the province of each musc seems to have been more restricted; and additions were made to their number, which ultimately was fixed at nine, their names and respective functions being: Cho, the musc of History; Euterpe, of Lyric Poetry; Thalia, of Comedy and Idyllic Poetry; Melpomene, of Tragedy; Terpsichore, of Music and Dancing; Erato, of Erotic Poetry; Calliope, of Epic Poetry; Urania, of Astronomy; and Polyhymnia (or Polymnia) of singing and harmony. Hebeon and the region round Parnassus was the favourite seat of the muses, where they were supposed, under the presidency of Apollo, to be perpetually engaged in song and dance, and in elevating the style and conceptions of their favoured votaries. Apollo, as patron and conductor of the muses, was named Musagetes, "Leader of the Muses;" the same surname was also given to Hercules. They were generally represented as young, beautiful, and modest virgins, usually apparelled in different attire, according to the arts and sciences over which they presided, and sometimes as dancing in a chorus, to intimate the near and indissoluble connection between the liberal arts and sciences. Their worship was universally established, particularly in Greece, Thessaly, and Italy. No sacrifices were offered

to them; but the poets invariably prefaced their compositions with a solemn invocation for the aid and inspiration of the muses.

***muse-rid, v.** Possessed or influenced by poetic inspiration. (*Pope: Dunciad, ii, 57.*)

***mūse (2), s.** [*MUSE, v.*]

1. The act or state of musing; abstraction of mind, deep thought, a brown study.

"Phoebus walked all alone upon the seashore where the players played, and was to visit music with him self" —*North: Plutarch, p. 62.*

2. Surprise, bewilderment, wonder.

"At this Mr. Standish was put into a muse." —*Bunyan: Pilgrim's Progress, pt. ii.*

***mūse (3), s.** [*O. Fr. musse* = a little hole or corner, in which to hide things; *mūsser* = to hide.]

1. An opening in a fence or thicket through which hares, rabbits, or other game are accustomed to pass; also called Muset or Must, and in Yorkshire a muise.

2. A loophole; a means of escape.

mūse, v.t. & t. [*Fr. musser* = to muse, to dream, from *O. Fr. *muse* = the mouth, the snout of an animal; *musel* = a little snout (*Fr. musaur, Eng. muscle*). "The image is that of a dog sniffing idly about, and *musing* which direction to take, and may have arisen as a hunting term." (*Skeat.*)]

A. Intransitive:

1. To ponder, to meditate; to study or think on a matter in silence.

"Why muse you, set? 'tis dinner time." —*Shakespeare: Twelfth Night of Verona, ii, 1.*

"Musing and sighing with your arms across." —*Shakespeare: Julius Caesar, iii, 1.*

3. To wonder; to be surprised or amazed.

"Do not muse at me." —*Shakespeare: Macbeth, iii, 4.*

4. To gaze in thought or meditation. (*Romant of the Rose (ed. Harris), 1, 527.*)

B. Transitive:

1. To muse or think on; to ponder, to meditate on.

"Man superior walks Amid the glad creation, musing praise." —*Thomson: Spring, 61.*

2. To wonder at.

"I cannot too much muse Such shapes." —*Shakespeare: Tempest, iii, 3.*

***mūse-fūl, v.** [*Eng. muse, v.; -ful(D)*]

Musing, pondering; thinking deeply; absorbed in thought.

"Meanwhile, in *museful* mood Absorbed in thought, on vengeance fix'd he stood." —*Pope: Homer: Odyssey xviii, 303.*

***mūse-fūl lŷ, adv.** [*Eng. museful; -ly*]

In a museful manner; with deep thought; thoughtfully.

***mūse-lēss, v.** [*Eng. muse (1), s.; -less*]

Without a muse; disregarding the power of poetry or literature.

"It is to be wondered how *museless* and unbookish they were, minding nought but the feats of war." —*Milton: Of Calveined Printing.*

mu sē-na, mus-sa-na, mus-sen-na, s.

[Native name.]

Bot.: *Albizia anthelmintica*, a tree growing in Abyssinia.

musca-bark, s.

Chem.: A bark used in Abyssinia as an anthelmintic.

mū-sē-nin, s. [*Eng. &c. musen(a); -in*]

Chem.: A colloid substance obtained from musca bark. It has a sharp taste, is soluble in water and alcohol, and insoluble in ether.

mu-šē-ōg-ra-phist, s. [*Gr. μουσεῖον (mousetion) = a museum, and γραφω (graphō) = to write.*] One who writes on or classifies objects in a museum.

mū-ēr, s. [*Eng. muse, v.; -er*]. One who muses, one given to musing; one who is absent-minded.

"Some words of woe the *muser* finds." —*Scott: Lord of the Isles, v, 23.*

mū-šēt, mū-šit, s. [*O. Fr. musette* = a little hole or corner in which to hide things, dimin. of *musse* = a hole or corner, from *mūsser* = to hide.] A small hole or gap in a hedge or fence; a muse. [*MUSE (3), s.*]

"The many *mūsts* through the which he goes." —*Shakespeare: Venus & Adonis, 681.*

mu šćtć, s. [*Fr. dimin. of O. Fr. a pipe.*]

Music:

1. A small bagpipe formerly much used by the various people of Europe.

2. The name of a melody, of a soft and sweet character, written in imitation of the bag-pipe tunes.

3. (*Ital.*): Dance tunes and dances, as a measure of these melodies.

1. A red stop on the organ.

mu šō ūm, s. [*Lat., from Gr. μουσεῖον (mousion) = a temple of the muses; μουσα (moussa) = a muse.*] A room of building used as a repository for works of art or science; a collection or repository of natural, scientific, or literary curiosities; a collection of objects illustrating the arts, sciences, manufactures, or natural history of the world, or some particular part.

"Of *museums*, galleries of paintings and statues, public libraries, &c., I need only say that they exist in almost every town in Italy." —*Estlin: Italy, vol. 1 (Prof. Des).*

• Of the museums in Great Britain the Ashmolean at Oxford, founded in 1659, is the oldest; the British Museum is the largest. Of late years numerous museums have been established in various localities of the country, to foster and promote the study of the natural and fine arts. Chief amongst these are the South Kensington Museum, in London, and the Museum of Science and Art, in Edinburgh. Amongst foreign museums the most are the Louvre, at Paris; the Vatican, at Rome; and the museums of St. Petersburg, Florence, Vienna, Munich, and Berlin.

mūsh, v.t. & t. [*Etym. doubtful.*] To nick or notch deep furrows round the edge with a stamp, for ornament.

mūsh, s. [*Ger. mus = pap.*] The meal of maize boiled in water. (*American.*)

mūshed, v. [*Prob. provincial for mused.*] Depressed.

"You're a young man, eh, for all you look so mūshed." —*G. Elliot: Sils-Murher, ch. x.*

mūsh room, *mush-cr-on, *mush-romc, s. & v. [*O. Fr. mousier or (Fr. moussier), from mouisse = moss; O. H. Ger. mus (Ger. moss) = moss (q.v.).*]

A. As substantive:

I. Ordinary Language:

1. *Lit.*: In the same sense as II.

2. *Fig.*: An upstart; one who rises suddenly from a low condition of life.

"*Machosons* come up in a night, and yet they are un-own; and therefore such as are upstarts in state, they call in reproach *mushrooms*." —*Bacon: Nat. Hist.*

II. Botany:

1. Properly *Americus campestris*, a fragrant mushroom, wild in Britain and cultivated in horse-droppings and other material for stimulating growth. At first it appears as a small round ball popularly called a button; then it develops a thick, white, fleshy, conical pileus with liver-coloured gills, and is at its best. Finally the pileus becomes conical and gray and the gills black; it is then called a flap.

"The *mushrooms* have two strange properties; the one that they yield so delicious a food; the other, that they come up so hastily, as in a night, and yet they are unown." —*Bacon: Nat. Hist., § 636.*

2. Any Agaricus or similar fungus, wholesome or poisonous. (There are no precise characters by which the latter can be discriminated from the edible fungi.)

B. As adjective:

1. *Lit.*: Pertaining to mushrooms; made or prepared from mushrooms.

2. *Fig.*: Resembling a mushroom in rapidity and suddenness of growth; ephemeral upstart.

"But as for such *mushroom* divines, who start up of a sudden, we do not usually find their success so good as to recommend their practice." —*South: Sermons, vol. iv, ser. 1.*

mushroom anchor, s. An anchor with a central shank and a head like a mushroom, so that it can grasp the soil however it may happen to fall. Invented by Henman of Chatham in 1809.

mushroom-catsup, mushroom-ketchup, s. A sauce for meats, &c., prepared from the juice of mushrooms, salted and flavoured with spices.

mushroom-headed, v. Having a head shaped like a mushroom.

mushroom spawn. [*MUSE (3), s.*]

mushroom stone. A fossil of some kind, usually a hydrous silicate.

"The *mush-stone* is a variety of the same shape." —*Wood: Geology, p. 102.*

mushroom sugar. [*MUSSEL, s.*]

***mūsh roomed,** [*Eng. v. from room (1), v.*] Pertaining to a room of low rank or station.

"The *mūsh roomed* parlour, with one of its chairs, was the only one of the kind." —*Wood: Geology, p. 102.*

mu šic, *mu šiek, *mu šicke,

mu šik, mu syk, *mu šilko, &c. [*Fr. musicien, from Lat. musico, from Gr. μουσικός (mousikos), from Gr. μουσα (mousa) = a muse, Sp. Port. & Ital. musico.*]

1. Originally, any art over which the muses presided; afterwards, that science and art which deals with sounds as produced by the human voice, and by musical instruments. The science of music includes several branches: 1. The physics, that is, the analysis of the cause and constitution of sound, the number of atmospheric vibrations which produce given sounds, and the arrangement of series of sounds standing in a definite relation to each other as regards their vibration number (scales); also, the form and construction of instruments with reference to the character and nature of the sounds they produce; and also, the apparatus of experimental acoustics, such as sound-measures (tonometers, sirens, tuning-forks, &c.). 2. The branches, of course, involve problems of pure mathematics. 2. The physiology of music.

This deals with the construction and function of the sound producing organs of the human body, the vocal chords, larynx, &c., and also, with the receptive organ of sound, the ear. 3. The mental philosophy of music; the effect of music on the emotions and intellect. The art of music includes the formation of melody (sounds in succession) and harmony, and counterpoint (sounds in combination); also, the "technique" of voice production and singing, and of performing on musical instruments. The earliest efforts of mankind in music consisted of the elevation and depression of the voice in reading sacred writings and lyrical poetry, and in the construction of pipe-instruments, tubes perforated with holes (flutes), tubes containing a vibrating tongue (reed instruments), and collections of pipes in which the sound was produced by making the breath or other column of an impulse on a sharp edge (the sarrus and the organ), in using the lips as a cause of vibrations in open tubes (the trumpet family), in the stretching of strings in a frame (the lute and harp family), in placing stretched strings over a resonance-box (the lute and guitar family), in the use of the "bow" to excite vibrations (the viol family), and in the striking of strings over a resonance-box by means of hammers (the dulcimer and harpsichord and pianoforte family).

The ancient signs for the elevation and depression of the voice in reading were called accents (not stress, but the raising and dropping of the voice without adding notes to it). These led to a system called neumes; these again led to signs called notes (*or two or three syllables*), the position of which on lines showed their pitch, and the shape of which determined their duration. The use of letters in various positions to represent definite sounds was an essential element of ancient Greek music, which, however, was discarded at the revival of music in the early Christian church; but the system has, in an improved form, been revived in the modern tonic sol-fa system. The earliest crude attempts at the combination of vocal sounds were called organum or duophony; these were succeeded by an arbitrary system of harmonization called descent, which in its turn was superseded by counterpoint, the laws of which to this day govern vocal part-music, and are exhibited in their highest form in the vocal or instrumental fugue. The genre of the romantic style of music is to be found in the love-songs of the troubadours and their collateral brethren; the use of music as a language of emotion in the present day has been gradually developed from this source. The highest form of unaccompanied music is to be found in madrigals and pure vocal masses; the constant improvement of musical instrument-

an independent branch of pure instrumental music, which, passing through fantasies and concerti, has culminated in the modern symphony. The wedding of vocal and instrumental music has led to the production of the opera and oratorio.

Musical charms to soothe a savage breast, To soften rocks, or bend the knotted oak.
—*Traveller's Magazine* (1763), v. 1.

2. A taste for harmony or melody.

“The man that hath no music in himself, Is fit for treason, stratagem and spoils.”
—*Shakespeare, Merchant of Venice*, v. 1.

3. The score, written or printed, of a musical composition.

4. A band of musicians.

“Play, music, then.”
—*Shakespeare, Love's Labour's Lost*, v. 2.

* *Magic music*: A game in which one of the company endeavours to find some article hidden during his absence from the room, being guided in his search by the music of some instrument, which is played fast as he approaches the place where the article is concealed, and slowly as he recedes from it.

music-book, *s.* A book containing tunes of songs for the voice or instruments.

music-box, *s.* [MUSICAL-BOX.]

music-clamp, *s.* A temporary binder of files for holding sheet music in convenient form for use and preservation.

music-hall, *s.* A hall commonly used for entertainments consisting chiefly of songs, strolling, and slight sketches of a pantomime and farcical nature, without the aid of scenery.

music-master, *s.* One who teaches music.

music of the spheres, *s.* [HARMONY OF THE SPHERES.]

music paper, *s.* Paper ruled with lines for writing music.

music pen, *s.* A pen made for ruling at once the five lines which, with the intervening spaces, form the staff of music.

music recorder, music recording-instrument, *s.* A machine to record the notes played upon a keyed instrument.

music shell, *s.*
Zool.: *Olella musica*, a shell with markings upon it somewhat resembling musical notes.

music-smith, *s.* A mechanic who makes the metal parts of pianofortes, &c.

music-stand, *s.* A light frame for supporting music while being played.

music-stool, *s.* A stool with a collar leg, and a revolving seat adjustable as to height by means of its screw-stem.

music-type, *s.* Movable types for setting up music to be printed by the ordinary printing-press.

music-wire, *s.*
1. A steel wire employed for instruments of wire.
2. Wire drawn of various patterns and used in some kinds of music-printing.

mû şic-âl, *u.* [Eng. *music*; -*al*.]
1. Of or pertaining to music; as, a *musical* instrument.
2. Producing music or melody; harmonious, melodious, agreeable in sound.
“The sound so musical to modern ears, of the river flowing round the mossy rocks.”—*Macaulay's Hist.* ch. xii.

musical-box, *s.*
Music: A portable instrument, the sounds of which are produced by a steel comb having teeth of graduated length. Projecting pegs or stops, in a metal barrel which is turned by clockwork, set the teeth in vibration. They are chiefly made in Switzerland. Small specimens were formerly called musical snuff-boxes. A set of five reels is now sometimes inserted.

musical-clock, *s.*
Music: A clock which plays tunes at the hours. It may consist of a musical-box attachment set in motion by the clock-work at the expiration of the hours.

musical-glasses, *s. pl.*
Music: A musical instrument consisting of a number of goblets, tuned by filling them

more or less with water, and played by touching their rims with the wetted finger. The size of the glasses being equal, the smaller quantity of water produces the lower note in the scale. The instrument was revived and improved by Benjamin Franklin in 1760.

“The whole conversation ran upon . . . Shakespeare and the musical glasses.”—*Goldsmith's Vicar of Wakefield*, ch. x.

musical interval, *s.* [INTERVAL.]

musical scale, *s.* [SCALE.]

mû-şic-âl lÿ, *adv.* [Eng. *musical*; -*ly*.] In a musical manner; with melody or harmony; harmoniously, melodiously.

“Thine to those sweetly falling founts, To shake the clanging lips.”—*Byron, Ruins of Rome*.

mû-şic-âl nÿss, *s.* [Eng. *musical*; -*ness*.] The quality or state of being musical; harmony, melodiousness.

“The peculiar *musicalness* of the first of these lines, in particular, arises principally from its consisting entirely of amiable feet.”—*Warburton's Essay on Pope*.

mû-şic-âl cian, **mû-şic-âl-tian**, *s.* [Fr. *musicien*, from Lat. *musicus*; Ital., Sp., & Port. *músico*.] One who is skilled in or understands the science of music; one who sings or plays upon a musical instrument according to the rules of the art.

† **mû-şic-âl lÿ**, *u.* [Eng. *musicien*; -*ly*.] Exhibiting musical skill.

“Fall of *musically* contivance.”—*Athenaeum*, May 26, 1854, p. 678.

† **mû-şic-âl cian-ship**, *s.* [Eng. *musician*; -*ship*.] Musical skill.

“Little *musicianship* is shown in the concerted pieces.”—*Athenaeum*, April 28, 1853, p. 554.

* **mû-şic-âl less**, *u.* [Eng. *music*; -*less*.] Destitute of music; unmusical, inharmonious.

mû-şic-âl mâ-nî-a, *s.* [Gr. μουσική (*mousiké*) = music, and μαρία (*mania*) = madness; Fr. *musomanie*.]

Mental Pathol.: A species of monomania, in which the desire for music becomes so strong as to derange the intellect.

mû-şic-âl, *s.* [Eng. *music* (-*al*) *s.*; dim. suff. -*ic-âl* = *g.*] A music.

“My music, to d'w'ny a sonnet On gown and hat, and douse black bonnet.”
—*Turpin, To the Dee, John McMath*.

mûş-î-môn, *s.* [MOUFFLON.]

mûş-i-ng, * **mus-yng**, *pr. par., u., & s.* [MUSE, *v.*]

A. *As pr. par.*: (See the verb).

B. *As adj.*: Meditative, thoughtful, pondering.

“Yet lags the chief in musing mood.”
—*Scott, Lady of the Lake*, iii. 27.

C. *As subst.*: Meditation, thoughtfulness, absent-mindedness, abstraction of mind.

“Rused as they went, In matus worthy of the great event.”
—*Cooper's Conversation*, 510.

mûş-i-ng lÿ, *adv.* [Eng. *musical*; -*ly*.] In a musing manner; like one musing.

* **mû-şit**, *s.* [MUSEET.]

mû-sive, *u.* [Low Lat. *musicum*.] The same as *MOSAIC* (2).

mûsk, *s.* [Fr. *musc*, from Lat. *musca*, *gens.* of *muscus* = musk; from Pers. *musk*, *mosk* = musk; Gr. *μόσχος* (*mōschos*) = musk; from Sansc. *mushka* = a testicle, because obtained from a bag behind the deer's navel.]

I. *Ordreana Lemnina*:
1. In the same sense as II. 2.

“Late discoveries add divers sorts of monkeys, the civet cat and gazelle, from which our musk proceedeth.”—*Brown's Vulgar Errors*, bk. iv. ch. 8.

2. A small like musk; an aromatic smell, a perfume.

“The musk of the roses blown.”
—*Tenison, Manu*, I. xxii. 6.

II. *Technically*:

1. *Botany*:

(1) *Moandus moschatous*, a garden-plant of musky odour from the region of the Columbia river.

(2) *Erodium moschatum*, Musk Stork's-bill, a rare British plant, with pinnate leaves smelling of musk.

“Roses, musc or musk, To grace my city towers.”
—*Tenison's Courtier's Daughter*, 225.

2. *Chem.*: An odoriferous, resinous substance

obtained from the male Musk-deer (q.v.). It is imported in the natural pods or bags from Bengal, China, and Russia, but the Tonquin musk is the most esteemed for its odour. It occurs in commerce in brownish clots, often mixed with hairs, fat, and sand. Its taste is slightly bitter, and it is the most powerful, penetrating, and lasting of perfumes. Pure musk should contain from 5 to 6 per cent. of ash, and on being digested with boiling water, should lose about 75 per cent. of its weight. It is frequently adulterated with red bullock's blood, chocolate, sand, &c. One sample lately imported in the pod or bag from Yunnan, was, on examination at Somerset House, found to contain 60 per cent. of sago flour. As a medicine musk is a powerful stimulant and antispasmodic.

3. *Zool.*: The Musk-deer (q.v.).

musk-bag, *s.* A bag or vessel containing musk; specif. the cyst containing musk in a musk-deer.

* **musk-ball**, * **muske-balle**, *s.* A ball for the toilet, scented with musk.
“Their vessels of spury comphrehendeth all their coolies, their muske-balls, their pomander-pottes, &c. *Bible*, *Isaiah*, of both *Charles*, pt. ii.

musk beaver, *s.* The same as *MUSK-RAT* (q.v.).

musk beetle, *s.*
Bot.: *Callichroma muschata*. [CALLED FROMA.]

* **musk cake**, *s.* Musk, rose-leaves, and other ingredients made into a cake.

musk cat, *s.* The musk-rat (q.v.).

“Here is a jar of fortune's sic, or of fortune's cat (but not a musk-cat) that has fallen into the net of the husband of her displeasure.”—*Shakespeare*, *All's Well that Ends Well*, v. 2.

musk-cherry, *s.* A sort of cherry, so-called from the smell.

* **musk-cod**, *s.* A contemptuous or abusive term applied to a scented counter.

“'Tis a sweet musk-cod, a pure spiced gull.”
—*Dekker's Satirostomix*.

musk-deer, *s.*
Zool.: A name formerly applied to the family Tragulidae, but improperly, as they possess no musk-gland. The term is now restricted to *Moschus moschiferus*, from which the musk of commerce is obtained. [MOSCHUS.]

musk-duck, *s.*
Ornithology:

1. *Carolina muschata*, a duck wild in Guiana, &c., where the males fight savagely with each other. It is often reared in poultry-yards. Corrupted into Muscovy Duck; called also Barbary Duck.

2. *Zizura lobata*, an Australian Duck. According to Mr. Ramsay the musky odour, which is very powerful, is confined to the male. It is twice as large as the female. (*Parus*: *Descent of Man*, pt. n., ch. xiii.)

musk-gland, *s.*
Compar. Anat.: An abdominal gland in *Moschus moschiferus*, communicating with a pouch or sac, and secreting the substance known as musk.

“The males have a musk-gland.”—*Nicholson's Zoology* (1878), p. 674.

musk hyacinth, *u.*
Bot.: *Muscari moscovium*. [MUSCARI.]

musk mallow, *s.*
Bot.: *Melva moschata*. [MALVA.]

musk melon, *s.*
Bot.: *Cucumis Mela*. [MELON.]

musk orchis, *s.*
Bot.: *Hermipodium moureohis*.

musk-ox, *s.*
Zool.: *Oribus moschatus*, considered by some naturalists to be a connecting link between the sheep and the ox, whence its generic name. It is found in herds of from ten to thirty, in Arctic America north of latitude 60°. It is covered with brown hair, nearly a yard in length, and a thick woolly under-wool. When fat, its flesh is well-flavoured, but lean animals smell strongly of musk. The horns are similar in form to those of the Cape buffalo, and in the bulls they meet in the middle line of the forehead. It is heavily built, with short legs, and weighs about three hundred pounds, but eludes rocks and precipices with ease. It was aizenzen of Britain in prehistoric times. [OVIPOS.]

müs sal, *s.* [Maharati & Hind. *mushal*, *mushal* = a torch.] Torches made of long strips of cotton bound tightly together and dipped in oil.

müs säi ghéë, *s.* [MUS-VAHEL.]

* **muzz-īng**, s. [MZZY.] Broused, muzzled, passing time stupidly.
 "You would not dare keep me muzzling out."
Mad. *De* (*in*) *of* *Windsor*, v. 15.

müz-zle, 'mos-el, 'mos-ell, s. (f.) Fr. *muze*, *muse* (Fr. *muze*), from a hypothetical *ed* U. Fr. *muze*, a dimin. fr. Low Lat. *muza*. (1) a buckle, (2) a buckle, (3) a remora, (4) a beak, a snout, from Lat. *muca* = a beak, a tooth, *muca* = to bite; Ital. *muca* = a muzzle.]

1. The mouth and nose of an animal, as of a horse, dog, &c.; the snout. Sometimes applied in contempt to the mouth of a human being.
 "And like a greyhound the mooll and the head of a horse."
Temple. *Stanza of Thebes*, pt. 1.
2. The mouth of anything; the opening for entrance or discharge; specifically, the mouth of a gun or cannon, the open end of the pipe of a bellows, &c.
 "Every man took his gun to pieces, and the back of his collar, stuck a cork in the muzzle, stopped the touch hole with a quill, and threw the weapon into the next pond."—*Macaulay*. *Hist. Eng.*, ch. xvii.
3. A gag or mask, of various materials, placed over the head of a dog, or the muzzle of a calf or various horse. (*Chambers*, *Dict.*, i. 2, 157.)
4. The piece at the forward end of the plow-beam by which the traces are attached. Also called the bridle, elevior, or plough-head.

muzzle cap, s.
Arms: The cover over the muzzle of a gun.

muzzle lashings, s. pl.
Arms: Ropes, of mel, about 4 to 5 fathoms in length, used to lash the muzzles of guns to the upper part of a port.

muzzle loader, s. A gun which is loaded at the muzzle, as distinguished from a breech-loader.

muzzle ring, s.
Arms: The ring or circle surrounding the muzzle of a gun.

muzzle sight, s.
Arms: The front sight, screwed into the swell of the muzzle of a gun or the muzzle band of a howitzer. It is of iron or steel, equal in height to the disparity or difference between the semi-diameters of the base-ring and muzzle.

muzzle stopper, s.
Arms: A tampon, to close the muzzle of a gun.

muzzle strap, s.
Arms: A broad strap, which is buckled around a horse's mouth to stop his biting.

müz-zle, 'mos-el, ² a. & s. [MZZYER, v.]

A. Intransitive:

1. *Intrans.*: To land the mouth with a muzzle, so as to prevent from biting or eating.
 "Thou shalt not muzzle the mouth of the ox that treadeth out the corn."—*1 Cor.*, ix. 9.
2. To keep under restraint; to prevent from giving vent to complaints.
3. To fuddle with the mouth close.
 "The negro was then muzzling and covering of the hole."
Le (*in*) *of* *Windsor*.

B. Intransitive: To bring the muzzle of mouth near; to fuddle.
 "The bear muzzled, and snuggled to him, put his nose to his mouth and to his ears."
Le (*in*) *of* *Windsor*.

müz-zý, a. [Eng. *muzz* (2); -y.] Absent in

maned, bewildered, muddled, tipsy, = upol, confused.

His words dull *maned* did *maned*. *Mod. Br. Eng. Interp.*, 1908.

mý, mī, poss. pron. oru. [From *Mbl*, Eng. = mine, by dropping the final *a*.] Mine, belonging to me.

• *Mý* is only used attributively, and *mī* as a pronoun; thus we say, *This is mī book*, *This book is mī*.

mý a, s. Lat., from *Gr.* *μύα (mýa)* = a kind of mussel found on the shores of the Thracian Bosphorus.

Zool.: *Gaper*. The typical genus of the family Myacidae (q.v.). The shell is gaping at the ends; the left valve smaller than the right, with a large process for the earilage; spherical fold large; epidermis enclosing siphons, which are partially retractile. Ten recent species known. *Mya arenaria* and *M. truncata* are found throughout the Arctic Seas, and furnish excellent food.

mý aē i dæ, s. pl. [MYAÏE.]

mý-a-çi-tēs, s. Gr. *μωαί (mwaí)*, gent. *μωαίος (mwaíōs)* = the sea-mussel; suff. *-tēs* (tēs).

Botan.: A genus of Conchiferous Molluscs, family Anartimidae. The shells oblong, ventrally gaping, thin, often concentrically furrowed and granulated. Known species fifty, from the Lower Silurian to the Chalk. From the United States, Europe, and South Africa. (S. P. Huxford.)

mý a dæ, mý-āg i dæ, s. pl. [Gr. *μωαί (mwaí)*, gent. *μωαίος (mwaíōs)* = the sea-mussel; Lat. fem. pl. adj. suff. *-dæ*.]

Zool.: A family of Conchiferous Molluscs. The valves of the shell are gaping behind, opaque, and strong, covered with wrinkled epidermis; foot small, siphons united and retractile. Chief genera: *Mya*, *Corbula*, *Florus*, *Panopaea*, and *Tellina*.

mý āl ġī a, s. [Gr. *μῦς (mýs)* = a muscle, and *άλγος (álgos)* = pain.]

Path.: Muscular pain; cramp. Stiffness and stiffness produced by over-exertion are forms of Myalgia. There is also a rheumatic and a diaphragmatic Myalgia. (*Physiology*.)

mý-āll, s. [Native name.] (See compound.) **myall-wood, s.**

Bot.: The wood of *Aravia humilifolia*, and some other species.

mý-çē-li-ōid, a. [Mod. Lat. *mycelium*]; suff. *-oid*.]

Bot.: Resembling a mushroom.

mý-çē-li-um (pl. **mý-çē-li-ā**), s. [Mod. Lat., from *Gr.* *μυκός (mýkōs)* = a mushroom, a fungus.]

Bot.: The spawn or vegetative part of a fungus. It consists of inconspicuous white down and stipes traversing the soil, and may be filamentous or cellular.

mý-çē-tā-lēs, s. pl. [Gr. *μυκός (mýkōs)*, gent. *μυκῆτος (mýkētos)* = a fungus, Lat. masc. and fem. pl. adj. suff. *-lēs*.]

Bot.: An alliance of Cryptogamic plants, containing lichens and Fungi, both of which have mycelia, and derive nourishment from the matrix on which they grow, and from the atmosphere. (*Botany*.)

mý-çē-tēs, s. [Named by Hübner, from *Gr.* *μυκῆτος ἀετῆσιος (mýkētos aētēsios)* = an eagle, because accompanied by a hollow noise.]

Zool.: Howler. A genus of Platyrrhine or New World Monkeys, family Cebidae (q.v.). They are the largest American monkeys, some being nearly three feet in length exclusive of the prehensile tail. The thumb is not opposable, but is in a line with the other fingers. The voice is extraordinarily resonant, owing to a long drum, formed by a convexity of the *hyoides*, and communicating with the larynx. Ten species are known, from the forests of tropical America between East Guatemala and Paraguay.

mý-çēt-ō-ma, s. [Mod. Lat., from *Gr.* *μυκός (mýkōs)* = a fungus.]

Pathol.: A disease in which the bones and other structures of the foot become necrosed and ultimately destroyed by a necroseque fungus.

mý-çē-tō-phāg-i-dæ, s. pl. [Mod. Lat., from *Gr.* *μυκῆτος (mýkētos)*, Lat. fem. pl. adj. suff. *-ido*.]

Botan.: A family of Dipteres, tribe Neocerophagae. The antennae are clavate, the body oblong, oblong ovate, or convex, pubescent, abdomen of five nearly equal segments. First with four distinct joint, except in the anterior feet of the males, which have only three. They live in holes and other fungus, or under the bark of trees. Fifteen are British.

mý-çē-tō-ph-a-gus, s. [Gr. *μυκός (mýkōs)*, gent. *μυκῆτος (mýkētos)* = a fungus, and *φαγῆν (phagēn)* = to eat.]

Entom.: The typical genus of the family Mycetophagidae (q.v.). Seven are British.

mý-çē-tō-ph-i-l-a, s. [Gr. *μυκός (mýkōs)*, gent. *μυκῆτος (mýkētos)* = fungus, and *φιλέω (philēō)* = to love.]

Entom.: The typical genus of the family Mycetophilidae (q.v.). There are but two very small ocelli.

mý-çē-tō-phil-i-dæ, s. pl. [Mod. Lat. *mycetophilicus*], Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: Fungus-midges; a family of dipterous insects, tribe Neocerera. They are very active; found in damp situations upon herbaceous or on leaves. They run spring by means of their hind legs. The male feed upon fungi.

mý-çē-tō-zō-a, s. pl. [Gr. *μυκός (mýkōs)*, gent. *μυκῆτος (mýkētos)* = a fungus, and *ζῷον (zōon)*, pl. of *ζῷον (zōon)* = a living creature.]

Zool.: A name sometimes given to certain abnormal Rhizopods of low organization.

mý-çi-na, s. [Gr. *μυκός (mýkōs)* = a fungus; Lat. suff. *-ant*.]

Bot.: A kind of shield occurring in Bryomyces, and helms akin to it.

mý-cō-dèrm, mý-cō-dèr-ma, s. [Gr. *μυκός (mýkōs)* = a fungus, and *δέρμα (dèrma)* = skin.]

Bot., &c.: A sporous genus founded on the appearance presented by certain fungi and algae when developed in liquids. Example: yeast (q.v.). If they float or grow on the surface, they are popularly called flowers, as, flowers of wine; but if they sink, mother, as, mother of vinegar. When mycetoderms find free oxygen, they absorb it rapidly; when they have to take it from the liquid in which they are growing, its withdrawal hastens decomposition.

mý-cō-dèr-mic, a. [Eng. *mycetoderm*; *-ic*.] Gr. pertaining to, or consisting of mycetoderms.

mý-cō-lōg-ic, mý-cō-lōg-ic-āl, a. [Eng. *mycology*; *-ic, -ic-āl*.] Pertaining or relating to mycology, or fungi.

mý-cōl-ō-ġist, s. [Eng. *mycology* (q.) *-ist*.] One who is versed in mycology.

mý-cōl-ō-ġy, s. [Gr. *μυκός (mýkōs)* = a fungus, and *λόγος (lógos)* = a discourse.]

Bot.: That branch of botany which investigates the nature and history of fungi; a treatise on fungi.

mý-eom-ēl-āte, s. [Eng. *mycomelic* (q.) *-ate*.] A salt of mycomelic acid.

mý-cō-mēl-ic, a. [Gr. *μυκός (mýkōs)* = a fungus; Lat. *mel* = honey, and Eng. suff. *-ic*.] (See the compound.)

mycomelic acid, s.

Chem.: $C_{12}H_{12}N_4O_{12}H_2O$. Alloxanamide. A monoclastic acid obtained by heating aqueous alloxan with ammonia and decomposing the resulting salt with sulphuric acid. When freshly precipitated, it is transparent and gelatinous, but when dried it forms a loose yellow powder. It is insoluble in cold water, alcohol, and ether, but soluble in boiling water and in the alkalis. The only mycomelates known are the ammonium salt and the silver salt, the latter of which is precipitated in yellow flakes, when ammonium mycomelate is added to a solution of silver nitrate.

mý-cōse, s. Gr. *μυκός (mýkōs)* = a fungus; Eng. suff. *-ose* (*Chem.*.)

Chem.: $C_{12}H_{12}O_{12}$. A peculiar kind of sugar very like trehalose, obtained from the ergot of rye. It forms shining rhombic crystals, soluble in water and in boiling alcohol, but insoluble in ether. Its aqueous solution is dextro-rotatory, but it does not reduce cuprous

oxide from alkaline cupric solutions. When boiled with dilute sulphuric acid, mycose is converted into dextroglucose; with strong nitric acid it forms a detonating compound. Heated with acetic acid, it yields saccharides which are undistinguishable from those formed in like manner from dextroglucose.

mý-çēr-i-a, s. [Latinized from *Gr.* *μυκῆρ (mýkēr)* = the nose, a snout.]

Ornith.: Jabiru; a genus of *Ardeula*, subfamily *Coccyinae*. The bill is turned up at the tip. [Jabiru.]

mýd-ā-us, s. Gr. *μῦδος (mýdos)* = decay, in allusion to the fetid smell of the animal.]

Zool.: Stinking Badger; a genus erected for the reception of the *Tebala* (q.v.), sometimes known as *Tebala mýdalis*.

mýd-del-este, a. [Mbl.] The most middle (a double superlative). (*Chuvaco*.)

mý-dri-ā-sis, s. [Gr.]

Pathol.: A disease of the eye, in which the pupil is excessively dilated, and the sight becomes impaired, or even entirely lost.

mý-dri-āt-ic, a, w, s. [Eng. *mydriatic* (q.) (q.v.); *-ic*.]

A. *As ady.*: Dilating the pupil of the eye.

B. *As subst.*: A medicine or agent which dilates the pupil of the eye. The chief are belladonna, atropine, stramonium, hyoscyamine, all derived from the nightshade order of plants.

mý-ēl-ēn-çēph-a-lā, s. pl. [MYELEN-EPHALOS.]

Zool.: (See extract.)

"The sub-kingdom Vertebrata, or *Myelencephala*, is characterized by the disposition of the principal mass of the nervous system in a median axis, consisting of the brain and spinal cord, situated along the dorsal aspect of the body, behind the heart and digestive system, and enclosed in a body of cartilaginous case, constituting a spinal column.—*Owen Comp. Anat.*; *Vertebrata*, p. 12.

mý-ēl-ēn-çē-phāl-ic, a. [Eng., &c. *myelencephalic* (q.) *-ic*.] Pertaining to or connected with the myelencephalon.

"The *myelencephalic column*.—*Owen Comp. Anat.*; *Vertebrates*, iii. 7.

mý-ēl-ēn-çēph-a-lōn, s. [Gr. *μυελός, μύελος (mýelōs, mýelōs)* = marrow, and *ἐγκεφαλον (enkephalon)* = the brain.]

Comp. Anat.: The cerebro-spinal system; the brain, spinal marrow, and nerves viewed as a whole. (*Owen Comp. Anat.*; *Vertebrata*, i., ch. iv.)

mý-ēl-ēn-çēph-a-lōus, a. [Eng. *myelencephalic* (q.) *-ous*.] Cerebro-spinal.

"The myelon, the encephalon, and their nerves, constitute the *myelencephalic* or *myelo-spinal system*.—*Owen Comp. Anat.*; *Vertebrates*, i. 266.

mý-ēl-in, s. [Eng., &c. *myelin* (q.) *-in*.]

Chem.: A name applied by Krichow and Beneke to a peculiar fatty substance extracted from the yolk of hard-boiled eggs by means of alcohol. It is also said to be present in young chlorophyll, in flower stalks, and in certain seeds, especially in peas, and always accompanied by cholesterin. It is characterized by shooting out into spiral threads or loops when immersed in water or in a solution of sugar.

mý-ēl-ine, s. [Gr. *μυελίνος (mýelínos)* = marrow-like; Ger. *myelin*.]

Min.: A soft amorphous mineral, of a yellowish white to reddish-white color. Sp. gr. 2.45 to 2.53; feel somewhat greasy. Comps.: a silicate of alumina; formula, $Al_2O_3SiO_2$. Ita places it with Andalusite.

mý-ēl-i-tis, s. [Gr. *μυελός, μύελος (mýelōs, mýelōs)* = marrow; Eng. suff. *-itis*.]

Pathol.: Inflammation of the spinal cord; (1) acute, (2) by ramollissement, (3) by underrived suppuration, (4) by abscess.

mý-ēl-ōid, a. [Gr. *μυελός, μύελος (mýelōs, mýelōs)* = marrow, and *εἶδος (eidos)* = form, appearance.] Resembling marrow; as, a *myeloid tumour*.

mý-ēl-ōn, s. [Gr. *μυελός, μύελος (mýelōs, mýelōs)* = marrow.] A name sometimes given to the spinal cord.

mý-ēl-ōn-āl, a. [Eng. *myelon*; *-āl*.] Pertaining to or connected with the myelon (q.v.). "A contiguous portion of the anterior *myelonic* column.—*Owen Comp. Anat.*; *Vertebrates*, ii. 82.

fâte, fât, fare, amidst, whât, fâll, father: wê, wêt, hêre, camel, hêr, thêre: pine, pit, sire, sir, marine: gô, pô, or, wôre, wolf, work, whô, sôn: mûte, eub, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â; qu = kw.

mÿg'-a lē, s. [Gr. = a shrew or field mouse.] **Zoology:**

1. An old genus of Soricidae (Shrews) containing the Desmans. [MYOGALIA.]

2. The typical genus of the family Mygale. The species are large, with a rough hairy coat and stout hairy legs. They chiefly inhabit tropical America, though some extend to the East. They reside in fissures in trees, in the crevices between stones, &c., spinning a tubular, silken dwelling. The best-known species, *Mygale acenbriata*, was alleged by Madame Merlan and others to catch birds, then the notion was abandoned; but Mr. Bates recently revived it, having found a dead and a living bird in these spiders' webs.

mÿ-gāl'-i-dæ, s. pl. [Lat. *mygale*(s); fem. pl. adj. suff. -idae.]

Zool.: A family of Arachnida, the typical and only one of the tribe Tetrapneumons (Four-lunged Spiders). There are four stigmatic openings towards the base of the abdomen, and the spinnerets are only four, two of them very small. There are many species, some large, inhabiting warm countries. Most construct silken habitations. *Atypus Sulzeri*, about half an inch long, is British; it makes a burrow in the ground which it lines with silk.

mÿl'-a-bris, s. [Gr. *μυλάριος (mυlārēios)* in Phydias for *μυλάριος (mυlārēios)* = a kind of cockroach found in mills and bakehouses.]

Entom.: A genus of Cantharidae. *Mylabris cichorii*, a common Indian species, *M. vulvar*, *M. melanaria*, *M. huncuclis*, *M. proina*, and *M. arctabalis* have been recommended as substitutes for cantharides. [Valencia Exhib. Rep.]

* **mylde, n.** [MILDE.]

* **mylde-ly, adv.** [MILDELY.]

mÿl'-i-ōb'-a-tēs, s. [MYLIOBATIS.]

mÿl'-i-ō-bāt-i-dæ, s. pl. [Mod. Lat. *myliobat*(s) (q.v.); Lat. fem. pl. adj. suff. -idae.]

1. **Ichthy.:** Devil-fishes, Sea-devils, or Eagle-rays, a family of plagiostomous fishes, of the group Batoidei (Rays). The disc is very broad, owing to the great development of the pectoral fins, which, however, leave the sides of the head free, and reappear at the extremity of the snout as a pair of detached (cephalic) fins. Viviparous, producing only one at a birth. The species are generally of large size, from tropical and temperate seas. The dentition consists of flat molars, like a mosaic pavement, in both jaws. Dr. Günther enumerates five genera: *Myliobatis*, *Aetobatis*, *Rhinoptera*, *Dicerobatis*, and *Ceratoptera*.

2. **Paleont.:** Remains have been found in Tertiary formations, from the Eocene of Shropshire to the Norwich Crag.

mÿl'-i-ōb'-a-tis, mÿl'-i-ōb'-a-tēs, s. [Gr. *μύλη (mύlē)* = (in pl.) the molars, and Lat., &c., *batis* (q.v.).]

1. **Ichthy.:** The typical genus of the family Myliobatide (q.v.). Teeth, hexangular, large, flat, tessellated, those in the middle broader than long, several narrower ones on each side; tail, very long and thin, with a dorsal fin near its root. There is generally a serrated spine behind the fin. Seven species are known, two of which are European, one, *Myliobatis aquila*, being almost cosmopolitan, and found occasionally on the British coast.

2. **Paleont.:** Teeth of species very closely allied to, or perhaps even identical with, existing species are found in Tertiary formations. (Günther.) *Multiobates holarpiensis* is from the Eocene of Shropshire. (Owen.)

* **mÿl i-oun, s.** [MILLIENS.]

Mÿ-lit'-ta, mÿ-lit'-ta, s. [Gr. *Μύλιττα (Mύλιττα)* (Herod. i. 131); see also *Ravlinson: Herodotus*, *ess. x.*, in App. to bk. i.]

1. **Babylonian & Assyri. Myth.:** A female divinity corresponding to the Roman Venus. Dr. Oppert considers *Mÿlitta* a corruption of Baalitis. Max Müller considers this identification probable. In that case she is the wife of Baal and the same as Astarte (q.v.).

2. **Bot.:** A genus of ascomycetous fungi, sub-order Tuberales. *Mÿlitta australis* is a large truffle, weighing more than two pounds, found in Australia, where it is called Native bread.

* **mylle, s.** [MILLE.]

mÿ-lō, pref. [Gr. *μύλος (mύlō)* = a mill.] Connected with or resembling molar teeth.

mylo hyoid, n.

Anat.: Of or belonging to the hyoid bone (q.v.), and the molar teeth. There is a mylo-hyoid groove, a muscle, a nerve, and a ridge.

mÿ-lō-car'-i-ūm, s. [Pref. *mylo*, and Gr. *καρπορ (karpōr)* = a nut.]

Bot.: A genus of Cyrtellids. [Böckman, *ARTICLE*.]

mÿ-lō-dōn, s. [Pref. *mylo*, and Gr. *δδων (dōn)*, *genit. δδωνος (dōnōs)* = a tooth.]

Paleont.: A genus of edentate mammals, the best-known species being *Mylobolus robustus*, which reached a length of eleven feet, slightly less than that of the Megatherium, which it much resembled. The dental formula of the two is the same, $\frac{1}{1} \frac{2}{1} \frac{3}{1}$. The fore feet have five and the hinder four toes, the two external digits being nailless. From the Pliocene deposits of Central Brazil.

mý ô py, mý ô pi a, s. [Gr. μυωπία (*myōpiā*), from μυωπή (*myōpē*) = shortsighted.].

Myopia, &c.: Near or short sight, a defect of the eye, produced generally by too great convexity of the cornea or crystalline lens, causing the focus to be placed not on the cornea, but in front of it. It occurs in early life from too great use of the eyes on minute objects, as the print in a book, especially by imperfect light. It is corrected by doubly-convex spectacles. As a rule the defect diminishes with the advance of age.

mý ôs chi lós, s. [Pref. *myo-* (2), and Gr. χείλος (*cheilos*) = a lip (C).].

Bot.: A genus of Santalaceę. An infusion of *Myoschilus oblongus*, called by the Chibmas Senia, is purgative.

mý ô sin, s. [Gr. μυς (*mys*), gent. μυός (*mys*) = a mouse.].

Chem.: The chief constituent of the muscle plasma enclosed in the sarcolemma tubes of muscular fibre. In the living muscle it exists in the liquid state, but when the *ricor anatis* sets in, it curdles completely. Myosin is insoluble in water, but soluble in very dilute acids and alkalis, and in a dilute solution of sodium chloride. It is coagulated by heating with water, and by the addition of alcohol.

mý ô sis, s. [Gr. μυω (*myō*) = to close the eyes or lips.].

Pathol.: Permanent contraction of the pupil, usually caused by iritis. When it exists to such an extent as to obliterate the pupil it is called Sympiesis.

mý ô sit íe, n. & s. [MYOSIS.]

A. *As adj.*: Contracting the pupil of the eye.

B. *As subst.*: A medium or agent which contracts the pupil of the eye.

mý ôx í dę, s. pl. [Mod. Lat. *myoxus*]; Lat. fem. pl. adj. suff. *-idus*].

Zool.: A family of Myomorpha (q.v.), from the Palearctic and Ethiopian regions. There are four genera: *Myoxus*, *Muscardinus*, *Elomys*, and *Graphiurus*.

mý ôx üs, s. [Gr. μυωξός (*myōxōs*) = a dormouse; μύς (*mys*) = a mouse, and όξυς (*oxys*) = sharp snout.].

1. *Zool.*: Dormouse; a genus of myomorph rodents, typical of the family Myoxidię (q.v.). Three species are known. *Myoxus asellomurinus*, the Common Dormouse; *M. glis*, the Lohr; and *M. vible*, the Lerot.

2. *Paleont.*: (See EXTRACT.)
*Two species have been detected in the Upper Eocene (Oxygonus series of Montanaiel), and a third from beds of Miocene age. Several have been detected in Post-Tertiary deposits, of which the most remarkable is *M. mellebrans*, from the Maltese Post-Pliocene. This form is described by Falconer as being "as big in comparison to a living dormouse as the bandicoot rat is to a mouse." —*Naturalist's Palace*, 11. 410.

mýr çi a, s. [Lat. *Myrica* = an epithet of Venus, said to be taken from the myrtle (q.v.), which was sacred to her. (*Varr. de Ling. Lat.* (ed. Mill.), v. § 154.)].

Bot.: A genus of Myrtaceę, tribe Myrteę. From 300 to 500 are known, from tropical and sub-tropical America. Many have edible fruits. (*Trouv. de Bot.*)

mýr í a, pref. [Gr. μυριάς (*myriās*) = ten thousand.]. Many, possessing many or much.

mýr í a cęn thous, a. [MYRIACANTHUS.] Of or belonging to the genus Myriacanthus.

mýr í a cęn thús, s. [Pref. *myria-*, and Gr. ακανθα (*akanthos*) = a prickles.].

Paleont.: A genus of fossil Rhaioles founded by Agassiz in 1847. Morris enumerates three species from the Lias of Lyme Regis.

mýr í ad, n. & s. [Gr. μυριάς (*myriās*), gent. μυριάδος (*myriādos*), from μυρία (*myrias*) = numberless.].

A. *As adj.*: Innumerable, countless, numberless, infinite, manifold.
*The forests, with their myriads tongues, Shouted of liberty." —*Longfellow's Slave's Dream*.

B. *As substantive*:

1. The number of ten thousand.

2. Used proverbially of any very great number; multitudes.

"In the orchards led Myriads of caterpillars." —*Longfellow's Part's Tale*.

myriad-minded, a. Of vast and extremely versatile intellect. (*Coleridge*.)

mýr í a grām, mýr í a grāmme, s. [Fr. *myriagramme*, from pref. *myria-*, and Fr. *gramme*.] A French measure of weight, containing 10,000 grammes, and equal to 22.0455 lbs. avoirdupois.

mýr í a li tre (tre as tēr), s. [Fr., from pref. *myria-*, and Fr. *litre*.] A French measure of capacity, containing 10,000 metres, and equal to 610,280 cubic inches.

mýr í a mē tre (tre as tēr), s. [Fr., from pref. *myria-*, and Fr. *mètre*.] A French measure of length, containing 10,000 metres, and equal to 10 kilometres, or 6,213,697 English miles.

mýr í a nī-tęs, s. [Gr. μυριάς (*myriās*) = ten thousand; a connect, and suff. *-ites*.]

Paleont.: Formerly considered a genus of Amaloids, from the Lower Silurian Rocks of Llanpeter in South Wales. *Myriacites McLeary* resembles worm tracks with marks like those of setæ or rudimentary limbs. (*Marchison's Siluria*, ch. viii.) When, however, the stone is broken up, and the rest of the fossil displayed, it is seen to be a leaf-like expansion, perhaps a fucoïd.

mýr í a pöd, s. [MYRIAPODA.] One of the Myriapoda (q.v.).

mýr í äp ô da, mýr í öp ô da, s. pl. [Pref. *myria-*, and Gr. ποός (*poos*), gent. ποδός (*podos*) = a foot.].

1. *Zool.*: A class of annulose animals, division Arthropoda. The body is generally long, cylindrical, or flattened, and consists of more than twenty somites. There is no distinction between the thorax and the abdomen; there are antennę, and the mandibles are often large and powerful; one or two pairs of legs are attached to each segment of the body. The sexes are separate; the internal anatomy like that of insects. The Myriapoda live under stones, dead leaves, the bark of trees, and other dark places. Some are luminous. The class is divided into four orders—Chilopoda (Centipedes), Chilognatha (Millepedes), Pauripoda, and Onychophora.

2. *Paleont.*: The oldest known Myriapods are from the Coal Measures.

mýr í arch, s. [Gr. μυριαρχός (*myriarchōs*), from μυρία (*myrias*) = ten thousand, and αρχή (*archē*) = to rule, to lead.]. A commander of ten thousand men.

mýr í äre, s. [Fr., from pref. *myria-*, and Fr. *are*.] A French measure of land, containing 10,000 ares, or 1,000,000 square metres, and equal to 247-1143 English acres.

mýr í ca, s. [Lat. *myrica*, *myrica*, from Gr. μυrica (*myrikē*) = the tamarisk; not the modern genus.].

Bot.: Sweet Gale; Bog-myrtle; the typical and only genus of the order Myricaceę. *Myrica Gale*, the Sweet Gale or Dutch Myrtle, has a shrubby stem and lanceolate leaves, broader upwards. It is found in bogs and moory ground in Scotland and elsewhere. Its leaves have a pleasant smell, and the inhabitants of Islay and Jura scent their clothes with them, and in parts of Scotland a tea is made from them; the twigs are used for beds. The plant yields a yellow ethereal oil, which after a time becomes slightly warm. Formerly its leaves were used against the itch, and by Swedish brewers as a substitute for hops. The root of *M. cretensis*, the Wax Myrtle or

Bay-tree of North America, if eaten in quantities, is emetic. The Nepalese eat the fruit of *M. sapida*, which is about the size of a cherry. Dr Dymock says that the bark, treated with boiling water, yields an abundant, hard, brittle extract resembling kino. Dr. Burck states that this bark is valuable in rheumatism, and is occasionally used in the north-western provinces of India for cough, &c. The fruit of *M. integrifolia* and *M. Nagi* are eaten.

myrica-tallow, s.

Chem.: Myrtle-wax. A solid fat extracted from the berries of *Myrica cerifera*. It is pale-green, translucent, brittle, and has an aromatic taste and smell. It is soluble in hot alcohol, but insoluble in ether; has a sp. gr. 1.005, and melts at 48.

mýr-i-cā-çē-æ, s. pl. [Lat. *myrica*(*o*); fem. pl. adj. suff. *-æra*.]

Bot.: Galeworts; an order of Dicotyledonous Exogens, alliance Amentales. It consists of leafy shrubs or small trees covered with resinous glands and dots; alternate leaves, and amentaceous flowers; stamens two to eight, generally in the axil of a scale-like bract; anthers two to four-elled; ovary one-elled; fruit drupeaceous; seed solitary, erect. Found in America, Europe, the Cape of Good Hope, and India. Known genus, one; species, thirty.

mýr-i-cār-i-ā, s. [Lat. *myrica*(*o*); fem. sing. adj. suff. *-āra*.]

Bot.: A genus of Tamaricaceae. *Myricaria germanica*, a common garden plant with pink flowers, has a balsamic, bitter bark, formerly used as an astringent. The leaves of *M. elegans*, a West Himalayan species, are applied in India to bruises. *M. hirsuta* is used by the Mongols for tea, and the woolly tissue is considered tonic.

mýr-i-çin, s. [Mod. Lat., &c. *myrica*(*o*); -in (*Chem.*)]

Chem.: That portion of common beeswax which is insoluble in boiling alcohol. It consists chiefly of myricyl palmitate, $C_{31}H_{61}(C_{30}H_{59}O)_2$, and when heated with potash, is decomposed in the same manner as spermaceti, yielding potassium palmitate and myricyl alcohol.

mýr-i-çyl, s. [Eng. *myrica*(*o*); -yl (q.v.)]

Chem.: The hypothetical radical of myricyl-alcohol (q.v.).

myricyl-alcohol, s.

Chem.: $C_{30}H_{60}O = \frac{C_{30}H_{61}}{H} O$. Myricyl-hydrate. Melissic-alcohol. Melissin. The highest known alcohol of the series $C_nH_{2n+2}O$, obtained by heating a mixture of myricin and potash, dissolving the product in water, precipitating with baric chloride, and exhausting the precipitate with ether. It is a crystalline body with a silky lustre, soluble in boiling alcohol and in ether, and melting at 85°. When strongly heated, it partly sublimes, and is partly resolved into water and melene, $C_{20}H_{40}$.

myricyl-hydrate, s. [MYRICYL-ALCOHOL.]

mýr-i-ō-nē-mā, s. [Pref. *myrio-*, and Gr. *νήμα (nēma)* = yarn.]

Bot.: The typical genus of the sub-order or tribe Myriconeae. The frond is parasitical, forming a flat base, being cushion-like tufts of decumbent filaments. (*Greville & Hedyotis*.)

mýr-i-ō-nē-mā-çē-æ, s. pl. [Mod. Lat. *myriconeae*(*o*); Lat. fem. pl. adj. suff. *-æra*.]

Bot.: A sub-order or family of Fucaceae.

They are minute epiphytes, consisting of jointed filaments springing from a layer of decumbent, coloring filaments. They bear oblong spores, or probably zoospores, producing zoospores. British genera, four.

mýr-i-ōph-yl-li-tēs, s. [MYRIOPHYLLUM.]

Palaobot.: A fossil from the English Coal Measures, resembling Myriophyllum (q.v.).

mýr-i-ōph-yl-lōus, a. [MYRIOPHYLLUM.]

Having very numerous leaves.

mýr-i-ōph-yl-lūm, s. [Gr. *μύριος (myrios)* = innumerable, and *φύλλον (phullon)* = a leaf.]

Bot.: Water-milfoil; a genus of Haloragaceae, tribe Halorageae. The flowers are monoecious, the males having an inferior calyx of four leaves, with four petals, and four to eight stamens; the females a four-lobed calyx with four sessile stigmas; fruit consisting of four sessile, sub-globose, one-celled carpels, at last separating. Found in most countries. Known species, fifteen. Three are British, *Myriophyllum verticillatum* is the Whorled, *M. alternifolium* the Alternate-flowered, and *M. spicatum* the Spiked Water-milfoil.

mýr-i-ō-ra'-mā, s. [Pref. *myrio-*, and Gr. *οπαινα (horina)* = a view.] A sort of landscape picture: made of a number of separate sections which are capable of being associated in various ways so as to form distinct scenes.

mýr-i-ō-scope, s. [Pref. *myrio-*, and Gr. *σκοπεω (skopeo)* = to see.]

A variation of the kaleidoscope, and, like the latter, depending upon the multiplication of images which coalesce in such manner as to form a geometrical pattern. A square box has a sight-hole in front, and at the rear are two plane mirrors which are arranged at a suitable angle. On horizontal rollers is a piece of embroidered silk or other ornate fabric, which is moved by means of a crank-handle on one of the rollers. This causes a pretty display when the ornamental figures are multiplied and thrown into geometrical apposition. The top of the box is of oiled muslin or other translucent material which admits sufficient light.

mýr-i-pris'-tis, s. [Gr. *μυριός (myrios)* = numberless, and *πριστός (pristos)* = toothed like a saw.]

1. *Icthyi*: An acanthopterygian genus of the family Berycidae. Snout short; eye large; villiform teeth on vomer and palatine bones. Scales large, ctenoid. Two dorsals, the first with ten or eleven spines; anal with four spines; caudal forked; ventrals with seven soft rays. Eighteen species, from the tropical seas of both hemispheres, the majority living near the coast, at the surface. Coloration principally red or pink on the back, silvery on the sides. They attain a length of about fifteen inches, and are esteemed as food.

2. *Palaont.*: There is a species from the Eocene of Shleppy.

mý-ris'-tāte, s. [Eng. *myrist*(*ic*); -ate.]

Chem.: A salt of myristic acid.

myristate of benzoyl, s. [MYRISTO-BENZOIC ANHYDRIDE.]

myristate of ethyl, s. [MYRISTIC-ETHER.]

myristate of glyceryl, s.

Chem.: $C_{45}H_{86}O_4 = \frac{(C_{15}H_{31})^3}{(C_{14}H_{27}O)_3} O_2$. Myristin. A solid crystallizable fat, obtained from nutmegs by pressure between hot iron plates. It is insoluble in water, slightly soluble in boiling alcohol, but very soluble in boiling ether. By dry distillation it yields acrolein and a fatty acid.

mý-ris-tic, a. [Mod. Lat. *myrist*(*ic*); -ic.] Contained in or derived from nutmeg.

myristic acid, s.

Chem.: $C_{14}H_{26}O_2 = \frac{C_{14}H_{27}O}{H} O$. A monobasic acid occurring as a glyceride in nutmeg butter, in otoba fat, in dika bread, and in small quantity in cocoanut oil and spermaceti. It may also be produced artificially by heating ethal with potash lime. It is most easily obtained by the saponification of otoba fat. Pure myristic acid crystallizes from alcohol in silky needles, which melt at 54°, and solidify on cooling in crystalline scales. It is insoluble in water and in ether, but very soluble in hot alcohol. The myristates of the

alkali-metals are soluble in water, and not decomposed like the stearates. The other myristates are insoluble or sparingly soluble, and are obtained by precipitation. Myristate of copper, $C_{14}H_{25}O_2$, is a bluish-green powder consisting of microscopie needles. Myristate of lead, $C_{14}H_{25}O_2$, is a white amorphous powder which melts at 119°. Myristate of potash, $C_{14}H_{25}KO_2$, forms a white crystalline soap, soluble in water and alcohol, but insoluble in ether.

myristic alcohol.

Chem.: $C_{14}H_{26}O = \frac{C_{14}H_{27}O}{H} O$. Methyl. An alcohol supposed to exist, together with ethal and others of the same series, in commercial spermaceti. It has never been isolated.

myristic aldehyde, s.

Chem.: $C_{14}H_{24}CHO$. Obtained from myristic acid by oxidation. It melts at 52.5°, and boils at 214° under 100 mm. pressure.

myristic anhydride, s.

Chem.: $C_{28}H_{52}O_4 = (C_{14}H_{26}O)_2$. A fatty substance, obtained by the action of phosphorus oxychloride on potassium myristate. It melts at 50°, giving off vapour having a disagreeable odour, and is but slowly saponified by boiling caustic potash.

myristic ether, s.

Chem.: $C_{14}H_{25}(C_2H_5)O_2$. Myristate of ethyl, obtained by passing dry hydrochloric acid gas into a hot solution of myristic acid in absolute alcohol. It forms large, hard, easily fusible crystals, soluble in hot alcohol and in ether. Its specific gravity is 0.864.

mý-ris'-tī-ca, s. [From Gr. *μυριστή (myristē)* = to be fragrant with perfume, referring to the odour of the fruit.]

Bot.: The typical genus of the order Myristiceae. It consists of lofty trees or shrubs, generally aromatic, with entire leaves, and dioecious flowers. The albumen of *Myristica moschata* is the Nutmeg (q.v.), its seed the Mace (q.v.). *M. tuba* constitutes the coarse, strong smelling nutmegs of Santa Fe. Those of Brazil come from *Myristica Baudouin* or *officinalis*; it is a tome. Those of Madagascar from *M. acuminata* and *malagascariensis*, and those of the Indian Archipelago from *M. spuria*. Another is *M. tomentosa*. *M. fatiha* has but slight and evanescent fragrance. *M. corticata* and *M. longifolia*, evergreen trees, natives of Burmah, exude a red resin. The bruised and boiled seeds of *M. malabarica* yield a yellowish concrete oil applied to ulcers.

mý-ris-tī-cā-çē-æ, s. pl. [Mod. Lat. *myristiceae*(*o*); Lat. fem. pl. adj. suff. *-æra*.]

Bot.: Nutmegs; an order of Dicotyledonous Exogens, alliance Mnispermiales. It consists of tropical trees, often with a red juice, alternate, entire, coriaceous, stalked leaves, and axillary or terminal racemes, glomerules, or panicles of minute flowers, each, as a rule, having a cucullate bract. Flowers, unisexual; calyx, trifid or rarely quadrifid; filaments, separate or united; anthers, three to twelve or more. Carpels solitary, or many, with a single, erect ovule; fruit, baccate. Common in the tropics of India and America. Known genera five, species thirty-five. (*Lindley*.)

mý-ris-tī-çin, s. [Eng. *myrist*(*ic*); -in.]

Chem.: The camphor or stearoptene of volatile oil of nutmeg. (*Watts*.)

mý-ris-tic-ōl, s. [Eng. *myristic*, and (*alcohol*)]

Chem.: A camphor said to exist, together with absinthol, in the oil of wormwood. It boils at 212-218°, and yields cymene on distillation with zinc chloride or phosphoric sulphide.

mý-ris-tin, s. [Eng. *myrist*(*ic*); -in.] [MYRISTATE OF GYCERYL.]

mý-ris-tō, pref. [MYRISTONE.]

myristo benzoic anhydride, s.

Chem.: $C_{27}H_{42}O_4 = C_{14}H_{25}OC_2H_5COO$. Myristate of benzoyl. Produced by the action of benzoyl-chloride on potassium-myristate. It crystallizes in laminae, having a silky lustre; insoluble in alcohol, slightly soluble in ether. It has an agreeable odour, and melts at 88°.

mý-ris-tōnc, s. [Eng. *myrist*(*ic*); -in.]

Chem.: $C_{27}H_{42}O_4 = C_{14}H_{25}OC_2H_5COO$. A crys-

tall, substance obtained by distilling calcium myrristate. It forms colourless, acicular scales, soluble in boiling alcohol, insoluble in ether and in benzene. It melts at 75, and solidifies on cooling in a tabular mass.

myr mē cō, *s. pl.* [Gr. μύρμηξ (*myrmēx*), cf. *μυρμηξ (myrmēx)* = an ant.]. Freeding ants.

myr mē cō bi ī nē, *s. pl.* [Mod. Lat. *myrmecobii*]; Lat. fem. pl. adj. suff. *-ae*.] *Col.*: A sub-family of Hymenoptera, erected for the reception of the aberrant genus *Myrmecobius* (q.v.).

myr mē cō bi us, *s.* [Pref. *myrmeco*-, and Gr. βίος (*bios*) = life.]

Zool.: The typical and sole genus of the family Myrmecobidae. The head elongate, basal behind; muzzle, long and pointed; ears, ovate and of moderate size; five toes on fore, hallex wanting externally on hind feet, but

45. MYRMECOBIUS.

the metatarsal bone is present; no trace of pouch in female, the young, when attached to the nipples, being concealed only by the long hair of the abdomen. *Myrmecobius fasciatus*, from western and southern Australia, is the only species known. It is about the size of an English squirrel, and, like that animal, has a long, bushy tail. It lives on the ground, and feeds on snails. Colour, chestnut-red; the hinder part of the back is marked with broad white transverse bands.

myr mē cō lē ōn, *s.* [MYRMELEON.]

myr mē cōph' a ga, *s.* [Pref. *myrmeco*-, and Gr. φάγερ (*phagēr*) = to eat.]

Zool.: Ant-eater. The typical genus of the family Myrmecophagidae (q.v.). Body rather compressed, covered with long, coarse hair; tail, non-prehensile, covered with very long hair; ears, small, oval, erect; eyes, very small. There is but one species, the Great Ant-eater (q.v.).

myr mē cō phāg ī dē, *s. pl.* [Mod. Lat. *myrmecophagae*]; Lat. fem. pl. adj. suff. *-arum*.]

Zool.: Ant-eaters. A family of edentate mammals from the Neotropical region. *Myrmecophaga* (q.v.), *tamandua*, and *Tamandua* and *Cyclops*, arboreal.

myr mē cōph a gōus, *s.* [Eng. *myrmecophagous*]; Lat. fem. pl. adj. suff. *-ae*.]

Zool.: The cervical vertebrae do actually differ in two *myrmecophagous* species—*tamandua*, in *Zool. of Europe*, p. 157.

myr mē cō lē ōn, | **myr mē cō lē ōn**, *s.* [Gr. μύρμηξ (*myrmēx*) = an ant, and λέων (*lēōn*) = a lion.]

Entom.: Ant-lion (q.v.); the typical genus of the family Myrmecoleonidae (q.v.). *Myrmecoleon europaeus* and *M. formicivorus* live in the south of Europe, and there is a species in India.

myr mē lē ōn tī dē, *s. pl.* [Mod. Lat. *myrmecoleonidae*]; Lat. fem. pl. adj. suff. *-arum*.]

Entom.: A family of neuropterous insects, sub-order Planipennia, tribe Megaloptera. The head is large, the antennae clavate, the upper edge of the mandibles toothed.

myr mī ca, *s.* [Gr. μύρμηξ (*myrmēx*) = an ant.]

Entom.: The typical genus of the sub-family Myrmecinae (q.v.). Under the designation Red-ant, *Myrmica rubra*, it is now known that three species have been confounded; viz., *M. ruginodis*, *M. subsericealis*, and *M. brevicornis*. They are common in Britain, making their nests under ground, in the stumps of trees, &c. A house ant, *M. molesta*, was introduced into England from Brazil in or before 1828. It is found near fireplaces in some houses in great numbers.

myr mī cī nē, *s. pl.* [Mod. Lat. *myrmicinae*]; Lat. fem. pl. adj. suff. *-arum*.]

Entom.: A sub-family of Formicidae, containing ants in which the abdominal petiole has two knots.

myr mī cīnc, *s.* [MYRMICINE.]

Entom.: Of or belonging to the sub-family Myrmicinae (q.v.).

myr mī dōn, *s.* [Lat. *Myrmidonius*, from Gr. Μυρμιδῶνες (*Myrmidonaiōnes*). See def.]

1. *Gr. Anth.*: One of a warlike people of Thrace, ruled over by Achilles, and taken by him as his followers to the siege of Troy.

2. A soldier of a rough character; a ruffian, a brutal fellow; one who executes the orders of his superiors ruthlessly and pitilessly; an unscrupulous follower.

3. (1) *Myrmidonius of the law*: A term applied to policemen, bailiffs, sheriff's officers, or such officers of the law.

(2) *Bow Street Myrmidonians*: Bow Street runners. [RUNNERS.]

"When Little's leadless pistol met his eye
And Bow Street myrmidonians stood laughing by."
Burton, English Bards & Scotch Reviewers.

myr mī dō nī an, *s.* [Eng. *myrmidon*]; Lat. fem. pl. adj. suff. *-arum*.]

"Some beam of comfort yet on Greece may shine,
If I but lead thy *Myrmidonian* line."
Pope, Homer; Iliad xv. 57.

myr rōb' a lān, **myr rōb' ō lān**, *s.* [Lat. *myrobolanium*, from Gr. μύροβαλανός (*myrobolānos*), from μύρον (*myron*) = a sweet juice distilled from plants, any prepared unguent or sweet oil, and βαλανός (*balānos*) = an acorn, a nut; Fr. *myrobolane*, *myrobolano*; Sp. *mirobolano*, *mirobolano*; Ital. *mirobolano*.]

Botany: 1. *Stag.*: *Terminalia Chebala*, and others of the genus. [TERMINALIA.]

2. *Pl.*: The name given by Linley to the order Combretaceae (q.v.).

3. The Boleic myrobolan is *Terminalia belleric*; *Emlib* myrobolans are the fruit of *Phyllanthus Emlib*, called also *Emliba officinalis*. [PHYLLANTHUS.]

myrobalan plum, *s.*

Bot.: *Prunus cerasifera* or *P. domestica*. *Myrobolana*, a North American deciduous shrub, introduced into Britain in 1629.

myr rō dī a, *s.* [Gr. μύρον (*myron*) = fragrant oil, and δία (*dia*) = smell.]

Bot.: A genus of Sterculiaceae, tribe Helicteraceae. *Myrodia angustifolia* is used in Brazil in venereal disorders.

myr rō nāte, *s.* [Eng. *myronate*]; Lat. fem. pl. adj. suff. *-arum*.]

Chem.: A salt of myronic acid.

myr rōn' ic, *a.* [Gr. μύρον (*myron*) = a sweet-smelling ointment; Eng. suff. *-ic*.] (For def. see etym. and compound.)

myronic acid, *s.*

Chem.: $C_{10}H_{10}NS_2O_{10}$. An acid occurring as potassium-myronate in the seeds of the black mustard. Its properties are unknown in the free state, as it decomposes quickly. The myronates are inodorous, soluble in water, and yield sulpho-cyanate of alkyl with aqueous myrosin. Potassium-myronate, $C_{10}H_{10}NS_2O_{10}$, is obtained by digesting ground mustard-seed with boiling alcohol, and treating the residue with cold water. It crystallizes in silky needles, insoluble in absolute alcohol and ether, but very soluble in water. It is quickly converted by myrosin into grape-sugar, oil of mustard, and hydric potassium-sulphate.

myr rōp' ō list, *s.* [Gr. μύροπότης (*myropōtēs*), from μύρον (*myron*) = a sweet oil, and πότης (*pōtēs*) = to sell.] One who sells unguents or perfumery.

myr rō sin, *s.* [Gr. μύρον (*myron*) = a sweet-smelling ointment; *s* connect., and Eng. suff. *-in*.]

Chem.: The ferment of mustard-seed, prepared by exhausting the pulverised seeds of black and white mustard with cold water, and precipitating by means of alcohol. Its aqueous solution is transparent, colourless, and gummy, and froths when agitated.

myr rō spēr' mīn, *s.* [Eng. *myrospermum*]; Lat. fem. pl. adj. suff. *-arum*.]

Chem.: The name given by Richter to the portion of the oil of Balsam of Peru which is soluble in alcohol. (*Cooley*.)

myr rō spēr' mūm, *s.* [Gr. μύρον (*myron*) = a sweet oil, and σπέρμα (*spērma*) = a seed.]

Bot.: A genus of papilionaceous plants, tribe Sophoreae. *Myrospermum peruvianum*, A. J. Siquinno, furnishes the Balsam of Peru (q.v.); and *M. boliverianum* the Balsam of Tolu (q.v.).

myr rōx ō car' pīn, *s.* [Eng. *myroxylon*]; *a* connective; *oxy* (*ox*), and suff. *-in*.]

Chem.: $C_{15}H_{15}O_6$. A substance extracted from white Peru Balsam by alcohol. It crystallizes in large, thin, colourless prisms, often an inch long, tasteless, insoluble in water, but very soluble in alcohol and ether. It melts at 115 to a transparent glass, which does not crystallize on cooling. It does not unite with acids or alkalis.

myr rōx' yl' ic, *a.* [Mod. Lat. *myroxylon*]; Eng. adj. suff. *-ic*.] Contained in or derived from myroxylon.

myroxylic acid, *s.* [MYROXYLIS.]

myr rōx' yl' īn, *s.* [Eng. *myroxylon*]; *-in*.]

Chem.: The name given by Richter to the portion of the oil of Balsam of Peru which is insoluble in alcohol. By oxygenation it forms myroxylic acid. (*Cooley*.)

myr rōx' yl' ōn, *s.* [Gr. μύρον (*myron*) = sweet oil, distilled from a plant, and ἔλαιον (*elaion*) = wood.]

Bot.: A synonym of *Myrospermum* (q.v.).

myrrh, **mirre**, **myrrhe**, **myrre**, *s.* [O. Fr. *mirre* (Fr. *myrrhe*), from Lat. *myrrina*; Fr. *myrre* (*myrrhe*) = the balsamic juice of the Arabian myrtle, from Arab. *myrr* = (1) butter, (2) myrrh; cogn. with Heb. *myr* = bitter; Ital. & Sp. *myrra*.]

1. *Botany*: (1) *Balsamolegnum Myrrha*. [2] (2) The genus *Myrrhis* (q.v.).

2. *Chem.*: A gum resin which exudes from *Balsamolegnum Myrrha*, a shrub growing in Arabia and Abyssinia. It occurs in irregular, roundish masses, called "tears," varying in size from small grains to pieces as large as an egg, semi-transparent, and possessing a reddish-brown colour. It has a peculiar and agreeable fragrance, with an aromatic, bitter, and acid taste; slightly soluble in water and alcohol, but very soluble in chloroform.

3. *Pharm.*: There is a tincture of myrrh and a pill of aloes and myrrh. Myrrh is a stimulant, an antispasmodic, and an emmenagogue. It is given internally in amenorrhoea, leucorrhoea, chronic bronchitis, and phthisis. Externally it is applied to alythous sore mouth, spongy gums, &c. (*Garrod*.)

myrrh seed, *s.*

Bot.: *Myrospermum pubescens*.

myrrh' ic, *a.* [Eng. *myrrh*]; *-ic*.] Pertaining to or derived from myrrh.

myrrh' in, *s.* [Eng. *myrrh*]; *-in*.]

Chem.: The portion of myrrh soluble in alcohol. It has the odour of myrrh, melts at 93°, and is soluble in ether. Heated to 168° it swells up and is decomposed, leaving a reddish-brown mass, without taste or smell, soluble in alcohol and ether, but insoluble in boiling potash.

myrrh' inc, *a. & s.* [Lat. *myrrhinus*.] [MYRRHINE.]

A. As adj.: Made of the myrrhine stone. "Crystal and myrrhine cups embossed with gems."
Milton, P. R., iv. 119.

B. As subst.: Myrrhine; myrrhite (q.v.).

myrrh' is, *s.* [Gr. = Sweet Cicely.]

Bot.: Cicely; a family of umbelliferous plants, family Canalicidae. The umbels are compound, many-rayed; the bracts few or none; the bracteoles many, membranous; the fruit very elongate, with the commissure broad; the carpels very convex at the back. Two species are known. One, *Myrrhis odorata*, is half wild in Britain. It has deltoid, tri-lobulate leaves, is aromatic and stimulant. Formerly it was cultivated as a pot herb, and is still used in Italy in salads. (*Sir J. D. Hooker*.)

fāte, fāt, fare, amidst, whāt, fāl, father; wē, wēt, here, camēl, hēr, there; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōrc, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rule, fūll; try, Sŷrian. æ, œ = ē; ey = ā. ȳr = iōr.

myrrh ite, s. [MYRRHINT.]

myrrh oil, s. [Eng. *myrrh*, and Lat. *ol(eum)* = oil.]

Chem.: The essential oil of myrrh, obtained by distilling an alcoholic solution of myrrhin with water. It is a viscid, brownish green oil; sp. gr. 1.0189 at 15.5°, boiling at 266°.

myrrh' ô phôre, s. [Lit. = myrrh-bearer, from Gr. *myrrha* (*myrrhina*) = myrrh, and *phoros* (*phoros*) = to bear.]

Art.: The myrrhophores are the three Maries, who, "as it began to dawn, came to see the sepulchre." They are represented as bearing vases of myrrh in their hands.

***myrrh' y, a.** [Eng. *myrrh*; *y*] Red-dirt of myrrh.

"As pours some pigeon from the myrrhy land"
Browning, Watermark

myr si nâ çê-æ, s. pl. [Mod. Lat. *myrsinæ*]; Lat. fem. pl. adj. suff. *-æveæ*.]

Bot.: Anisades, an order of Perigynous Exogens, alliance Cortusales. It consists of trees or handsome shrubs, with smooth, coriaceous, exstipulate leaves, sometimes ternate. Inflorescence, generally axillary, in umbels, corymbs, or panicles; flowers small, white or red, often with sunken dots or lines; calyx, four- to five-cleft, persistent; corolla four- or five-cleft; stamens four or five, with anthers, opposite the segments of the corolla, there also in some cases being five sterile petaloid ones; ovary superior or half inferior, one-celled, with a free central placenta and a definite or indefinite number of ovules; fruit fleshy, generally one-seeded. Found in tropical islands, also in Asia, Africa, and America. Known genera, thirty; species, 320. (*Lindley*.)

myr-sî nê, s. [Gr. *μυρσίνης* (*myrsinês*) = of myrtle, from *μύρτος* (*myrtos*) = myrtle.]

Bot.: The typical genus of the order Myrsinææ. The fruit of *Marsipia africana* is antihelmintic. In dropsy and colic it is a laxative. The gum is a remedy for dysmenorrhœa. The berries of *M. bifida* are cathartic.

myr tâ-çê æ, s. pl. [Lat. fem. pl. of *myrtæceris* = of myrtle, from *myrtus* (q.v.).]

Bot.: Myrtle-blooms; an order of Epigynous Exogens, alliance Myrtales. It consists of trees or shrubs, with opposite or alternate entire leaves, usually with transparent dots and a vein running parallel to the margin. Inflorescence generally axillary; flowers red, white, or yellow, never blue; calyx valvate, four- or five-cleft, sometimes falling off in one piece; petals four or five, or wanting; stamens generally twice as many as the petals, rarely the same in number, sometimes indefinite; ovary inferior, one-, two-, four-, five-, or six-celled, with a simple style; placenta central or axile. Fruit dry or fleshy; seeds generally induplicate. Natives of South America, the East Indies, Australia, the South Sea Islands, with a few in Africa, &c. It is divided into two tribes — *Leptospermeæ*, with capsular, and *Myrtææ*, with baccate fruit. Known genera, forty-five; species, 1,300. (*Lindley*.)

myr-tâ-çê-ous (or çê as sh), a. [MYRTÆCÆ.]

Bot.: Of or pertaining to the Myrtæcæ (q.v.).

myr-tal, a, & s. [Mod. Lat. *myrtalis*.]

A. *As adj.*: Of or belonging to the genus *Myrtus* (q.v.); as, the *Myrtal* Alliance. (*Lindley*.)

B. *As subst.*: A plant of the alliance Myrtales. (*Lindley*; *Veg. Kingd.* (ed. 3rd), p. 716.)

myr-tâ-lês, s. pl. [Lat. *myrtal(es)*; masc. or fem. pl. adj. suff. *-al(es)*.]

Bot.: An alliance of Epigynous Exogens with polypetalous dichlamydeous flowers; axils, placenta, and the embryo with little or no albumen. It contains ten orders: Combretææ, Alangiææ, Chamælaniææ, Haloragacææ, Amaracææ, Rhoizophorææ, Bellisacææ, Melastomacææ, Myrtæcææ, and Lecythidacææ.

myr-tê-æ, s. pl. [Lat. *myrtal(es)*; fem. pl. adj. suff. *-æ*.]

Bot.: The typical tribe of the order Myrtæcæ (q.v.).

myr-ti-form, a. [Lat. *myrtos* = myrtle, and *forma* = form, shape.] Having the appearance of myrtle or myrtle-berries.

myrtiform fossa,

Anat.: A slight depression in the upper maxillary bone. Called also the meisor fossa.

myr tle, mir tle, myr til, s. [O. Fr. *myrtel*, dmu., of *myrt*, *myrtis* = the myrtle, from Lat. *myrtus*, *myrtis*, *myrta*, from Gr. *μύρτος* (*myrtos*), from Pers. *myrd* = the myrtle.]

1. *Bot.*: *Myrtus communis*, a native of Persia, but naturalised in the south of Europe and grown in greenhouses and sheltered places in Britain. By distillation it yields an essential oil, used in perfumery. About a hundredweight of the leaves yield only 3 oz. of the perfume called in France *eau de rose*. The leaves are used in cerebral affections, &c. The fruit, which is carumative and astringent, is given in dysentery, diarrhoea, internal ulcers, and rheumatism. Dr. Emerson says that a gargle of the leaves is used in aphthæ, and a paste of the seeds in scorpion bites. (*Valentia Eribis, Rep.*) In the Greek archipelago the berries, especially those of a variety with white fruit, are eaten, as were the buds and berries by the ancients. In Tuscany they are used for pepper, and also made into a kind of wine, there called *myrtinum*. The powdered leaves have been used in Sicily as a substitute for snuff.

2. *Script.*: The word rendered *myrtle* in Scripture is correctly translated.

myrtle-berry, s. The fruit of the myrtle.

myrtle bilberry, s.

Bot.: *Vaccinium myrtillus*.

myrtle bloom, s.

Bot. (Pl.): The English name given by Lindley to the order Myrtæcæ (q.v.).

myrtle wax, s. [MYRTICA-TALLOW.]

myr-tūs (pl. myr-tī), s. [Lat., from Gr. *μύρτος* (*myrtos*).] [MYRTLE.]

Botany:

1. *Sing.*: The typical genus of the order Myrtæcæ (q.v.). The flowers, which are yellow or white, are axillary; the petals five; the fruit succulent, crowned by the calyx lobes, divided into two or three cells, their seeds kidney- or horseshoe-shaped, with a bony shell; leaves opposite, entire, dotted. About twelve species are known, from South America, Central Asia, and New Zealand. *Myrtus communis* is the Myrtle (q.v.). All are not trees, *M. Newzealandica* of the Falkland Islands being an undershrub.

2. *Pl.*: Jussieu's name, given in 1789, to the order now called Myrtæcæ, of which he was the founder.

myr-ūs (yr as ir), s. [Lat., from Gr. *μύρος* (*myros*) = a kind of sea-eel, the male of the Murena.]

Ichthy.: A hypothetical genus of Murenideæ; possibly it may be only a larval form of some other species.

my-sêlf, my-selvé, my silf (pl. ôur-sêlves), pron. [Eng. *my*, and *self*.]

1. Used in the nominative, after I, to add emphasis, or to point out more emphatically the distinction between the speaker and another person. The I is sometimes omitted in poetry.

"Myself hath often overheard them say,"
Shakspeare, Titus Andronicus, iv. 4.

2. Used in the objective as a reflexive pronoun.

my selvé, my selv en, pron. [MYSELF.]

my-sî-dæ, s. pl. [Mod. Lat. *mysid(es)*; Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: Opossum-shrimps; a family of Crustaceans, order Stomatopoda. The form of the body closely approaches that of the shrimps; the resemblance to an opossum is in the pouch, formed of plates attached to the abdominal legs, in which the female keeps first the eggs and then the immature young. They form a great part of the food of the whale.

my-sîs, s. [Gr. *μύσεις* (*mysis*) = a closing the lips or eyes; *μύω* (*mysô*) = to close, to shut.]

Zool.: Opossum-shrimp; the typical genus of the family Mysidæ (q.v.). *Mysis chlorurca*, or *rubiparis*, the Common Opossum-shrimp, is a native of the northern European seas, &c. *M. relicta*, from the great lakes of Sweden and North America, is the only known freshwater Stomatopod.

mysis stage,

Bot.: A stage in the development of certain Crustaceans (Phyllocæ) in which they exhibit the typical qualities of MYSIS, a genus belonging to a slightly advanced group.

mýs ôps, s. [Gr. *μύς* (*mys*) = a mouse, and *ôps* (*ôps*) = the eye, the face, the countenance.]

Bot.: *Myrica*. A genus of Myricales found in the Eastern and North American zone.

My sore, s. [Hind. *Mysh-ha-ara*.]

A state of Southern India professed by the British.

Mysore thorn,

Bot.: *Caralpinus spinosa*, a scandent, strictly armed shrub, forming an almost impenetrable fence. Hybrid Myrtles in a good cultivated place, to which *Phoradendron*

mýs ta çî na, s. [Mod. Lat., from Gr. *μύσταις* (*mystais*), genit. *μύστακος* (*mystakos*) = the upper lip.]

Zool.: *Mystacinus tuberculata*, the sole species of the group Mystacina, a peculiar form restricted to New Zealand, where, with *Chalcidius tuberculatus*, it represents the indigenous mammalian fauna. It has the peculiar property of folding its wings and rolling up the posterior half of the intersegmental membrane, thus becoming quadruped. The claws of the thumbs and toes have each a small lacin projecting from the base. The soles of the feet and the inferior surface of the legs are manifestly adhesive, and their structure leads to the belief that this species hunts for its insect food, not only in the air, but also on the branches and leaves of trees, among which its peculiarities of structure probably enable it to walk about with security and ease. (*Proc. Zool. Soc.*, 1876, p. 488.)

mýs ta çî-næ, s. pl. [Nom. pl. of Mod. Lat. *mystacinæ* (q.v.).]

Zool.: A group of Embellimorpha subfamily Melosomina. The tail perforates the intersegmental membrane, and appears on its upper surface. Mystacina is the sole genus.

mýs ta cò çêtes, s. pl. [MASTVOCTE.] The English form of the scientific name *Mystacoceti* (q.v.).

"The *Mystacocetæ* appear at first sight to be the most specialized and aberrant of the existent Cetææ."
Encyc. Brit. (ed. 9th), vi. 734.

mýs ta-cò çê-ti, s. pl. [Mod. Lat., from Gr. *μύσταις* (*mystais*), genit. *μύστακος* (*mystakos*) = the upper lip, and *κίχρος* (*kichros*) = a sea-monster, a huge fish.]

1. *Zool.*: The Batropoda (Whalebone or Bilen Whales), a sub-order of Cetææ Genera, *Balenæ*, *Neodulicæ*, *Rachinæctes*, *Meqaptera*, and *Balanoptera*.

2. *Paleont.*: The sub-order is represented in the early Pliocene, but the species were generally smaller than those now existing.

mýs ta-cò leu-cûs, s. [Gr. *μύσταις* (*mystais*), genit. *μύστακος* (*mystakos*) = the upper lip, the mustache, and *λευκός* (*leukos*) = white.]

Ichthy.: A genus of Xenocephalina, from Sumatra.

mýs ta gòg ic, mýs ta gòg ic al, a. [Eng. *my* (*myself*); *ic*.] Relating or pertaining to a mystagogue or mystagogy; having the character of a mystagogue; pertaining to the interpretation of mysteries.

"Mysticall hath often overheard them say,"
Shakspeare, Titus Andronicus, iv. 4.

2. Used in the objective as a reflexive pronoun.

mýs ta gòg ic al, mýs ta gòg ic al, a. [Eng. *my* (*myself*); *ic*.] Relating or pertaining to a mystagogue or mystagogy; having the character of a mystagogue; pertaining to the interpretation of mysteries.

"Mysticall hath often overheard them say,"
Shakspeare, Titus Andronicus, iv. 4.

2. Used in the objective as a reflexive pronoun.

mýs ta gòguc, s. [Lat. *mystagogus*, from Gr. *μύσταιγος* (*mystaiygos*), from *μύσταις* (*mystais*) = initiated in mysteries, and *αγωγός* (*agōgos*) = a leader; *αγωγή* (*agōgē*) = to lead; Fr. *mystagogue*; Ital. *mistagogico*.]

1. One who interprets divine mysteries.

"The Egyptian *mystagogus* taught it among other created spirits."
Washington, Divine Evidences, bk. ii. 14.

mýs ta gòg y, s. [MASTVOCTE.] The interpretation of mysteries; the principles, practice, or doctrines of a mystagogue.

*mÿs tēr, s. [MYSTER.]

*mÿs tēr i al, s. [Eng. myster; -al.] Containing a mystery or puzzle; not easily understood or solved; enigmatical. "Beauty and Love, whose story is mysterious!" —Ben Jonson: Love's Triumph.

*mÿs tēr i arch, s. [Gr. μυστηράρχης (mÿstēr-ārch), from μυστήριον (mÿstērion) = a mystery, and ἀρχή (archē) = to rule, to direct.] One who presides over mysteries. [MYSTERY (1), 6.]

mÿs tēr i ōūs, v. [Fr. mystérieux; from Lat. mysterium = a mystery (q.v.); Ital. & Sp. misterioso.] Containing or of the nature of a mystery; not plain to the understanding; obscure; beyond human comprehension; mystic, occult, incomprehensible. "Mysterious His ways, whose power Brings forth that unexpected doom." —Cowper: Pastoral Epistle to Lady Austen.

mÿs tēr i ōūs lÿ, adv. [Eng. mysterious; -ly.] In a mysterious manner; in a manner beyond human comprehension; mystically, allegorically. "Each stair mysteriously was meant, nor stood There always." —Milton: P. L., vi 516.

mÿs tēr i ōūs nēss, s. [Eng. mysterious; -ness.]

1. The quality or state of being mysterious; obscurity; mysticalness, incomprehensibility. "The unavoidable mysteriousness of the chief articles of the Christian religion." —South: Sermons, vol. ii, ser. 6.

2. That which is mysterious or obscure; a mystery.

*mÿs-tēr-ize, v.t. [Eng. myster(y); -ize.] To express in enigmas. "Mysterizing their enigms, they make the particular ones of the twelve tribes accomodable unto the twelve signs of the zodiac." —Browne: Vulgar Errors, bk. v, ch. x.

mÿs tēr-ÿ (1), *mÿs-tēr-iē (1), s. [Lat. mysterium, from Gr. μυστήριον (mÿstērion) = a mystery, from μύσσειν (mÿssēs) = one initiated into mysteries; μύω (mÿō) = (1) to close the mouth or eyes, (2) to initiate into mysteries; Fr. mystère; Ital. misterio, mistero; Sp. misterio.]

1. Something above human comprehension, and fitted to inspire a sense of awe; something hidden from human knowledge. "I will tell thee the mystery of the woman and of the beast that carrieth her." —Revelation xvii. 7.

2. A secret; something carefully and intentionally hidden from the knowledge of others. "You would pluck out the heart of my mystery!" —Shakspeare: Hamlet, iii. 3.

3. An enigma, a puzzle; a riddle; something puzzling or hard to understand. "There is a mystery in the soul of state." —Shakspeare: Troilus & Cressida, iii. 3.

4. The Holy Communion. "My duty is to exert you in the mean season to consider the dignity of that holy mystery." —Common Prayer: Communion Service.

5. (Pl.): The consecrated elements in the Eucharist.

"We most heartily thank thee for that thou dost vouchsafe to feed us, who have duly received these holy mysteries, with the spiritual food of the most precious Body and Blood of thy Son our Saviour Jesus Christ." —Common Prayer: Communion Service.

6. (Pl.): A term applied amongst the Greeks and Romans to certain secret rites and ceremonies, only known to and practised by the initiated; as, the Eleusinian mysteries.

*mÿs tēr-ÿ (2), *mÿs-tēr-iē (2), s. [A corrupt. of Mid. Eng. mystice = a trade, a craft; from O. Fr. mister (Fr. métier); from Lat. ministrum = service, employment; mister = a servant. The proper spelling should be mystery, or mister, the y being due to confusion with mystery (1).] [MYSTER.]

1. A trade, an occupation, an employment, a profession.

2. A kind of mediæval drama, or dramatic composition, the characters and events of which were drawn from sacred history. They were totally devoid of invention or plot, following the sacred narrative or the legends tamely and literally. They were also called miracle-plays. [MIMICRY.] The Mysteries were succeeded in the sixteenth century by Moralities, in which we find the first attempts at dramatic art, as they contain some rudiments of a plot, and even attempted to delineate character and to paint manners. Many of these Mysteries still exist. They were played

by members of the different crafts or trading companies. Thus the collection known as the Chester Mysteries were acted in that city in the year 1327, and contains "The Fall of Lucifer," acted by the Tanners; "The Creation," by the Butchers; "The Last Supper," by the Bakers; "The Resurrection," by the Skinners, &c. [MORALITY, 4.]

mystery play, s. [MYSTERY (2), 2.]

mÿs tic, *mÿs tick, n. & s. [Fr. mystique from Lat. mysticus, from Gr. μυστικός (mÿstikos) = mystic, from μύσσειν (mÿssēs) = one initiated into mysteries; Ital. & Sp. místico.]

A. As adjective:

1. Hidden from or incomprehensible to human knowledge or comprehension; mysterious, dark, occult, obscure, secret. "Careful the Lady to be list Her magic arts in view of day." —Scott: Lay of the Last Minstrel, v. 27.

2. Allegorical, emblematical. "Ceremonial law, with all its mystic rites . . . to many, that bestow the reading on it, seems scarce worth it." —Boyle: Works, ii. 278.

3. Pertaining to the ancient mysteries. [MYSTERY (1), 6.]

4. Of or pertaining to mystics or mysticism.

B. As subst.: One who is addicted to mysticism; a supporter of the doctrine of mysticism; specif., one of a religious party which arose towards the close of the third century, distinguished by their professing pure, sublime, and perfect devotion. "But why before us Protestants produce An Indian mystic or a French recluse?" —Cowper: Truth, 128.

*mÿs-tic-al, *mÿs-tic-all, *mÿs-tic-all, a. [Eng. mystic; -al.] The same as MYSTIC, a. (q.v.).

"These things are mystical and not to be understood but by Theophrastus himselfe." —Ginsburgh: Icon Bartholomæus of Bath. (Note.)

mystical theology, s.

Ecclesiol.: That branch of theology which deals with personal spiritual experience, and lays down rules for the attainment of a high state of contemplation.

mÿs-tic-al-lÿ, *mÿs-tic-al-liē, adv. [Eng. mystical; -ly.] In a mystical manner; allegorically.

"All characterized mystically there." —Sterling: Domesday; The Fifth Hour.

*mÿs-tic-al-nēss, s. [Eng. mystical; -ness.] The quality or state of being mystical.

*mÿs-ti-çism, s. [Eng. mystic; -ism; Fr. mysticisme.]

Theol. & Church Hist.: The views of the mystics; specially, that they possessed more direct communion with God than did other Christians. Individuals have more or less held this view in every age of the Church. The creed of modern mysticism may be found in the universally popular Imitation, attributed to a Kempis; somewhat less known are the poems of Madame Guyon, translated by Cowper. The piety breathed in her verse is most ardent, though at times the language used is more familiar than is usually addressed to God.

mÿs-ti-fi-cā-tion, s. [Fr.]

1. The act of mystifying, puzzling, or perplexing.

2. The state of being mystified, puzzled, or perplexed.

3. That which mystifies, puzzles, or perplexes; a puzzle, a mystery.

*mÿs-ti-fi-cā-ōr, s. [MYSTIFY.] One who mystifies, puzzles, or perplexes.

mÿs-ti-fÿ, v.t. [Lat. mystifico, and fÿ, pass. of fero = to make.] To involve or shroud in mystery; to perplex. [MYSTERY (1).]

mÿs-trō-pēt-a-lī-næ, s. pl. [Mod. Lat. mystroptelion]; Lat. fem. pl. adj. suit. -ina.]

Bot.: An order of Rhizanthis parasitic on roots. The stem is sheathing, covered by imbricated scales; the flowers in dense heads or spikes. They are monœcious, the male flowers being on the upper and the female on the lower part of the spike. The males are one- to three-valved; stamens two (?); the females a three-lobed stigma. Fruit a rounded achene. Akin to Balanophoraceæ. Known species two, both from South Africa. (Sir Joseph Hooker & Prof. Balfour.)

mÿs trō-pēt-a-lōn, s. [Gr. μυστρον (mÿst-rōn) = a spool, and πέταλον (petalon) = a leaf, a petal.]

Bot.: The typical genus of the order Mystroptelium (q.v.).

*mÿ-ta-çism, s. [Gr. μεταçισμός (mÿtal-çism) = fondness for the letter m.]

Etym.: Too frequent use of the letter m. (Encyc. London.)

mÿth, *mythe, s. [I. d. mythos = a fable, a myth; Gr. μῦθος (mÿthos) = anything delivered by word of mouth.]

1. Literally:

(1) thin.: A fiction framed unconsciously, not a wilful falsehood. Such myths arose most copiously in the infancy of nations, but they do so yet, especially among young people or the uneducated, there being the closest analogy between the mind of early man and that of a child or of an imbecile person. Every observation of nature, every event in human history, every attempt to understand nature tended to the multiplication of myths. They have been divided into philosophical and historical myths, myths of observation, nature-myths, &c.

(2) Spec.: A philosophical myth. According to George is the evolving of an imaginary fact from an idea, and is to be distinguished from legend, which is the evolving of an idea from a fact. When the Romans of the Augustan times, out of the idea how their polity arose, created the narrative of Æneas, his misfortunes, his wanderings, and his settlement in Italy, they framed a myth; when real historic facts become embellished by fiction, they are legendary. "Most of the Hottenot mythæ solar or celestial." —Max Müller: Science of Religion (1822), p. 229.

2. Figuratively:

(1) Any statement partly or wholly fabulous.

(2) A euphemism for a falsehood.

(3) A person or thing which does not exist; as, He is a myth.

mÿth-ic, mÿth-ic-al, a. [Eng. myth; -ic, -ical; Fr. mythique.]

1. Lit.: Of or belonging to myths in the literal sense.

2. Fig.: Of or belonging to fabulous narrations or falsehoods.

*mÿth-ic-al-lÿ, adv. [Eng. mythical; -ly.] In a mythical manner; by means of myths or mythical fables.

mÿth-i-cō, pref. [MYTHIC.] (For definition see compound.)

mythico-historical, a. Partly mythical and partly historical; partaking of the nature both of myth and of history.

"This expedition is properly an example of mythico-historical narrative." —Lewis Cred. Early Roman Hist (1855), ii. 502.

*mÿth-ō-clās-tic, a. [Gr. μῦθος (mÿthos) = a fable, and κλάσσειν (klāsēs) = a breaker; κλάω (klāō) = to break.] Destroying faith in myths and legends.

"In this mythoclastic age." —Spectator, Oct. 15, 1881.

mÿ-thōg-er-a-phēr, s. [Gr. μῦθος (mÿthos) = a fable, & myth, and γράφω (grāphō) = to write.] One who writes myths; one who narrates myths, fables, or legends.

"The statues of Mars and Venus had been copied from Filagetas, Eusebius's favourite mythographer." —Warton: Hist. Eng. Poetry, vol. 1. (Addenda.)

mÿ-thōl-ē-gēr, s. [Gr. μυθολογία (mÿthologos) = dealing in fables.] [MYTHOLOGY.] The same as MYTHOLOGIST (q.v.).

*myth-ō-lō-gī-an, s. [Eng. mythology; -an.] A mythologist.

mÿth-ō-lōg-ic-al, *mÿth-ō-lōg-ic, a. [Gr. μυθολογικός (mÿthologikos), from μυθολογία (mÿthologia) = mythology (q.v.).] Pertaining or relating to mythology; containing or of the nature of a myth; fabulous, mythical, legendary.

"And taught at schools much mythologic stuff, But sound religion sparingly enough." —Cowper: Tractation, 197.

mÿth-ō-lōg-ic-al-lÿ, adv. [Eng. mythological; -ly.] In a mythological manner; according to mythology; by the use of myths.

"An essay . . . mythologically, mythologically, and emblematically offered." —Wood: Athena Oxoniensis, vol. ii. Dissert. Jones.

fātē, fāt, fare, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, there; pīne, pit, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rīle, fūll; trÿ, Syrian. æ, œ = é; y = ā; qu = kw.

mý-thōl-ō-gíst, s. [Eng. *mythology*(y); -íst.] One who is versed in mythology; one who writes or discourses on mythology.

† **mý thōl ó gíze, v.t.** [Eng. *mythologize*(y); -íz.] To relate or discourse on mythology or fabulous history. [*Catalan Review*, Nov. 10, 1883, p. 607.]

* **mýth ó-lógue, s.** [MYTHOLOGY.] A myth or fable invented for a purpose.

"May we not consider his history of the Fall as an excellent *mythology*?"—*Calculus*, *Trigon. Bibl.* (1767)

mý-thōl ó-gý, s. [Fr. *mythologie*, from Lat. *mythologia*; Gr. *μυθολογια* (*mythologia*), from *μυθος* (*mythos*) = a fable, and *λογος* (*logos*) = a word, a discourse; *λογος* (*logos*) = to tell.]

1. Gen.: The science of myths or legends; that branch of science which investigates the meaning of myths, and the relationship between the myths of different countries or peoples; a treatise on myths.

"Parts of *mythology* are religious, parts of *mythology* are historical, parts of *mythology* are poetical, but *mythology* as a whole is neither religion nor history, nor philosophy, nor poetry. It comprehends all these together under that peculiar form of expression which is natural and intelligible at a certain stage, or at certain recurring stages in the development of thought and speech, but which, after becoming traditional, becomes frequently unatural and unintelligible."—*Max Müller*, *Science of Religion*, pp. 252, 253.

2. Spec.: A system of myths or fables in which are embodied the beliefs of a people concerning their origin, deities, heroes, &c.

"What we call a religion differs from *mythology* in the same way as a civilized state does from a savage tribe."—*Sage*, *Comparative Philology* (1854), p. 230.

3. *Comparative mythology*: The comparison of the mythologies of all nations. Professor Sayce considers that it is but a branch of the science of language. Mythology, he says, is founded on words, and the history, therefore, of words must explain its external side, which is its most important one. The religious instruct will explain the internal one.

* **mýth ó-plásm, s.** [Gr. *μυθος* (*mythos*) = a fable, and *πλασμα* (*plasma*) = anything moulded, a fiction; *πλασσω* (*plássō*) = to mould.] A narration of mere fable.

* **mýth ó-pœ ic, mýth ó-pō ét ic, a.** [Gr. *μυθολογος* (*mythologos*) = making legends or fables; *μυθος* (*mythos*) = a fable, and *ποιω* (*poiō*) = to make.] Myth-making; suggesting or giving rise to myths.

"These mythical genealogies . . . do not belong to the earliest *mythologic* ages."—*Cox*, *Introduct. to Mythology*, p. 37.

† **mýth ó-pō-é-sis, s.** [Gr. *μυθος* (*mythos*) = a myth, and *ποιωσις* (*poiēsis*) = a making.] The growth of myths.

"It is in keeping with the principles of *Mythopoeia* that Calypso's land . . . should be in the midst of the sea."—*Keary*, *Outlines of Primitive Belief*, p. 42. (Note 3.)

mý-til-í-dæ, s. pl. [Lat. *mytil(us)* = a sea-mussel; fem. pl. adj. suff. -í-dæ.]

1. Zool.: Mussels; a genus of Conchiferous Mollusca, division Asiphoidea; shell, oval and equilateral; edges closely fitting, ligament internal, hinge edentulous. The Mytilidae are mostly marine, and attached by a byssus. Chief genera, Mytilus, Modiolus, Lithodanus, and Plesseia.

2. Paleont.: The family is Paleozoic, some members being from the Lower Silurian, others from the Coal Measures and the Permian.

mý-til-ite, s. [Lat. *mytil(us)*; Eng. suff. -ite (*Paleont.*)]

Geol.: A fossil shell of the genus Mytilus.

mý-tí-lóid, s. & a. [Lat. *mytilus* (q.v.), and Gr. *είδος* (*eidos*) = form, resemblance.]

A. As substantive:

Zool.: An individual of the family Mytilidae.

B. As adj.: Belonging to, characteristic of, or resembling the Mytilidae.

"A *mytiloid* shell."—*Geol. Mag.*, 1883, p. 415.

mý-tí-lús, s. [Lat., from Gr. *μύτιλος* (*mytilos*) = Mytilus *mytilus*. (See def.)]

1. Zool.: True Mussel; the typical genus of the family Mytilidae (q.v.). Shell, wedge-shaped, umbones at end; it inoors itself to piles and stones by a strong and coarse byssus. World-wide in distribution; seventy recent species have been described. *Mytilus edulis* is the Common Sea Mussel (q.v.). Horace (*Sat.*, ii. 4, 27) (if *mytilus* is not a misreading for *unguis*), attributes purgative qualities to it, and it is mentioned by Martial (iii. 60) as far inferior to the oyster.

2. Paleont.: Apparently came into existence in Permian times.

mýx a mœ bæ, s. pl. [Gr. *μύξα* (*myxa*) = mucus, and Mod. Lat. *myxina*.]

Zool.: A name given to Myxomyxete in a certain stage of development.

mýx í-nê, s. [Gr. *μαγίρος* (*magiros*) = a smooth sea-fish, a slime-fish.]

Ichthy.: The typical genus of the family Myxiniidae (q.v.). There is one external branchial aperture on each side of the abdomen, leading by six ducts to six branchial sacs. Three species are known, from the North Atlantic, Japan, and the Straits of Magellan. Myxine descends to a depth of 347 fathoms, and is generally met with in the Norwegian froids at 70 fathoms, sometimes in great abundance. (*Gadoides*.)

mýx ín-í-dæ, s. pl. [Mod. Lat. *myxine*(e); Lat. fem. adj. suff. -í-dæ.]

Ichthy.: A family of cyclostomatus fishes, with two genera, Myxine and Bellostoma. The fishes of this family are popularly known as Hag-fish, Glutinous Hags, or Borers; they are marine, and their distribution is similar to that of the Gadidae, in the abdominal cavity of which they are frequently found buried. They secrete an immense quantity of glutinous slime, and are considered by the fishermen as a great nuisance, as they seriously damage the fisheries where they abound.

mýx ín-óid, s. [Mod. Lat. *myxine*, and Gr. *είδος* (*eidos*) = form.]

Ichthy. (Pl.): The family Myxiniidae (q.v.). (*Huxley*; *Introduct. to Class. Zool.*, p. 64.)

mýx ó-gás-três, s. pl. [Gr. *μύξα* (*myxa*) = mucus, slime, and *γαστήρ* (*gastēr*) = the belly.]

Bot.: A suborder of Fungals, order Gastromyces. There is a mucilaginous matrix, from which arise sac-like dehiscient peridia, emitting an often reticulated, filamentous structure, bearing spores. They grow on the bark of trees, on leaves, or on the ground. There are four sections: Trichiacei, Stenomitei, Physariet, and Ethalimæ.

mýx ó-gás-trōns, n. [MYXOGASTRES.] Of or pertaining to the Myxogastres (q.v.).

mýx ó-mý-cē-tæ, mýx ó-mý-cē-tēs, s. pl. [Gr. *μύξα* (*myxa*) = mucus, and *μωκός* (*mochos*) = a fungus.]

Bot.: A doubtful order of Fungals. Alone among plants they have three cells, without a cell wall, in their vegetative period, and not combined into a tissue. They live on decaying animal and vegetable substances. (*Thomæ*.)

mýx ó-mý-cē-toñs, n. [MYXOMYCETÆ.] Of or pertaining to the Myxomyxete (q.v.).

mýx ón, s. [Lat. from Gr. *μύξα* (*myxa*) = a fish. Suggested by Cuvier to be either *Muscula tricornis* or *tridacna*, the turbot.]

Ichthy.: (For det. see ETYM.)

mýx ó-pōd, s. [Gr. *μύξα* (*myxa*) = mucus, slime, and *πους* (*pus*), genit. *ποδος* (*podos*) = a foot.]

Zool. (Pl.): According to Huxley, a division of the Protozoa (q.v.). [RIZOPODA.]

"It will be convenient to distinguish those Protozoa which possess pseudopodia as *Myxopoda*."—*Holger*, *Amat. Insect. Animals*, p. 26.

mýx óp-ó-da, s. pl. [MYXOPODA.]

mýx ó-spōn-ǵí-æ, s. pl. [Gr. *μύξα* (*myxa*) = mucus, and *σπογγία* (*spōngiā*) = a sponge.]

Zool.: An order of Spongiae (q.v.), containing soft sponge in which the skeleton is absent. According to Huxley, it only contains the family Halisarcidae, with the single genus Halisarca. Other authorities make it include also the family Chondrosiadae.

mýx-ūs, s. [Gr. *μύξα* = mucus, slime.]

Ichthy.: A genus of Mugilida, differing only from the typical genus in having the teeth more distinct.

mý-zōm-é-la, s. [Gr. *μύξα* (*myxa*) = to mutter, and *μελος* (*melos*) = song.]

Ornith.: The typical genus of the sub-family Myzomelinae. The plumage of the males is usually black and red.

mý-zō-mé-li-næ, s. pl. [Mod. Lat. *myzomelinae*(e); Lat. fem. pl. adj. suff. -í-dæ.]

Ornith.: Honey creepers, a sub-family of Meliphagina (Honey eaters). (*For. &c.*)

mý-zō-stome, s. [MYZOSTOMA.]

1. Zool.: A genus of the genus MYZOSTOMA.

2. Entom.: A genus of the genus MYZOSTOMA.

3. Bot.: A genus of the genus MYZOSTOMA.

4. Bot.: A genus of the genus MYZOSTOMA.

5. Bot.: A genus of the genus MYZOSTOMA.

6. Bot.: A genus of the genus MYZOSTOMA.

7. Bot.: A genus of the genus MYZOSTOMA.

8. Bot.: A genus of the genus MYZOSTOMA.

9. Bot.: A genus of the genus MYZOSTOMA.

10. Bot.: A genus of the genus MYZOSTOMA.

11. Bot.: A genus of the genus MYZOSTOMA.

12. Bot.: A genus of the genus MYZOSTOMA.

13. Bot.: A genus of the genus MYZOSTOMA.

14. Bot.: A genus of the genus MYZOSTOMA.

15. Bot.: A genus of the genus MYZOSTOMA.

16. Bot.: A genus of the genus MYZOSTOMA.

17. Bot.: A genus of the genus MYZOSTOMA.

18. Bot.: A genus of the genus MYZOSTOMA.

19. Bot.: A genus of the genus MYZOSTOMA.

20. Bot.: A genus of the genus MYZOSTOMA.

21. Bot.: A genus of the genus MYZOSTOMA.

22. Bot.: A genus of the genus MYZOSTOMA.

23. Bot.: A genus of the genus MYZOSTOMA.

24. Bot.: A genus of the genus MYZOSTOMA.

25. Bot.: A genus of the genus MYZOSTOMA.

26. Bot.: A genus of the genus MYZOSTOMA.

27. Bot.: A genus of the genus MYZOSTOMA.

28. Bot.: A genus of the genus MYZOSTOMA.

29. Bot.: A genus of the genus MYZOSTOMA.

30. Bot.: A genus of the genus MYZOSTOMA.

31. Bot.: A genus of the genus MYZOSTOMA.

32. Bot.: A genus of the genus MYZOSTOMA.

33. Bot.: A genus of the genus MYZOSTOMA.

nāg-yāg-ite, *s.* [From Nagyat, Transylvania, where first found; suff. -ite (*Min.*).]
Min.: A rare mineral, occurring as crystals, granular, or foliated. Crystallization, probably orthorhombic; hardness, 1 to 1.5; sp. gr. 6.85 to 7.2; lustre, metallic, splendid, but becoming dull on exposure; streak and colour blackish lead-gray; opaque, sectile, flexible; Compos.: somewhat variable, but it appears to be essentially a sulpho-telluride of lead and gold, with occasionally small amounts of antimony and copper. Found, associated with gold, in Transylvania, and subsequently in the United States.

nāh lōh, *s.* [Arab.]
Bot.: The date-palm, *Phoenix dactylifera*.

Nā-hūm, *s.* [Heb. נחום (*Nakhūm*) = comfort, consolation; from נחם (*nā-chām*) = to be comforted; Gr. *Naxōm* (*Naxōm*).]
 1. *Script. Biog.*: A prophet called the Elkoshite, from Elkosh where he was born or where he laboured; but whether it was in Galilee or in Assyria has not been determined; the time when he flourished is also uncertain. The most probable opinion is that his prophecies were spoken in the reign of Uzziah a short time after Sennacherib's invasion. In ii. 2 there seems to be an allusion to the captivity of the Ten Tribes which took place in that reign.
 2. *Old Test. Canon*: The seventh of the Minor Prophets; i.e., of the minor books of prophecy. The theme is "The burden of Nineveh," the utter destruction of which is predicted, the reference probably being to its capture by the combined forces of the Medes and Chaldeans about 625 B.C. Nahum i. 15 closely resembles Isa. li. 7. The style of the book has been highly commended, and its canonical authority has never been doubted.

nā-īa (ī as y), *s.* [NAJJA.]

nā-īd, **nā-īd**, *s.* [Lat. *naias* (genit. *naiadis*), from Gr. *ναῖός* (*naios*), genit. *ναῖάδος* (*naiados*) = a water-nymph, from *ναῖός* (*naios*) = to flow; Fr. *naiade*; Ital. *naiade* Sp. *naiada*.]
 1. *Gr. & Rom. Myth.*: A water-nymph; one of a number of female deities who presided over fountains, rivers, brooks, &c. The number of these goddesses was indefinite. In his

Georgies (q.v.) Virgil enumerates sixteen; and Ovid, in his Elegies (m. 64), speaks of at least one hundred in the river Anio. The most beautiful of the naiads is said to have been Egle; and, according to Homer, many of the old Greek heroes were the offspring of these deities, who are represented as beautiful women, having their heads crowned with rushes, and reclining against urns from which water is flowing.

2. *Zool. (Pl.)*: The English name given by Lindley to the order Naiadaceæ (q.v.).

3. *Zool.*: One of the Unionidæ.

I. Ordinary Language:
1. Lit.: The quality or state of being naked; nudity; want of clothing or covering.
"Their nakedness [was] as furze from dishonesty & all cause of shame as they would wet in from all the tokens of sin."—*Sir T. More, Works, p. 4, 274.*
2. Figuratively:
(1) Want of provision for defence; state of being unfurnished with means of defence; weakness.
"Ye are spies; to see the nakedness of the land ye are come."—*Jeremias xlvi. 9.*
(2) Plainness, evidence; openness to view.
"Why seekst thou to cover with excuse
That which appears in proper nakedness?"
Shakesp. Much Ado About Nothing, iv. 1.

II. Script.: The privy parts.
"And Ham... saw the nakedness of his father."—*Genesis ix. 22.*
"To uncover nakedness."
Script.: To have sexual intercourse with a woman.

nak-en, et. [NAKE.]

nā-kér (1), s. [NACRE.]
nā-kér (2), na-kere, s. [O. Fr. *naquir*; Low Lat. *naquir*, from Arab. *nayirah* = a drum.]
Music: A kind of kettledrum.
"A way the *naquir* noyse, notes of pipes,
Tymbres & tabours, tulket among,
Symbales & sonetz swared the noyse."
Early Eng. Allit. Poems, Cleanness, l. 413.

nā-kir, s. [Elym. doubtful.] A wandering path, passing from one hub to another.

na-koò, s. [Native name.] The gaviol or Gangeitic crocodile.

nāle, s. [See def.] Nale occurs in the phrase, *at the nāle, atte nāle = at then ale = at the ale-horse*; the *n* of the dat. of the article being tacked on to the substantive.
"And they were fully glad to fille his purse,
And naken him gret bestes at the nāle."
Chaucer, C. T., 6, 324.

nāll, s. [From a *null*, for an *ull* = an awl.]
(*Practical*).
"Whole bridle and saddle, whiteleather and nall,
With colbas and harness."
Luscar, Husbandrie.

¶ See remarks under *N*.

nām, et. [For *n am*.] *Am* not.

"In swiche estat as God hath cleped us,
I wol petyver, I woun not preyen."
Chaucer, C. T., 5, 730.

nām, part. of v. [NIM.]

nām-a-ble, a. [NAMABLE.]

na-mā-qua-lite, s. [From Namaqua(land), South Africa, where found; *suff. -lite* (Min.).]

Min.: A mineral occurring in silky fibres and thin layers. Hardness, 2½; sp. gr. 2.49; lustre, silky; colour, pale-blue; translucent. Analysis gave: alumina, 15.29; protoxide of copper, 44.74; magnesia, 3.42; lime, 2.01; silica, 2.25; water, 32.38 = 100.00. Related in composition to hydrocalcite (q.v.).

na-mā-tion, s. [Low Lat. *namatio*, from *namo* = to distract, to take, from A.S. *naman* = to take.]
Law: The act of distraining or levying a distress.

nām-āy-cūsh, s. [North American Indian name.]
Ichthyol.: *Salmo namayeght h*, the Great Lake Trout of North America. [SALMO, THROT.]

na-māz, s. [Turk.] The ordinary prayer of a Turk.

nām bŷ-pām-bŷ, a. & s. [Said to be derived by reduplication from Ambrose Philips, a poet (died 1749).]

- A. *As adj.*: Silly, affected, weakly sentimental, insipid.
- B. *As subst.*: Silly, affected, or insipid talk or writing.

nām by-pām-by, et. [NAMBY-PAMBY, a.]
To talk affectedly to, to flatter, to wheedle.
"A lady sends... her waiting woman to namby-pamby me."—*Mass Edgeworth, Absentee, ch. xvi.*

nāme, s. [A.S. *namn*, *nama*; cogn. with Dut. *naam*; Icel. *naft*, *nama*; Dan. *naem*; Sw. *nama*; Goth. *namo*; Ger. *name*; O. H. Ger. *namo*; Lat. *nomen*; Gr. *ονομα* (*onomata*); Sansc. *namanta*.]

- I. Ordinary Language:
 - 1. That by which a person or thing is called; the word or words by which a particular person or thing is designated in distinction from others; an appellation, a designation, an epithet. [CHRISTIAN NAME, SURNAME.]
"What's in a name? That which we call a rose,
By any other name would smell as sweet."
Shakesp. Romeo & Juliet, ii. 1.
 - 2. Common or generic appellation; title.
"Then dost usurp the name of king!"
Shakesp. Emperot, i. 2.
 - 3. The mere word by which anything is known or called, as distinguished from the real thing itself; sound or appearance only in opposition to reality.
"Albion's name and contempt are things
He only knows by name."
Wordsworth, Excursion, bk. iv.

- * 4. A person or individual.
- * 5. Persons having a particular name; a family, connections.
- * 6. Descent, lineage, family.
"I am from humble, he from lionnet name"
Shakesp. All's Well That Ends Well, v. 3.
- * 7. That which is said or thought of a person; current estimation, reputation, character.
"He hath an excellent good name."
Shakesp. Much Ado About Nothing, ii. 1.
- 8. Renown, glory, fame, reputation, honour, celebrity, distinction.
"What men of name resort to him?"
Shakesp. Richard III, iv. 5.
- 9. Authority, behalf, part.
"I did, in your name, receive it"
Shakesp. Two Gentlemen of Verona, i. 2.
- 10. An opprobrious appellation; abuse. [† 2].

II. Technically:
1. *Gram.*: A noun (q.v.).
2. *Philos. & Logic*: A word taken at pleasure to serve for a mark, which may raise in our mind a thought like to some thought we had before, and which being pronounced to others, may be to them a sign of what thought the speaker had, or had not, before in his mind. (*Hobbes, Commentaries*). On this, John Stuart Mill says: "This simple definition of a name as a word (or set of words) serving the double purpose of a mark to recall to ourselves the likeness of a former thought, and as a sign to make it known to others, appears unexceptionable. (*Logic, ch. ii*). Some philosophers, including Hobbes, consider names as appellations of our ideas of things, rather than of the things themselves; others, and John Stuart Mill among the rest, consider names as appellations of things themselves. Names may be primarily divided into General and Individual, or Singular, names. A second general division is into Concrete and Abstract

names; a third into Connotative and Non-connotative; the latter sometimes, but improperly, called Absolute; a fourth into Positive and Negative; a fifth into Relative and Absolute, and a sixth, and last, into Univocal and Equivocal.

¶ 1. Name of God:

(1) Old Test.: That by which God makes himself known; whether literally his name or names (Dan. ii. 20), specially Jehovah (Psalm lxxxiii. 18), any of his titles (Psalm xx. 1. Isa. xlviii. 4), his attributes (Exod. xxxiv. 14. Amos v. 27), or his worship (1 Chron. xviii. 8. Neh. i. 9).

(2) New Test.: The actual names of the Trinity of any person of it (Matt. xxviii. 19).

2. To call names: To apply opprobrious epithets to; to abuse.

3. To take a name in vain: To use a name lightly and profanely; to swear by a name unnecessarily or profanely.

* name-son, s. A godson, a namesake.

"I am your name-son, sure enough."—Smalllett Sir L. Brevint, ch. xiii.

nâme, *nemme, *nempne, v.t. [A.S. *nennan*; Icel. *nifna*; Sw. *nenma*; Dan. *nenne*; Dut. *nenne*; Goth. *nenman*; Lat. *nomino*; Fr. *nommer*.]

1. Ordinary Language:

1. To give a distinctive name, appellation, or epithet to; to designate by a particular name; to entitle, to denominate.

"Teach me how to name the bigger light."

Shakesp. Tempest, i. 2.

2. To mention by name; to mention, utter, or record the name of.

"I guess the sequel."

Shakesp. Two Gentlemen of Verona, ii. 1.

3. To nominate; to designate or appoint by name.

"The high spirited accomplished Devonshire was named Lord Steward"—Moxleying Hist. Eng. ch. xi.

¶ 1. To speak of, to entitle, to designate.

"Whether among the thrones, or named Of them the highest." Milton P. L. xi. 296.

¶ 2. To name a (or the) day: To appoint or fix a certain day for something; specif., said of a lady fixing her wedding-day.

II. Parl.: To mention by name any member who has been disorderly, has interrupted the proceedings of the House, or who has refused to obey the orders of the chair. The power is vested in the Speaker and in the Chairman of a Committee of the whole House. Formerly the act of naming was held a sufficient mark of the disapprobation of the House; latterly, owing to the growth of obstruction, after a motion made by the leader of the House and carried, a member who has been named is on the first occasion suspended from the service of the House for one week, on the second for a fortnight, and on the third for a month.

* name-a-ble, a. [Eng. name; -able.] Capable of being named.

"A rational and logical classification of nameable things."—Dr. J. A. H. Murray. Eighth Address to Philological Society, p. 4.

name-lass, a. [Eng. name; -less.]

1. Not distinguished by any distinctive name; not having a name.

"Are all the nameless sweets of friendship fled?" Cooper: Progress of Error, 294.

2. Not known to fame; unknown; without family or pedigree.

"This issue blurred with nameless bastardy." Shakesp. Rape of Lucrece, 522.

* 3. Inexpressible; that cannot be named or described.

"What I cannot name: tis nameless woe." Shakesp. Richard II., ii. 3. 2.

4. Not to be named; unfit to be named; as, nameless crimes.

name-lass-ly, adv. [Eng. nameless; -ly.] In a nameless manner.

name-less-ness, s. [Eng. nameless; -ness.] The quality or state of being nameless.

name-ly, * name-liche, * name-lyche, * nome-liche, adv. [Eng. name; -ly.]

1. Especially; singled out by name in virtue of pre-eminence; chiefly, expressly.

"There are many disbelievers, and talkers of vanity, and deceivers of minds, namely [καταρατα] untruths, they of the circumcision."—Tyndale Titus, i. 10.

2. To mention by name; to particularize; to wit; valedict; that is to say.

"The certainty of these principles: namely, that there is a supreme Governor of the world." Southey's sermons, vol. iii. ser. 1.

name' plate, s. [Eng. name, and plate.] A metal plate having the owner's name (and sometimes his profession) engraved on it, and affixed to the door of a dwelling-house or place of business.

nam' er, s. [Eng. nam(er); -er.] One who names or calls a person or thing by name; one who gives a name to.

"Skillful Merlin, nammer of that town." Tristram: Battle of Agincourt.

name' sake, s. [For name's sake; one whose name is given to him for the sake of the name or fame of another.] One who has the same name as another; or one who is named or called after another.

"Joshua, that well deserves his namesake's tree." Dryden: Absalom & Achitophel, ii. 223.

nan, interj. [See def.] The same as ANAN (q.v.).

na'-na, na'-non, s. [South American.] The pine-apple.

nan'-cê' ic, a. [From Nancy, where Braconnet, the discoverer, lived.] (See the compound.)

nanceic acid, s.

Chem.: Braconnet's name for the acid which he found in the wash-liquor of the preparation of wheat starch, &c., afterwards shown to be lactic acid. (Watts.)

nan'-cý, s. [A corrupt. of none so.] (See the compound.)

nancy pretty, s.

Bot.: A corruption of None-so-pretty (q.v.).

nan'-dí-dæ, s. pl. [Mod. Lat. *nanid(us)*; Lat. *nan. pl. adj. suff. -idus*.]

Ichthy.: A family of acanthopterygian fishes. Body oblong, compressed, covered with scales; lateral line interrupted. Dentition more or less complete, but feeble. It consists of two groups, Plesiojuna and Nandina (q.v.).

nan dí'-na (1), s. pl. [Mod. Lat. *nanid(us)*; Lat. *nan. pl. adj. suff. -inu*.]

Ichthy.: A group of freshwater fishes, family Nandini. They have five ventral rays; no pseudobranchie. All of small size, from the East Indies. Three genera, *Badis*, *Sandus*, and *Catoptra*.

nan dí'-na (2), s. [From *nandina*, the Japanese name of one of the species.]

Bot.: The typical genus of the tribe Nandinee (q.v.). *Nandina domestica* is an evergreen garden shrub, with panicles of flowers. It was originally from China and Japan.

nan'-dine, s. [NANDINIA.] The popular name of *Nandina binadata*.

nan'-din'-ê' æ, s. pl. [Mod. Lat. *nanidota*; Lat. *nan. pl. adj. suff. -idota*.]

Bot.: A tribe of Berberidaceæ.

nan'-din'-i-a, s. [Etym. doubtful; probably from a French proper name Nandim.]

Zool.: A genus of Viverrine, with one species, *Nandium binadota*, sometimes referred to *Paradoxurus*. It is smaller than the true *Paradoxurus*, has smaller and more pointed molars, and no evening. Fur, rich dark brown, lighter on sides, tail obscurely ringed with black. The specific name has reference to two yellow spots on the shoulders. (Proc. Zool. Soc., 1864, p. 539.)

nan'-dû, s. [Braz. *handu*.] [RHEA, STRUCTIO]

nan'-dûs, s. [Etym. doubtful.]

Ichthy.: The typical genus of the group Nandina (q.v.).

nanê, v. [NONE.] (Scotch.)

nan' keen', nan' kin', s. [So called from Nankin in China.]

1. Originally a fabric made from cotton of a yellow colour (*Gossypium nigricans*), and exported from Nankin. It is now made of white cotton, dyed by oak bark, annatto, alum, &c., and sent from England to China. A part is, no doubt, reshipped in curious

packages with the name of Lin upon it, as if it were of Chinese manufacture.

2. (P.): Trousers or breeches made of this material.

nan no chàr a çì na, s. pl. [Mod. L. O. & C. *nan*; *no*; *çì*; *na*; *nan*; *no*; *çì*; *na*.] Lat. *nan. pl. adj. suff. -na*.]

Ichthy.: A group of Characidae. They have a short dorsal and anal adipose fin; teeth in both jaws well developed; notched incisors; gill-membranes grown to the isthmus; nostrils close together. (Gün. & Steud.)

nan' nôch a rax, s. [Gr. *νανος* (*nanos*) = a dwarf, and *ραγάς* (*ragas*) = a scabbard, put laps the rudd.]

Ichthy.: The single genus forming the group *Nannochlaena* (q.v.). There are only two species, very small, from the Nile and the Gambia.

Nantes, Nantz, s. [See def.] A kind of brandy, so called from Nantes, in France, whence it is shipped.

"What a boy the villain gave me as he started the good salt into the salt water!"—Scott: The Pirate, ch. xxv.

nan-tô kite, s. [From Nant-ko, Chili, where found; *suff. -tô* (*Mo*).]

Min.: An interesting mineral, occurring granular or massive, but yielding a conchoidal cleavage, showing its isomeric crystallization. Hardness, 2 to 2½; sp. gr. 3.550; colour, white to colourless; lustre, adamantine. Analysis showed a composition which corresponds to Cu₂Cl₂ or copper, 64.11; chlorine, 35.89. Rapidly oxidizes on exposure to the air, being converted into atacamite (q.v.). Its oxidation in the mine causes a strong odour of chlorine, which inconveniences the miners. Some mineralogists are of opinion that the whole of the South American atacamite is the result of the oxidation of nantokite.

na' om'-ê try, s. [Gr. *ναός* (*naos*) = a temple, and *μετρον* (*metron*) = a measure.] A word coined by Johnson to ridicule the wild interpretations put upon Scripture prophecies by some of the sectaries of his day. The allusions seem to be to Rev. xii. 14, xi. 1.

"To calculate a time and half a time, And the whole time, according to prophecy."—Staple of Verses, iii. 1.

na' ôs, s. [Gr. = a temple.]

Arch.: The chamber or enclosed apartments of a Greek temple. The part of the temple which stood before the naos, comprehended between the wall and the columns of the portico, was called the pronaos; while the corresponding part behind was called the posticum. (Walsh.)

nap (1), s. [An abbreviation of Napoleon.] A game of cards played for stakes, usually by three, four, or five players, with an ordinary pack. Five cards are dealt to each player, and each, beginning with the eldest hand, is entitled to call as many tricks as he believes he can win with the cards in his hand, making whichever suit he wishes trumps. Should he win the number of tricks he has called, he receives payment for that number from each of the other players; should he fail, he pays each for that number. To go nap is to declare to win the whole five tricks. Nap is also applied to the taking of the pool by winning all the five tricks after declaration.

nap (2), nappc, s. [NAP (1), v.] A short sleep or slumber; a doze.

"Sweet refreshment ease without annoy, Or luscious non-day nap."—Shelton: Economy.

nap (3), nop, noppc, s. [A.S. *hnappe* = a kind of cloth, a variant of *cnapp* = a top, a knob, a knop, allied to *Dut. knop* = a knot, a knob, *knop* = a knob; *Dut. noppc* = trilled nap of cloth, *knop* = a knob; O. Sw. *anpp* = nap; Sw. *knop* = a knot.]

1. One of those little knots which, after cloth has been passed through the fulling-mill, are removed by women with little hammers, a process termed *knapping*.

"When the nappe is made, it will be shorn."—Sicilia: *Magistero*, l. 1.

2. The woolly or villous substance on the surface of cloth, felt, or other fabric; the pile of cloth or of a hat.

"The only coat where dust confound with rain, Roughens the nap, and leaves a mangled stain."—Swift: Description of a City Shop.

3. (P.): The hoops of velvet which are used to make the pile.

bôil, bôy; pout, jowl; cat, cell, chorus, çin, bench; go, gem; thin, this: sin, aş; expect, Xenophon, exist. -ing. -cian, -tian = şan. -tion, -sion = şùn. -çion, -şion = zhùn. -cious, tious, sious = şüs. -hic, dlc, &c. = beç, dçl.

4. Any soft downy or hairy substance, as the down on some plants.

"There be also plants that have a kinde of downe on a lyttle part upon their leaves, which downe or *wool* consisteth of a soft spinn, in a soft or fat substance." *Bacon Nat. Hist.* 3, 203.

nap at noon, *s.*

Bot. *Lin.* = *populus parvifolius*.

nap warp, *s.*

W. = Pile-warp. In fasten-weaving, the upper warp covering the main warp of nap.

nap (1), *'nappe, v.t.* [*A.S. nappan* = to nap; originally = to nod, and allied to *A.S. nappan* = to bend one's self, and feel; *knappan* = to droop, to despond; cf. *Bavarian knapfen* = to nod with the head.]

1. To slumber; to take a short sleep; to daze.

"She shall not nappe neither sleepe, that helpeth Israel." *De Witt's Bible* xxvi. 4.

2. To be off one's guard; to be careless or unprepared. (Only in the pr. part.)

"I took the *nappan*, unprepared." *Bitter's Herodotus* 1, 3.

nap (2), *v.t.* [*Nap* (5), *s.*] To raise or put a nap on.

nape, *s.* [*Prop.* = knob or projection, and a variant of *knuppe* = a knob, a button; cf. *Leich. Knuppe*, *knäpfe*; *Wel. knap* = a knob, a stud, a button.] [*Nap* (5), *s.*] The back part of the neck; the prominent part of the neck behind.

"Turn your eyes towards the *nap* of your necks, and make but an inward survey of your good selves." *Shakspeare Coriolanus*, ii.

na-pell, s. [*Etym.* doubtful.]

Bot.: *Lathyrus macrorhizus*, the Bitter Vetch (q.v.).

"Hot *napell* making lips and tongue to swell." *Sylvestr. The Furies*, 179.

nap-ê-lî-ne, s. [*Mod. Lat. nappellus*] in *Acrotium Nappellus*, the scientific name of the Acrotis (q.v.). [*Nap* (5), *s.*]

Chem.: An alkaloid obtained by Hubschmann from crude acetone. It is a white, electric powder, having a bitter, burning taste, and an alkaline reaction. It is more soluble in water and weak spirit than acetone, but less soluble in ether, and is not precipitated from dilute solutions by ammonia.

nap-êr-y, 'nap-êr-iê, s. [*O. Fr. naperie* (*Fr. napierie*), orig. = the office in a household for providing table-linen, from *Low Lat. napieria*, from *napia*, a corrupt of *Lat. nappia* = a cloth.] [*Nap*, *NAPKIN*.]

1. Table-linen collectively; linen cloths used for domestic purposes, especially for the table; as table-cloths, napkins, &c.

"Many barbers... have learned also to garnish their copulds with plates" and their tables with fine naperies." *Barron's Descript. England*, bk. ii., c. 11.

2. Linen underclothing; linen for the person.

nap-ê-t, s. [*Fr. nappé* = a table-cloth; *Eng. dimm.*, *suff.*, &c.] A napkin.

nap-h-a, s. [*Fr. nappe, nappe*; *Ital. nappe*, from *Arab. naph* = an agreeable odour.] (For det. see *etym.* and compound.)

napha water, *s.* A fragrant perfume distilled from orange blossoms.

nâ-phew (ew as û), *s.* [*D. Fr. nappé*, from *Low Lat. nappellus*, from *Lat. nappis*.] The same as *NAPKIN* (q.v.).

nâph-thâ (or **ph** as **p**), *s.* [*Lat.*, from *Gr. naphtha* (*naphtha*), from *Arab. nâft*, *nâft* = naphtha, bitumen.]

Chem.: A term applied to the liquid hydrocarbons which issue from the earth in great quantities, and to the mineral oils, liquids produced by the dry distillation of organic substances. [*PETROLEUM, PARAFFIN, WOOD-SAPHTHA.*]

nâph-thâ-dil (or **ph** as **p**), *s.* [*Eng. naphtha*, second element doubtful; cf. *â* (1), *v.*]

Chem.: A substance derived from petroleum; it is black, with a weak, greasy lustre; copper-brown in fracture; does not change in the light, melts at the same temperature as wax, and burns with a clear flame. (*Wolfe*.)

nâph-thâl-a-mide (or **ph** as **p**), *s.* [*Eng. naphthal(m)ide*, and *naphth.*] [*PHthalAMIDE.*]

nâph-thâl-a-mine (or **ph** as **p**), *s.* [*NAPHTHylAMINE.*]

nâph-thâ-lâse (or **ph** as **p**), *s.* [*Eng. naphthal(ene)*, *suff.*, *acid.*]

Chem.: $C_{10}H_8O_6$. Obtained by heating with great care, in a retort, a mixture of nitro-naphthalene with ten times its weight of baric hydrate. Ammo-naphthalene passes over, whilst naphthalene condenses in the neck of the retort as a thick yellowish oil, which solidifies on cooling. It solidifies without fusing at 230°; is soluble in water, but insoluble in alcohol and ether. Its most characteristic reaction is its power of colouring sulphuric acid a beautiful violet tint.

nâph-thâ-lâte (or **ph** as **p**), *s.* [*Eng. naphthal(ate)*; *suff.*, *acid.*]

Chem.: A salt of naphthalic acid.

nâph-thâ-lêne (or **ph** as **p**), *s.* [*Eng. naphthal(ene)*; *conn.*, and *suff.*, *acid.*]

Chem.: $C_{10}H_8$ = $C_{10}H_8$. Naphthalin, naphthaline. A frequent product of the dry distillation of organic substances, and occurring to a considerable extent in that portion of coal-tar distilling between 180 and 220°, from which it crystallizes on cooling. It forms colourless shining, leafy crystals of peculiar odour and burning taste; melts at 79° to a liquid as clear as water; boils at 216° to 220°, and burns, when inflamed, with a highly luminous but smoky flame. Its sp. gr. is 1.077 at the fusing point, and its vapour density = 4.53. It is insoluble in water, but dissolves readily in alcohol, ether, chloroform, carbon disulphide, benzene, and fixed and volatile oils. Naphthalene unites directly with chlorine and bromine, forming a large number of substitution products. On passing dry chlorine gas into naphthalene, a heavy pale yellow oil is formed (naphthalene dichloride, $C_{10}H_6Cl_2$), and this, uniting with more chlorine, is converted into a crystalline substance (naphthalene tetrachloride, $C_{10}H_4Cl_4$), which melts at 182°. Monochlor-naphthalene, $C_{10}H_7Cl$, obtained by heating naphthalene dichloride with alcoholic potash, is a colourless oil, boiling at 263°. Dichlor-naphthalene, $C_{10}H_6Cl_2$, is prepared by boiling naphthalene tetrachloride with alcoholic potash. It is a crystalline mass, melting at 35°-36°, and boiling at 280°. The substitution products with bromine are far less stable than those of chlorine.

naphthalene-alcohol, s.

Chem.: $C_{10}H_7O_2$ = $C_{10}H_7$. A tetra-atomic alcohol, produced by heating an alcoholic solution of naphthalene chlorhydrin with potassium hydrate. It crystallizes in prisms, which rapidly turn brown, melts at a gentle heat, and decomposes when distilled. It is slightly soluble in water, but very soluble in alcohol and ether. Glacial acetic acid decomposes it, forming a black resin and a red body soluble in ether.

naphthalene-carboxylic-acid, s. [*NAPHTHOIC-ACID.*]

naphthalene-sulphonic acid, s.

Chem.: $C_{10}H_7SO_2OH$. Formed by heating naphthalene with concentrated sulphuric acid. If the temperature is kept low, α -naphthalene sulphonic acid is produced, melting at 85° to 90°; but if raised to 160°, the isomeric β -naphthalene sulphonic acid is obtained.

nâph-thâl-ic (or **ph** as **p**), *a.* [*Eng. naphthal(ene)*; *acid.*] Pertaining to or derived from naphthalene.

naphthalic acid, s.

Chem.: $C_{10}H_6O_4$ = $C_{10}H_6$. Obtained by the oxidation of acenaphthene by chromic and dilute sulphuric acids. It crystallizes in colourless needles or plates, which decompose at 140°. Calce naphthalate yields naphthalene on heating with calcic hydrate, $C_{10}H_6CO_3 + Ca + Ca(OH)_2 = 2(CaCO_3) + C_{10}H_6$.

naphthalic anhydride, s.

Chem.: $C_{10}H_6O_3$ = $C_{10}H_6$. Prepared by heating naphthalic acid to 140°. It melts at 266°.

nâph-thâl-î-dâm (or **ph** as **p**), *s.* [*Eng. naphtha*; *conn.*, and *mat(m)ina*.]

Chem.: [*NAPHTHylAMINE.*]

nâph-thâl-î-dî-ne (or **ph** as **p**), *s.* [*Eng. naphthal(ene)*; *conn.*, and *suff.*, *acid.*]

Chem.: [*NAPHTHylAMINE.*]

nâph-tha-lî-ne, nâph-tha-lîn (or **ph** as **p**), *s.* & *a.* [*NAPHTHAlENE.*]

A. *As subst.*: [*NAPHTHAlENE.*]

† B. *As suff.*: Composed of naphtha.

"The *naphthalene* river of Passand." *E. A. Poe For Amuse.*

naphthaline blue, s.

Chem.: Naphthyl blue. A blue dye obtained by treating naphthylamine with meta-chloric nitrate.

naphthaline red, s. [*MAGDALA-RED.*]

naphthaline violet, s.

Chem.: A dye produced by Blunier-Zweifel on cotton and linen fabrics by treating naphthylamine while present on the woven tissue with chloride of copper.

nâph-thâl-îze (or **ph** as **p**), *v.t.* [*Eng. naphthal(ene)*; *conn.*, and *suff.*, *acid.*] To impregnate or saturate with naphtha.

nâph-tha-mê-ne (or **ph** as **p**), *s.* [*OXY-NAPHTHylAMINE.*]

nâph-thâz'-ar-ine (or **ph** as **p**), *s.* [*Eng. naphthal(ene)*, and *(di)azine*.]

Chem.: $C_{10}H_4(OH)_2O_2$. Dihydroxy-naphthoquinone. A colouring matter resembling alizarine, obtained by heating dinitro-naphthalene with Nordmann's sulphuric acid to 200°, and then adding fragments of zinc, the temperature being kept between 200° and 295°. It crystallizes in long red needles, of golden-green lustre, soluble in alcohol, and dissolves in alkalis, with a blue or violet colour.

nâph-thês-îc (or **ph** as **p**), *a.* [Formed from naphthalene with the omission of certain letters (?); *s* enphonic, and *ic*.]

naphthesic-acid, s.

Chem.: $C_{10}H_8O_8$. According to Laurent, this acid is obtained by treating naphthalene with acid chromate of potassium, water, and sulphuric acid. It forms rhombic needles, melting below 190°, and subliming at a high temperature. It is insoluble in water, but soluble in alcohol.

nâph-thî-ôn-â-te (or **ph** as **p**), *s.* [*Eng. naphthal(ene)*; *acid.*]

Chem.: A salt of naphthionic acid.

nâph-thî-ôn'-ic (or **ph** as **p**), *a.* [*Eng. naphthal(ene)*; *thion*, and *suff.*, *acid.*] Derived from naphthalene and sulphur.

naphthionic acid, s.

Chem.: $C_{10}H_7N_2SO_3$. Sulpho-naphthalidic acid. Obtained by treating an alcoholic solution of nitro-naphthalene with ammonium sulphide, and decomposing the ammonium naphthionate formed with hydrochloric acid. It forms small colourless crystals, re-soluble asbestos, slightly soluble in water and alcohol, but insoluble in ether. It completely saturates alkalis, but its salts with the heavy metals have an acid reaction. The naphthionates are all soluble, and their solutions are opalescent, transmitting, when viewed at different angles, beautiful red, blue, and violet colours. Naphthionate of potassium, $C_{10}H_7KN_2SO_3$, crystallizes in small micaceous laminae, very soluble in water and alcohol. Naphthionate of calcium, $C_{10}H_7CaN_2SO_3 \cdot 4H_2O$, prepared by boiling naphthionic acid with milk of lime, crystallizes in white semi-transparent laminae, having a fatty appearance, very soluble in water, but insoluble in alcohol. Naphthionate of lead is prepared by double decomposition of a solution of sodium naphthionate with lead nitrate. It crystallizes in red-fish needles, slightly soluble in water, but insoluble in alcohol.

nâph-thô- (or **ph** as **p**), *pref.* [*Eng. naphthal(ene)*, and *(oxy)en*.] Containing naphthalene and oxygen.

naphtho-hydroquinone, s.

Chem.: $C_{10}H_6(OH)_2$. A crystalline body prepared by heating naphthoquinone with hydrochloric acid and ammonium phosphorus. It is soluble in water, melts at 176°, and is re-

fâte, fat, fare, amidst, wât, fâll, father: wê, wêt, hêre, eamêl, hêr, thêre: pînc, pît, sîre, sir, marine: gô, pôt, or, wôre, wôlf, wôrck, wôh, sôn: mûte, eüb, eüre, unite, eür, rûle, füll; trÿ, Syrian. æ, œ = ê: ey = â: qu = kw.

transformed into naphtho-quinone by oxidizing agents.

naphtho-quinone, s.

Chem.: C₁₀H₆O₂. Obtained by heating naphthalene dissolved in glacial acetic acid, with chromic acid, and distilling the product with water. It is soluble in ether and hot alcohol, crystallizes in large yellow tables, and melts at 125°. Heated with nitric acid, it is converted into phthalic acid.

naph-thō-āte (or **ph** as **p**), *s.* [*Eng. naphthoate*; *ntv.*]

Chem.: A salt of naphthoic acid.

nāph thō c̄ȳ-a-māte (or **ph** as **p**), *s.* [*Eng. naphthocyanic*; *ntv.*]

Chem.: A salt of naphthocyanic acid.

nāph thō c̄ȳ-ām-īc (or **ph** as **p**), *a.* [*Eng. naphthalene*; *o* (*cyanic*); *ey* (*cyanic*); *and* (*ammonio*), and suff. (*ic*).] Derived from or containing naphthalene, cyanogen, and ammonia.

naphthocyanic acid, s.

Chem.: C₂₀H₁₃N₃O₅. Produced by the action of potassium-cyanide on dimtro-naphthalene, and decomposing the resulting potassium naphthocyanate with the smallest quantity of any free acid. It forms a black, shining mass, insoluble in water and ether, slightly soluble in alcohol, but more so in anhydrous alcohol, forming a dark brown, reddish liquid.

nāph thō-īc (or **ph** as **p**), *a.* [*Eng. naphthalic*; *a* (*carboxyl*), and suff. (*ic*).] Pertaining to, or contained in, naphthal.

naphthoic acid, s.

Chem.: C₁₀H₇O₂. Memphthoxylic acid, naphthalene carboxylic acid, naphthyl carbonic acid. Prepared by fusing naphthalene sulphonic acid with sodic formate. It crystallizes in colourless needles, slightly soluble in boiling water, very soluble in hot alcohol, and melts at 160°. It forms salts, chlorides, amides, &c., in the usual way, and yields naphthalene on distillation with lime.

naphthoic aldehyde, s.

Chem.: C₁₀H₇O. Prepared by distilling a mixture of calcium naphthoate and calcium formate at a high temperature. It forms dazzling white crystals, insoluble in cold water, slightly soluble in boiling water, but soluble in alcohol and ether; melts at 95°, and is converted by nascent hydrogen into uncrystallizable compounds difficult to purify.

nāph thōl (or **ph** as **p**), *s.* [*Eng. naphthalin*; and (*alcohol*).]

Chem. (*Pl.*): C₁₀H₈. Prepared by fusing the respective naphthalene sulphonic acids with potassic hydrate, and extracting by means of ether: α -naphthol crystallizes in mono-hemic prisms, melting at 94°, and boiling at 278-280°; β -naphthol, or isonaphthol, forms colourless rhombic tables, melting at 122°, and boiling at 296°.

nāph thūl-min (or **ph** as **p**), *s.* [*Eng. naphthalene*; and (*amine*).]

Chem.: C₁₀H₉O₂. A black bulky substance produced by the action of aqueous potassium nitrate on hydrochlorate of naphthylamine. It is insoluble in water, alcohol, ether, and the alkalis, but dissolves in concentrated sulphuric acid, forming an indigo-coloured solution, from which it is precipitated by water.

nāph thyl (or **ph** as **p**), *s.* [*Eng. naphthyl*; suff. (*yl* (*qv*).)]

Chem.: C₁₀H₇. The monatomic radical of naphthylamine.

naphthyl-blue, s. [*NAPHTHALINE-BLUE*.]

naphthyl-carbamide, s.

Chem.: C₁₁H₁₀N₂O = N₂(CO)C₁₀H₇. Obtained by saturating an ethereal solution of naphthylamine with cyanic acid gas, and re-crystallizing from hot alcohol. It forms that, shining, flexible needles, insoluble in water, slightly soluble in alcohol, very soluble in ether. From its ethereal solution oxalic acid throws down a crystalline precipitate.

naphthyl carbonic acid, s. [*NAPHTHOIC-ACID*.]

naphthyl-cyanate, s.

Chem.: C₁₁H₇NO = $\frac{CN}{C_{10}H_7}$. Produced by heating dinaphthyl-carbamide with phos-

phoric anhydride. It forms easily fusible crystals, insoluble in water, soluble in alcohol and ether.

naphthyl diamine, s.

Chem.: C₂₀H₁₅N₃ = $\frac{N}{N}$ ($\frac{C_{10}H_7$)₂. Azobin-

naphthyl-diamine. A base produced by passing nitrous anhydride into a warm alcoholic naphthylamine solution. It crystallizes in orange-red needles, having a light green metallic lustre, insoluble in cold water, but slightly soluble in boiling water, in alcohol, ether, and benzene. It melts at 130° to a blood-red liquid, and yields salts with two equivalents of acid.

nāph thyl a cēt-a mīde (or **ph** as **p**), *s.* [*Eng. naphthyl*; *ac* (*ox*), and (*amide*).]

Chem.: C₁₀H₇N(C₂H₅O). Acetonaphthylamine. Obtained by heating a mixture of naphthylamine and glacial acetic acid for several days. It crystallizes in white silky needles, slightly soluble in boiling water, soluble in alcohol and dilute acids, melts at 152°, and sublimes at 160°.

nāph thyl a mine (or **ph** as **p**), *s.* [*Eng. naphthyl*; and (*amine*).]

Chem.: C₁₀H₉N = C₁₀H₇(NH₂). Naphtalidam, Naphtalaminum, Naphtalidine. A compound discovered by Zinin, in 1842, during his researches on the nitro-compounds. It is produced by the action of ammonium sulphide on an alcoholic solution of nitro-naphthalene. It crystallizes in colourless silky needles, insoluble in water, but soluble in alcohol and ether; melts at 50°, and distils at 200° without decomposition. It forms numerous crystalline salts. Naphtylamine sulphate, 2(C₁₀H₉N)H₂SO₄, prepared by dissolving the base in hot sulphuric acid, crystallizes in white silvery scales, having a disagreeable odour, and an acid reaction. It is slightly soluble in water and cold alcohol, but very soluble in hot alcohol.

Na piēr', s. [*John Napier, of Merchiston, in Scotland, a celebrated mathematician, known also as the inventor of logarithms.*] (See the compounds.)

Napier's bones, Napier's rods, s. pl.

Math.: A set of rods contrived by Baron Napier, and first described by him in 1617, for the purpose of facilitating the numerical operations of multiplication and division. They consist of pieces of bone, or ivory, in the shape of a parallel-pipedon, about three inches long and three-tenths of an inch in width, the faces of each being divided into

NAPIER'S BONES.

squares, which are again subdivided on ten of the rods by diagonals into triangles, except the squares at the upper ends of the rods. These spaces are numbered as shown in the diagram. To show the manner of performing multiplication by means of the rods, let it be required to multiply 5578 by 937. Select the proper rods, and dispose them in such a manner that the numbers at the top shall exhibit the multiplicand, and on the left of these rods place the rod of units. In the rod of units seek the right hand figure of the multiplier, which, in this case, is 7, and the numbers corresponding to it 4, 8, 4, 6 on the other rods. Beginning on the 1794 left add the digits in each parallelogram, formed by triangles of adjacent rods, and write them down as in ordinary multiplication; then take the sum of the several products as in ordinary multiplication, and it will be the product required. From the outermost triangle on the line with 7, write out the number there

found, 4; in the next parallelogram on the left add 9 and 4 there found; their sum being 13, set down the 3 and carry the one to be added to 8, and 4 found in the next parallelogram on the left; this sum being 8, set it down in the next parallelogram on the left over the numbers 5 and 6, their sum being 11, set down 1 and carry 1 to the next number on the left; the number 1 found in the triangle on the left of the row, increased by 1, gives 2, which set down placed in like manner till all of the partial products are found, and take their sum as in the example.

Napier's compass, s. A watchman's compass, made of gold which is put into a plain pen and pencil-holder, and to the other a plain point and pen. These fold in between the legs, so that the instrument may be carried in the pocket without inconvenience.

nā pi form, s. [*Lat. nappus* = a turnip, and (*form*) = form, shape.]

Bot.: Having the shape or form of a turnip, bulging out at the top, and becoming more slender below, as, a *nappiform* root.

nāp kin, s. [*NAPIES*, *s.*] To wipe up in a napkin.

Let every man beware of *nappiana*, for the fabric which was devised him to trade with — *to be so soon* — *Wicks*, *in*, &c.

nāp kin, nape-kin, nape-kyn, nap kyn, s. [*Fr. napper* = to wipe, *s.*] [*Eng. dunn*, *suff.* (*ic*); *Low Lat. nappus*, *nappus*, corrupt. of *Lat. nappus* = a cloth.] [*Wax*, *s.*]

1. A small cloth; specif., one used at table to wipe the hands.
2. A handkerchief.

"I am glad I have found this *napper*."
"This was her first remembrance from the Moor."
Shakesp. Othello, *in*, &c.

napkin ring, s. A ring of wood, ivory, metal, &c., used to enclose a napkin.

Nā ples (*ples* is *peļs*), *s.* [*Lat. Neapolis*, from *Gr.* = *n-w* city.]

Geog.: A city on the south-west coast of Italy, formerly the capital of the kingdom of the Two Sicilies.

Naples yellow, s.

Chem.: *Neapolitan yellow*. A very permanent orange yellow pigment, much used in oil-painting, and in glass and porcelain staining. It is prepared by fusing, at a moderate heat, for two hours, a mixture of chemically pure antimoniate-tartrate of potash, lead nitrate, and sodium-chloride. After cooling, the fused mass is placed in water, when the common salt dissolves out, leaving the pigment in the form of a fine yellow powder.

nāp lēss, a. [*Eng. nap* (*s.*); *less*.] Without nap; having no nap; threadbare.

"Nor on him put
The *napless* vesture of humanity."
Shakesp. Coriolanus, *in*, &c.

nā pō lē ōn, s. [After the Emperor Napoleon I.]

1. A French gold coin of 20 francs, weigh-

NAPOLÉON. (*Empt* *s*.)

ing 6.4566 grammes, and worth £70286, or £8. 10½, sterling.

2. A name of cards, commonly abbreviated into *nap*. [*NAPI* (*qv*), *s.*]

3. The same as NAPOLÉON-GUN (*qv*).

"Two boys' twelve-pound *Napoleon* unblinded on our right." — *Century Magazine*, *1853*, *p*, 94

Napoleon gun, s.

Art.: A gun invented by Prince Louis Napoleon, afterwards Napoleon III, about A.D. 1830. Its object was the construction of a gun of medium weight and calibre, that should be capable of firing both shot and shell. It was issued in 1837 to the French divisional batteries, was used during the Crimean war, and has been adopted by various European nations, and by the United States. (*Rifled Gun*.)

na pō lē ō na, s. [After the Emperor Napoleon I.]

Et.: A synonym of Belvisia, the typical genus of the order Belvisiaceae (Napoleon-worts), called by Englisher Napoleonee.

Na pō lē ōn ic, a. [Eng. Napoleon; -ic.] Pertaining to or founded by the Emperor Napoleon I. as, the Napoleonic dynasty.

Na pō lē ōn ism, s. [Eng. Napoleon; -ism.] The rule of the Napoleons; support of the Napoleonic dynasty.

His glorification of Napoleon in his history has done more to debilitate and demoralize the moral sense of his countrymen than any other cause whatever. —Hist. Quart. Review, 1873, p. 221.

Na pō lē ōn ist, s. [Eng. Napoleon; -ist.] A supporter of the dynasty of the Napoleons; a Bonapartist.

na pō lē ōn itc, s. [Eng. Napoleon; suff. -ite (Alm.).] Petrol.: A variety of diorite (q.v.), consisting of amethyst, hornblende, and a little quartz. These minerals constitute an aggregate of spheres of varying dimensions, having concentric bands consisting of one or of both of the above minerals. Structure radial fibrous. Known also under the name of corrite, from Corsica, where found, and globular diorite = the Kugelhorn of the Germans.

na pō lē ōn wōrt, s. [Eng., &c. Napoleon, and wōrt.] Bot. (Pl.): [BELVISIACEAE.]

nāppe (1), s. [Fr. = a sheet, a surface.] [NAPKIN.]

Math.: One of the two parts of a conic surface, which meet at the vertex. The nappæ on which the diameter lies is called the lower, and the other the upper nappæ of the cone.

• Nappæ of a hyperboloid:

Math.: One of the branches of which the surface is composed. Hyperboloids of one nappæ are warped surfaces; those of two nappæ are double-curved surfaces.

nāppe (2), s. [NAP (2), s.]

nāppe, v. [NAP (1), v.]

nāp pēr (1), s. [NAP (1), v.] One who indulges in naps.

nāp pēr (2), s. [NAP (2), v.] An instrument or machine for napping and surfacing woollen goods.

nāp pēr (3), s. [Eng. napper, v.; -er.] An honorary officer who carries a napkin at some royal functions.

nāp-pī nēss, s. [Eng. nappy; -ness.] The quality or state of having a nap on the surface.

nāp-pīng (1), pr, par, or a. [NAP (1), v.] Sleepy, drowsy; hence, off one's guard, unprepared.

To catch one napping: To take one un-awares.

nāp-pīng (2), pr, par, a., & s. [NAP (2), v.] A. & B. A: pr, par, & particip. adj.: (See the verb).

C. As substantive:

1. Upl. Linn.: The act or process of raising a nap or pile on.

2. Hat-making: A sheet of partially felted fur in a stage between the operation of the bow, which first distributes the fur in a light layer, and the battery at which it is united to the hat-body. It becomes the nap of the hat, which is raised by carding and shorn to a length.

napping machine, s. A machine for raising the nap or pile on woollen and cotton fabrics.

nāp-py (1), a. [Eng. nap (3), s.; -y.] Having a nap or pile on the surface; downy.

nāp-py (2), a. & s. [Eng. nap (1), v.; -y.] A. & B. A: Strong, heady; causing to sleep or to become drowsy. (Suff. of ale or beer)

When I'my thresher heard, With nappy beer I to the barnyard, —Eng. Shepherd's Book, Tuesday.

B. A: Subst.: Strong ale. (See tēh.)

nāp-py, s. [A.S. nappæ, napp = a cup or bowl.] A round earthen dish with sloping sides and a flat bottom.

nā prōn, s. [O. Fr. napron. The initial a has been dropped, being mistaken for the final a of the article an.] An apron.

"Napron tēh and white t-wass" —Tale of Beryn, 33.

nāp-tāk-īng, a. & s. [Eng. nap (2), s., and taking.]

A. As adj.: Taking a nap or short sleep; dozing, sleeping; hence, off one's guard.

B. As subst.: The act of taking a nap or short sleep; hence, a taking by surprise, or when one is off his guard; an unexpected attack or onset.

"Naptakings, assaults, spoilings, and fines, have in our forefathers days, between us and France, been common. —Carew. Survey of Cornwall.

na-pū, s. [Native name.] Zool.: Tragulus javanicus, the Javan Deer-let; rust-brown above, white beneath. It is gentle in disposition, and is frequently seen in menageries.

nā-pūs, s. [Lat.] A kind of turni; the nave (q.v.).

* nar, a. & vdr. [NEARER.]

nar-a-ka, nūr-ūk, s. [Maharatta & Sansc.] Hind. Myth.: A term equivalent to the English hell; it consists of twenty-eight divisions, in which sinners of as many different classes are confined and subjected to tortures corresponding to the gravity of their offences.

nar-cāph-thōn, s. [Gr.] The bark of an aromatic tree, used in fumigation, and formerly imported from India.

nar-çē-ine, s. [Gr. νάρκη (narkē) = a numbness, a deadness; Eng. suff. -in.]

Chem.: C₂H₂₅NO₉. An alkaloid discovered by Pelletier in opium in 1835. It crystallizes in white interlaced needles, slightly soluble in water and cold alcohol, very soluble in boiling alcohol, but insoluble in ether, and melts at 145°. Its crystallizable salts are decomposed by water into acid and base.

nar-çē-tine, s. [Altered from narcotine (q.v.).]

Chem.: Narcotine. An alkaloid produced by the action of sulphuric acid and peroxide of lead on narcotine. It is soluble in sulphuric acid with a fine red colour, and in nitric acid with a yellow colour.

nar-çi-nē, s. [Gr. νάρκη (narkē) = stiffness, numbness.]

Ichthy.: A genus of Torpedinidæ (q.v.). The tail is longer than the disc, and the spiracles are immediately behind the eyes. Four species are known. Narcea brasiliensis ascends the rivers of tropical America.

nar-çis-sal, a. [From Mod. Lat. narcissosus (q.v.).]

Bot.: Of or belonging to the genus Narcissus; as, the Narcissal alliance. (Lindley.)

nar-çis-sā-lēs, s. pl. [Lat. narcissus; masc. & fem. pl. adj. suff. -ales.]

Bot.: An alliance of Endogens. It consists of endogenous petaloid plants with symmetrical flowers, three or six stamens, and albuminous seeds; and contains four orders, Bromeliaceæ, Taceaceæ, Hemodoraceæ, Hypoxidaceæ, Amaryllidaceæ, and Trillaceæ.

nar-çis-sē-æ, s. pl. [Lat. narcissus; fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Amaryllidaceæ, containing bulbous plants with a coronet in the flower.

nar-çis-sī-ne, a. [Eng. narcissus; -ine.] Pertaining to or resembling the Narcissus.

nar-çis-šūs, Nar-çis-sūs, s. [Lat., from Gr. νάρκισσος (narkissos) = (1) the plant narcissus, so named from its narcotic properties, (2) the youth Narcissus; νάρκη (narkē) = numbness, torpor; Fr. narcisse.]

1. Bot. (Of the form narcissus): Narcissus, Daffodil; the typical genus of the tribe Narcisseæ. The perianth, which is coloured, has a tubular limb with a crown. Fruit a conical capsule, with globose seeds, smooth till they become dry. About thirty are known, from Europe and Asia. One, Pseudo-Narcissus, is British. It has a solitary yellow flower. N. biflorus is naturalised in Britain in copses and woods. Its flowers are poisonous. N. poeticus, N. conspicuus, N. incomparabilis, N. minor,

and N. bulbularis are also occasional escapes. N. Tuzetii, N. odoratus, and N. poeticus are emetic. N. Tuzetii is also absorbent. Its perfume is used in India in headache.

2. The Narcissus of Japan is Nerina sibirica.

3. Myth. (Of the form Narcissus): The beautiful son of Cepheus and the nymph Liriope. Though beloved by all the Grecian nymphs, he treated them with contemptuous indifference; but, having accidentally seen his own image reflected in a fountain, he became so enamoured of it that he languished till he died, and thus realised the prophecy of Tiriasis, that he should live until he saw himself. After his death the gods, moved with compassion for his fate, changed him into the flower which bears his name.

narcissus-flowered, a. Having flowers like those of a narcissus.

¶ Narcissus-flowered Anemone. Bot.: Anemone narcissiflora.

nar-çi-tine, s. [Eng., &c. narcisus; t connect., and suff. -ine.]

Chem.: A substance possessing emetic properties, contained in the white narcissus.

nar-cō-gēn-īne, s. [Gr. νάρκη (narkē) = numbness, torpor, and γενναίον (gennaion) = to produce.]

Chem.: An alkaloid, supposed by Blyth to be present in all samples of narcotine. Now said to be merely a double salt of narcotine and cotarine.

nar-cō-sis, s. [Gr., from νάρκη (narkē) = numbness, torpor, and suff. -osis.]

Pathol.: A state of numbing stupor, in which death may ultimately ensue from paralysis of the respiratory muscles. The pupils are contracted, breathing slow and stertorous, and an insensible condition like apoplexy or alcoholic intoxication is produced; best seen in the effects of opium.

nar-cō-teine, s. [NARCOTINE.]

nar-cōt-ic, nar-cōt-ick, nar-cot-ike, a. & s. [Fr. narcotique = stupefying, from Gr. νάρκωτικός (narkōtikos) = numbing, from νάρκω (narkō) = to numb; νάρκω (narkō) = to become numb, from νάρκη (narkē) = numbness, torpor; Ital. & Sp. narcotico.]

A. As adjective:

1. Lit.: Having the properties or qualities of a narcotic; producing torpor or coma.

"Narcotick medicines be those that benum and stupify with their coldness, as opium, henbane, and the like" —P. Holland. Phlegm; Expl of Words, f. 41.

2. Fig.: Dull and stupid, so that a reader is apt to fall asleep over it.

"Who reads in vain Narcotic volumes o'er." —Shelton. Economy.

B. As substantive:

Pharma. (Pl.): Medicines which act upon the nervous system, producing sleep or torpor. They are of two kinds, anodynes and soporifics (q.v.). Soporifics generally act also as anodynes, and various anodynes are anti-spasmodic.

"Like dull narcotick, numbing pain" —Tranquill. In Memoriam, v. 5.

narcotic acid, s. Chem.: An acid said to be formed by boiling narcotine with potash. It appears to differ from narcotine only by the elements of water.

† nar-cōt-ic-al, a. [Eng. narcotic; -al.] The same as NARCOTIC (q.v.).

"Medicines which they call narcotical, that is to say, such as benumme and dead the disease." —Barnar. Trans. of Berz. (1857), p. 321.

* nar-cōt-ic-al-ly, adv. [Eng. narcotical; -ly.] In a narcotic manner; after the manner of a narcotic.

"As those things do, that pass for narcotically cold." —Whitlock. Manners of England, p. 222.

nar-cōt-ic-al-nēss, s. [Eng. narcotical; -ness.] The quality of being narcotic; narcotic qualities or properties.

* nar-cōt-ic-nēss, s. [Eng. narcotic; -ness.] The same as NARCOTICALNESS (q.v.).

nar-cot-ike, a. & s. [NARCOTIC.]

nar-cō-tine, s. [Eng. narcotic; -ine.] Chem.: C₂H₂₅NO₉. One of the alkaloids of opium, and the first base extracted from that substance, discovered by Delesne in

fate, fāt, farc, amidst, what, fāll, father: wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sire, sir, marine; gō, pōt, or, worc, wōlf, work, who. sōn: mūtē, cūb, curē, ūnitē, cūr, rūlc, fūll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

1893. It forms lustrous rhombic prisms, which melt at 170, and decompose at 220. Insoluble in water and alkalis, but soluble in alcohol and ether. It is less poisonous than morphine, and its salts are very unstable.

nar-cô-tin-ic, n. [Eng. *narcotin*(y); *ic*.] Pertaining to or obtained from narcotine.

nar-côt-ism, s. [Eng. *narcot*(n); *-ism*.] *Med.*: The same as NARCOSIS (q.v.). "Dr. Austin, in his 'Stomatitis and Narcotism, recognizing a kind of chronic narcotism, the very existence of which is usually denied.'—*Daily Telegraph*, Oct. 2, 1882.

nar-côt-ize, v.t. [Eng. *narcot*(n); *-ize*.] To bring or place under the influence of a narcotic; to put in a condition of stupor.

nard, nardê ūs, s. [Lat. *nardus*, from Gr. *νάρδος* (*nardos*), from Pers. *nard*, from Sansc. *nābala* = the Indian Spikenard, from *nā* = to smell; Fr. *nard*.]

- 1. A plant; the same as SPIKENARD (q.v.). "About the cedars alleys flung / Nard and cassia's balmy smells."—*Milton Comus*, 261.
- 2. An ointment or unguent prepared from spikenard. "The good, sincere, and true nard is known by the lightness, red colour, sweet smell, and the taste especially.—*P. Rational Pharmac.* bk. XI, ch. xv." § Common Nard, *Nardus stricta*.

† **nard, n.t.** [NARD, s.] To amount with nard. "She took the body of my just delight / Nard and od' swarted and bathed it for herself."—*Tempsong*, *Love's Labor's Lost*, I.

nar-dine, n. [Lat. *nardinus*; Ital. & Sp. *nardin*, *na*.] Of or pertaining to nard; having the qualities of or resembling nard.

nar-dōb, s. [Native Australian name.] *Bot.*: *Mitrasala nardobus*, *hirsuta*, or *subretata*, two species and sports-cases of which are made into bread by the Australian aborigines.

nar-dōs-mi-a, s. [Gr. *νάρδος* (*nardos*) = nard, and *σμίαι* (*smiai*) = smell.] *Bot.*: A genus of Composites, sub-tribe Pelastioideae. *Nardosmia foetida* is sometimes found as an escape in shrubberies.

nar-dōs ta chrys, s. [Gr. *νάρδος* (*nardos*) = nard, and *στραχης* (*strachis*) = a spike.] *Bot.*: A genus of Valerianaceae, natives of Nepal. [SPIKENARD.]

nar-dūs, s. [Lat., from Gr. *νάρδος* (*nardos*) = nard (q.v.).] *Bot.*: Mat-weed; a genus of grasses, tribe Rothoalleae. One known species, *Nardus stricta*, is British. It has harsh coarse leaves, and grows on moors and heaths to 3,300 feet high. The cattle do not care for it, but it serves a useful purpose in affording a secure foothold to the alpine herbivores.

nāt-ty, a. [Prob. connected with *neat* (2), a.] Neat, tidy, spruce.
"A higher promise for maturity than Lucy's natty completeness." — *G. Elliot, Mill on the Floss, ch. vii.*

nāt-u-ral, nāt-u-rall, nat u-rel, a., adv., &c. [Fr. *naturel*, from Lat. *naturalis*, from *natura* = nature (q.v.); Sp. & Port. *natural*; Ital. *naturale*.]
A. As adjective:

- I. Ordinary Language:**
- 1. Pertaining to nature; produced or effected by nature; not artificial, acquired, or assumed; given or conferred by nature.
"The natural bravery of your title."
Shaksp., Cymbeline, ii, 1.
 - 2. Forming part of nature.
"Nothing natural I ever saw so noble."
Shaksp., Tempest, i, 2.

3. Connected or dealing with nature or the existing system of things; treating of the world of matter and mind; as, *natural* philosophy, *natural* history, *natural* laws.

4. In conformity with the laws of nature; regulated by or in accordance with the laws which govern events, actions, sentiments, &c.; following or coming naturally, or in the ordinary course of things.

"There is something in this more than *natural*!"
Shakesp. Hamlet, iii. 2.

5. In accordance with what would naturally happen; reasonable; consonant with what might be expected in the ordinary course of things. as, It was only *natural* that he should think so.

6. By nature; by natural disposition.
"A *natural* coward without instinct"—*Shakesp. Henry IV.*, ii. 4.

7. According to life and reality; not strained or affected; not artificial; without affectation, artificiality, or exaggeration; true to life.

"Then art even *natural* in thine art."
Shakesp. Temon of Athens, v. 1.

*8. Obedient to the impulses of nature; kind, tender.

"In his love to her, even most kind and *natural*."—*Shakesp. Measure for Measure*, iii. 1.

Shakesp. Temon of Athens, iv. 3.

10. Illegitimate; born out of wedlock; as, a *natural* son.

II. Technically:

1. *Math.*: A term used in mathematics to indicate that a function is taken in, or referred to, some system, in which the base is 1. Natural numbers are those commencing at 1; each being equal to the preceding, plus 1. Natural sines, cosines, tangents, cotangents, &c., are the sines, cosines, tangents, cotangents, &c., taken in arcs, whose radii are 1. Natural, or Napierian, logarithms are those taken in a system whose modulus is 1.

Music:

(1) A term applied to the diatonic or normal scale of C. [SCALE.]

(2) Applied to an air or modulation of harmony, which moves by easy and smooth transitions, changing gradually or but little into nearly-related keys.

(3) Applied to music produced by the voice, as distinguished from instrumental music.

(4) Applied to the harmonies or over-tones given off by any vibrating body over and above its original sound.

3. *Theol.*: In a state of nature; unregenerate.

"The *natural* man receiveth not the things of the Spirit of God"—*1 Cor. ii. 14.*

B. As adv.: Naturally.
"To it more *natural*."—*Shakesp. Twelfth Night*, ii. 3.

C. As substantive:

I. Ordinary Language:

*1. A native; one of the original inhabitants of a place.

*2. A natural quality, state, or gift; a gift of nature; a gift.

"It was with depraved man in his impure *natural*, that we must maintain this quarrel"—*By Hill St. Paul's Conduct*

3. One born without the usual powers of reason or understanding; an idiot, a fool.

"That a monster should be such a *natural*."—*Shakesp. Tempest*, iii. 2

II. A sign (♯) which restores a note to its place in the normal scale of C. It has the effect of sharpening a note previously flattened, or of flattening a note previously sharpened. It is an accidental; that is, it does not occur in the signature of a piece of music, unless at the sudden change of key. Its power does not extend beyond the bar in which it appears. The earliest known use of the sign is found in Bonaffino's *Madrigali Concertati* (1622), a work in which also bars are employed as marking the correct divisions of time.

natural affection, *s.* The love which one has for his or her kindred.

natural allegiance, *s.* [ALLEGIANCE, *s.*, II. 1.]

natural barriers, *s. pl.*

Physical Geog.: The name given by Buffon to mountains, deserts, seas, or climates, separating natural history provinces from each other.

natural-born, *a.* Born in a country; native.

"*Natural-born* subjects are such as are born within the dominions of the crown of England."—*Blackstone Comment.*, bk. i, ch. 1.

natural child, *s.*

Law: The child in fact; the child of one's body. Used specially for one born out of wedlock.

natural harmonics, *s. pl.*

Music: The sounds given off by any vibrating body over and above its original sound; overtones.

natural history, *s.*

Science: In the widest sense, and as used by the ancients, Natural History included all natural science, and had the Cosmos for its subject. In more recent times its range was limited to zoology; now again, its bounds are extended, and it may be defined as the science which deals with the earth's crust and its productions. Thus it includes Geology and Mineralogy, Paleobotany and Paleontology, treating respectively of the inorganic world and organic remains of past ages. To these succeed Biology, or the Science of Life, in its widest sense. [BIOLOGY.] Popularly, Natural History is synonymous with zoology (q.v.), and some writers of authority use it in that sense.

Natural History Provinces: [PROVINCE.]

natural infancy, *s.*

Law: The period of life under seven years of age. It is held to be one destitute of all legal responsibility.

natural key, *s.*

Music: The key of C.

natural order, *s.*

Bot. (Pl.): The orders established under the natural system of botany. [ORDER.]

natural persons, *s. pl.*

Law: Such as are formed by God, in opposition to artificial persons, or those formed into corporations by human laws for purposes of government or society.

natural philosophy, *s.*

1. [PHYSICS.]

2. [MORAL-PHILOSOPHY.]

natural pitch, *s.*

Music: The pitch of a pipe before it is overblown.

natural religion, *s.*

Compar. Religions:

1. A theological system devised by human reason without supernatural aid or revelation.

2. (See extract.)

"The term *natural-religion* is used in various and even incompatible senses. Thus Butler, in his *Analogy*, signifies by *natural-religion* a universal system which he expressly argues to have been not reasoned out, but taught first by revelation."—*Zygon. Prim. Cult.* (ed. 1834), ii. 359. (Note.)

natural rights, *s. pl.*

Law: Those relating to life and liberty.

natural science, *s.*

Science: A term formerly used as the equivalent of Physics (q.v.), now employed as a synonym for Natural History (q.v.) in its most comprehensive signification.

natural selection, *s.* (See extract.)

"[The preservation of favourable individual differences and variations, and the destruction of those which are injurious I have called *natural selection*. *Natural selection* will modify the structure of the young in relation to the parent, and of the parent in relation to the young. In social animals it will adapt the structure of each individual for the benefit of the whole community, if the community profits by the selected change. What *natural selection* cannot do, is to modify the structure of one species, without giving it any advantage, for the good of another species."—*Darwin: Orig. of Species* (ed. 1859), ch. iv.

natural steel, *s.* A steel obtained directly from the richer and purer kinds of ore by reducing them with charcoal and refining the cast-iron thus produced, so as to

deprive it of part of its carbon. It is principally used for making files and other tools. It is frequently termed German steel, being largely produced in Germany.

natural system, *s.*

Bot.: The system of botany which attempts to arrange plants according to their natural affinities. [BOTANY.]

natural theology, *s.*

Theol. & Phil.: The science which deals with the evidences for the being of God, drawn from purely natural sources, without reference to revelation. Paley's *Natural Theology* is the standard English work on the subject, and the *Bridgewater* and *Euclett Treatises* have a similar object. Hume, Kant, and Dean Mansel may be quoted as to the impossibility of such logical demonstration.

* **natural writer**, *s.* A naturalist; a writer on natural history.

"A laughing which had our *natural writers* name Vanellus."—*Broome: Miscell. Tracts*, iv.

* **nät-ù-räl-ësque** (**que** as **k**), *s.* [Eng. *natural*; *esque*.] Keeping pretty closely to the characteristics of nature; as, a *naturalesque* style of ornamentation.

nät-ù-räl-ïsm, *s.* [Eng. *natural*; *-ism*.]

1. *Ord. Lang.*: A state of nature; a natural state.

2. *Theol.*: The name given to all forms of belief or speculation which deny or ignore the doctrine of a personal God as the author and governor of the universe. It is opposed to Theism (q.v.).

"He [Lord Balmgroke] was of that sect which, to avoid a more odious name, chooses to distinguish itself by that of *naturalism*."—*Hurd: Life of Warburton*

nät-ù-räl-ïst, *s. & a.* [Eng. *natural*; *-ist*.]

A. As substantive:

1. *Ordinary Language*:

*1. One versed or learned in natural science in its widest sense.

"*Naturalists* observe that when the frost seizes upon wine they are only the slighter and more watery parts of it that are subject to be congealed."—*South Sermons*, vol. ii, ser. 12.

2. One versed or learned in natural history.

II. Theol.: An adherent of any form of Naturalism. The word was used (1) by German writers as an equivalent of Pantheist; (2) by English writers for (a) one who rejects revelation, and (b) for one who, while admitting that the Scriptures contain some truths, maintains that these truths are only a republi-cation of natural religion, and so unnecessary. [BLUNT.]

"[I] have appeared in the plain shape of a mere *naturalist* myself, that I might, if it were possible, turn him off from downright atheism."—*H. More: An Antidote against Atheism*. (Pref., p. 7.)

B. As adj.: The same as NATURALISTIC, 1 (q.v.).

"Sketches from Mr. Trollope's South African tour of a somewhat *naturalist* kind."—*Saturday Review*, March 27, 1854, p. 418.

nät-ù-räl-ïst-ic, *a.* [Eng. *natural*; *-istic*.]

1. In accordance with nature; natural; following or based on nature; realistic.

"The rendering is of a *naturalistic* rather than of a prophetic character."—*Athenian*, Feb. 18, 1852

2. *Natural, plain.*

"Such *naturalistic* and *naturalistic* expletives as would scarcely have passed the censor."—*Athenian*, April 1, 1852

3. Pertaining to the doctrines of naturalism (q.v.).

"He was apt to resolve . . . the whole work of Christ into a fulfilment of a merely *naturalistic* order."—*Brit. Quar. Review*, 1854, p. 26.

* **nät-ù-räl-ï-tÿ**, * **nat-ù-räl-i-tic**, *s.* [Fr. *naturalité*, from Lat. *naturalitas*, accus. of *naturalis*, from *naturalis* (q.v.).] The quality or state of being natural; nature.

"The gods by their *naturalité* and power, close up the furies, and govern the steers."—*Golden Age*, lth. 2.

nät-ù-räl-ï-zä-tion, *s.* [Eng. *naturali*(-); *-ation*.]

I. Ord. Lang.: The act or process of naturalizing; the state of being naturalized

II. Technically:

1. *Law*: The act of placing an alien in the position, or investing him with the rights and privileges of a natural-born subject.

* Naturalization, properly so called, cannot be performed but by Act of Parliament; for by this an alien is put in exactly the same

state as if he had been born in the king's allegiance, excepting only that he is incapable, as well as a denizen, of being a member of the Privy-council or of Parliament. The legislature, however, has by the Naturalization Act of 1870 authorized the Home Secretary to grant to aliens who have been resident in this country for not less than five years, or who have been in the service of the Crown for not less than five years, a certificate of naturalization; which, being enrolled in chancery, confers on the grantee, on his taking an oath of allegiance and fidelity, all the rights, privileges, and capacities of a natural-born British subject.

2. *Biol.*: The introduction of plants through human agency into new lands or regions. They are of a diversified nature. In Dr. Asa Gray's *Manual of the United States*, 260 naturalized plants are enumerated belonging to 162 genera. The sturdy plants of Europe introduced into New Zealand cause the native plants to die out, as the Maori vanishes before the colonizing European. (*Darwin: Origin of Species* (ed. 6th), pp. 89, 163.)

nät-u-räl-ize, *v.t. & i.* [Eng. *naturalize*; -ize; Fr. *naturaliser*.]

A. Transitive:

I. Ordinary Language:

* 1. To make natural or accustomed; to accustom, to render natural, easy, and familiar; to make a second nature.

"He rises fresh to his hammer and anvil; custom has naturalized his labour to him."—*South: Sermons*.

2. To receive or adopt as native or natural; as, To naturalize foreign words.

* 3. To make familiar or well-known.

* Naturalizing to any degree authors, whose names only float amongst us.—*Observer*, No. 2.

4. To accustom or habituate to a climate or country; to acclimatize.

II. Law: To adopt into a nation or state; to confer the rights and privileges of a natural-born subject upon.

"Any alien woman who marries a British subject is *de facto* naturalized."—*Blackstone: Comment*, bk. 1, ch. 19.

B. Intransitive:

1. To become naturalized; to become like a native.

2. To explain phenomena by natural laws, to the exclusion of the supernatural.

"We see how far the total of an age is infected by this antinatural tendency."—*Bushnell: Annals*.

nät-u-räl-ly, **nät-u-räl-lye**, *adv.* [Eng. *natural*; -ly.]

1. In a natural way; according to nature; by the powers or impulses of unassisted nature; by nature, not by art or training.

"Though I am not naturally honest, I am sometimes so by chance."—*Shakespeare: Winter's Tale*, iv. 4.

2. Spontaneously; without art or artificial treatment; as, A plant grows naturally in some places.

3. According to nature; in a natural way, without affectation or artificiality; according to life.

"That part was aptly fitted and naturally performed."—*Shakespeare: Taming of the Shrew*. (Induct. i.)

4. According to the usual course of things; as, This might naturally have been expected.

nät-u-räl-ness, *s.* [Eng. *natural*; -ness.]

1. The quality or state of being natural; the state of being given or produced by nature.

"To show the naturalness of monarchy."—*South: Sermons*, vol. III, ser. 12.

2. Conformity to nature; freedom from affectation or artificiality.

"Mrs. — has the gift of naturalness, with something more and better of her own to boot."—*Pull Bull Gazette*, Oct. 13, 1852.

* **nät-u-räls**, *s. pl.* [NATURAL, C. 2.]

nät-ture, *s. & a.* [Fr., from Lat. *natura*, orig. fem. sing. of *naturus*, fut. par. of *nascor* = to be born; Sp., Port., & Ital. *natura*.]

A. As substantive:

1. The universe, as distinguished from the Creator; all that exists or is produced without artificial means; the world of matter and of mind; the system of which we ourselves form a part; creation; all created things, by which man is more immediately surrounded, as land, oceans, plants, animals, &c.

2. By metonymy, the agent, producer, or creator of things; the powers which carry on the processes of creation; the powers concerned to produce existing phenomena, whether

in sum or in detail; the personified sum and order of cause and effect.

"'Twas a *nature's* will."—*Wordsworth: Excursion*, bk. vi.

3. The inherent or natural qualities of anything; those peculiar characteristics and attributes which serve to distinguish one thing from another.

"Happy is he who lives to understand Not human nature only, but explores All natures."—*Wordsworth: Excursion*, bk. iv.

4. The natural disposition of mind of any person; temper; personal character; individual constitution.

"It may be in your power; but it is not in your nature."—*Macaulay: Hist. Eng.*, ch. v.

5. Quality, sort, kind, species.

"Your capacity is of that nature."—*Shakespeare: Love's Labour's Lost*, v. 2.

* 6. Human life; vitality; natural existence.

"I would repent upon the reminder of nature."—*Shakespeare: All's Well that Ends Well*, iv. 3.

7. Natural affection; the innate and involuntary affection of the heart and mind.

"Fond nature bids us all lament."—*Shakespeare: Romeo & Juliet*, iv. 5.

8. That which is in conformity with nature, truth, or reality; sentiments or images adapted to nature, as distinguished from that which is affected, artificial, or false.

9. The natural course of things.

"My end Was wrought by nature, not by vice offence."—*Shakespeare: Comedy of Errors*, i. 1.

B. As adv.: Natural; growing naturally or spontaneously; as, a nature grass. (*Scottish*.)

* 1. To go (or walk) the way of nature, To pay the debt of nature; To die.

"He's walked the way of nature."—*Shakespeare: 2 Henry IV.*, v. 2.

2. In a state of nature:

(1) *Oral Lang.*: Naked, as when born; stark-naked.

(2) *Theol.*: In a state of sin; unregenerate.

(3) *Good (or ill) nature*: A naturally good (or bad) temper or disposition.

(4) *Laws of Nature, Natural laws*: That instinctive sense of justice, and of right and wrong, felt by every human being.

nature gods, nature deities, *s. pl.*

Anthrop.: The powers of nature personified and considered as deities.

"The great nature-gods are large in strength, and far-reaching in influence."—*Tylor: Prim. Cult.* (ed. 1873), ii. 258.

nature myth, *s.*

Anthrop.: A myth in which some natural phenomenon is poetically expressed as the result of the action of conscious agents.

"The explanation of the Rape of Proserpine, as a nature-myth of summer and winter, does not depend alone on analogy of incident."—*Tylor: Prim. Cult.* (ed. 1873), i. 315.

nature mythology, *s.*

Anthrop.: The mythology which represents natural phenomena as the result of the action of conscious agents. (*Tylor: Prim. Cult.* (ed. 1873), i. 318.)

nature-printing, *s.* A process in which impressions which may be printed from are obtained from objects, such as leaves, fibres, lace, &c. In one method the object, such as a fern frond, is placed between a steel plate and one of heated lead and subjected to a strong pressure, forming an exact intaglio copy in the lead from which impressions are taken.

nature-worship, *s.*

Compar. Religions: A generic term to denote a stage of religious thought in which the powers of nature are personified and worshipped. It found its highest and most beautiful expression in the mythology of ancient Greece. Classifying religions with regard to the estimation in which the deity is held, Lubbock (afterwards Lord Avebury) in his *Origin of Civilization* (1882, p. 204) makes nature-worship the second stage, atheism (the absence of definite ideas on the subject) being the first.

"The third and last stage in early religious development is the anthropomorphic stage, which looks upon nature-gods not as homothems."—*Henry: Outlines of Primitive Belief*, p. 46.

* **nät-ture**, *v.t.* [NATURE, *s.*] To endow with natural qualities.

"He which natureth every kynde."—*Chaucer: C. T.*, vi.

* **nät-ture-less**, *a.* [Eng. *nature*; -less.] Not in accordance with nature; unnatural.

 - "Now the *navamacha* begins." *Lowell: Lucania: Posthuma, p. 43.*
 - A place constructed for exhibiting sham sea-fights.
 - "Among the Roman antiquities still remaining at Lyons are four aqueducts . . . and a *navamacha*."—*Walter, in Cassell's Technical Educator, pt. XI, p. 354*

nau-man-nite (au as öw), s. [Named after the celebrated German mineralogist, C. F. Naumann; suff. *-ite* (*Min.*).]
Met.: An isometric mineral occurring in cubes, massive, granular, and in thin plates. Hardness, 2.5; sp. gr. 8.0; lustre, metallic; colour and streak, iron-black. Compos.: selenium, 26.8; silver, 73.2; yielding the formula Ag₂Se. Found with other selenides in calcite at Fätkeröde, Harz, Germany.

naum-burg-i-a, s. [Named by Willdow, it is believed, after John Samuel Naumburg, who published a botanical work at Erfurt, in 1792.]

Bot.: A section of the genus *Lysimachia*, containing *Lysimachia thyrsoiflora*.

nau-pli-i-form, a. [Lat. *nauplius* (q.v.), genit. *nauplii*, and *forma* = shape, appearance.] Having the shape of a nauplius; resembling a nauplius (q.v.).
 "The larvae of the Copepods are naupliiform."—*Nicholson: Zoology (1876), p. 278.*

nau-pli-üs (pl. nau-pli-i), s. [Lat., from Gr. *ναυπιος* (*naupios*) = a kind of mollusc which sails in its shell as in a ship. (*Pliny: H. N., ix. 39, 49.*)]

Zool.: A term applied by O. F. Müller to the unsegmented ovate larvae of the lower Crustacea, with a single median frontal eye and an unsegmented body. The name is now employed to designate all the larval forms having this character.
 "The embryo almost always leaves the egg in the condition of a nauplius."—*Huxley. Comp. Anat. Invert. Anim., p. 288.*

nauplius form, s.

Zool.: The earliest stage in the development of many Crustacea, especially those belonging to the lower groups. (*Darwin: Origin of Species.*) [NAUPLIFORM.]

nau-rö-pöm-č-ter, s. [Gr. *ναῦς* (*naus*) = a ship; *πόσις* (*posis*) = an inclination, and *μετρον* (*metron*) = a measure.] An instrument for measuring the amount of a ship's heel or inclination at sea.

***nau-scö-pý, s.** [Fr. *nauscopie*, from Gr. *ναῦς* (*naus*) = a ship, and *σκοπεῖν* (*skopein*) = to see, to observe.] The art of discovering the approach of ships, or the vicinity of land, from a distance.

nau-së-a, s. [Lat. *nausea, nausea*, from Gr. *ναῦστα* (*naustia*) = sea-sickness, from *ναῦς* (*naus*) = a ship.]

Pathol.: A sick feeling which may go on to vomiting, caused by the digestive system or the brain being in an abnormal state. In hysteria and pregnancy, irritation or tumours of the abdominal or the pelvic viscera may produce it, as may also the early stage of zymotic disease, or epilepsy, and diseases of the brain.

***nau-së-ant, s.** [Lat. *nauseans*, pr. par. of *nauseo* = to be sea-sick, to be sick.] A substance or preparation which causes nausea.

nau-së-äte, v. i. & t. [Lat. *nauseatus*, pa. par. of *nauseo* = to be sick.]

- *A. *Intrans.*: To feel nausea; to be inclined to vomit; to become squeamish; to conceive an aversion.
 "Don't over fatigue the spirits, lest the mind be seized with a lassitude, and *nauseate*."—*Watts. On the Mind.*
- B. *Transitive*:
 - To loathe; to reject with disgust.
 "Hunger and thirst with patience will we meet, And what offended nature *nauseates*, eat." *Jonas. Locum, III. 52.*
 - To cause to feel nausea; to affect or fill with loathing or disgust.
 "He let go his hold and turned from her, as if he were *nauseated*."—*Swift. Gulliver's Travels.*

nau-së-ä-tion, s. [NAUSEATE.] The act of causing nausea; the state or condition of being nauseated.

"It causeth a *nauseation* in the people of England."—*Failler. Church History, II. vi. 10.*

***nau-së-ä-tive, a.** [Eng. *nauseate*; *-ive*.] Causing nausea or loathing; nauseating.

nau-seöus (se as sh), a. [Lat. *nauseosus*, from *nauseo* = sea-sickness, sickness; Fr. *nauseux*; Ital. & Sp. *nauseoso*.] Loathsome, disgusting; exciting or tending to excite nausea; regarded with abhorrence; distasteful.
 "His very food is *nauseous* to him."—*South: Sermons, vol. IV, ser. 3.*

nau-seöus-ly (se as sh), adv. [Eng. *nauseous*; *-ly*.] In a nauseous manner; in a manner tending to excite nausea, disgust, or loathing; loathsome, disgustingly.
 "So *nauseously*, and so unlike, they paint." *Garth. Clarendon.*

nau-seous-ness (se as sh), s. [Eng. *nauseous*; *-ness*.] The quality or state of being nauseous; loathsomeness, disgustingness.
 "Riches and honours, thine, are useless things, To the ill-tulcous palate sweet, But turn at last to *nauseousness* and call." *Pouffret: A Prospect of Death.*

***naus-i-tý, s.** [Eng. *nauseo*; *-ity*.] Nausea, aversion.
 "It has given me a kind of *nauseity* to measure conversions."—*Cotton. Montaigne, ch. LXVI.*

naught, s. [Hind. *nach* = a dance.] An entertainment consisting in watching dancing by professional dancing-girls, called *naught-girls*. (*East Indies.*)

naught girl, s. In the East Indies a native dancing-girl; one who dances at a *naught*.

nau-tic-al, 'nau-tic-all, 'nau-tic, 'nau-tick, a. [Lat. *nautilus* = nautical, from Gr. *ναυτικός* (*navtikos*) = pertaining to ships; *ναυτης* (*navtis*) = a sailor; *ναῦς* (*naus*) = a ship; Fr. *navigue*; Ital. & Sp. *navico*.] Pertaining to seamen, ships, or navigation.
 "He elegantly shewed by whom hee was drawn, when he departed the *nauticall* compass."—*Caunden. Reminiscences: Impress.*

nautical almanack, s. [ALMANACK.]

nautical-day, s. [DAY.]

nautical-distance, s. The arc of a thumb line intercepted between any two places.

nautical-mile, s. [MILE.]

nau-tic-al-ly, adv. [Eng. *nautical*; *-ly*.] In a nautical manner; in matters pertaining to navigation.

***nau-ti-form, s.** [Gr. *ναῦς* (*naus*) = a ship, and Lat. *forma* = form, shape.] Shaped like the hull of a ship.

nau-ti-i-dæ, s. pl. [Lat. *nautilus*]; fem. pl. adj. suff. *-idæ*.]

I. *Zool.*: A family of Tetrabranchiate Cephalopods. Sutures of the shell simple; the siphuncle central, sub-central, or near the convexity of the curved shells; simple. By some naturalists it is divided into two sub-families, but the only recent genus is *Nautilus* (q.v.).

2. *Palæont.*: The *Nautilidae* proper have gradually decreased from the Palæozoic, through the Secondary and Tertiary periods, to the present day. (*Nicholson: Palæont., II. 59.*)

nau-ti-löid, a. & s. [Gr. *ναυτιλος* (*navtilos*) = the nautilus, and *εἶδος* (*eidos*) = form, appearance.]

A. *As adj.*: Resembling a nautilus.
 "The *nautiloid* shell so common among the Foraminifera."—*Nicholson: Zoology (1876), p. 68.*

B. *As subst.*: That which has the form or appearance of a nautilus.

nau-ti-lüs, s. [Lat., from Gr. *ναυτιλος* (*navtilos*) = a seaman, a nautilus; *ναυτης* (*navtis*) = a sailor; *ναῦς* (*naus*) = a ship; Fr. *nautilé*; Ital. & Sp. *nautilo*.]

I. *Ord. Lang.*: A name popularly applied to very different animals: the Paper Nautilus—the *Nautilus* of poets, which belongs to the genus *Argonauta* (q.v.), and not to *Nautilus* (II. 1, 2); and to the Pearly Nautilus (*Nautilus pompilius*), for a long period the only known species. The quotation refers to the Paper Nautilus.
 "Learn of the little *nautilus* to sail, Spread the thin oar and catch the driving gale." *Pope. Essay on Man, III. 177.*

II. *Technically*:

1. *Zool.*: The typical and only recent genus of the family *Nautilidae* (q.v.). The shell is involute, with an outer porcellanous and an inner lacereous layer. The soft structures of the animal were first described by Owen in 1832, and its anatomy is elaborately discussed by E. Ray Lankester in the *Encyclopædia Britanica* (ed. 9th, art. *Mollusca*). Three species are known: *Nautilus pompilius* (the Pearly Nautilus), *N. macromphalus*, and *N. multilobatus*, all from the Indian and Pacific Oceans.

2. *Palæont.*: Range in time from the Upper Silurian to the present day, with a maximum development in the Carboniferous period.

3. *Hydraul. Engin.*: A form of diving-bell requiring no suspension. Water admitted through the cock into pipes flows into the exterior chambers, causing the apparatus to sink. The workmen enter through an aperture at the top, closed by an air-tight cover, and can in still water move the machine in any required direction by stepping on the ground and pushing. Air is condensed in a reservoir at the surface to a degree somewhat

fäte, fät, färe, amidst, whät, fällt, father; wë, wët, here, camel, hër, there; pine, pit, sire, sir, marine; gö, pöt, or, wëre, wölf, wörk, whò, sön; müte, cüb, cürç, unite, cür, rüle, füll; trÿ, Sÿrian. æ, œ = ë; ey = ä; qu = kw.

greater than the condensation due to the depth, and passes through a pipe into the chambers rendering the machine specifically lighter than water, and enabling it to lift stones or other objects below. A gauge indicates the amount of lifting power attained as the air is admitted, so that the supply may be cut off when the requisite power is reached.

nautilus-propeller, s. A water-jet propeller on the reaction principle. Water is forced, by a turbine driven from the engine, through two nozzles, one on each side of the vessel, and directed fore or aft. It has proved practicable, but wasteful.

nā-vā-ḡī-ūm, s. [Low Lat., from Lat. *navis* = a ship.] A form of feudal tenure, being a duty on certain tenants to carry their lord's goods in a ship.

nā val, nā vall, a. & s. [Fr. *naval*, from Lat. *navis*, from *navis* = a ship; Sp. *naval*; Ital. *navale*.]

A. As adjective:
1. Consisting or composed of ships: as, a naval armament.
2. Pertaining to ships or to a navy.

B. As subst. (pl.): Naval affairs.
1. In Cromwell's time, those affairs were much greater than had ever been in any age. — *Cherwellton* 166, li. 97.

naval-crown, s.
1. *Roman Antiq.*: [CROWNS, s., A. 1. 1 (1)].
2. *Her.*: The naval crown is formed with the stern and square sails of ships placed alternately upon the circle or fillet.

naval-officer, s.
1. *In England*: An officer of the Royal Navy.
2. *In America*: An officer who assists in collecting the customs on importations.

nā-valṣ, s. pl. [NAVAL, B.]

nāv'-arch, s. [Gr. *ναύαρχος* (*navarchos*), from *ναῦς* (*naus*) = a ship, and *ἀρχή* (*archē*) = to command.]
Greek Antiq.: The commander of a fleet; an admiral.

nāv'-ar-chý, s. [Gr. *ναυάρχη* (*navarchia*), from *ναύαρχος* (*navarchos*) = a naval ch. (q.v.).] Skill in navigating vessels; nautical skill.

nāve (1), s. [A.S. *nafe*, *nafe*; cogn. with Dut. *naef*; Icel. *naf*; Dan. *nar*; Sw. *naf*; Ger. *nabe*; Sansc. *nabhi* = the navel, the nave of a wheel, the centre.] [NAVEL.]

1. The central portion of a wheel, from which the spokes radiate; the hub.
"Twas twisted betwixt nave and spoke."
Wordsworth: Alice Fell.

2. The navel. (*Shakesp.*: *Macbeth*, li. 2.)

nave-hole, s. The hole in the centre of a gun-truck for receiving the end of the axle-tree.

nave-shaped, a. [MODULIFORM.]

nāve (2), nef, s. [Fr. *nav* = a ship, a body of a church; from Lat. *navem*, accus. of *navis* = a ship, a body of a church; Ital. & Sp. *navre*; cf. Ger. *schiff* = a ship, a nave.] That part of an ecclesiastical edifice to the west of the choir, and in which the congregation assemble; the part of a church between the aisles. [NAVY.]

"Double rows of lustræ lighted up the nave."
Eustace: Italy, vol. 1, ch. v.

nā-vel, nā-vell, s. [A.S. *nafe*; cogn. with Dut. *naef*, from *naef* = a nave; Icel. *naf*, from *naf* = a nave; Dan. *nar*, from *nar*; Sw. *naf*, from *naf*; Ger. *nabel*, from *nabe*; Sansc. *nabhi*.] [NAVE (1).]

I. Ordinary Language:
1. In the same sense as II. 1.

"Evelyn objects to the absurdity of representing Adam and Eve with navels." — *Walpole: Anecdotes of Painting*, vol. 1, ch. 11.

2. The central part or point of anything: the middle. (Cf. the use of the Gr. *ομφαλος* (*omphalos*) = (1) a navel, (2) the central point.)

"In describing this river, this one thing might honourable be come unto my mind touching the center and navel as it were of England." — *Holshed: Description of Brittain*, ch. 11.

3. The nave of a wheel.
"And the axle trees, the navels, spokes and shafts were all molten." — *Kingsley: Hereward*.

II. Technically:
1. *Anat.*: The creatrix of the umbilicus which causes a narrow and deep impression on the surface of the abdomen. It marks where the fetus was attached to the placenta by the umbilical cord.

2. *Ordn.*: A perforated lug on the under side of a carronade which is engaged by a through bolt and thereby secured to the carriage.

navel-bolt, s.
Ordn.: The bolt which secures a carronade to its slide.

navel-gall, s. (See *extract*).
Navel-gall is a disease on the top of the chine of the back, behind the saddle, right against the navel, or caused either by the saddle being split behind or the stuffing being wanting, or by the cropper buckle knots lying directly behind the saddle. — *Farmer's Dictionary*.

navel-hood, s.
Shipwright: A hood wrought above the exterior opening of a hawse-hole.

navel-point, s.
Her.: The point in a shield between the middle base point and the fesse point; the noubilt.

Navel-souls, s. pl. [OMPHALOTECHEOL.]

navel-stead, s. The place of the navel, the navel. (*Chapman*.)

navel-string, s. The umbilical-cord (q.v.).

navel-wort, s.
Bot.: The genus *Cotyledon* (q.v.). The popular name has reference to the depression in the centre of the leaf.

NAVEL-POINT.

LEAF OF NAVEL-WORT

nā-velled, a. [Eng. *navel*; -*vel*.]
1. *Lit.*: Furnished with a navel.
2. *Fig.*: Situated in the centre. (*Byron: Childe Harold*, iv. 173.)

nā-vew (ew as ū), s. [O. Fr. *navoat*, *navel*; from Low Lat. *navellus*, dimin. of Lat. *navis* = a turnip.]
Bot.: The wild turnip (*Brassica campestris*). It has lyrate, dentate, somewhat hispid leaves. It is found as a weed in cultivated ground, and is, according to Mr. Watson, a colonist. Sir Joseph Hooker thinks it now nowhere wild, and divides it into three subspecies — *B. campestris* proper, the probable origin of the Swedish turnip; *B. Napus*, the rape or coleseed; and *B. Rapa*, the origin of the turnip.

nā-vi-cēl-la, s. [Lat., dimin. of *navis* = a ship.]
Zool.: A genus of Neritidae, from fresh and brackish waters of countries bordering the Indian Ocean and the islands of the Pacific. The shell is oblong, smooth, and patelliform, with a small columella-shelf beneath; operculum very small and shelly; shell covered with a dark olive epidermis. Twenty-four species have been described.

na-vic-u-la, s. [Lat. = a small vessel, a boat.]
Zool.: A genus of Diatoms, having the valves convex, with a median longitudinal line, and nodules at the centre and extremities.

na-vic-u-lar, a. [Lat. *navicularis*, from *navicula* = a little ship; dimin. from *navis* = a ship; Fr. *naviculaire*.]
1. *Ordn.*: Pertaining to small ships or boats; shaped like a boat.
II. Technically:
1. *Anat.*: Pertaining to the navicular bone (q.v.). (*Foetus*, Dec. 6, 1884.)
2. *Bot.*: [BOAT-SHAPED.]

navicular bone, s.
Anat.: The scaphoid bone of the hand or foot.

navicular fossa, s.
Anat.: A slight depression at the base of the internal pterygoid process; it gives attachment to the *tensor palati* muscle. (*Quain*.)

nav i ga bil i ty, s. [Fr. *navigabilité*, from *navigable*, navigable (q.v.).] The quality or state of being navigable; capability of being navigated.

nāv i ga ble, a. [Fr., from Lat. *navigabilis*, from *navis*, a ship, to navigate (q.v.); Sp. *navegable*; Ital. *navigabile*.]
1. That may or can be navigated; capable of being navigated by a ship; affording passage to ships.
2. The days of the 4th and 5th years were a navigable year of the sea. (*Bacon: Proc. of the Assoc. A.S.*)

2. *Lat.*: For navigation of sailing; sailing; engaged in navigation.
"The better suppers than navigable vessels." — *Walter Scott: Rob. Bruce*, v. 278.

nāv i ga ble ncss, s. [Fig. *navigable*.]
1. The quality or state of being navigable; navigability.

nāv i ga bly, ad. [Fig. *navigable*.] *In* a navigable manner; so as to be navigable.

nāv i gant, s. [Lat. *navigans*, pa. par. of *navigare* = to navigate (q.v.).] A navigator, a sailor.
"Under whose [God's] merciful hands navigans above all other creatures naturally is most high and vicine." — *Walsley: Kingsley*, v. 278.

nāv i gate, v. t. [Lat. *navigatus*, pa. par. of *navigare* = to sail, to manage a ship; *navis* = a ship, and *ago* = to drive; Fr. *navigner*; Sp. *navigar*; Ital. *navigare*.]
A. Intrans.: To sail; to pass from place to place by water; to manage a ship at sea.
"The Phoenix was navigated to the extremities of the western ocean." — *Abraham: Quinlan*.

B. Transitive:
1. To pass over in a ship; to sail on or over; to traverse in ships.
"Drusus, the father of the Emperor Claudius, was the first who navigated the northern ocean." — *Leibnitz: Hist. nat.*
2. To direct or manage in sailing, as a ship; as, *To navigate a vessel*.

nāv i gā tion, s. [Fr., from Lat. *navigationem*, acc. of *navigatio* = a sailing; from *navigatus*, pa. par. of *navigare* = to navigate (q.v.); Sp. *navegacion*, *navegacion*; Ital. *navigazione*.]

1. The act of navigating; passing from place to place in ships; sailing.
2. The art or science of navigating or conducting vessels from one port to another, on the ocean, by the best routes. Navigation more especially means the art of directing and measuring the course of ships, and of determining the position of the ship at any moment, and the direction and distance of her destination. The management of the sails, steering, and the general working of the vessel belong rather to seamanship (q.v.). There are two methods of determining the position of a ship at sea: the first is by means of the reckoning; that is, from a record which is kept of the courses sailed and distances made on each course [DEFINITION]; the second is by means of observations made on the heavenly bodies, and the aid of spherical trigonometry. The first method gives only approximate results; the second admits of great accuracy. The position of the vessel being known at any moment, the direction and distance of any other point may be determined either by the aid of a chart, or by the application of the principles of trigonometry. To the approximate method of determining a ship's position it is necessary to add frequent checks by astronomical observations. The principal objects to be attained by astronomical observations are, to ascertain the latitude, the longitude, and the variation of the needle, for correcting the dead reckoning.
"I have greatly wished there were a lecture of navigation read in this city." — *MacSturt: Voyage* (q.v.)

3. Shipping; ships in general.
"The jesty waves confound and swallow navigation by." — *Shakesp: Macbeth*, v. 1.

(1) *Aerial navigation*: The art, art, or science of steering air-ships, or sailing or floating in the air in balloons.

(2) *Land navigation*: The navigating or passing of boats, vessels, &c., on canals, lakes, or rivers in the interior of a country; conveyance by boats in the interior of a country.

navigation laws, s. pl.
Polit. Econ.: *Hist.*: The branch of maritime law which comprises the various Acts

which have been passed defining British ships and the way in which they are to be manned, the peculiar privileges which they enjoy or enjoy, and the conditions on which foreign vessels may be allowed to import or export British produce, or engage in the coasting-trade. The first maritime code in England seems to have been that of Oleron (OLERONS). Other enactments followed in the reign of Richard II. Those in the reign of Henry VII. to a considerable extent anticipated the legislation as to Foreign Trade of the Long Parliament. By 5 Eliz., c. 5, foreign ships were excluded from English fisheries and the coasting-trade. By the Act of Navigation, passed by the Republican Parliament on Oct. 9, 1651, no goods of any kind were to be imported into England or the Colonies except in ships owned and manned by Englishmen. By the Act, 12 Charles II., c. 18, the prohibition was confined to certain articles, and to importations from Russia or Turkey. Later enactments were consolidated by 3 & 4 William IV., c. 54. The 12 & 13 Viet., c. 29, passed after much opposition, Jan. 26, 1849, which came into operation Jan. 1, 1850, swept away these protectionist enactments as far as importation and exportation went. Another Act in the same direction was 16 & 17 Viet., c. 131, passed in 1853 and subsequently amended. An Act regulating steamboats followed in 1851, and foreign ships were admitted to the coasting-trade by 17 & 18 Viet., c. 5. The abolition of protection has in no respect proved detrimental to British shipping.

nāv-i gā tōr, ' nav-i-ga tour, s. [Lat. *navigator*, from *navigatus*, pa. par. of *navigo* = to sail; Fr. *navigateur*; Sp. *navegador*; Ital. *navigatore*.]

1. A sailor, a seaman; one who navigates or sails; one who is skilled in the art of navigation.

"By means of it [the navigator's compass] navigators found that at all seasons, and in every place, they could discover the North and South with so much ease and accuracy."—*Burton's "Aurifer,"* vol. 1, bk. 1.

* 2. A navy (q.v.).

"There's enough of me to make a good navigator if all trades fail."—*C. Kingsley "West,"* ch. vi.

* **nā-viġ ċr-ōis, n.** [Lat. *navis* = a ship, and *veho* = to bear, to carry.] Capable of bearing or floating ships.

nāv-vy, s. [An abbreviation of *navigator*, the name having been originally applied to labourers employed on canals for inland navigation.] A common labourer employed in the construction of such works as canals, railways, &c. [STEAM-SAVVY.]

"It was proved that one English navy would do as much work as two French labourers."—*Fischart's "Manual of Polit. Economy,"* bk. ii, ch. v.

nā-vy, * nā-viċ, s. [O. Fr. *navie* = a ship, a navy, from Lat. *navis* = a ship, a vessel; *navis* = a ship; Gr. *navis* (*navis*); Sansc. *nav* = a ship, a boat; A.S. *nav* = a boat; Icel. *náhvi*; Ger. *vochen*. From the same root as Lat. *navis* = to swim; Gr. *naō* (*naō*) = to flow.]

* 1. A fleet.

2. The shipping of a country collectively.

"None but wood ships were built, either for the *navis* or the merchant *naves* of the world."—*Brit. Quart. Review*, 1873, p. 59.

2. The war-ships belonging to a country collectively; the naval establishment of a country, including the ships, officers, men, armaments, stores, &c., intended for use in war. Previously to 1840 the ships of the line of the British navy were all sailing vessels; in 1841 steam began to be substituted for sails. As early as 1840 the building of ironclad vessels had been suggested to the United States Government by Mr. Stephens, of New York, and it was in that country that the earliest sea-going ironclad cruisers were built. [ROSCALD, A.] The British navy was formerly under the direction of a Lord High Admiral, an office now abolished; it is now controlled by a board known as the Board of Admiralty, the members of which are styled "Lords commissioners for executing the office of Lord High Admiral." This board now consists of seven members: the First Lord, who is a member of the Cabinet, and retires with his party from office, has supreme control, and is responsible to Parliament for all matters connected with the navy; the Senior Naval Lord directs the movements of the vessels, and is responsible for their discipline; the Third Lord has the management and superintendence of the dockyards; the Fourth Naval Lord is responsible

for the victualling of the fleet, and the regulation of the transport department; the Senior Civil Lord, who has charge of the accounts, and is usually a Member of Parliament; the Junior Civil Lord and the Junior Naval Lord, who have charge of the construction of new vessels. All the Lords, with the exception of the Junior Civil Lord, go out of office with the administration by which they are appointed, but may be, and frequently are, reappointed by the new government. Under this board is a Financial Secretary, a Member of Parliament, who also goes out with the Government. The permanent establishment is superintended by two permanent secretaries. The business is divided amongst several branches or departments, as the Commission, the Transport, the Legal and Miscellaneous branches, &c., each under the superintendence of a head. The dockyards and ship building yards are under the control of an admiral or superintendent, and Greenwich Hospital, at which officers are trained for the Navy, is also directed by an admiral. The highest rank in the British Navy is that of admiral, next to which come vice-admirals, and rear-admirals. [ADMIRAL.] Each ship is commanded by a captain, commander, or lieutenant, according to its size. The men of the navy are composed of two bodies, the seamen and the marines [MARINE], under the direction of three grades of officers, commissioned, warrant, and petty officers. The Royal Observatory at Greenwich is also under the control of the Admiralty. [RAM, TORPEDO-BOAT.]

navy bill, s.

1. A bill drawn by an officer of the navy for his pay, &c.

2. A bill issued by the admiralty in payment of stores for ships and dockyards.

nā-wāb, s. [Hind.] A viceroy, a deputy, a nabob (q.v.).

* **nāwl, s.** [From an *awl*, the *n* of the article being tacked on to the noun.] An awl.

"Every man shall have a special care of his own soul; and in his pocket carry his two confessors, His Yagel, and his Nail."—*Bertram & Flet.: Woman Pleas'd*, iv. 1.

nāy, ' nēi, ' nai, nāy, & s. [Icel. *nai* = no; Dan. *nei*; Sw. *nej*.] There was originally a distinction in the use of *nay* and *no*; the former was used to answer simple questions, the latter was used in answer to questions framed in the negative.

¶ The distinction was wearing out in the time of Henry VIII. Tyndale neglected it in his translation of the Bible, for which he was censured by Sir Thomas More, (see *his The Study of Words*, p. 156.)

A. As a verb:

1. A word expressing negation or refusal; no. "Therefore Jesus saith to him, children we yete him any supping thou? thei answered to him, *nai*."—*Wycliffe John* xxi.

2. Not only so; not this or that only; implying something intensive or amplifying to be added.

"Nay, eurs'd be thou! since against his thy will, Chose freely what it now so justly rues."—*Milton: P. L.*, iv. 72.

B. As subst.: A denial, a refusal. (*Chaucer: C. T.*, 8,693.)

* ¶ *To say nay:* To deny, or refuse.

"The stork would not be said *nay*."—*L'Étrange: Fables*.

* **nay-saying, ' naye-sayinge, s.** Denying, contradiction.

"And without all *nayesayinge*, he which is lesse receaueth blessing of him which is greater."—*Hebrews* vi. (1551.)

* **nāy, v. i. & t.** [NAY, *adj.*]

* **nāy-ward, s.** [Eng. *nay*; *-ward*.] A tendency to denial.

"How'er you lean to th' *nayward*."—*Shakesp.: Winter's Tale*, ii. 2.

* **nāy-word, s.** [Eng. *nay*, and *word*.]

1. A byword; a proverbial term of reproach.

"Gull him into a *nayward*, and make him a common recreation."—*Shakesp.: Twelfth Night*, ii. 3.

2. A watchword.

"And we have a *nayward* how to know one another."—*Shakesp.: Merry Wives of Windsor*, v. 2.

Nāz-a-rē-ān, s. [Heb. נָזְרִי (*nē-tseri*) = a branch.]

* *Church, Hist.:* A Jewish sect mentioned by Euphuanus (*Her.* xviii.). They aimed at a patriarchal religion in place of a Mosiac Judaism, and rejected the history of Genesis and the Mosiac Law. They were found in Galaditis, Basanitis, and other parts beyond Jordan. (Blount.)

Nāz-ā-rēnc, s. [Gr. Ναζαρηός (*Nazarēnos*) = an inhabitant of Nazareth, from Gr. Ναζαρετ (*Nazaret*); Eng. suff. *-ence*.]

1. *Scripture & Church History:*

(1) A native of Nazareth (Matt. ii. 23).

(2) (*Pl.*): A name applied reproachfully to the early Christians by the Jews (Acts xxiv. 5). (11.)

(3) (*Pl.*): A heretical sect from among the Judaising Christians of Hebrew descent, so frequently in conflict with St. Paul, which arose about the end of the first century, contemporaneously with the Ebionites and at first holding similar tenets. Jerome (*Ep.* 79) says, "Desiring to be both Jews and Christians, they are neither the one nor the other." They made use of the Gospel to the Hebrews, observed the Mosiac ceremonial law, and to the last retained belief in the divinity of Christ, while the Ebionites ultimately rejected it.

2. *Ornith.:* *Turdus Nazarenus*, a species of Dodo, said to have existed in the island of Rodriguez, near Mauritius.

Nāz-ār-ite, s. [The word, which should have been Nazirite, is from Heb. נָזִיר (*nazir*) = separation, abstinence, consecration (?); or = crowned one (?).]

Jewish Church: A man or woman set apart by a vow for the service of God, either for a definite period or for life. The hair was allowed to grow, the fruit of the vine in any shape was forbidden, and no Nazirite might approach a corpse. The "law of the Nazirite" is given at length in Numbers (vi. 1-21), Samson (Judges xiii. 5), Samuel (1 Sam. i. 11), and John the Baptist (Luke i. 15) were Nazirites. From Amos (ii. 11, 12) it may be gathered that persons so dedicated to God had an organization like that of the prophets, and among the later Jews the vow was developed (1 Mac. iii. 49; Acts xviii. 18, xxi. 23, 24). [RECHABITE.]

"To vow a Vow of a Nazirite to separate [himself] unto the Lord."—*Numbers* vi. 5. (*Geneva Bible*, 1561.)

Nāz-ār-ite-ship, s. [Eng. *Nazirite*; *-ship*.] The condition or state of a Nazirite.

Nāz-ār-it-ic, a. [Eng. *Nazirite*(s); *-ic*.] Of or pertaining to the Nazirites or Naziritism.

nêb-u-la (pl. nêb-u-læ), s. [Lat. = a mist, a little cloud, allied to *nubes* = a cloud; Gr. *νεφέλη* (*nephêlê*), dimm. from *νεφος* (*nephos*) = a cloud, mist; Ger. *nebel* = mist, fog.]

1. *Astron.*: A slight cloudy patch of light, retaining its form unchanged except under keen and long-continued observation. More than five thousand nebulae, or star-clusters closely resembling them, have been found in both hemispheres, and in nearly every constellation. A few, as the great nebula of Orion, Argo Navis, and Andromeda, are visible on very clear nights to the naked eye; the rest are telescopic. When greatly magnified some are found to be composed of many thousand remote stars, others remain only as diffused masses of light. Sir William Herschel divided them into six classes:

- (1) Clusters of stars, globular or irregular in form.
- (2) Resolvable nebulae, which look as if they might be resolved into stars under powerful telescopes.
- (3) Nebulae which look quite irresolvable.
- (4) Planetary nebulae, circular or slightly oval, like a planetary disk, and often coloured.
- (5) Stellar nebulae, i.e., those having in their middle a condensation of light.
- (6) Nebulous stars (q.v.).

The great nebula of Orion surrounds a multiple star, θ Orionis, consisting of six, apparently revolving round their common centre of gravity. It has been found to alter its form very slightly. The late Earl of Rosse

1. Spiral Nebula; 2. Crab Nebula; 3. Hercules.

and his assistant, Mr. Stoney, detected in its densest part multitudes of minute stars, but the bluish light of parts of it has remained irresolvable, and Dr. Huggins has ascertained by means of spectrum analysis that this portion of it is a gaseous body, containing hydrogen, nitrogen, and an unidentified substance. The nebula in Andromeda is different, and may perhaps be wholly resolved into stars.

2. *Pathology*:
(1) A slight speck on the cornea. [CALICO.]
(2) A mist or cloud suspended in the urine.

nêb-u-lar, a. [NEBULA.] Of or pertaining to nebula.

nebular-hypothesis, s.

Astron.: An hypothesis first suggested by Sir William Herschel in a paper read before the Royal Society, on June 20, 1811, though the germs of it may be found in Kant's *General Natural History and Theory of the Heavens*, printed in 1755. It was developed by La Place, with whose name it came to be associated. The hypothesis assumes that originally all stars were in a nebulous or ultra-gaseous state. The nebulous matter from which they were originally formed was at first scattered pretty uniformly through all space, but ultimately began to gravitate towards certain centres. The particles moving towards these centres not doing so with equal velocities or in the same direction, rotation would be established in the entire nebulous mass, and the spherical form produced. If, by radiation of heat, the condensed body still further contracted, its velocity would increase. If the centrifugal force overcame that of gravity, a ring would be thrown off, which would gradually become globular, in fact it would be a planet with an orbit almost or quite circular, moving in a plane nearly that of the central body's equator and revolving in its orbit in the same direction in which the central globe rotated. Further contraction producing increased velocity, ring after ring would be cast off, till the central body or sun generated a whole system of planets revolving around it. They, in turn, might in the same way produce satellites. Laplace believed that the sun thus produced our earth and the other attendant planets. On this hypothesis, the rings of Saturn were produced by Saturn himself, and have remained in the annular form instead of condensing into nearly spherical satellites. Many people supposed that the resolution of various nebulae into stars (NEBULA) was necessarily fatal to the nebular-hypothesis, but the discovery that some are not only irresolvable, but can be actually proved by spectrum analysis to consist of glowing gas, has re-established upon a firmer basis than ever, though the original theory may need revision in points of detail.

nêb-ule, s. [Lat. *nebula*.] A cloud, dimness.
"O light without *nebula*, shining in thy sphere"
—*Chaucer*. *Ballade in Commend. of Our Lady*.

nebule-moulding, s.

Arch.: An ornament of the zigzag form, but without angles; it is chiefly found in the remains of Saxon architecture, in the archivolts of doors and windows.

nêb-u-list, s. [Eng. *nebul*(a); *-ist*.] One who holds or supports the nebular hypothesis.

nêb-u-lize, v.t. [NEBULA.] To reduce [a liquid] into spray for cooling, perfuming, disinfecting, or other purposes.

nêb-u-löse, a. [Lat. *nebulosus*, from *nebula* = a cloud, mist.]

1. *Ord. Lang.*: Misty, cloudy, foggy, nebulous.
2. *Bot.*: Clouded (q.v.).

nêb-u-lôs-i-tÿ, s. [Lat. *nebulositas*, from *nebulosus* = nebulous (q.v.).]

1. *Ord. Lang.*: The quality or state of being nebulous; cloudiness.
2. *Astron.*: The state of being nebulous; the state of apparently consisting of diffused light. (Used of a luminous appearance around certain stars, of the tails of comets, &c.)

nêb-u-loüs, a. [Lat. *nebulosus*, from *nebula* = cloud, mist; Fr. *nebulux* = Ital. & Sp. *nebuloso*.]

1. *Ordinary Language*:
1. *Lit.*: Cloudy, misty, foggy, dimmed, hazy.
2. *Fig.*: Foggy, hazy, bewildered, puzzled, befogged.
2. *Astron.*: Of, belonging to, or resembling a nebula.

nebulous-star, s.

Astron.: A nebula with one or more stars through it. They are sometimes circular, sometimes oval or annular, or of other regular forms. When the nebula is circular, the star is generally in its centre, when it is elliptical, the two stars often constitute the foci of the ellipse.

nêb-u-loüs-nêss, s. [Eng. *nebulous*; *-ness*.] The quality or state of being nebulous; cloudiness, fogginess.

nêb-u-lÿ, a. & s. [Lat. *nebula* = a cloud.]

1. *As adjective*:
1. *Ord. Lang.*: Covered or ornamented with wavy lines.
2. *Her.*: Applied to a line drawn with undulations like the wavy edges of clouds, or to a shield or charge divided by several such lines drawn across it.
2. *As substantive*:
Her.: A line of partition of a wavy form.

nêcc-ês-sâr-i-an-îsm, s. [Eng. *necessarian*; *-ism*.] The same as NECESSITARIANISM (q.v.).

nêcc-ês-sâr-ri-êç, s. pl. [NECESSARY, B. H.]

nêcc-ês-sâr-i-lÿ, adv. [Eng. *necessary*; *-ly*.]

1. Indispensably; of necessity.
"The other offices which are *necessarily* required in the commemoration of Christ."—*Tyndal*: *Works*, p. 83.
2. By inevitable consequence; as a necessary consequence or result.
"It *necessarily* followeth that . . . the church of Christ hath always and never faileth in right understanding of scripture."—*St. T. More*. *Works*, p. 118.
3. By fate or necessity; not of free will.

nêcc-ês-sâr-i-nêss, s. [Eng. *necessary*; *-ness*.] The quality or state of being necessary.

nêcc-ês-sâr-ÿ, *nec-ês-sâr-ÿ, a. & s. [Fr. *nécessaire*, from Lat. *necessarius* = needful, from *neccesse* = unavoidable, necessary; Sp. *necesario*.]

1. *As adjective*:
1. Inevitable, such as cannot be avoided; such as must come or be.
"Death, a necessary end,
Will come when it will come."
—*Shakspeare*. *Julius Caesar*, II 2.

fâte, fât, fare, amidst, whât, fâll, fatîser; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marîne; gô, pôt. or, wôre, wôlf, wôrkl, whô, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = é; ey = â; qu = kw.

2. Following as an unavoidable consequence or result; conclusive.

"Necessaries show by any necessary argument, that it is naturally impossible that all the relations concerning America should be false." - Tillotson Works (Pict.)

"'Tis necessary he should die" - Shakesp. Temon of Athens, III, 5.

4. Acting from necessity or late; not free; as, a necessary agent.

B. As substantive:

I. Ordinary Language:

1. Anything necessary or indispensably requisite; a thing which cannot be done without. (Generally used in the plural.)

"I must unto the road, to disembark Some necessities, that I needs must use." - Shakesp. Two Gentlemen of Verona, II, 4.

2. A privy, a water-closet.

II. Law (Pl.): Such things as, though not absolutely necessary for the preservation or support of life, are or may be considered necessary to the station in life of any particular person. (Paley: Moral Philosophy, bk. vi., ch. xi.)

necessary-truths, s. pl. Such truths as from their very nature cannot but be true.

*nec-ces-ism, s. [Lat. necesse = necessary; Eng. suff. -ism.] The same as NECESSARIANISM (q.v.).

nec-ces-si-tar-i-an, a. & s. [Eng. necessit(y); -arian.]

A. As adj.: Belonging to or characteristic of the Doctrine of Necessity.

"The necessitarian doctrines of Professor Clifford." - Modern Review, 1891, p. 325.

B. As substantive:

1. Hist. & Philos.: One who holds any of the forms of the Doctrine of Necessity (q.v.). Hobbes may be considered the founder of the English Necessitarians (Leviathan, § 108), and on the continent it was developed by his contemporary Spinoza, and later by Leibnitz, who was opposed by Dr. Clarke, Dean of Salisbury, in his turn opposed by Anthony Collins, the author of a Philosophical Inquiry into Human Liberty, which Dr. Clarke's Boyle Lectures (1720, 1721) were designed to answer. Jonathan Edwards (1703-1758), President of Princeton College, towards the close of his life published An Enquiry into the Freedom of the Will; and Priestley (1733-1804) published his Doctrine of Philosophical Necessity Illustrated in 1777.

nec-ces-si-tar-i-an-ism, s. [Eng. necessitarian; -ism.]

Philos. The Doctrine of Necessity. [NECESSITY, ¶ (1).]

"Philosophical necessitarianism, on the other hand, merely asserts that certain causes, under certain conditions, must give rise to certain effects." - Modern Review, 1891, p. 325.

nec-ces-si-tate, n. [Lat. necessitas (genit. necessitatis) = necessity.]

1. To make necessary or indispensable; to render unavoidable.

"This consequently necessitates the frequent use of a lower style." - Pope Homer: Odyssey (Foot)

2. To compel, to force, to constrain, to oblige.

"The contrary to liberty . . . is a person's being hindered or unable to conduct as he will, or being necessitated to do otherwise." - Edwards: On the Will, pt. 1, § 5.

*nec-ces-si-ta-tion, s. [NECESSITATE.] The act of making necessary or indispensable; compulsion; the state of being necessary.

"Free from necessitation, I say, no man can be." - Hobbes: Of Liberty & Necessity.

*nec-ces-sit-ed, a. [Eng. necessit(y); -ed.] Compulsory. (Nabbes: Hannibal & Scipio, p. 2.)

*nec-ces-si-tied, a. [Eng. necessity; -ed.] Driven by want to; wanting; in want of; necessitous.

"If her fortunes ever stand Necessitated to help." - Shakesp. All's Well, v. 3.

nec-ces-si-to-us, a. [Eng. necessit(y); -ous.] 1. In a state of need or want; pressed with poverty.

"They who were envied, found no satisfaction in what they were envied for, being poor and necessitous." - Clarendon: Civil War.

2. Narrow, pinched; as, necessitous circumstances.

*nec-ces-si-to-us-ly, adv. [Eng. necessitous; -ly.] In a necessitous manner; in need.

*nec-ces-si-to-us-ness, s. [Eng. necessitous; -ness.] The quality or state of being necessitous or in need; need, want, poverty, necessity, necessitousness.

"Where there is want and necessitousness, there will be quarreling." - Burket: Theory of the Earth.

nec-ces-si-tude, s. [Lat. necessitudo, from necesse = necessary.]

1. Necessitousness, need, want, poverty.

"The mutual necessitudes of human nature necessarily maintain mutual offices between them." - Hale: Orig. of Mankind, p. 68.

2. Intimacy, close connection, alliance or relation.

"Between kings and their people . . . there is no great a necessitude." - Jeremy Taylor.

nec-ces-si-ty, nec-ces-si-tie, s. [Fr. necessite, from Lat. necessitudo, acc. of necessitas = necessity, from necesse = necessary; Ital. necessita; Sp. necesidad.]

I. Ordinary Language:

1. The quality or state of being necessary or unavoidable; unavoidableness, inevitableness.

"I will show you such a necessity in his death." - Shakesp. Othello, iv. 2.

2. The quality or state of being necessary or indispensable; absolute need, indispensableness.

"One of his men . . . showed what necessity he looked to it." - Shakesp. Temon of Athens, in. 2.

3. Irresistible power or force applied; compulsion, whether physical or moral.

"So spoke the fiend, and with necessity, The tyrant's plea, excused his devilish deeds." - Milton: P. L., IV, 382.

4. In the same sense as II.

"Making a virtue of necessity" - Shakesp. Two Gentlemen of Verona, iv. 1.

5. The absolute determination of the will by motives.

6. That which is necessary for a purpose; a necessary; something essential or indispensable.

"These should be hours for necessities, Not for delights." - Shakesp. Henry VIII., v. 1.

7. Extreme want or indigence; pinching poverty; pressing need, distress.

"God comfort him in this necessity." - Shakesp. 1 Henry VI., iv. 3.

II. Law: Constraint exercised upon the will, by which a person is impelled or compelled to do an act of which his judgment disapproves, and which (it is presumed) his will, if left to itself, would reject or refuse to do. Of this nature is the obligation of civil subjection, whereby the inferior is constrained by the superior to act contrary to what his own reason would suggest, as when a legislature establishes iniquity by a law, and commands the subject to do an act contrary to morality.

"Another species of compulsion or necessity is what our law calls duress per vim; or threats and menaces, which induce a fear of death or other bodily harm, and which take away, for that reason, the guilt of many crimes and misdemeanors. There is a third species of necessity, viz. when a man has his choice of two evils, and being under a necessity of choosing one, he chooses the least pernicious of the two. Where, for instance, a man, by the commandment of the law, is bound to arrest another for any capital offence, or to disperse a riot, and resistance is made to his authority: it is here justifiable and even necessary to wound or perhaps to kill the offenders, rather than permit the boulder to escape, or the riot to continue." - Blackstone: Comment., bk. iv., ch. 2.

¶ (1) Doctrine of necessity; Philosophy:

1. Fatalism, taken in a wide sense, either with or without reference to a Creator and Governor of the universe; the doctrine that everything happens according to fixed laws which cannot be changed.

"Since Priestley there has been no writer of distinction among those who have maintained the doctrine of necessity, but it has been extensively held by the Unitarians and the Rationalists." - Blunt: Diet. Deists, p. 265.

2. The doctrine that man's will is not free to control his actions, but that these proceed necessarily and inevitably from the direction given to them by the Creator.

3. (See extract under Necessitarianism.)

(2) Logical necessity: That necessity which consists in the circumstance, that something cannot be conceived different from what it is.

(3) Moral necessity: The same as NECESSITY, A. 5.

(4) Physical necessity: That necessity which arises from the laws of the material universe.

"A conjurer with familiar spirits, or a wizard, or a necromancer."—*Deut.* xviii. 11.

* **neck-rò-mán-çing**, *a. & s.* [*ENG. necromancy*; *-ing*.]

A. As adj.: Practising necromancy.

B. As subst.: The art or practices of a necromancer; necromancy.

neck-rò-mán-cý, * **nig-ro-man-cie**, * **nig-ro-man-cy**, * **nig-ro-maunce**, * **nyg-ro-maunce**, * **nyg-ro-man-cye**, *s.* [*Fr. nigromancie*, from *Low Lat. nigromantia*, a corrupt of *necromantia*, from Gr. *νεκρομαντεία* (*nekromantēia*) = necromancy; from *νεκρός* (*nekros*), and *μαντεία* (*mantēia*) = prophecy, divination; *μαντής* (*mantis*) = a prophet, a seer; Fr. *nécromancie*. The word was spelled by the Latin mediæval writers whose Greek was little or none, *nigromantia*, from an erroneous idea that it came from *Lat. niger* = black. By the "black," however, they meant the dead. In a vocabulary published A.D. 1475, this definition is given: "Nigromantia dicitur divinatio facta per nigros." (*French: English Past & Present*, p. 190.) From this confusion with *Lat. niger* = black, necromancy came to be called the "black art" (q.v.).]

1. The art of revealing the future by means of a pretended communication with the dead; sorcery; the black art.

"This man [Baldus] was well scene in the sciences of astronomy and nigromancie."—*Holme's: Hist. Eng.*, bk. 3, ch. v.

nē-crōph-a-ga, s. pl. [Pref. *necro-*, and Gr. *φάγειν (phagēin)* = to eat.]

Entom.: A name adopted by many modern entomologists for Latreille's *Clavicornes*. It contains a number of families, which have scarcely anything in common, except the practice of feeding on decaying animal or vegetable matter.

nē-crōph-a-gan, s. [NECROPHAGA.]
Entom.: A beetle belonging to the group *Necrophaga* (q.v.).

nē-crōph-a-gōus, a. [Mod. Lat. *necrophag(i)*; Eng. adq. suff. *-ous*.]

1. *Ord. Lang.*: Eating or feeding on the dead.

2. *Zool. & Entom.*: Belonging to or characteristic of insects or other animals which feed on decaying carcases.

"These insects are the most *necrophagous* of the strip," - *Hesperian Antlers Class. of Insects*, 1, 157.

nē-crōph-i-ism, s. [Pref. *necro-*; Gr. *φιλέω (philōō)* = to love, and Eng. *-ism*.] An unnatural love or appetite for the dead, manifesting itself in various ways, as exhuming corpses to look at, kiss, or mutilate them. It has a tendency to develop itself into a species of cannibalism.

nē-crōph-i-lūs, s. [Pref. *necro-*, and Gr. *φιλος (philos)* = loving.]

Entom.: An insect described by Roux under the name of *Necrophilus acervatus*, and by him made a genus of the family Hymenoptidae. It is now supposed to be the larva of *Nemoptera* in part. [NEMOPTERA.]

nēc-rō-phō-bŷ, **nēc-rō-phō-bi-a**, s. [Pref. *necro-*, and Gr. *φοβέω (phobēō)* = to fear, *φόβος (phobos)* = fear.]

1. *Ord. Lang.*: A horror of dead bodies.

2. *Med.*: An exaggerated fear of death, a symptom accompanying certain diseases.

nē-crōph-ōr-ūs (pl. **nē-crōph-ōr-i**), s.

[Pref. *necro-*, and Gr. *φόρος (phōros)* = a bearer, *φύρα (phūra)* = to bear, to carry.]
Entom.: Burying-beetles (q.v.), sometimes called Grave-diggers. The elytra are shortened and truncated at the tip, leaving the abdomen exposed. The species are numerous, chiefly confined to the north temperate zone; four or five, including *Necrophorus vespillo*, are British.

nē-crōp-ō-lis, s. [Pref. *necro-*, and Gr. *πόλις (polis)* = a city; Fr. *nécropole*.] A city of the dead; a name often given by the ancients to their cemeteries, which in many cases were very extensive. The term is now frequently applied to any cemetery.

nēc-rōp-sŷ, s. [Pref. *necro-*, and Gr. *ὀψις (opsis)* = sight, view.] A viewing or examination of a dead body.

nē-crōr-nis, s. [Pref. *necro-*, and Gr. *ὄρνις (ornis)* = a bird.]

Palæont.: A genus of scansorial birds, probably related to the Misophagidae, from the Miocene beds of France. [HALLUC.]

need fire, v. [Lit. friction fire, from *need* = to knead; A.S. *nyedan* = to rub; Dan. *nyede*; Sw. *nyeda*.]

Antiquary: A quasi-sacrificial rite, probably a survival of some form of sun-worship, having for its object the protection of cattle from murrain. The *Mirror* (June 24, 1826) records the performance of this rite by a farmer near Feith.

"When a murrain has broken out and the herds have suffered much harm, the farmers determine to make a *need fire*. On an appointed day there must be no single flame of fire in any house or any hearth. From each house straw and water, and brushwood must be fetched, and a stout sabbot driven fast into the ground, and a hole bored through it; in this a wooden windlass is stuck, well smeared with pitch and tar, and turned round so long that, with the herce heat and force, it gives forth fire. This is increased with straw, heath, and brushwood, and the cattle and horses hunted with whips and sticks two or three times through it." — *E. & Taylor's Early Hist. Manx* (ed. 1874), p. 29.

nē grō, nē ger, *s.* & *n.* [Sp. *negro* = a black man, from Lat. *nigrum*, accus. of *niger* = black; Ital., Sp., & Port. *negro*; Fr. *negre*.]

A. As substantive:
Anthrop.: The distinctly dark, as opposed to the fair, yellow, and brown varieties of mankind. Their original home was probably all Africa south of the Sahara, India south of the Indo-Gangetic plains, Malaysia, and the greater part of Australasia. In early and middle Tertiary times this tract was probably broken up by the sea, and the disappearance of the region named by Scheler Lennora. Negroes fall naturally into two great divisions: (1) African Negroes, (2) Papuan or Melanesians. Prof. A. H. Keane (*Engce Brit.*, ed. 9th, xvii, 216-220) makes four sub-divisions of African Negroes, according to locality: (1) West Soudan and Guinea; (2) Central Soudan and Chad Basin; (3) East Soudan and Upper Nile; (4) South Africa. He estimates their number at 130,000,000, with probably 20,000,000 full-blood or half-caste negroes, either slaves or descendants of slaves, chiefly in tropical or sub-tropical America, and enumerates the following as the chief anatomical and physiological points in which the Negro differs most from his own congeners.

1. The abnormal length of the arm, sometimes reaching to the knee-joint.
2. Pigeon-tus (facial angle 70°, in Caucasians 92°).
3. Weight of brain, 35 oz. (in gorilla 29 oz., average European, 45 oz.).
4. Full black eye, black iris, and yellowish sclerotic coat.
5. Short, flat, snub nose, broad at extremity, with dilated nostrils and concave ridge.
6. Thick, protruding lips, showing inner surface.
7. Very large zygomatic arches.
8. Exceedingly thick cranium, enabling him to use the head as a weapon of attack.
9. Weak lower limbs, terminating in a broad, flat foot, with low instep, projecting and somewhat prehensile great toe, and "dark heel."
10. Complexion deep brown, blackish, or even black, not due to any special pigment, but to the greater abundance of coloring matter in the Malpighian corpuscles of the skin.
11. Short, black hair, distinctly wavy, not frizzly.
12. Thick epidermis, cool, soft, and velvety, mostly

hairless, and emitting a peculiar odour, described by Premier Bey as *lurine*.

1. Frame of medium height, thrown somewhat out of the perpendicular by the shape of the pelvis; the spine, the backward projection of the head, and the whole extended stature.

2. The natural cuticles, which lose much earlier in the Negro than in other races.

B. As adj.: Pertaining or relating to negroes, black, &c., as, a negro race.

A. As adj.: Resembling negroes; having the characteristics of negroes; of the negro type.
"The Wakawani are the same in race and language with the *negroid* Massai."—*Daily Telegraph*, Jan. 15, 1883.

B. As substantive:
Anthrop.: One belonging to the Negroid race; a negro.

Negroid-race, *s.*

Anthrop.: A term used in the same sense as the "Negro" of other anthropologists. The Negroid type is primarily represented by the Negro of Africa between the Sahara and the Cape district, including Madagascar. Two important families are classed in this system.

(1) The Bushmen of South Africa, diminutive in stature, and of yellowish-brown complexion. (The Hottentot is supposed to be the result of crossing between the Bushman and the ordinary Negroid.)

(2) Negroes of the Andaman Islands, the Peninsula of Malacca, the Philippines, and other islands to New California and Tasmania. They are mostly dolichocephalic, with dark skins and woolly hair. In various districts they tend towards other types, and show traces of mixture. (*Journal Ethnol. Soc.*, 1870, 405, 406.)

Nē grō lānd, *s.* [Eng. *negro*, and *land*.]

Geom. & Anthrop.: That part of the continent of Africa south of Sahara.

"Architecture has no existence, nor are there any monumental ruins or stone structures of any sort in the whole of *Negroland*, except those erected in Somalia under the Hamitic and Semitic influences."—*Prof. A. H. Keane, in Engce Brit.* (ed. 9th, xvii, 218.)

nē grō lōid, *n.* [Eng. *negro*; I connect, and Gr. *εἶδος* (*eidos*) = appearance.] The same as NĒ-GRŌLD (q. v.).

bōil, bōy; pētūt, jōwīl; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xcnophon, exist. ph = f
-cian, -tian = şan. -tion, -sion = şun; -fion, -şion = żhun. -cious, -tious, -sious = şhūs. -ble, -dle, &c. = bəl, dəl.

* ne-gro-man cōr. [NEGROMANCER.]

* ne-gro-man cy. [NEGROMANCY.]

nē gūn-dī ūm, s. [ETYM. UNKNOWN. (Parsian).]

Bot.: Box-elder; a genus of Aceraceæ distinguished from Acer by its apetalous duraceous flowers and its pinnate leaves. *Negundo americanum*, the Black Ash of America, has been introduced into Britain.

nē gūs (1), s. [Called after Colonel Francis Nevens, who lived in the time of Queen Anne, and is reported to have been the first to mingle the beverage now named after him.] A beverage composed of wine, water, sugar, and spice.

nē-gūs (2), s. [Abyssinian.] The sovereign of Abyssinia.

Nē-hō-mī-ah, s. [Heb. נְחֻמְיָהוּ (Nēchēmīyāh) = comforted of Jehovah; Gr. Νεεμάσις (Nēemāsīs).]

Script. Biography: Three persons of this name are mentioned in Scripture: one who came with Zerubbabel from Babylon (Ezra ii. 2; Neh. vii. 7); another, the son of Azbuk (Neh. iii. 16); and lastly the celebrated Jewish leader, the son of Hachaliah (Neh. i. 1), and brother of Hanani (i. 2, vii. 2). In the twentieth year of the reign of Artaxerxes Longimanus, king or emperor of Persia (B.C. 445), he was eunuch to the monarch. Questioned as to why he looked sad, he replied that his sorrow arose from the reflection that the city (Jerusalem), the place of his ancestors' sepulchres, lay waste, with its gates burnt (Neh. ii. 3). He requested permission to rebuild the city, and was allowed temporary leave of absence to carry out the project. Carrying with him letters from the king designed to secure co-operation from various quarters, he proceeded to Jerusalem, obtained zealous assistance from his countrymen, and, notwithstanding Samaritan and other opposition, rebuilt the wall. An inscription in the earliest Hebrew, discovered in 1880 in the tunnel cut through the rocks which conducts the water of the Virgin's Spring, the Gihon of Scripture, into the modern pool of Siloam, has, in Prof. Sayce's opinion, become the starting point for comprehending the topography of Jerusalem in the times of the Kings and in that of Nehemiah. Mount Zion is now fixed as the hill on the south-western slope of which is the Pool of Siloam. The valley of the Tyropæon of the Græco-Roman age, was the Valley of Hinnom. The size of Jerusalem was only fifty acres, but it had crowded into it a population of 15,000 Jews and 5,000 slaves. In 433 B.C. Nehemiah returned to Persia, but that year or the next was a second time appointed Governor of Judæa. The date of his death is unknown. (Sayce: *Introd. to Ezra, Nehemiah, & Esther*.)

¶ The Book of Nehemiah:

Old Test. Canon: In modern Hebrew Bibles, as that of Van der Hooght, the Book of Nehemiah is distinct from that of Ezra, immediately following it as one of the Hagiographia. In the Jewish Canon, however, the two were treated as a single work. Origen was the first to separate them, calling them the first and second books of Esdras. Jerome applied to the second the name of Nehemiah. The style of the two is so different that they must have had different authors. The latter work is naturally divided into four portions: ch. i.-vii., a continuous narrative written by Nehemiah; ch. viii.-x., apparently from another author; ch. xi.-xiii. 26, from Nehemiah's pen, as was the fourth section, xi. 27 to end of the book, excepting some verses of later date. Nehemiah's portions of the book were of date 433-2 B.C.; the later verses, which refer to Jaddua, high priest in the time of Alexander the Great and Darius Codomanus, B.C. 336-331, were penned later than this date (ch. xii. 11-23). The language used is Hebrew with some Aramæisms. Persian words also occur, some of which, however, are now found to have been originally Babylonian. No quotation from the book occurs in the New Testament. The septuagint translation of the book is badly executed. (Sayce: *Introd. to Ezra, Nehemiah, & Esther*.)

nē-hūsh-tān, s. [Heb. נְחֻשְׁתָּן (nēchūsh-tān) = brass, a brazen thing.] [BRASS.]

neive-fûl, *s.* [Eng. *neive*; -ful(l).] A handful.

* **nêld**, * **nêlde**, *s.* [NEEDLE, *s.*]

nêl-sô-nî-a, *s.* [Named after D. Nelson, who accompanied the circumnavigator, Capt. Cook.]

Bot.: The typical genus of Nelseonice. The species are found in the warmer regions.

nêl-sô-nî-ê-æ, *s. pl.* [Mod. Lat. *nelsoni*(*n*); Lat. fem. pl. adj. suff. -*æ*.]

Bot.: A tribe of Acanthaceæ.

nê-lûm-bî-â-çê-æ, *s. pl.* [Mod. Lat. *nelumbi*(*n*); Lat. fem. pl. adj. suff. -*æ*.]

Bot.: Water-beans; an order of Hypogynous Exogens, alliance Nymphales. It consists of water-plants, with pedate, fleshy, floating leaves, four or five sepals, numerous petals, in many rows, arising from outside the base of the torus; stamens numerous, in several rows. First carpels and then nuts many, buried in the hollows of the enlarged torus; seeds solitary, rarely two in each nut. Only one kind genus, species three or more.

nê-lûm-bî-ûm, *s.* [NELUMBIO.]

Bot.: The typical and only genus of the order Nelumbiaceæ. The species are remarkable for the beauty of their flowers. *Nelumbium speciosum* has magnificent flowers, magenta or white. It is believed to be the Egyptian lotus and the Pythagorean Egyptian bean. It does not now grow in Egypt, but is found in India. The filaments are there deemed astringent and cooling; they are prescribed in burns, piles, and menorrhagia; the seeds are given to prevent vomiting, and to children as diuretics and refrigerants. The large leaves are made into bed sheets for fever patients; a sherbet made from the plant is given as a refrigerant in smallpox, &c. The rhizome, stalks, and seeds are eaten by the Hindoos. A fibre derived from the stalk is used as a wick for lamps in Hindoo temples, the plant being considered sacred. The North American Indians eat the rhizomes of *N. luteum*.

nê-lûm-bê, *s.* [Cingalese.]

Bot.: The Hindu and Chinese lotus, *Nelumbium speciosum*. [NELUMBIO.]

nêm, **nêm-a**, *pref.* [Gr. *nêma* (*nêmo*) = a thread.] Resembling a thread.

nêm-a-cân-thûs, *s.* [Pref. *nêm*, and Gr. *âkantha* (*acantha*) = a spine.]

Palaont.: A genus of fossil Plagiostoma from the Trias. [GANTHER.]

nêm-a-chî-lûs, *s.* [Pref. *nêm*, and Gr. *chêlos* (*chêlos*) = a hip.]

Ichthy.: A genus of Cobitidina. No erectile sub-orbital spine; six barbels, none at the mandible; dorsal in opposite to the ventrals. Fifty species are known from Europe and temperate Asia; the species which extend into tropical parts inhabit streams of high altitude. The British species *N. barbatulus* is found all over Europe, except in Denmark and Scandinavia.

Nê-mæ-ân, *a.* [NEMEAN.]

† **nêm-a-line**, *a.* [Gr. *nêma* (*nêma*) = a thread; l. connective, and Eng. suff. -*ine*.]

Min.: Having the form of threads; fibrous.

nêm-a-lite, *s.* [Pref. *nêm*, and Gr. *lithos* (*lithos*) = a stone; Ger. *neolith*.]

Min.: A fibrous variety of Brucite (q.v.).

nê-mâs'-tô-ma, *s.* [Pref. *nêm*, and Gr. *stoma* (*stoma*) = the mouth.]

Bot.: A synonym of Irilæa.

nê-ma-stêm-i-dæ, *s. pl.* [Mod. Lat. *nemastoma*(*n*); Lat. fem. pl. adj. suff. -*idæ*.]

Bot.: A family of Alzals, order Ceramiaceæ, sub-order Cryptoneææ.

nêm-a-thê-çî-ûm (pl. **nêm-a-thê-çî-a**), *s.* [Pref. *nêm*, and Gr. *thêçî* (*thêçî*) = a sac.]

Bot. (F.): Warty excrescences on the fronds of certain rose-spired algae, producing tetraspores, as in *Phyllophora*.

nêm-a-thêl-min'-tha, *s. pl.* [NEMATHELMINTHES.]

nêm-a-thêl-min-thêç, *s. pl.* [Pref. *nêm*, and Gr. *thêçî* (*thêçî*), genit. *thêçînos* (*thêçînos*) = a worm.]

Zool.: Round and Thread-worms; a class of the type Nemes (q.v.). Nearly all are parasitic. They have cylindrical unjointed bodies marked with rings, or are filiform, narrowed at each end, with papillæ or stylets on the anterior extremity. The sexes are separate. The class is divided into two orders, Acanthocephala and Nematodea (q.v.).

nêm-a-tô, *pref.* [Gr. *nêma* (*nêmo*), genit. *nêmatos* (*nêmatos*) = a thread.] [NEMA-]

nêm-a-tôç-êr-a, *s. pl.* [NEMOCERA.]

nê-mât-ô-çêst, *s.* [Pref. *nêmato*, and Eng. *çest*.]

Zool. (Pl.): The same as CESTLE (q.v.).

nêm-a-tô-da, *s.* [NEMATODEA.]

nêm-a-tôde, *a. & s.* [NEMATOID.]

nêm-a-tôid, **nêm-a-tôde**, *a. & s.* [NEMATODEA.]

A. As adj.: Pertaining to or resembling the Nematodea; threadlike.

B. As subst.: Any individual of the order Nematodea.

nêm-a-tôid-ê-a, **nêm-a-tô-da**, *s. pl.* [Pref. *nêmato*(*n*), and Gr. *êdos* (*êdos*) = appearance.]

Zool.: Thread-worms. An order of Nematelminthes (q.v.), mostly parasitic. They have elongated rounded bodies, usually tapering at one end, sometimes at both; non-segmented, occasionally provided with setiform spines or papillæ. Organs of sense are not known to exist, though the pigmented spots on some free Nematoids may have this character. They are for the most part dioecious. Schneider divides them into three groups according to their muscular system; but Prof. Hubrecht classes them as (1) Free-living, separated by Bastian into a distinct family Anguillulidæ (q.v.); (2) Parasitic; (a) undergoing development in a single host, as is the case with *Tricocephalus affinis*; (b) in the bodies of two distinct hosts, as is the case with *Olluloloma tricuspis* and *Trichina spiralis*; (3) Transitional; (c) parasitic in the larval state, free when adult, as are Gordius and Mermis; (d) free in the larval state, parasitic when adult, as are Strongylus and many species of Ascaris.

† **nêm-a-tô-nêur'-a**, *s. pl.* [Pref. *nêmato*, and Gr. *nêuron* (*nêuron*) = a nerve.]

Zool.: Owen's name for animals in which the nervous system is filamental, as in the star-fish. The group includes the Echinodermata, Rotifera, Coelmintha, and Bryozoa. (*Anat. Invert.* (ed. 2nd), p. 15.)

nê-mât-ô-phêre, *s.* [Pref. *nêmato*, and Gr. *phoros* (*phoros*) = bearing; *phêra* (*phêra*) = to bear.]

Zool. (Pl.): Busk's name for the cup-shaped appendages on the polypary of certain of the Plumularidæ, filled with protoplasmic matter having the power of emitting amoeboid prolongations. Huxley described them as "clavate organs" (*Phil. Trans.*, 1849, p. 427), and compared them with the tentacles of Diplopes (q.v.).

nêm-a-tôp-tÿch-i-ûs, *s.* [Pref. *nêmato*, and Gr. *ptÿç* (*ptÿç*), genit. *ptÿchos* (*ptÿchos*) = a fold.]

Palaont.: A genus of Palæozoic rocks from the Upper Palæozoic rocks.

Nê-mâu-sa, *s.* [A female name, from Nemausus, the ancient name of Nisus.]

Astron.: [ASTEROID, 51.]

Nê-mê-ân, **Nê-mæ-ân**, *a.* [See def.] of or pertaining to Nemea, a city in Argolis, Greece.

Nemean games, *s. pl.*

Gr. Antiq.: Public games or festivals celebrated at Nemea, most probably triennially, in the Athenian month Boedromion (the modern August). The Argives were the judges at these games, which comprised boxing and athletic contests, as well as chariot-races; and the conquerors were crowned with olive.

Nemean lion, *s.* A lion which committed great ravages in Greece, and was killed by Hercules.

nêm-ê-ô-hî-i-dæ, *s. pl.* [Mod. Lat. *nemebidæ*(*n*); Lat. fem. pl. adj. suff. -*idæ*.]

Entom.: A family of Butterflies, formerly made a sub-family of Erycinidæ. The sub-costal nervure of the fore-wings divides into four branches instead of three. There are twelve genera and 145 species.

† **nêm-ê-ô-bî-i-næ**, *pl.* [Mod. Lat. *nemebidæ*(*n*); Lat. fem. pl. adj. suff. -*idæ*.] [NEMEBIDÆ.]

nêm-ê-ô-bî-us, *s.* [Gr. *nêmos* (*nêmos*) = a grove, and *biros* (*biros*) = tide.]

Entom.: The typical genus of the family Nemebidæ (q.v.). It has but one species, *Nemobius luteus*, the Duke of Burgundy Frigatefly, local in the South of England. The wings (all mesh across) brown, with rows of dull orange spots, under surface reddish-brown with black marginal dots, and two rows of whitish spots on hind wings.

nêm-ê-ôph-il-a, *s.* [NEMOPHILA.]

Entom.: A genus of Moths, family Ctenopidæ. *Nemophila phanogona* is the Wood Tiger-moth. The fore wings are black with white streaks and spots and a yellow margin; the hind ones dull yellow with four or five black spots. Expansion of wings an inch and a half. Larva brown, feeding on the plant on. Flies over woods and heaths in the afternoon.

nê-mêr-tê-a, *s. pl.* [Lat., &c. *nemertæ*(*n*); neut. pl. adj. suff. -*æ*.]

Zool.: A sub-division of worms, mostly marine, with ciliated skin, a retractile proboscis, and simple generative organs. They are ribbon-shaped animals, more or less cylindrical in section. There are no external appendages of any kind, and their colours are often bright and varied. Formerly arranged among Platemurths, in the order Tubellaria, and made a sub-order Nemertina, Nemertina, or Rhynchonoda. They are now made a phylum of Platemurths with three sub-orders, Hoplo-, Schizo-, and Palæonemertea. (*Prof. Hubrecht, in Europ. Brit.*, xvii, 326.)

nê-mêr-tê-ân, **nê-mêr-ti-ân**, *a. & s.* [NEMERTIDA.]

A. As adj.: Belonging to or characteristic of the phylum Nemertea or the genus Nemertes.

B. As subst.: Any individual of the phylum Nemertea, or the genus Nemertes.

"Even the *Nemertina*, though so lowly organized." — Darwin. *Descent of Man* (ed. 2nd), p. 264.

nê-mêr-têç, *s.* [Gr. *Nêmerptis* (*Nêmerptis*) = the Unerring, a nymph, the daughter of Sereus and Doris. (Horn. *Il.* xviii, 46.)]

Zool.: The typical genus of the phylum Nemertea, and the sub-order Hoplonemertea. The body is more or less elongated, proboscis much diminished. MacIntosh (*Monograph of Brit. Annelids*, Ray Society, 1873-74), enumerates three species, *Nemertes gravilis*, *N. nesi*, and *N. arcinophila*.

† **nê-mêr-tid**, *s.* [NEMERTIDA.] Any individual of the division Nemertida.

† **nê-mêr-tid-a**, † **nêm-êr-ti-na**, *s. pl.* [Lat. *nemertæ*(*n*); neut. pl. adj. suff. -*idæ*, -*ina*.] [NEMERTIDA.]

† **nê-mêr-tine**, *a. & s.* [NEMERTIDA.]

A. As adj.: Belonging to or characteristic of the sub-order Nemertina. [NEMERTIDA.]

B. As subst.: Any individual of the sub-order Nemertina.

Nêm-ê-sis, *s.* [Lat., from Gr. *Nêmesis* (*Nêmesis*) = distribution, retribution, from *nêma* (*nêmo*) = to distribute.]

1. Gr. Antiq.: A Greek divinity, worshipped as the goddess of vengeance. According to Hesiod, she was the daughter of Night, and pursued the proud and insolent with inflexible hatred. Temples were erected to her honours, not only in Greece, but throughout the Roman Empire.

2. Astron.: [ASTEROID, 128.]

3. Retributive justice.

nêm-ieh-thÿs, *s.* [Pref. *nêm*, and Gr. *ichthys* (*ichthys*) = a fish.]

Ichthy.: A genus of Murenide (q.v.); exceedingly elongate, band shaped; tail tapering to a point. Jaws produced into a slender bill, the upper part formed by the vomer and intermaxillaries. Two species are known, both from the Atlantic, occurring at depths of from 500 to 2,500 fathoms.

bôil, **bôy**: **pout**, **jowl**: **cat**, **çell**, **ehorns**, **çhin**, **bençh**: **go**, **çem**: **thin**, **thîs**: **sin**, **aç**: **expect**, **Xenophon**, **exist**. **ing**. -**cian**, **tian** = **çhan**. -**tion**, -**sien** = **shùn**: -**çion**, -**çion** = **zhùn**. -**çious**, -**çious**, -**sieus** = **shús**. -**bic**, -**dle**, &c. = **bel**, **dcl**.

nēm i nē cōn-tra-dī cēn-tē, *phr.* [Lat.] No one saying No, or opposing. Usually abbreviated to *nēm. con.*

nēm-i nē dis sōn-tī-ēn-tē, *phr.* [Lat.] No one dissenting.

nē-mō bi-us, *s.* [Gr. νεμος (ne-mos) = a grove, and βιος (bios) = life.] *Entom.*: A genus of creakets, *Nemobius sylvestris*, the Wood-creecket, a small species with the hind wings rudimentary, is rare and local in England, but more common in France.

nē-mōc-ēr-a, nēm-a-tōc-ēr-a, *s. pl.* [Pref. *nemato-*, and Gr. κερας (keras) = a horn.] *Entom.*: A tribe of dipterous insects, having the antennae usually of from ten to seventeen joints, but sometimes only of six; thread-like or beaded; the palpi of four or five joints; the cross-veins in the wings usually few or wanting, and the halteres uncovered. The larva is furnished with a more or less distinct head, and gives origin to a free pupa. Their classification is not fixed. Some authors treat them as a single family, others divide them into from two to twelve families. Mr. Dallas makes seven families: Culicidae, Chironomidae, Tipulidae, Mycetophilidae, Cecidomyiidae, Psychodidae, and Bibionidae. (Cassell's Nat. Hist., vi. 74-83.)

nēm-ō-glōs-sā-tā, *s. pl.* [Gr. νημα (nēma) = a thread, and γλωσσα (glōssa) = a tongue.] *Entom.*: The name sometimes given to the hymenopterous sub-tribe of Apriariae, or Bees.

nē-mōph-ī-lā, *s.* [Gr. νεμος (ne-mos) = a grove, and φιλία (philēa) = to love.]

Bot.: A genus of Hydrophyllaceae, with pinnatifid leaves and conspicuous flowers. Several North American species, chiefly from California, have been introduced into British gardens. The best known is *Nemophila insignis*, which has brilliant blue flowers with a white centre. It is prized in gardens as a border plant.

nē-mōph-ī-list, *s.* [NEMOPHILA.] One who is fond of forests or forest scenery.

nē-mōph-il-ī-s, [NEMOPHILA.] Fondness for forests or forest scenery; a love of the woods.

nē-mōp-tēr-a, *s.* [Gr. νεμος (ne-mos) = a grove, and πτερον (pteron) = a wing.]

Entom.: A genus of Megaloptera (q.v.). The hind wings are very long, each forming a kind of strap, growing broader at the extremity; the fore wings are abnormally broad. The species live in the warmer parts of the Old World, from Southern Europe to Australia. *Nemoptera out* is from Turkey and the neighbouring parts of Asia and Africa. [NEMOPHILUS.]

nēm-or-āl, *a.* [Lat. *umoris*, from *arvus* (gent. *umoris*) = a grove.] Of or pertaining to a wood or grove.

nēm-ōr-ōse, *a.* [NEMOROUS.] *Bot.*: Growing in groves. (*Treas. of Bot.*)

nēm-ōr-ōus, *a.* [Lat. *umoris*, from *arvus* (gent. *umoris*) = a grove.] Of or pertaining to a wood; woody. "Paradise itself was but a kind of *nemorous* temple, or sacred grove."—*Eothen*, *Sylvia*, bk. iv. § 4.

nēm-p-nē, *v.t.* [A.S. *nemnan* = to name (q.v.).] To name, to call. "As much disdainng to be so misnempt, Or a warmanng to be basely nempt."—*Spenser*, *F. Q.*, III. v. 20.

nēm-s, *s.* [Arab.] The leineumon (q.v.).

nē-mur-a, *s.* [Gr. νημα (nēma) = a thread, and ούρα (oura) = a tail.] *Entom.*: A genus of Perlidae (q.v.). The larvae are naked, and live in the water. They go through the winter, and become pupae in the spring. The adult lives only a few days, for its mouth is not suited for receiving food. The larva has two long caudal hairs which it loses on arriving at the adult state. *Nemura virgatula* is British.

nē-nī-a, nē-nī-a, *s.* [Lat.] A funeral song; an elegy.

nēm-n-phâr, *s.* [Pers. *noifer*, *ailâf* c.] *Bot.*: *Nymphaea alba*. [NYMPHÆA.]

nē-ō, *pref.* [Gr. νέος (neos) = new.] A prefix

much used in scientific terms, with the force or meaning of new, recent, or fresh.

nē-ō-arc-tic, *a.* [NEARCTIC.]

nē-ō-hā-læ-nā, *s.* [Pref. *nēo-*, and Lat. *halenā* (q.v.).]

Zool.: A genus of Mystacoceti, with a single rare species, *Neobalena muricata*, the smallest of the Whalebone Whales, from the Australian and New Zealand seas. It is not more than twenty feet in length. The baleen is very long, slender, elastic, and white.

nē-ō-chān-nā, *s.* [Pref. *nēo-*, and Gr. χάνη (chanē) = a kind of sea-fish.]

Ichthy.: A genus of Galaxiidae. Dr. Gunther considers it a degraded form of the typical genus Galaxias, from which it differs by the absence of ventral fins. It has been found only in burrows, which it excavates in clay or dried mud at a distance from the water.

† Nē-ō-chris-ti-an (or **tian** as **tyan**), *a. & s.* [Pref. *nēo-*, and Eng., &c. *Christi-an*.]

A. As adj.: Of or belonging to new Christianity or rationalism.

B. As subst.: One who seeks to reconstruct Christianity on a rationalistic basis; a rationalist.

† Nē-ō-chris-ti-ān-ī-tī, *s.* [Pref. *nēo-*, and Eng. *Christianity*.] New Christianity, rationalism, or its results when applied to the Bible and to Christian doctrine.

nē-ō-chryr's-ō-lite, *s.* [Pref. *nēo-*, and Eng., &c. *chrysolite*.]

Min.: A variety of chrysolite (q.v.), occurring in small, black, crystalline plates. It contains a considerable amount of manganese. Found at Vesuvius in cavities of the lava of the year 1631.

Nē-ō-cō-mī-ān, *a. & s.* [From Lat. *Neocomium* = Neufchâtel.]

A. As adj.: Of or belonging to Neufchâtel, or the rocks there typically represented. [B.]

B. As substantive:

Geol.: A continental name for the Lower Greensand Formation, the inferior part of the Cretaceous system. Lyell divides it into Upper, Middle, and Lower Neocomian; the Upper contains the Folkestone and Hythe beds of the south-east of England with the Kentish rag intercalated, the whole less than three hundred feet thick. Beneath this is the Atherfield clay, gray in colour, of great thickness at Atherfield, in the Isle of Wight. Part of the Speeton clay, several hundred feet thick, is also Neocomian. Under the Middle division are ranked the Weald clay, the Middle Speeton, and Tealby beds. Tealby is a village in Lincolnshire. The Lower Neocomian contains the Hastings sand, passing into Purbeck beds of the Jurassic series, and the lower Speeton clay, the latter two hundred feet thick. Remains of Plesiosaurus and Teleosaurus have been found in the Upper Speeton clay and *Pecten cinctus*, various Ammonites, &c., in other beds. The lower Neocomian is homotaxic with the yellow sandstone of Neufchâtel.

nē-ō-cōs-mic, *a.* [Pref. *nēo-*, and Eng. *cosmic*.] Pertaining to the present condition and laws of the universe; specific, applied to the races of historic man. (*Annuaire*.)

nē-ōc-ra-cy, *s.* [Gr. νέος (neos) = new, and κρατω (krato) = to govern.] Government by new or unused hands; upstart authority.

nē-ō-cri-nōi-dē-a, *s. pl.* [Pref. *nēo-*, and Mod. Lat. *crinoides* (q.v.).]

Zool.: In some recent classifications an order of Crinodea, which is then made a class.

nē-ōc-tēse, *s.* [Pref. *nēo-*, and Gr. κτήσις (ktēsis) = acquisition; Gr. *neoktes*.]

Min.: The same as SCORODITE (q.v.).

nē-ō-cy-an-ite, *s.* [Pref. *nēo-*, and Eng., &c. *cyanite*; Ital. *neociano*.]

Min.: A mineral occurring in extremely minute tabular crystals, as a sublimation product, in the fumaroles of Vesuvius. Crystallization, monoclinic. Colour, blue. Supposed, from preliminary experiments, to be an anhydrous silicate of copper.

nē-ōd-a-mōde, *s.* [Gr. νεοδαμωδός (neodamōdōs), from νεός (neos) = new, and δαμωδός

(dēmōdōs) = pertaining to the people, popular; δῆμος (dēmos) = the people, and εἶδος (eidos) = appearance; Fr. *néodamode*.]

Gr. Antiq.: A person recently admitted to the rights of citizenship.

nē-ō-gā-a, *s.* [Pref. *nēo-*, and Gr. γαία (gaia), poet. for γῆ (gē) = the earth.]

Zool. & Geog.: A division of the earth for hisological purposes by Mr. Sclater; it includes his Neartic and Neotropical regions. (*Jal-luce*: *Geog. Dist. Asia*, i. 66.)

nē-ō-g-a-mist, *s.* [Gr. νεόγαμος (neogamos) = newly married; pref. *nēo-*, and γαμῶ (gamō) = to marry; Fr. *neogame*.] A person recently married.

nē-ō-gēn, *s.* [NEOGENE.]

Chem.: A name given to an alloy resembling silver. It consists of copper, zinc, nickel, and tin.

nē-ō-gēne, *a.* [Pref. *nēo-*, and Gr. γεννάω (gennaō) = to produce.]

Geol.: A term used by some continental geologists to denote the Pliocene and Miocene Tertiary, in contradistinction to the older strata of the Eocene. (*Pagc*.)

nē-ō-g-ra-phy, *a.* [Pref. *nēo-*, and Gr. γράφω (gráphō) = to write.] A new system of writing.

nē-ō-lāt-in, *a.* [Pref. *nēo-*, and Eng. *Latin*.]

1. New Latin. A term applied to the Romance languages, as having sprung directly from the Latin.

2. Latin, as written by modern authors.

nē-ō-līm-ū-lūs, *s.* [Pref. *nēo-*, and Lat. *limulus* (q.v.).]

Paleont.: A genus of Xiphosura, from the Upper Silurian. The head shield resembles that of the recent Limulus, and the divisional line crossing the head apparently corresponds with the facial suture of the Trilobites. There was probably a long spiniform telson. The sole species, *Neolimulus foliatus*, has been described by Dr. H. Woodward.

nē-ō-lite, *s.* [Pref. *nēo-*, and Gr. λίθος (lithos) = stone; Ger. *neolith*.]

Min.: A green mineral occurring in stellate groups of silky fibres, and massive. Hardness, 1 to 2; sp. gr. 2.77. Appears to be a hydrated silicate of alumina and magnesia, with some protoxide of iron. Found in cavities in basalt, at Eisenach, Germany, at Arendal, Norway, and other places.

nē-ō lith-ic, *a.* [NEOLITE.]

Anthrop.: A term applied by Lord Avebury to the second of the four epochs into which he divided Prehistoric Archaeology.

"The later or polished Stone Age; a period characterized by beautiful weapons and instruments made of flint and other kinds of stone, in which, however, we find no trace of the knowledge of any metal excepting gold, which seems to have been sometimes used for ornaments. This we may call the *Neolithic* period."—*Lubbock*, *Prehistoric Times* (1878), p. 3.

nē-ō-lō-gī-ān, *a. & s.* [Eng. *neology*; -*an*.]

A. As adj.: Of or pertaining to neology; neological.

B. As subst.: The same as NEOLOGIST (q.v.).

"We must take heed not to do as the *neologists* have done."—*Tregellas*: *Heads of Hebrew Grammar*, p. 7.

nē-ō-lō-gī-an-īsm, *s.* [Eng. *neologist*; -*ism*.] The same as NEOLOGISM (q.v.).

nē-ō-lōg-ic, nē-ō-lōg-ic-al, *a.* [Eng. *neology*; -*ic*, -*ic-al*.] Of or pertaining to neology; employing new words.

"A general *neological* dictionary containing those polite, though perhaps not strictly grammatical words and phrases, commonly used, and sometimes understood, by the beau monde."—*Chesterfield*: *The World*, No. 32.

† nē-ō-lōg-ic-al-ly, *adv.* [Eng. *neological*; -*ly*.] In a neological manner.

nē-ōl-ō-gīsm, *s.* [Eng. *neology*; -*ism*.]

1. A new word or phrase; a new use of a word or phrase.

2. The use of new words, or of old words in new senses.

"Kept pure of Balzac and *neologism*."—*E. B. Browning*.

3. New doctrines. [RATIONALISM.]

nē-ōl-ō-gīst, *s.* [Eng. *neology*; -*ist*.]

1. One who coins or introduces new words

fāto, fāt, fare, amidst, whāt, fāl, father: **wē, wēt, hērc, camel, her, there**: **pīnc, pit, sire, sir, marine**; **gō, pōt, or, wōre, wōlf, wōrk, whō, sōn**: **mūte, cūb, cūre, unite, cūr, rūle, fūll**; **trȳ, Sȳrian**. æ, œ = ē; ey = ā; qu = kw.

or phrases, or who uses old words in new senses.

2. One who introduces innovations in doctrine, especially in theology. [RATIONALIST.]

* **nē-ōl-ō-gist-ic**, **nē-ōl-ō-gist-ic-al**, *a.* [Eng. *neologist*; *-ic*, *-ical*.] Pertaining or relating to new *ogy*; neological.

* **nē-ōl-ō-gī-zā-tion**, *s.* [Eng. *neologization*; *-ation*.] The act or habit of neologizing; neologism.

nē-ōl-ō-gīze, *v.i.* [Eng. *neologize*; *-ize*.]

1. To introduce new words or phrases; to use old words in new senses.

2. To introduce new theological doctrines; to introduce or adopt rationalistic views in theology.

nē-ōl-ō-gy, *s.* [Pref. *neo-*, and Gr. *λόγος* (*logos*) = a word; Fr. *néolog-isme*.]

1. The introduction or use of new words or phrases, or of old words in new senses; neologism.

2. Rationalistic views in theology.

* **nē-ō-mē-ni-a**, *s.* [Gr. *νεομηνία* (*neomēnia*), from *neos* (*neos*) = new, and *μην* (*mēn*) = a month.]

1. *Ord. Lang.*: The time of new moon; the beginning of the month.

2. *Gr. Anth.*: A festival observed by the Greeks at the beginning of every lunar month in honour of all the gods, especially of Apollo, thence called *Neōmēnos*, as the author of light, and the luminary from which all time receives its distinctions and divisions.

nē-ō-mor-pha, *s.* [Pref. *neo-*, and Gr. *μορφή* (*morphē*) = form.]

Ornith.: *Habia*, the New Zealand Wood-crow, the *Heterocheila* of Calanis. According to Buller, a genus of *Upupa*, placed by some authors with the *Corvidæ*. First described by Gould, who mistook the male and female for distinct species, owing to their differently-shaped bills, and named the former *Neomorphia uetulastris* and the latter *N. crassirostris*. It is now known as *N. Gouldii*. Plumage black, with green metallic gloss, broad terminal band of white on tail; bill ivory-white to dark-gray at base; wattles large, rounded, and rich orange-colour; tarsi and toes bluish-gray; claws light horn-colour. (Buller: *Birds of New Zealand*.)

* **nē-ō-nism**, *s.* [Gr. *νεός* (*neos*) = new; Eng. suff. *-ism*.] A new word, phrase, or idiom; a neologism.

* **nē-ō-nō-mī-an**, *s. & a.* [Pref. *neo-*, and Gr. *νόμος* (*nomos*) = a law; Fr. *néonomien*.]

A. *As subst.*: One who advocates or supports new laws; specif. see extract.

"One that asserts the Old Law is abolished, and therein is a supererogatory Antinomian, but pleads for a New Law, and justification by the works of it, and therefore is *néonomien*." (*A Charity; Neonomianism Unsettled* (1692), (Ep. Dial.)

B. *As adj.*: Pertaining or relating to the Neonomians.

nē-ō-nō-mī-an-ism, *s.* [Eng. *neonomianism*; *-ism*.] The doctrine or tenets of the Neonomians.

* **nē-ō-phī-lōs-ō-phēr**, *s.* [Pref. *neo-*, and Eng. *philosopher* (q.v.).] A new philosopher; one who holds or advances new principles of philosophy.

nē-ō-phrōn, *s.* [Gr. *νεόφρων* (*neophrōn*), as *adj.* = childish in spirit; as *subst.*, often as a proper name.]

Ornith.: A genus of *Vulturidae*, sub-family *Vulturinae*. *Neophron percipiter* is the Egyptian Vulture (q.v.), Pharaoh's Hen, or Pharaoh's Chicken; *N. gypsflorens* is the Indian Scavenger Vulture, and *N. pileatus*, widely distributed in Africa, the Pileated Vulture.

nē-ō-phýte, **nē-ō-phíte**, *s. & a.* [Lat. *neophytus*, from Gr. *νεοφύτος* (*neophytos*) = newly planted; *νεός* (*neos*) = new, and *φύτος* (*phytos*) = grown; *φύω* (*phōō*) = to grow; Fr. *néophyte*; Ital. & Sp. *neofito*.]

A. *As substantive*:

1. *Ordinary Language*:

1. A novice; one newly admitted to the order of the priesthood.

2. A tyro, a beginner, a novice.

"There stands a *neophyte* chalice of ivory." (*Ben Jonson: Cynthia's Revels*, 1. 1.)

II. Church Hist.: A term applied in the primitive Church to the newly-baptized. They wore white garments at their baptism, and for eight days after. The Council of Nice (A.D. 325) ordered that neophytes should not be admitted to holy orders till their constancy had been in some measure proved. The term is still used by Roman missionaries for the converts from the heathen. A special use of the word was to denote one who, not having passed through the inferior grades, was, in view of 1 Tim. iii. 6, considered canonically unfit to be consecrated bishop.

"Those whom he calls *neophytes*, that is newly grafted into Christianity."—*Basilius: Canon of Law*.

B. *As adj.*: Newly entered upon or admitted into some state; novice.

"It is with your young grammatical courtier, as with your *neophyte* player."—*Ben Jonson: Cynthia's Revels*, III. 4.

nē-ō-plāsc, *s.* [Pref. *neo-*, and Gr. *πλάσις* (*plasis*) = formation.]

Min.: The same as *BOTRYOGEN* (q.v.).

nē-ō-plās-tic, *a.* [Pref. *neo-*, and Eng. *plastic* (q.v.).] Newly formed; specif. applied to the matter which fills up a wound.

nē-ō-plā-tōn-ic, *a.* [Pref. *neo-*, and Eng. *platonian* (q.v.).] Of or pertaining to the Neoplatonists or their doctrines.

"The *Neoplatonist* conception of the action of the Deity on the world, and of the essence and origin of matter, can only be explained by reference to the dynamic pantheism of the Stoics."—*Engic Brit.* (ed. 9th), VII. 333.

Nē-ō-plā-tōn-ic-ian, *s.* [Eng. *neoplatonist*; *-ian*.] The same as *NEOPLATONIST* (q.v.).

Nē-ō-plā-tōn-ism, *s.* [Pref. *neo-*, and Eng. *Platonism*.]

Hist. & Philos.: The name given to an important movement in the Alexandrian school. G. H. Lewes says that their originality consisted in having employed the Platonic *Dialectics* as a guide to *Mysticism* and *Pantheism*; in having connected the doctrine of the East with the dialectics of the Greeks; in having made Reason the justification of faith; and he concludes that "by their *Dialectics* they were *Platonists*; by their theory of the Trinity they were *Mystics*; by their principle of *Emanation* they were *Pantheists*." Neoplatonism passed through three periods: (1) that of Ammonius Saccas and Plotinus, in the third century [AEMOSIAN], (2) that of Porphyry and Iamblichus, in the fourth century; and (3) that of Proclus (412-485). Under Justinian (483-565) the Alexandrian school became extinct.

"With the exception of Epicureanism, which was always treated as the mortal enemy of *Neoplatonism*, there is no outstanding earlier system which did not contribute something to the new philosophy."—*Engic Brit.* (ed. 9th), XVII. 332.

Nē-ō-plā-tōn-ist, *s.* [Pref. *neo-*, and Eng. *Platonist* (q.v.).] A member of the Alexandrian school, holding Neoplatonic views.

"The ancient religions of the East had a peculiar interest for the *Neoplatonist*."—*Engic Brit.* (ed. 9th), XVII. 333.

nē-ō-pūs, *s.* [Pref. *neo-*, and Gr. *πούς* (*pous*) = a foot.]

Ornith.: Kite-Eagle, an aberrant genus of *Accipitrinae*, with a single species, *Neopus mahyensis*. Geographical range, India and Ceylon to Borneo, Java, Celebes, and Ternate. The talons are longer and slenderer in proportion than in any known eagle. It is about thirty inches long, plumage black, with indistinct bars of ashy-gray on the tail.

* **nē-ō-ra-mā**, *s.* [Ionic Gr. *ράμα* (*raōs*) = a dwelling, and *ράμα* (*horama*) = a view.] A panorama representing the interior of a large building, in which the spectator appears to be placed.

nē-ō-rin-ōp-sis, *s.* [First element doubtful; Gr. *ὄψις* (*opsis*) = appearance.]

Palaont.: A genus of fossil Butterflies. *Neortynopsis sepulta*, of the family *Satyrinae*, is from the Sandstones of Aix-la-Chapelle.

nē-ō-tēr-ic, **nē-ō-tēr-ick**, *a. & s.* [Lat. *neotericus*, from Gr. *νεοτέριος* (*neoterios*) = novel, from *νεοτερός* (*neoterōs*), comp. of *νεός* (*neos*) = new; Fr. *néoterique*.]

A. *As adj.*: New, modern; of recent origin.

"Among our *neoteris* verbs, those in *re* are exceedingly numerous."—*Fitzedward Hall: Modern English*, p. 294.

* **B.** *As s.*: One belonging to new times; a modern.

Stimulus which all the moderns rep. [Dr. Watts: *Harmon. Anth. Melancholy*, p. 229.]

nē-ō-tēr-ic-al, *a.* [Eng. *neoteris*; *-al*.] The same as *NEOTERIC* (q.v.).

nē-ō-tēr-ism, *s.* [Gr. *νεοτερισμός* (*neoteris-mōs*), comp. of *νεός* (*neos*) = new; Eng. suff. *-ism*.] 1. The introduction or use of a new word or phrase; neology.

"Consideration whether it made any sense, because misreading."—*Fitzedward Hall: Modern English*, p. 15.

2. A new word or phrase introduced into a language; a neologism.

"As substitutes for the production of *neoteris*, some expressions lay down their old sense, altogether and acquire new ones."—*Fitzedward Hall: Modern English*, p. 16.

nē-ō-tēr-ist, *s.* [*NEOTERICISM*.] One who neologizes; one who uses or introduces new words or phrases; a neologist.

"Among writers of the first class, none are well *neoteris*."—*Fitzedward Hall: Modern English*, p. 19.

nē-ō-tēr-ist-ic, *a.* [Eng. *neoteris*; *-ic*.] Of or pertaining to neologizing or neoterisms.

nē-ō-tēr-ize, *v.t.* [*NEOTERICISM*.] To use or introduce new words or phrases; to neologize; to coin new words or phrases.

"Popularly *neoteris* quantities of skill in *neoteris*ing."—*Fitzedward Hall: Modern English*, p. 15.

nē-ō-tin-ē-a, *s.* [Originally *Lat. tinea*; but as there was a moth genus of that name, *neo-* was prefixed for distinction's sake.]

Bot.: A genus of *Orchids*, tribe *Orchieæ*. The flowers are small, the lateral sepals and petals forming a hood; lip three lobed, spatulate, the pollen masses four; generally with spotted leaves. *Neottia intacta* has a pink or purplish corolla, the sepals darker, and is found on limestone pastures in Gallo-way. Called also *Aceris secundiflora*.

nē-ō-tō-kite, *s.* [Gr. *νεοτόκος* (*neotokos*) = new-born, or of recent origin; Ger. *Neotokid*.]

Min.: An amorphous mineral resulting from the alteration of rhodonite (q.v.). Hardness, 3 to 4; sp. gr. 2.64 to 2.8; lustre, dull, or feebly submetallic; colour and streak, black, to various shades of dark-brown; opaque. Dana includes under this name *Stratopside* and *Wittingite* (q.v.), as being likewise alteration products, to neither of which can chemical formula be assigned. They appear to consist of hydrated silicates of proto- and sesqui-oxides of manganese, proto- and sesqui-oxides of iron, magnesia, some alumina, and impurities. Found associated with rhodonite at various localities in Finland and Sweden.

nē-ō-tō-mā, *s.* [Gr. *νεο* (*neo*) = to swim, and *τομή* (*tomē*) = a cutting.]

Zool.: A North American genus of *Murina*, order *Signatoides*. The teeth resemble those of the *Volves*. Four species are known, about the size of *Mus decumanus*. *Neotoma eremicus* has a bushy, squirrel-like tail; the tails of the other species rat-like.

nē-ō-tō-ra-gūs, *s.* [Pref. *neo-*, and Gr. *τέρας* (*teras*) = a goat.]

Zool.: An African genus of *Antelope*. Three specimens are known. *Neotragus Sottanus*, *N. Kerkira*, and *N. douvillei*. (*Proc. Zool. Soc.*, 1886, pp. 17-22.)

nē-ō-trōp-ic-al, *a.* [Pref. *neo-*, and Eng. *tropical* (q.v.).] Belonging to characteristic of the zoological region so called.

neotropical region, *s.*

Zool.: Dr. Sclater's name for a zoological region, embracing South America, the Antilles, and tropical North America. It possesses more peculiar families of vertebrates and genera of birds than any other region. Neither Prof. Huxley's suggested alteration *Antio-Columbia*, nor Dr. Sclater's new term *Den-droica*, appears to be an improvement. (*Ibid. Proc. Zool. Soc.*, 1877, p. 79.)

nē-ō-tō-æ, *s. pl.* [Mod. Lat. *neottia*; Lat. *neō*, pl. *neō*, suff. *-ia*.]

Bot.: A tribe of *Orchids*, having one anther, which is dorsal, the pollen powdery, granular, or setiferous.

nē-ō-tī-a, *s.* [Attic Gr. *νεοτίαια* (*neotiaia*) = a bird's nest; so called from the interwoven fibres of the roots.]

Botany:

* 1. Lady's tresses; the same as SPIRANTHES (q.v.). (Hooker & Arnott.)

2. Bird's Nest, a genus of Orchids, family Listeria, reduced by Sir Joseph Hooker to a subgenus of Listera. The species *Listera* (*Neottia*) *Nidus-avis*, the Bird's Nest Orchid, is a brown, leafless root parasite; the stem has sheathing scales, the raceme is lax-flowered, the corolla grayish-brown, the lip concave at the base, the terminal lobes divaricate. Found in dark woods, especially of beech, in Britain, also in continental Europe and Western Siberia.

† **nē-ōt'-tī-ōus**, *a.* [Mod. Lat. *neotti(o)*; Eng. suff. *-ous*.]
Bot.: Resembling *Neottia*; having a root like a bird's nest.

"That [genus] which contains the *Nidus-avis*, the only one here the *neottious* root."—Hooker & Arnott *Bret. Flora* (ed. 7th), p. 429.

nē-ō-type, *s.* [Pref. *neo-*, and Eng. *type*; Ger. *typ*.]
Min.: A variety of calcite containing some carbonate of baryta. Found in thombhedrons in Cumberland.

† **nē-ō-zō-ic**, *a.* [Pref. *aco-*; Gr. *ζῶν* (*zōn*) = life, and Eng. *ad*.], suff. *-ic*.]
Geol. & Paleont.: One of two divisions proposed by the late Prof. E. Forbes for past geological time and fossiliferous strata; it ranges from the commencement of the Trias up to the existing order of things, embracing the Mesozoic and Cainozoic epochs. He contended that, while there was a wide difference between Paleozoic and Mesozoic fossils, there was no essential difference between Mesozoic and Cainozoic fossils, and that it would be more philosophical to divide the whole lapse of geological time into two great epochs. [PALEOZOIC.]

"Both the paleozoic and the after-1 must coin a word—*neozoic* mollusca."—Prof. E. Forbes, in *Quar. Journ. Geol. Soc.*, vol. x., p. 1833.

nēp, *s.* [A contract. of *nepeta*.] A plant of the genus *Nepeta* (q.v.); catmint.
"The cat to her *nep*, the goat to his hemlock."—Bull. *Select Thoughts*, § 51
¶ Wild Nep is *Bryonia dioica*.

nē-pā, *s.* [Lat. = a scorpion.]
Entom.: Water-scorpion; the typical genus of the family Nepidae (q.v.), with one species, *Nepa cinerea*, the Common Water-scorpion, abundant in the fresh waters of Europe. It is about an inch long, elliptical, yellowish-gray, with red on the abdomen. It preys on aquatic insects.

Nē-pāul, *s.* [See def.] The name of a district in Northern Hindūstan.

Nepaul-barley, *s.*
Bot. & Hort.: *Hordeum ciliaste*, var. *trifurcatum*. It comes to maturity earlier than common barley.

Nepaul-paper, *s.* A strong, unsized paper made in Nepaul from the pulverized bark of the *Daphne papyracea*. Made many yards square.

Nēp-āul-ē-see, *a. & s.* [Eng. *Nepaul*; *-ese*.]
A. *As adj.*: Of or pertaining to Nepaul or its inhabitants.
B. *As subst.*: An inhabitant, or the inhabitants of Nepaul.

nēpe, *s.* [North American Indian.] A square piece of blanket wrapped by the American Indians about the foot and ankle before putting on the moccasin.

nē-pēnth, *s.* [NEPENTHES.]
Bot. (Pl.): The name given by Lindley to the order Nepenthaeae (q.v.).

nē-pēnthā-ē-æ, *s. pl.* [Eng., &c. *nepenthæ*(*æ*); Lat. fem. pl. adj. suff. *-æve*.]
Bot.: Nepenthes; an order of Dielinous Exogens, alliance Euphorbiales (?). It consists of herbs or half-shrubby plants, with leaves slightly sheathing at the base, dilated into a pitcher at the end, articulated with a bil-like lamina. Wood without concentric zones, but with abundant spiral vessels. Racemes dense, terminal, many-flowered. Flowers diœcious. Sepals four, inferior. Stamens cohering into a column, with about fifteen anthers. Fruit capsular, four-celled, four-valved, the dissepiments from the middle of the valves, and

having the minute seeds, which are numerous, adherent. Known genus one; species six (?), from swamps, in India and China. (Lindley.)

* **nē-pēn'-thē**, * **nē-pēn'-thēs**, *s.* [Gr. *νεπενθες* (*nepenthēs*); neut. sing. of *νεπενθής* (*nepenthēs*) = free from sorrow; *νη* (*nē*), negative prefix, and *πεθος* (*penthos*) = grief, suffering.]
I. *Literally*:
1. A kind of drug or potion supposed to have the property or quality of driving away all sorrow and misfortunes.
"Not that *nepenthes* which the wife of Thone in Egypt gave to Jove-born Helena—*Is of such power*."—Milton—*Comus*, 675.
2. Any draught or drug capable of removing pain or care.
"II. *Fig.*: Anything which removes pain or care, or renders one insensible to them.
"Lulled with the sweet *nepenthe* of a court."
Pope: Epit. to Satires, l. 98.

nē-pēn'-thēs, *s.* [NEPENTHE.]
1. *Ord. Lang.*: The same as NEPENTHE (q.v.).
2. *Bot.*: The only known genus of the order Nepenthaeae. Character, that of the order. *Nepenthes distillatoria* is the Pitcher-plant (q.v.).

nē-pē-ta, *s.* [Lat. = the wild mint (*Mentha silvestris*), or the balm, *Melissa altissima*.]
Bot.: The typical genus of the menthaeace tribe Nepeteæ. The calyx is fifteen-ribbed; the two posterior, *i. e.*, upper, stamens the longer; the upper lip of the corolla straight, emarginate, or bifid. About 110 species are known, from North Africa and the temperate parts of Europe. Two are British: *Nepeta cataria* (Catmint) and *N. Glehovia* or *Glehovia hederacea* (Ground Ivy) (q.v.). *N. cilivaris* is given in India in sherbet for fever and cough. *N. cicutaria* is supposed to be a cardiac tonic.

nē-pē-tā-æ, *s. pl.* [Lat. *nepete*(*æ*); fem. pl. adj. suff. *-æve*.]
Bot.: A tribe of Labiate, type *Nepeta*.

nē-pē-tī-dæ, *s. pl.* [Lat. *nepete*(*æ*); fem. pl. adj. suff. *-idæve*.]
Bot.: A family of Labiate plants, tribe Cimeneæ. Type *Lavendula* (q.v.). (Lindley.)

nē-phal-ism, *s.* [Gr. *νηφαλισμός* (*nēphalios-mos*) = sobriety, discretion; *νηφαλιζω* (*nēphaliozō*) = to purify by a libation without wine; *νηφαλιος* (*nēphalios*) = sober, temperate, abstinent (lit. & fig.). I Tim. iii. 2; Tit. ii. 2; *νήφω* (*nēphō*) = to be sober.] The name given by Prof. James Miller of Edinburgh to total abstinence.

† **nē-phal-ist**, *s.* [NEPHALISM.] One who advocates or practises nephalism.

nēph-ē-line, **nēph-ē-lite**, *s.* [Gr. *νεφελή* (*nephelē*) = a cloud; suff. *-ine*, *-ite*; Ital. *nefelina*. The name has reference to the fact that the mineral becomes cloudy when immersed in strong acids.]
Min.: A mineral species included by Dana in his unisilicate sub-division of anhydrous silicates. Crystallization, hexagonal, usually occurring in six- or twelve-sided prisms, with plane or modified summits. Principal cleavage, parallel to the planes of the hexagonal prism. Hardness, 5 to 6; sp. gr. 2.5 to 2.65; lustre, vitreous to greasy; colour, white to yellowish; when massive, frequently bluish-gray, dark-green, brownish to brick-red; transparent to opaque. Compos.: silica, 44.52; alumina, 33.7; soda, 16.9; potash, 5.2 = 100, represented by the formula 2(3NaO,3KO)3SiO₂ + 3(2Al₂O₃,3SiO₂) + 3SiO₂. Occurs in very fine crystals in cavities of the volcanic bombs in the agglomerates of Monte Somma, Vesuvius, and as a constituent of many dolerites, syenites, &c.

nepheline-basalt, *s.*
Petrol.: A crystalline granular admixture of nepheline, augite, and magnetite, with more or less of olivine, and, as accessory minerals, apatite, sphene, haryne, melilite, and garnet. Found at Katzenbuechel in the Odenwald, &c. Called also Nephelinite (q.v.).

nē-phē-lin'-ite, *s.* [Eng. *nephelin*(*ē*) (q.v.); and suff. *-ite* (*Min.*)] [NEPHELINE-BASALT.]

nēph-ē-lite, *s.* [NEPHELINE.]

nē-phē-lī-ūm, *s.* [Lat. = burdock; from Gr. *νεφέλιον* (*nephelion*) = a cloud-like spot; from *νεφέλη* (*nephelē*) = a cloud.]

Bot.: A genus of Sapindaceæ, tribe Sapindæ. They have generally pinnate leaves, flowers in panicles, and round or ovate warted or prickly fruit. *Nephelium Litchi* is the Litchi, *N. Longuana*, the Longan, and *N. hypoleuca* the Rambutan or Rambosstan (q.v.).

nēph-ē-lōid, *a.* [Gr. *νεφελή* (*nephelē*) = a cloud, and *είδος* (*eidōs*) = appearance, form.]
Med.: Clouded; a term applied to cloudy wine.

nephew (as **nēv-u**), * **nēv-eu**, * **nēv-ew**, * **nēph-ewe**, * **nēv-ewe**, *s.* [Fr. *neveu*; from Lat. *neptulus*, acc. of *neptus* = (1) a grandson, (2) a nephew; A.S. *nēfa* = a nephew; Sansc. *neput* = a grandson; O. H. Ger. *nefu*, *nevo*; Ger. *neffe*.]
"I. A grandson, a grandchild.
"their nephews, that, the children of their sons and daughters."—*J. Hallstead: Platarchæ, Morals*, p. 355.
¶ See also I Tim. v. 4 (H.V.).
2. The son of a brother or sister.
"The uncle is certainly nearer of kin to the common stock by one degree than the nephew."—*Blackstone Comment.*, bk. ii. ch. 3.
¶ By the civil law a nephew is in the third degree of consanguinity, but by the canon law he is in the second.
"3. A cousin.
"Henry the Fourth deposed his nephew Richard."
Shakspeare: I Henry VI., l. 5

nēph-ō-scope, *s.* [Gr. *νεφός* (*nephos*) = a cloud, and *σκοπέω* (*skopeō*) = to look at.]
Physics: An instrument for measuring the velocity of clouds, invented by Karl Braun, and made public in 1868.

nē-phrāl'-gī-a, *s.* [Gr. *νεφρός* (*nephros*) = the kidney, and *άλγος* (*algos*) = pain; Fr. *néphralgie*.]
Med.: Pain or disease in the kidneys.

nē-phrite, *s.* [Gr. *νεφρός* (*nephros*) = a kidney; suff. *-ite* (*Min.*).]
Min.: The same as JADE, JADEITE, and SAUSSURITE (q.v.).

nē-phrit'-ic, * **nē-phrit-ick**, *a. & s.* [Gr. *νεφρικός* (*nephrikos*) = pertaining to the kidneys; *νεφρός* (*nephros*) = a kidney; Fr. *néphrétique*; Ital. & Sp. *nefritico*.]
A. As adjective:
1. Of or pertaining to the kidneys or organs of urine.
"Nephritic pains, nervous colics and obstructions."
—*Berkeley: Siris*, § 62.
2. Suffering from disease of the kidneys.
"The diet of nephritic persons ought to be opposite to the alkalescent nature of the salts in their blood."
—*Arbuthnot: On Diet*.
3. Relieving disorders of the kidneys: as, nephritic medicines.
B. As subst.: A medicine intended or having the power to relieve or remove diseases of the kidneys, particularly gravel or stone in the bladder.

nephritic colic, *s.* The severe pain accompanying the passage of a calculus from the kidney to the bladder.

nephritic retinitis, *s.*
Pathol.: Inflammation of the retina of the eye attendant on nephritis.

nephritic-stone, *s.* [NEPHRITE.]

nephritic-wood, *s.*
Bot. & Pharm.: The wood of *Moringa pterygosperma*, a decoction of which has been given in diseases of the kidneys.

* **nē-phrit'-ic-al**, *a.* [Eng. *nephritic*; *-al*.] The same as NEPHRITIC, A. (q.v.).
"Tranbled with certain nephritical fits."—*Relin. Watsoniana*, p. 481.

nē-phrit-tis, *s.* [Lat., from Gr. *νεφρός* (*néphros*) = nephritis (*nevos*) = (disease) of the kidneys; from *νεφρός* (*nephros*) = a kidney.]
Pathol.: Intense congestion of the kidney, with great fever, exudation and hemorrhage into the tubes, and shedding of epithelium; Bright's disease (q.v.). The various forms of nephritis are: acute desquamative, desquamative, interstitial, parenchymatous, and suppurative.

nē-phrō-dī-ē-æ, *s.* [Mod. Lat. *nephrodi*(*um*); Lat. fem. pl. adj. suff. *-æve*.]
Bot.: A sub-tribe of Polyposidiaceæ, having a cordate or reniform indusium. Genera, *Nephrodium* and *Paidydia*.

fāte, fāt, fare, amidst, whāt, fāl, father: **wē, wēt, hēre, camēl, hēr, thēre**: **pīne, pīt, sīre, sīr, marine**; **gō, pōz, or, wōre, wōlf, wōrk, whō, sōn**: **mūte, cūb, cūre, unīte, cūr, rūle, fūll**; **trȳ, Sȳrian**. **æ, œ = ē**; **ey = ā**; **qu = kw**.

nē phrō dī ūm, s. [Gr. νεφρός (nephrōs) = the kidney, and εἶδος (eidos) = form. Named from the shape of the involucre.]

Bot.: A genus of polypodiaceous ferns, tribe Polypodeae. The sori sub-globose, dorsal or terminal on the venules; the involucre reniform, superior, attached by the spones. Extensively spread over the globe. Known species 224, of which seven are British. These all belong to the sub-genus Lastrea, in which the veins are free. They are Nephrodium Filix-Mas, the Male Fern; N. cristatum, the Crested; N. rigidum, the Rigid; N. spinulosum, the Prickly Toothed; N. arvensis, the Dwarf; N. Thelypteris, the Marsh; and N. Oryopteris, the Heath-Shield Fern. The rhizomes of N. esculentum are eaten in Nepal. That of N. Filix-Mas is considered in India to be anthelmintic, and is given specially for tapeworm.

nē-phrōg-ra phŷ, s. [Gr. νεφρός (nephrōs) = a kidney, and γραφή (graphē) = to write, to describe.] Anat.: A description of or treatise on the kidneys.

nēph-rōid, a. [NEPHRODIUM.] Bot.: Kidney-shaped.

† nē-phrōid-ē-ōūs, a. [Eng., &c. nephroid; -ous.] Bot.: Nephroid (q.v.).

nēph-rō lith' ic, a. [Gr. νεφρός (nephrōs) = a kidney, and λίθος (lithos) = a stone.] Med.: Pertaining or relating to the stone, or calculi, in the bladder.

nē-phrōl-ō-gŷ, s. [Gr. νεφρός (nephrōs) = a kidney; and -λογία (-logia).] A treatise or discourse on the kidneys.

nē-phrōl' ŷ māte, s. [Gr. νεφρός (nephrōs) = a kidney; and ἄμα (ama) = filth (?), and suff. -ω (Chem.).] Chem.: This name is applied by Boechemp to soluble ferment existing in the urine of man, the dog, and the rabbit, and capable of converting starch into sugar. (Watts.)

nēph-rōps, s. [Gr. νεφρός (nephrōs) = a kidney, and ὄψ (ops) = an eye.] Zool.: Norway Lobster; it occurs also on the English and French coasts, and as far south as the Mediterranean. Body long, segments cylindrical, cephalothorax compressed at sides; the great claws are long, slender, spiny, and ridged in the centre; rostrum long and slender. The scale at the outer base of the antennæ is large, and the eyes are large and prominent. Colour paler than in the Common Lobster, with bands of darker colour on the body rings. Only one species known, Nephrops norvegicus. Some authors make it a separate genus of decapods long-tailed Crustaceans; others make it a sub-genus of Homarus (q.v.). (LOBSTER.)

nē-phrōs-ta, s. [Gr. νεφρός (nephrōs) = a kidney.] Bot.: The spore-case of lycopods.

nē-phrōt' ō-mŷ, s. [Gr. νεφρός (nephrōs) = a kidney, and τομή (tomē) = a cutting.] Surg.: The operation of extracting a stone from the kidney by cutting.

nēph-thŷ-a, s. [NEPHTHYS.] Zool.: A genus of Alexonidae. The derm is a leathery skin, bristling with spicules; it forms branching lobes ending in projecting tubercles, in which are the polypi. The only known species is from the Red Sea.

nēph-thŷs, s. [An Egyptian goddess, the wife of Typhon.] Zool.: Hairy-bait; a genus of Nereidæ (q.v.). A common species on the British coasts is Nephthys evela, the Lurg (q.v.).

nēp-i-dæ, s. pl. [Lat. nep(i)s; fem. adj. pl. suff. -ata.] Entom.: Water-scorpions; a family of Hydrocoræ (q.v.). Ocelli wanting, antennæ three- or four-jointed; body flat above, elliptical; hemelytra with a distinct membrane; rostrum three-jointed. The fore-legs raptorial, the rest simple, fringed, or flattened, used as swimming organs. All are aquatic and insectivorous. Chief genera, Nepa, Ranatra, Nautocoris, Belostoma, and Diplonychus.

nē plus ūl tra, phr. [Lat. = no further.] The furthest point in anything possible to be reached.

nē pō tal, a. [Lat. nepos (genit. nepotis) = (1) a grandson, (2) a nephew; Eng. adj. suff. -al.] Of or pertaining to a nephew or nephews.

nē pōt' ic, a. [Lat. nepos (genit. nepotis) = (1) a grandson, (2) a nephew; Eng. adj. suff. -ic.] Of or pertaining to nepotism; characterized by or pertaining to nepotism.

nē pō-tious, a. [Lat. nepos (genit. nepotis) = (1) a grandson, (2) a nephew.] Added to nepotism; nepotic.

nē pōt' ism, s. [Lat. nepos (genit. nepotis) = (1) a grandson, (2) a nephew; Eng. suff. -ism. In Ger. nepotismus; Fr. nepotisme; Ital. nepotismo, in special sense 1, see below.] 1. Fondness for nephews.

2. Promeness on the part of the popes and other high ecclesiastics of the Church of Rome to heap wealth upon their nephews, not having children of their own to inherit any property they may have acquired.

"To this honour of nepotism Rome owes its present splendour."—Addison: On Italy.

3. The vice common among public men holding patronage, of appointing their own relatives to situations of emolument in disregard of the claims of others better fitted for the offices; favouritism towards one's relations.

nē pō tist, s. [Lat. nepos (genit. nepotis) = (1) a grandson, (2) a nephew; Eng. suff. -ist.] One who practises nepotism.

nēp-tic' u-la, s. [Lat. = a little grand-daughter, from nep(i)s (q.v.).] Entom.: The typical genus of the family Nephelidae. Nephelica aurella is a golden-brown moth, a quarter of an inch in extension of wing. The larva makes galleries in bramble leaves. N. splendidissima is closely allied, but has a black head. N. microtheriella, the larva of which feeds on nut leaves, is the smallest known moth, being only an eighth of an inch across the extended wings.

nēp-ti-cū-li-dæ, s. pl. [Mod. Lat. nep-tion(a); Lat. fem. pl. adj. suff. -idæ.] Entom.: A family of Tricæna. The head is rough, the antennæ short and thick, the anterior wings rather broad and short, often with coarse scales, the posterior wings lanceolate. Larva with no true legs, but with nine prolegs. The smallest size moths known. Some are highly beautiful. Fifty-two are British.

nēp-tis, s. [Lat. = a granddaughter.] Entom.: A genus of Butterflies, sub-family Nymphalinae. It is closely akin to Limenitis. They are dark brown butterflies, with white markings. Found in India, Africa, &c. Two are European.

Nēp-tune, s. [Lat. Neptunus.] 1. Roman Myth.: The fabled god of the sea; the son of Saturn and Rhea, and the brother of Jupiter and Pluto. He is generally identified with the Greek Poseidon, and is variously represented; sometimes with a trident in his right hand, a dolphin in his left, and with one of his feet resting on part of a ship; at others in a chariot drawn by sea-horses, with a triton on each side. He was said to preside over horses and the manger.

2. Astron.: A planet, the most remote of any yet discovered. Irregularities having been remarked in the movements of the planet Uranus, not to be accounted for by the attraction of any known heavenly body, two astronomers, M. Leverrier in France, and Mr. Adams in England, correctly reasoning that the perturbations must proceed from a yet undiscovered planet, independently calculated the probable place in the sky which such a planet would occupy. On September 29, 1846, Leverrier's calculations were communicated to Dr. Galle of Berlin, who promptly looked on the heavens, and the very same evening discovered the planet afterwards named Neptune within a single degree of its calculated position. Adams's computations had been placed in the hands of the Astronomer Royal, Sir George

NEPTUNE.

3. Astron.: A planet, the most remote of any yet discovered. Irregularities having been remarked in the movements of the planet Uranus, not to be accounted for by the attraction of any known heavenly body, two astronomers, M. Leverrier in France, and Mr. Adams in England, correctly reasoning that the perturbations must proceed from a yet undiscovered planet, independently calculated the probable place in the sky which such a planet would occupy. On September 29, 1846, Leverrier's calculations were communicated to Dr. Galle of Berlin, who promptly looked on the heavens, and the very same evening discovered the planet afterwards named Neptune within a single degree of its calculated position. Adams's computations had been placed in the hands of the Astronomer Royal, Sir George

Ary, in October, 1846. Not, however, till July 29, 1846, did Prof. Challis, of Cambridge, at the Astronomer Royal's suggestion, commence a search of the heavens for the planet, but not having the same time star chart which Dr. Galle possessed at Berlin, he found the planet without recognising it as one on July 30, as Galle had done on May 10, 1796, and Dr. Lamont in 1816 and 1846. The diameter of Neptune is nearly 4,000 miles. Its density is only a fifth that of the earth, its mean distance from the sun 27,500,000,000 miles, and its year 117 times as long as one of ours. Mr. Lassell discovered that it has one satellite.

Neptune's drinking cup. Zool.: The genus Petrolion (q.v.).

Neptune's horse. Ichthy.: A popular name for the Hippocampus (q.v.).

Nēp-tūn i-an, a. & s. [L. Neptunus = pertaining to Neptune.]

A. As adjectives: 1. Of or pertaining to the god Neptune. 2. Pertaining to the ocean over which he was represented as ruling; also deposited from the sea.

B. As subst.: The same as NEPTUNIST (q.v.). Neptunian Theory or Hypothesis: A geological stria. He assumed that the globe had at first been invested by a universal chaotic ocean, holding in solution the materials of all rocks. From these the crystalline rocks were first precipitated, somewhat clearing the waters, after which the so-called transition rocks went down next. The secondary rocks then followed. All igneous agency was ignored in this scheme. The Neptunian hypothesis has been long since disproved. (AQUIFERUS ROCKS, GEOLOGY.)

† Nēp-tū nist, s. [Eng. Neptunus; -ist.] One who held the Neptunian theory (q.v.).

Nēp-tū-nī ūm, s. [NEPTUNE.] Chem.: The name given to what Rose considers a mixture of impure molybdenum and tantalum, discovered in tantalite by Hermann in 1857.

nē quid nīm-is, phr. [Lat.] Let nothing be done to excess.

ner, + nere, u. & adv. [NEAR.]

nēre (l), s. [NEIR.] A kidney. "The herb of sibepe, the nere that take." Liber Cure Medicorum, p. 92.

nēre (2), s. [See def.] An ear, the u of the article being dropped on to the noun. "Held the nere to me, and little."—Early Eng. Poetry, Fr. 88, v. 3.

nērc, v. l. [For ne vere.] Were not.

nēr ē id (pl. nēr-ē-ids, nēr ē-ids), s. [Lat. Neris (genit. Nereidis), from Gr. Νηρηΐς (Nēreis) = a sea-nymph, a daughter of Nereus an ancient sea-god, from νηρός (nēros) = wet; Fr. néréide.]

1. Class. Mythol.: Nymphs of the sea, daughters of Nereus and Doris. They are said by most ancient writers to have been fifty in number, but Propertius makes them a hundred. The most celebrated of them were Amphitrite, the wife of Neptune; Thetis, the mother of Achilles; Galatea, Dotō, &c. They were originally represented as beautiful nymphs; afterwards described as beings with green hair, and the lower part of their body fish-like.

2. Zool.: Any individual of the family Nereidæ, or the genus Nereis (q.v.). "Resembling . . . the jaws of the living Neræidæ."—Nehalium: Field-ent., p. 10.

† nēr ē idā, nēr ē id ē a, s. pl. [Lat., &c. nēre(-); neut. pl. adj. suff. -idā, or -idā.] Zool.: A synonym of the order Eriaria or Chatopoda.

nēr ē idā, s. pl. [Lat. nēre(-); fem. pl. adj. suff. -idā.] Zool.: Sea-centipedes; a family of Eriaria (q.v.). The body is greatly elongated, and consists of a number of similar segments with rudimentary branches. The head is distinct and carries eyes and feelers; the mouth has a proboscis, and sometimes two horny jaws.

The body is greatly elongated, and consists of a number of similar segments with rudimentary branches. The head is distinct and carries eyes and feelers; the mouth has a proboscis, and sometimes two horny jaws.

bōil, bōy; pōūt, jōwl; cat, çell, chorus, çhin, bench; go, çem; thin, çis; sin, aç; expect, çenophon, exist. -ing. -cian, -tian = şan. -tion, -sion = şhün. -çion, -çion = zhün. -cious, tious, sious = şhus. -ble, die, & - bel, del.

nĕr ĕ id ā vūs, s. [Lat. *nercis*, genit. *nercis*(us), and *ovus* = an ancestor.]

Palæont.: Grinnell's name for fossil jaws, resembling those of living neroids, from the Silurian, Devonian, and Carboniferous formations.

nĕr ĕ id' ĕ a, s. pl. [NEREIDA.]

nĕr ĕ is, s. [NEREIDA.]

Zool.: Sea-centipede; the typical genus of the family Nereidæ. The species are numerous and widely distributed. Many of them are what Van Beneden calls "free messmates." *Nereis hillebrandi* and *N. succinea* inhabit the tubes of a species of Teredo, and *N. costata* is found in the cavities of *Euspongia officinalis*, and was regarded by Fabricius as "the essential animal and sole fabricant of the sponge." *N. marginata*, the Pearly Neroid, is very common on the British coast.

nĕr ĕ i tĕs, s. [Gr. *Νηρεΐς* (*Nĕreis*); suff. *-της* (*-itēs*)]

Palæont.: A hypothetical genus erected for what were supposed to be fossil remains of an annelid from the Silurian rocks. As there is no resistant exoskeleton in the Annelida, these fossils are now believed to be tracks or trails.

nĕr ĕ ō cŷs tīs, s. [Gr. *Νηρεΐος* (*N. reus*) = a god of the sea, and *κυστίς* (*kustis*) = a bag, a sac.]

Bot.: A genus of Fucaceæ, family Lamnariæ. The stem, which is filiform, is many fathoms long. It is fixed below by root-like processes, whilst above it ends in a siphon about a fathom in length, full of fluid, with a bunch of leaf-like processes extending some feet from its centre. It makes floating islands on the north-east coast of America and the opposite shores of Asia, on which the sea otter finds a home.

nerfe, s. [NERVE, s.]

nĕr i nœ an, n. [Mod. Lat. *nerina*(o); Eng. suff. *-an*.] Abounding in a species of Nerinea.

nerinean-limestone, s.

Geol.: A limestone full of Nerineæ found in the Jura, and probably homotaxitic with the English Coral Rag, *i. e.*, Middle Obolite. (Lyell's *Students' Elem. of Geol.*, ed. 1885.)

nĕr i nĕ, s. [One of the Nereids (*Virg.*: *Ecl.* vii. 37).]

Bot.: A genus of Amaryllidaceæ, tribe Amaryllidæ. *Nerine sarniensis* is the Guernsey Lily. It is not indigenous there, but was, according to London, introduced through the shipwreck of a vessel from the Cape, which had bulbs of it on board, but Paxton says it was introduced in 1659 from Japan. It is cultivated in England, but requires the protection of a frame. It is a beautiful plant, with red flowers.

nĕr in' ĕ a, s. [NERINE.]

Palæont.: A genus of Cerithiada (q.v.). Shell turreted, many-whorled, and nearly cylindrical. The species are very numerous, and exclusively Jurassic and Cretaceous.

nĕr i' ta, s. [Lat., from Gr. *νηρεΐς*, *νηρεΐος* (*nerēis*, *nerēios*) = a kind of shell; *νηρός* (*neros*) = wet; Fr. *nerite*.]

1. **Zool.:** The typical genus of the family Neritidæ (q.v.). The shell has a horny epidermis, a thick outer lip, toothed within, and a broad and flat columella, the inner side straight and toothed. They are found in the littoral zone of all warm seas. One hundred and sixteen species have been described.

2. **Palæont.:** Commences in the Liás.

nĕr ite, s. [NERITA.]

Zool.: Any individual of the genus Nerita. "The true Nerites are inhabitants of warm seas." Nicholson *Palæont.*, ii. 25

nĕr it' i dæ, s. pl. [Lat. *nerita*(o); fem. pl. acc. suff. *-idæ*.]

1. **Zool.:** A family of Holostomatous prosobranchiate gastropods. Shell thick, globular, with very small pore; aperture semi-lunate; operculum shelly, sub-apical, articulated to the shell by a hinge-like process. Chief recent genera, Nerita, Neritina, and Navicella.

2. **Palæont.:** From the Jurassic period onward, attaining its maximum in the present day.

nĕr i ti nā, s. [Dim. of Lat. *nercis* (q.v.)]

1. **Zool.:** Freshwater Nerita; the living species, a hundred in number, have small globular shells, ornamented with black or purple bands and spots, and covered with a polished horny epidermis. *Neritium fluviatilis* is found in British rivers, and in the blackish waters of the Baltic, *N. coronata*, the Crowned Nerite, from Madagascar, has a series of long tubercular spines. "*N. solitaria* is found on the foliage of tall trees, many hundreds of yards from the river's bank in the Celebes." (Adams: *In Cassell's Nat. Hist.*, v. 218.)

2. **Palæont.:** Twenty fossil species, commencing in the Eocene Tertiary.

nĕr i tite, s. [Lat. *nerita*(o), Eng. suff. *-ite* (*Palæont.*)] A fossil shell of the genus Nerita.

nĕr i tōp si dæ, s. pl. [Mod. Lat. *neritopsis*(is); Lat. tem. pl. adj. suff. *-idæ*.]

Zool.: A family of gastropodous molluscs, section Holostomata, recognised by Tate. He placed under it the genera Nerica, ranked by S. P. Woodward with the Naticidæ, and Neritopsis, regarded by Woodward as a sub-genus of Nerita.

nĕr i tōp sis, s. [Mod. Lat. *nerita*(o), and Gr. *ὄψις* (*opsis*) = aspect, appearance.]

Zool.: According to Tate, the typical genus of the family Neritopsidæ (q.v.).

nĕr i ūm, s. [Lat. *nerium*; Gr. *νηρόν* (*nerion*) = the oleander, from Gr. *νηρός* (*neros*) = wet, humid.]

Bot.: A genus of Apocynaceæ, tribe Wrightiæ. Corolla, hypocrateriform, with lacinated, multifid processes around its mouth; ovaries, two; style, filiform, dilated at the apex; stigma, obtuse. The species are poisonous. *Nerium oleander* is the Common, and *N. abrotanum* the Sweet-scented Oleander. [OLEANDER.]

nĕr ō li, s. [Said to be named after an Italian princess, to whom the discovery of the perfume is attributed.] (See compound.)

neroli-camphor, s.

Chem.: The camphor of orange-flowers, obtained by adding alcohol of 90 per cent. to neroli-oil. It is insoluble in water and absolute alcohol, soluble in ether, melting at 50°.

neroli-oil, s.

Chem.: Oil of orange-flowers. A volatile oil obtained by distilling orange-flowers with water. It is colourless when fresh, but changes to red on exposure to light. Nitric acid colours it dark brown.

nĕr ō ph is, s. [Gr. *νηρός* (*neros*) = a swimmer, and *ὄψις* (*opsis*) = a serpent.]

Ichthy.: A genus of Syngnathidæ (q.v.). Body smooth, rounded, few of the ridges distinct, no pectoral fin, caudal absent or rudimentary, tail tapering. The ova are attached to the soft integument of the abdomen of the male. Known species seven, from the European seas and the Atlantic. *Nerophis nephorus*, the Ocean, *N. ophidium*, the Straight-nosed, and *N. lambriciformis*, the Little Pipe-fish, are common on the British coasts.

nĕr ō schiñsk ite, s. [From Neritshinsk, Transbaikal, Asiatic Russia, where found; suff. *-ite* (*Min.*)]

Min.: A bluish-white clay, probably the same as LEZINITE or SEVERITE (q.v.)

nĕr vāte, n. [Mod. Lat. *neratus*.]

Bot.: Having nerves; nerved (q.v.).

nĕr vā tion, s. [Eng. *nerve*(s); *-ation*.]

1. **Oral. Lang.:** The arrangement or distribution of the nerves.

2. **Bot.:** The arrangement of nerves in a leaf or other structure.

"The most striking part of the whole habitation, that of the *nerotation* of the leaf."—*Dicks of Argyll. Reign of Love*, ch. iv., p. 195.

nĕr vā ture, s. [NERVE.]

Bot.: The same as NERVATION (q.v.).

"This tracery . . . is drawn in imitation of the *nervature* of a leaf."—*Dicks of Argyll. Reign of Love*, ch. iv., p. 195.

nerve, nerve, s. [Fr. *nerf* = a sinew, might; from Lat. *nervus*, accus. of *nervus* = (1) a sinew, a tendon, (2) in the modern sense (this was introduced by Galen); Gr. *νηρόν* (*nerion*) = a sinew, a string; Sp. *nerbio*; Ital. & Port. *nervo*.]

- 1. **Ordinary Language:**
- 1. **Lat.:** In the same sense as II. 1.
 - "That thirled had both horn, *nerve*, and thim!"
 - Chaucer: *Troilus & Criseida*, II. 612.
- 2. **Figuratively:**
- (1) A sinew, a tendon.
- (2) Strength, power, might, muscular power.

"He led me on to mightier deeds,
Above the *nerve* of mortal man."
Milton: *Samson Agonistes*, 5, 529

"(3) Force, vigour, spirit, energy.

"It cuts the *nerves* of all endeavour, by rating glory at a bare desire."—*South. Sermons*, vol. 11., sec. 1

(4) Self-command; steadiness or fortitude displayed under dangerous or critical circumstances.

"A stock of good intentions is a very poor set-off for a want of *nerve*."—*Pall Mall Gazette*, Nov. 25, 1904.

(5) **(Pl.)** The general tone of one's system; constitutional vigour; as, My *nerves* are quite shattered.

II. **Technically:**

1. **Anatomy:**

(1) **Human:** A structure composed in some cases, as in the greater portion of the brain, of white fibres, in lesser proportion gray fibre, nerve-cell, and granules. Each fibre is from 1/1000 to 1/10000 of an inch in diameter. The fibrilli are connected and held together by a delicate

ORIGINS AND TERMINATIONS OF NERVOUS FIBRES.

a, *a*, Vesicular substance of the spinal cord; *b, b, b*, vascular substance of the brain; *c*, vesicular substance at the commencement of afferent nerve, which consists of the cerebral division, or sensory nerve passing on to the brain, and *s*, the spinal division, or efferent nerve, which terminates in the vesicular substance of the spinal cord; on the other side, we have the efferent or motor nerve proceeding to the muscle *d*, likewise consisting of two divisions—*c*, the cerebral portion, proceeding from the brain, and conveying the influence of the will or of an instinct; and *s*, the spinal division, conveying the reflex power of the spinal cord. (*Carpenter*.)

areolar web. They are also connected with ganglia, which are of a pearly-gray tint, and which form the sympathetic system. The capillary vessels of nerves are very minute, and by their transverse communications form an oblong mesh similar to that of the muscular system.

(2) **Compar.:** In the lowest divisions of the animal kingdom no distinct nerve-system has been traced, but in Radiata, Star-fish, *e. g.*, we find nerves arranged in a circle round the mouth, communicating with the ganglia, one of which is found at the base of each ray. The simplest form, however, is found in the Mollusca. Coming to insects, we find they possess nerve-structure producing sensory, reflex, and motor action, and as we rise in the scale, the resemblance to that of man increases. [BRAIN.] There is a strong analogy between nervous action and electricity (q.v.).

2. **Arch.:** The same as NERVE, 1.

3. **Bot. (Pl.):** (1) The strong veins upon leaves or flowers. (2) The ribs or principal veins of a leaf. A term used when other veins similar to the midrib pass from the base to the apex of a leaf.

4. **Physiol.:** The principal functions of nerves are those of sensation and volition, motor and reflex action. The sensory and reflex actions are produced by the afferent or centripetal nerves, the motor by the efferent or centrifugal.

nerve-cell, s.

Anat. (Pl.): One of the two structural elements entering into the composition of nervous substance (q.v.). They are spheroidal, oval, pyriform, angular, or irregular, and sometimes send out finely-branched processes

fate, fat, fare, amidst, what, fall, father; wē, wēt, hère, camē, hēr, there; pine, pīt, sire, sir, marine; gō, pōt, or, wore, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīto, cūr, rūlc, fūll; trŷ, Sŷrian. æ, œ = ē; cy = ā; qu = kw.

from their circumference. They contain a round nucleus, and within it a nucleolus. They exist in the gray matter of the cerebral spinal centre and ganglions, &c., and are often named ganglion corpuscles, ganglion cells, or ganglion globules.

nerve corpuscle, s.

Anal. (Pl.): The same as NERVE-CELL (q.v.).

nerve eminence, s.

Anal.: The name given by Kulme to the sacrocolonna over the seat of the end-plate and the plate itself.

nerve ending, s.

Anal.: The expansion in which most voluntary muscles end; a motorial end-plate.

nerve fibre,

Anal. (Pl.): Bundles of fibres of nervous substance in voluntary muscles ultimately ramifying so as to act as muscular fibre.

nerve gland, s.

Anal. (Pl.): Remak's name for the Supra-renal Bodies (q.v.).

nerve instruments, .s. pl. Dentists' instruments for obliterating or extracting the nerve in a tooth.

nerve needle, s.

1. *Med.:* A tool used for broaching out the nerve-canal.

2. *Surg.:* The same as ESTHESIO-METER (q.v.).

nerve-tubes, s. pl. The same as NERVE-FIBRE (q.v.).

nerve, v.t. [NERVE, s.] To give nerve, firmness, or steadiness to; to strengthen the nerves of; to arm with force.

"It nerves up heart, it steels my sword"
Scott: Lady of the Lake, v. 13.

nerved, a. [ENG. NERVE(-); -ed.]

1. *Ord. Lang.:* In comp. having nerves of a certain character, as, strong-nerved, weak-nerved.

2. *Bot.:* Having so-called nerves. Often in comp.; as, three-nerved, five-nerved, &c.

nerve-less, a. [ENG. NERVE; -less.]

1. *Ord. Lang.:* Destitute of nerves or strength; weak. (*Lit. & Fig.*)

"There sank Thalia, nerveless, faint and dead"
Pope, Dunciad, iv. 41.

2. *Bot. (Of leaves, &c.):* Destitute of nerves.

***nerve'-shāk-en, a.** [ENG. NERVE, and shaken (q.v.).] Having the nerves shaken, weakened, or enfeebled.

ner'-vi-, pref. [NERVE.]

nervi-motion, s.

1. *Bot.:* The power of motion in leaves, as in the Sensitive Plant.

2. *Physiol.:* A term introduced by Dutrochet to designate the motion excited in the nerves by external agents and subsequently transmitted by the nerves to the muscles.

nervi motor, s. An agent capable of causing nervi-motion (q.v.).

nerv-ine, a. & s. [Low Lat. *nervinus*, from Lat. *nervus* = a sinew.]

A. As adj.: Capable of exciting or quieting nervous excitement, or of otherwise acting upon the nerves.

B. As subst.: A medicine or preparation for acting on the nerves.

nervine tonics, s. pl.

Pharmac.: Medicines which restore the tone of the nervous system. They are divided into two classes, those which are simply nervine tonics and those which are also antiperiodics. Of the former are the salts of iron, nitrate of silver, oxide of silver, mix vomica, strychnia, &c.; of the latter, cinchona bark, the salts of quinine, &c.

nerv-öse, a. [Lat. *nervosus* = full of sinew; *nervus* = a sinew.]

Bot.: The same as NERVED (q.v.).

ner'-vös'-it-ý, s. [Lat. *nervositas*, from *nervosus*.]

1. *Ord. Lang.:* The state of being nervous; nervousness.

2. *Bot.:* The state of being nervous or nerved.

nerv ous, a. [Fr. *nerveux*, from Lat. *nervus* = full of nerve; *ous* = a sinew, nerve.]

Sp. nervoso, nervosa, Ital. & Port. nervoso.]

I. Ordinary Language:

1. Full of nerves.

"The piercing his hands and feet, part very nervous, and exquisitely sensible." *Burton, Sicilians, l. 20.*

2. Pertaining to or situated in the nerves, as, a nervous disease.

3. Consisting of or composed of nerves, as, the nervous system.

4. Having strong nerves; strong; muscular, sinewy, vigorous.

"Spur clad his nervous feet, and trim his toed." *Wordsworth: Tintern Abbey*

5. Having the nerves affected or shaken; having weak or enfeebled nerves; timid, easily agitated or excited.

"Shout— I never seems to have been a nervous and timid full man." *Macaulay: Hist. Eng., ch. xv.*

6. Characterized by or exhibiting vigour of mind; characterized by force, vigour, or strength in sentiment or style; as, the book is written in nervous language.

7. Strung with a sinew or gut.

"From nervous cross-bow whistling arrows fly." *Boyer: Lucret., ll. 696.*

II. Bot.: The same as NERVED (q.v.).

nervous centre, s.

Anal. (Pl.): The brain, and the spinal cord.

nervous current, s. [NEURITE.]

nervous fluid, s. [NEURICITY.]

nervous substance, s.

Anal. &c.: The substance of which nerves are composed. It consists of two structural elements, nerve-fibres and nerve-cells (q.v.).

nervous system, s.

Anal. & Physiol.: The whole machinery of the nerves taken collectively. It consists of a series of connected central organs, called the cerebro-spinal axis and the cerebro-spinal centre, and of the nerves which extend from it through the body.

nervous temperament, s.

Physiol.: A fifth temperament superadded by Dr. Gregory to the four recognised by the ancients. [TEMPERAMENT.] Pichard repeated it as having no external characteristics of hair, colour of eyes, &c., like the rest. It is a modification which may affect any temperament, rather than a new one distinct from the rest. It is characterized by extreme mobility of the nervous system, and is the organization of genius and refinement. Poets, painters, musicians, literary men, orators, all more or less possess it, and, if it has been born with them, their method of life tends to develop it in a marked degree. One possessing it has, as a rule, the intellect of man with the sensitiveness of woman.

ner'-v'ous lý, adv. [ENG. NERVOUS; -ly.]

1. In a nervous, strong, vigorous, or forcible manner; with force, vigour, or strength of language, sentiment, or style; forcibly.

"[H.] [Marston] thus *nerviously* cries the strength of custom." *Burton: Hist. Eng., Pt. 2, vol. 1, p. 37.*

2. In a nervous, timid, or agitated manner.

3. *Bot.:* With respect to the nerves.

nervously-furrowed, nervously-streaked, a.

Bot.: Having nerves like furrows or streaks.

ner'-v'ous n'ess, s. [ENG. NERVOUS; -ness.]

1. The quality or state of being nervous, or composed of nerves.

"If there had been epithets joined with the other substantives, it would have weakened the *nervousness* of the sentence." *Warton: Essay on Pope.*

2. The quality or state of being nervous or timid; weakness or agitation of the nerves of the nervous system; timidity.

ner'-v-ure, s. [Fr.]

1. *Arch.:* One of the ribs of a vaulted roof which bound the sides of any groined compartment.

2. *Bot.:* The ramification of the veins of a leaf.

3. *Entom. (Pl.):* The ribs which support the membranous wings of insects.

"Each *nerve* consists of a central trachea or air tube, running in the centre of a larger blood-tube, so that the wings not only act as organs of flight, but at the same time assist in the process of respiration." *Nesbitt: Zoology 1876, p. 318.*

ner vy, s. [Eng. *nerve*(-); -y.] Strong descent, a sinewy.

"Death, that dark spirit, in his *nerve* Arnold took for Spak up." *Love's Labour's Lost*

nc s'w á, s. [From Neseon, a sea nymph.]

Bot.: A genus of Liliaceæ, tribe Lathraea-Carex, with cultivated the heritage of Asclepiadaceous, and said to have their young killed.

nc scl çnc'e (scl = shi), .s. pl. [Fr. *nerveux*, from *nerve*, a pretence, and -*çne*, and to -know, to be ignorant, to not, and -*çne*, to know.] AGNESTICISM (q.v.).

"Religion is died down by its breast, with suspicious rapidly into ignorance and death." *Telegraph, N. West. Feb. 1, 1872.*

ncs cock, .s. [NEST-COCK.]

n'esh, ncssh, n'esch, ncsshc, .s. [A. S. *neash*, with Goth. *Neash* = soft, delicate.]

1. Soft, tender, gentle.

"He was *neash* and the to hard." *Chaucer: C. T. x.*

2. Soft through moisture or wet.

"No step of him, was seen in the *neash* to the moon." *Delany: Cungle, ch. 41 xv.*

3. Delicate, weak, poor-spirited.

Obsolete, except as a provincialism in the Midland counties. (See *Notes & Queries*, 2nd ser., VII. 46, 117.)

n'esh, n'eshc, n'esch, .s. pl. [NESH, a.] To soften; to make soft or delicate.

"*Nesh* not your wound by drinking honey-suckle." *Shakspeare: The Winter's Tale, II. 438.*

n'e s'i-ar chus, s. [Gr. *νησάρχος* (*nēsarchos*) = the ruler of an island.]

Ichthyol.: A genus of Trichuridae (q.v.), with a single species, *Nesarchus musatus*, a rare deep-sea fish, from three to four feet in length, from the coast of Malena. Several strong fangs in jaws; no detached finlets, ventrals small, thoracic, caudal fin present, and dagger-shaped spine behind vent.

n'ēs ó d'ōn, s. [Gr. *νησός* (*nēsos*) = an island, and *δών* (*dōnos*), gent. *δωνός* (*dōnōtos*) = a tooth.]

Palæont.: A fossil genus of doubtful affinity, founded on skulls more or less perfect discovered by Darwin during the *Beagle* expedition on the banks of the Sarobris, a tributary of Rio Negro. Owen makes it, with *Toxodon*, constitute an order, *Toxodontia* (q.v.). Blumenhofer wished to give it ordinal distinction; Murray makes it a family of Multungulae. According to Owen there are four species. In size, *Nesodon viduatus* seems to have resembled a lamb, *N. salteri* a zebu, *N. oregonus* a sheep, and *N. venustus* a micaceous. Dental formula, $c \frac{1}{1}, i \frac{4}{2}, m \frac{1}{2}, p \frac{1}{2}.$

† n'e s'ō d'ōn ti d'ā, s. pl. [Mod. Lat. *nēsodon*, gent. *nēsodont*(us); Lat. fem. pl. adj. suff. *-ā*.] [NESODON.]

nc s'ō k'í a, s. A word of nocturny (*Agnos*.)

Zool.: A murine genus closely allied to *Mus*. It contains five or six species of eburny field rats spread over Southern Asia, from Palestine to Formosa, and from Cutchmere to Cayen. *Nesokia hinduodica* is the Great Bandicoot of Pigeat, often exceeding a foot in length. *N. bengalensis* is the common Field-rat of India.

n'ēs ó m'ýs, s. [Gr. *νησός* (*nēsos*) = an island, and *μύς* (*mūs*) = a mouse.]

Zool.: A genus of Sigmoidont Murine fr. Madagascar. It contains two species, with long hair more or less Rufous in color, about the size of a common Rat.

n'ess, s. [A. S. *nes, nes, nesso* = (1) the ground (2) a promontory; cogn. with Icel. *nes*; Dan. *nes*; Sw. *nes*.] [NAZE.] A promontory, a headland, a cape.

"He wicheon ankert and here cleere of the *nes*." *Beowulf: l. 1706.*

Ness is now only found as an element in English place-names, as, *Dotness*, *Shere-Dungness*, &c.

-n'ess, -ess, .s. [A. S. *nes, nese, nis, nys*.] A common English suffix appended to adjectives and past participles of Teutonic or Romanic origin, to form abstract nouns, denoting the prominent characteristic or distinctive quality or state; hence, *necessity*; false, *whiteness*, *whiteness*.

N'ess' l'ér, .s. [The name of the inventor of (See compound.)]

ból, bóy; p'ont, j'owl; cat, çell, chorus, çhin, bench; go, g'em; thin, this; sin, aš; expect, Xonophon, çxíst, ph' f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tions, -sious = shus. -b'e, -dic, &c. = bel, del.

Nessler's test, s.

Chem.—A very delicate test for ammonia, consisting of iodine of mercury dissolved in iodine of potassium, and made alkaline with solution of soda. It gives a brown precipitate or colour according to the quantity of ammonia present, and is capable of detecting one part of that substance in ten million parts of water.

nest, 'nest, s. [A.S. *nest*; cogn. with Dut. *nest*; Sw. *nest*; Ger. *nest*; Gael. & Ir. *nest*; Bret. *nez*; Lat. *nidus* (for *nidulus*); Lith. *vidas* (for *vidas*); Sansc. *nida*. According to Skeat, from a root *nis* = to go, to visit; and hence, a place to go to, a home.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II. 3.

2. Figuratively:

(1) A place of residence; a snug abode or situation. (*Spenser: F. Q., IV. v. 32.*)

(2) A home, an abode.

"Come from that nest of death."
Shaksp.: Romeo & Juliet, v. 3.

(3) A place of resort, a haunt; a number of persons living together or frequenting the same haunt; a pack. (Generally in a bad sense.)

"A nest of traitors."
Shaksp.: Winter's Tale, ii. 1.

(4) A set of articles of diminishing size, each enveloping the one next smaller in size; as, a nest of crucibles, tubs, or the like.

(5) A set of small drawers.

II. Technically:

1. *Georging, &c.*: A connected series of cog-wheels or pulleys.

2. *Geol.*: An isolated mass of any one or other mineral within a rock. (*Darwin.*)

3. Natural History:

(1) Properly, the place chosen or constructed by a bird for incubation and rearing its young. These are extremely diversified in situation and character. Some ducks lay their eggs on the bare rock, the stone-curlew and the goat-sucker on the ground; the apteryx chooses the roof of a tree-fern; the peculiar nidification of the ostrich was noticed by the author of the Book of Job (xxxix. 13, 14); the shelduck and martin line their habitations with down; the kingfisher makes a couch of un-digested fish-bones ejected from the stomach in its tunnel; the woodpecker selects a hole in a tree; the megapodes, and in a less degree, the grebes and rails, utilize the heat of decaying vegetable matter; the edible nests of *Collaredia esculenta* are the product of salivary secretion; the tailor-bird spins a thread and stitches its habitation together; golden-wrens and orioles have hammock-like constructions; the grosbeaks and humming-birds build a chamber depending from a single thread; the flamingo raises a high mound to receive the eggs, and the hens sit in the usual way; the hornbills are incarcerated during incubation, the males bringing them food; and the sociable grosbeaks form colonies so large that the weight of the nests has been known to break down the limbs of trees. (The subject has an extremely limited literature, but an excellent paper will be found in Wallace's *Contributions to the Theory of Natural Selection.*)

(2) Any place chosen or constructed by other animals for similar purposes. It is usual to speak of a wasp's nest, an ant's nest. Many species of the Muridæ construct nests closely resembling those of birds, as do some fishes.

"The nest of this stickleback . . . has been compared to the nest of a wren."
Prof. Seeley, in Gulliver's Voy. Hist. v. 193.

¶ **Cluck-nest:** (See extract).

"The male wren (probably of North America) builds cluck-nests to roost in, like the males of our lark-wrens—a habit wholly unlike that of any other known bird."
Baird: Origin of Species (ed. 1853), p. 234.

nest-builder, s. Any animal constructing a habitation resembling the nest of a bird.
"Among the catfishes are many nest-builders."
Harpur's New Southby, Dec. 1853, p. 197.

nēst, v. & t. [NEST, s.]

A. Intransitive:

1. To build a nest; to nestle.

"The cedar stretched his branches as far as the mountains of the moon, and the king of birds nēstid within his leaves."
Boon: Vocal Forest.

2. To relieve nature.

"To nest upon the stairs."
Modern Account of Nothurd. (1676).

B. Transitive:

"*Puffinus nestor*, the specific name having reference to the hoary head of the bird. Feathers olive-brown, with darker tips, which give the body the appearance of being covered with scales; crown light-gray; ear coverts and nape purplish-bronze; rump and abdomen crimson, often varying to orange or bright yellow. Many supposed species have been described, but Dr. Biller (*Birds of New Zealand*) admits but one—*Nestor meridionalis*, with several varieties, one of which, the kea (sometimes known as *N. notabilis*) feeds on raw flesh. *N. procerus*, the Nestor of Philip Island, is extinct. [NESTORIDÆ.]

Nēs-tōr-i-an, a. & s. [See def.]

A. As adj.: Pertaining or relating to Nestorius or his followers. [NESTORIANISM.]

B. As subst.: A follower of Nestorius; a supporter of the views or opinions of Nestorius.

Nēs-tōr-i-an-ism, s. [Eng. Nestorian; -ism.]

Church Hist.: The doctrine taught by Nes-

torius, Bishop of Constantinople, and one of the school of Theodora of Mopsuestia, that there were two persons as well as two natures in Jesus Christ, and that the Virgin Mary was in no sense Theotokos, or Mother of God, as she was the mother of the man Jesus and not of the Word. This doctrine was condemned by the Council of Ephesus, convened by Pope Celestine I., in A.D. 431. Nestorius was deposed, and the use of the Nicene Creed made obligatory. Nestorianism made rapid strides in the east, and Cardinal Newman (*Arians*, p. 425) says that in the eleventh century "its numbers, with those of the Monophysites, are said to have surpassed those of the Greek and Latin Churches together." Since 1553 a portion of the Nestorians have been in communion with Rome, and are known as Chaldeans. Blunt was of opinion that Nestorius did not hold the doctrine of a dual nature, but that his chief offence in the eyes of the orthodox was opposition to the growing devotion to the Virgin Mary.

nēs-tōr-i-dæ, s. pl. [Lat. nestor; fem. pl. adj. suff. -idæ.]

(*Ornith.*) (See extract).

"Like so many other New Zealand forms, Nestor seems to be isolated, and may truly be deemed to represent a separate family."
Nes-storidæ—a view which is fully justified by a cursory examination of its osteology.—*Prof. A. Newton in Emag. Brit. (ed. 9th), xvii. 255.*

Zool.: The ventral or inferior division of the foot tubercle of an ammelid; often called the ventral ear. (*Nicholson*.)

neu rōp tēr, s. [NEUROPTERA.] An individual of the order Neuroptera (q.v.).

neu rōp tēr a, s. pl. [Pref. *neu-*, and Gr. *πτερον* (*pteron*) = a wing.]

1. *Entom.*: An order of the class Insecta, in which the older entomologists included all insects possessing four membranous wings, more or less elaborately veined, but without the peculiar arrangement of cells which occurs in the Hymenoptera. This arrangement included insects with a complete and others with an incomplete metamorphosis. The latter are now more generally called Pseudoneuroptera, and made a sub-order of Orthoptera. The order Neuroptera of modern authors includes insects with a perfect metamorphosis, a mandibulate mouth, a free prothorax, and four more or less veined membranous wings, and has two sub-orders, *Planipennia* and *Trichoptera*. The insect figured is *Myrmeleon formicarius*, belonging to the sub-order *Planipennia*, and the group *Megaloptera*.

2. *Fabrot.*: (See extract.)

*"The Paleozoic types which have been described as Neuroptera seem all to be either Pseudoneuroptera, or most nearly allied to that tribe. In the Trias, forms which appear to be related to the existent North American genus *Planiboles* have been met with, and in the Lias and Oolite a few species of different families occur. In Tertiary deposits they are more plentiful. — W. S. Dallas, in Cassell's Nat. Hist., VI, 10.*

neu rōp tēr al, a. [Eng. *neuropter*; -al.] Pertaining or belonging to the Neuroptera (q.v.).

neu rōp tēr an, s. [Eng. *neuropter*; -an.] The same as NEUROPTER (q.v.).

neu rōp tēr is, s. [Pref. *neu-*, and Gr. *πτερίς* (*ptēris*) = a fern.]

Fulcrbot.: A genus of fossil ferns ranging

from the Devonian to the Triassic period, universally abundant in the Coal Measures. The midrib of the leaflets is evanescent, either not distinct, or disappearing towards the apex.

2. Gram.: A noun of the neuter gender.

"Even in Greek and Latin there is no outward distinction between the nominative and accusative of neuter."—Max Müller: *Science of Language*, § iii.

3. Entom.: A sterile female, a worker. Neuters are found in social insect-communities, such as those of bees and ants. They have no sex, and, consequently, no reproductive power. According to Huber and Latreille the non-development of sexual organs is due to the kind of nourishment to which such insects have been limited in the larval state. Darwin (*Origin of Species*, ch. viii.) considers the different castes of neuters to have arisen from natural selection among males and fertile females, and considers that the existence of these sterile forms furnishes an argument against Lamarck's doctrine of inherited habit.

"The annual or periodical massacre of the neuters by wasps."—Lindsay: *Mind at the Loiter*, A. 10, p. 131.

neũ-tral, 'neu trall, 'new-trall, a. & s. [Lat. neutrals, from neuter = neither; Fr. Sp., & Port. neutral; Ital. neutrals.]

news-pā pĕr, *s.*, [Eng. *news*, and *paper*.] A sheet of paper printed and distributed at short intervals for conveying intelligence of passing events; a public print which circulates news, advertisements, reports of the proceedings of legislative bodies and other meetings, public announcements, and the like.

The newspaper, like many other useful inventions, seems to have originated in China. The *Pekin Gazette*, the oldest daily in the world, was first issued about A.D. 1350. This is still in existence, and is an official journal, forming a pamphlet of 20 to 40 pages of coarse paper, printed from wooden types on one side only, and having a paper cover. Towards the close of the first half of the seventeenth century various journals made their appearance in England. The earliest of these was the *Veritable News of the Present Week*. The first printed newspaper, properly so called, and duly numbered like those of the present day, was the *Weekly News*, which appeared in 1622. The first London daily was the *Courant* published by Samuel Buckley in 1701. The first established newspaper in England, outside of London, is believed to have been the *Newspich Postman*, 1706. The first actually published in Scotland was at Edinburgh in 1754. The *Indian News Letter*, the earliest Irish paper, was established in 1684. [ABORIGINALS, III. 2; PAPER-DUTY, STAMP, &c.]

"Nature and Nature's laws lay hid in night; God said let Newton be, and all was light."—*Pope's Epitaph on Newton*.

"Newton's theory of the composition of light."

Optics: The theory that light is not homogeneous, but is produced by the blending of seven simple or primitive lights of unequal refrangibility.

Newton's disc, *s.*

Optics: A capillary disc, about a foot in diameter, its centre and edges covered with black paper, like spokes of a wheel; arranged around the centre are strips of paper of such dimensions and tints as to constitute five spectra. When the disc is rapidly rotated, the prismatic colours all blend together, the resultant being white, or grayish-white.

Newton's rings, *s. pl.*

Optics: Rings of colour concentrically arranged, when a very thin lamina of anything transparent is subjected to the action of light. The iridescence of a soap-bubble is a familiar instance. Newton produced rings by enclosing a lamina of atmospheric air between two glasses, one plane the other convex. With homogeneous light, as, for instance, red, the rings are successively black and red; with white light they present the colours of the spectrum.

nich-ar, s. [NICKAR.]

niche, nicc, s. [Fr. *niche*, from Ital. *nicchia* = a niche, *nicchio* = a shell, a nook, a corner, from Lat. *niculum, nitylum*, accus. of *niculus, nitylus*, = a sea-mussel; Gr. *μυτῶλος* (*mutolos*) = a mussel.]

1. *Lit. & Arch.*: A cavity or hollow place in the thickness of a wall, in which to place a figure, a statue, a vase, or an ornament. Niches are made to partake of all the segments under a semicircle. They are sometimes at an equal distance from the front, and parallel or square on the back with the front line, in which case they are called square recesses or square niches. Occasionally small pediments were formed over them, supported on consoles, or small columns or pilasters placed at the sides of the niches. Anciently they were used in ecclesiastical buildings for statues and shallow square recesses. Semicircular niches for the reception of statues were of frequent occurrence in the walls; and there was generally a large niche, with a vault above it, facing the entrance of the temple, and forming the termination of the building, which contained the image of a god. In the Early English architecture niches became more deeply recessed. In the Decorated style greater variation was introduced; in plan, they consisted of a half-octagon or half-hexagon, the heads were formed into groined vaults, with ribs, bosses, pendants, and canopies elaborately carved and ornamented. They were projected on corbels and ornamented with pillars, buttresses, and mouldings of various kinds.

"Gothic monks owed their chief grandeur to rich canopies, fretwork, and abundance of small *niches* and trifling figures."
Walpole, Anecdotes of Painting, vol. IV., ch. v.

2. To *nick a horse's tail*: To make an incision at its root to make him carry it higher.

* **nick cared**, a. Crop-cared.

* **nick** (2), *v.* l. [A contract. of *nicknam* (q.v.).] To nickname.

"Warbeck, as you *nick* him, came to me."
Frear, Perkin Warbeck.

nick-ar, s. [NICKER, (2).]

nicked, a. [Eng. *nick*; -ed.] Having nicks or notches cut in it; notched.

nick-er, s. [Ger. = worthless.]

1. *Chem.*: Symbol, Ni; atomic weight, 58.7.

A tetrad-metallic element, discovered by a count-stoff in 1751, in combination with arsenic, in the copper-coloured mineral arsenic of nickel;

called by the miners kupfernickel. Its preparation is effected in various ways, the most method involving first the separation of the arsenic, copper, &c., with by the sulphide, and that of cobalt by chloride of lime or nitrate of potash. The solution of pure nickel is precipitated by potash, and the dry oxide mixed with oil or charcoal and exposed in a crucible to the heat of a blast furnace, whereby the metal is obtained as a fused mass. Nickel is silvery-white, malleable and ductile, and as intrinsically soft. Specific gravity, 8.58 to 8.69. It is magnetic at ordinary temperatures, and dissolves in dilute sulphuric, nitric, and hydrochloric acids. Nickel forms several alloys, the most important being known as German silver. It forms two oxides: Nickel protoxide, NiO, formed by exposing nitrate of nickel to continued ignition; it is a grayish-green non-magnetic powder, which does not absorb oxygen from the air; Nickel sesquioxide, Ni₂O₃, formed by exposing nitrate of nickel to a moderate heat; it is a black powder, which dissolves in acids with evolution of oxygen and formation of nickel salts. These are mostly iron-ore-green in the hydrated state, turning yellow when heated.

2. In the United States a popular name for small coins, partly consisting of nickel, value one, two, and five cents.

nickel plating, s.

Chem.: The art of coating copper, brass, or other metal with nickel. To a dilute solution of pure zinc chloride a solution of nickel sulphate is added, until the liquid is distinctly green, and the whole raised to the boiling-point. The article to be plated, after being thoroughly cleaned, is placed in the liquid, and the boiling continued for thirty minutes, when the nickel will be found deposited in a brilliant white layer. After being washed and dried it takes a fine yellowish-toned polish. A moderate battery power and nickel anodes are sometimes employed. Nickel electrotypes stand wear and tear much better than the ordinary copper ones.

nickel sulphate, s.

Chem.: NiSO₄ + 7H₂O. One of the most important salts of nickel, formed by dissolving the carbonate in sulphuric acid. It forms green, prismatic crystals, which require three parts of water for solution. Used for nickel electroplating.

nic kcl ic, a. [Eng. *nickel*; -ic.] Pertaining to nickel; containing nickel.

nic kcl if-er-ous, a. [Eng. *nickel*; Lat. *fero* = to produce, and Eng. adj. suff. -ous.] Containing nickel.

"The nickel in the bronze from Western Switzerland is considered to have been derived from the *nickeliferous* copper ores of the Malais. *Dankwa*: *Early Man in Britain*, ch. 81.

nickeliferous gray antimony, s. [ULLMANNITE.]

nic kel inc, s. [Eng., Ac. *nickel*; -inc] (*Min.*.)

Min.: A mineral crystallizing in the hexagonal system, and isomorphous with Breithauptite (q.v.). Occurs mostly massive, crystals being rare and small. Hardness, 5 to 5.5; sp. gr. 7.33 to 7.67; lustre, metallic; colour, pale copper red; streak, brownish-black; opaque; brittle; fracture, uneven. Composes, arsenic, 55.9; nickel, 44.1 = 100, corresponding to the formula, NiAs. Found associated with cobalt, silver, and copper ores in Saxony and other parts of Germany, occasionally in Cornwall, &c.

nick-er (1), s. [Eng. *nick*, v., c. l.]

* 1. One of a set of wild, dissolute night-brawlers in the reign of Queen Anne, who amused themselves by breaking windows with halfpence.

"His scattered penne the flying *nick-er* flies."
Gay, Trivia, II. 415.

nicker-nuts, . pl. [GULANDINA.]

nicker-tree, s. [GULANDINA.]

nick-ing, pr. par. or a. [NICK, v.]

nickling buddle, s.

Metall.: A form of buddle used in washing lead ore.

nickling file, s. A thin file for making nicks in heads of screws.

nickling-trunk, s.

Metall.: A tub in which metalliferous slimes are washed. At the upper end is a trough which discharges a gentle sheet of water over a nicking board, which divides the water into rills and gradually washes off the slimes, settling them on the flat surface of the table in the order of their respective gravities.

nick-nāme, * **nek-nāme**, s. [A corrupt. of Mid. Eng. *anokename*, the *n* of the indefinite article being tacked on to the noun. (See remarks under N.) Cogn. with Icel. *aukaufi* = a nickname, from *auka* = to eke, and *nafu* = a name; Sw. *oknāme*, from *oka* = to eke, and *nāma* = a name; Dan. *ogenavn*, from *oge* = to eke.] [EKENAME.]

1. A surname or name given in derision, contempt, or reproach, or with reference to some act, habit, or peculiarity of the person; a sobriquet. (*Macaulay: Hist. Eng.*, ch. xiii)

* 2. A familiar or diminutive name.

* A very good name it [job] is; only one I know that an 's got a nickname too!—*Luckens' Pickwick*, ch. xvi.

nick-nāme, v. t. [NICKNAME.] To call by a nickname; to give a nickname to.

nick-ūm, s. [Eng. *nick* (1), s.] A mischievous fellow, a practical joker, a wag

nī-co, prof. [NICOTINE.] Derived from or contained in tobacco.

nico tannic, a. Having some of the properties of tobacco and tannin.

Nicotannic acid: [NICO-TANNIN.]

nico-tannin, s.

Chem.: Nico-tannic acid; a substance observed in tobacco leaves some years ago by the chemists at Somerses House, and more recently investigated by Dr. James Bell. It is obtained as a friable mass, slightly soluble in ether, easily soluble in alcohol and water, strikes a green colour with ferric salts, and yields canary yellow precipitates with oxide of lead, lime, and baryta. It instantly reduces oxide of silver and permanganates like ordinary tannin, but does not precipitate gelatin or the alkaloids.

Nic-ōl, s. [From the name of the inventor.]

Optics: Nicol's prism (q.v.).

"Eye-pieces filled with divided circles and ments."—*Cat. Loan Coll. at South Kensington* (1872), p. 216.

Nicol's prism, s.

Optics: An instrument for polarising light. It is formed from a rhombhedron of Iceland spar, thrice as long as its diameter, which is bisected in the plane which passes through the obtuse angle. The new faces being polished, the two halves are again united by Canada balsam. When a luminous ray enters the prism the ordinary ray undergoes total reflection at the layer of balsam, and is reflected out of the crystal, while the extraordinary one is alone polarised. It is thus a most valuable polariser. Modifications of this prism have been made by Foucault, who substitutes for the balsam a layer of air; by Prazmowski, who cuts the spar differently, and cements the two halves together with linseed-oil; by Dr. Steeg, Mr. Glazebrook, Professor Thompson, Dr. Feussner, and others.

Nic-ō-lā-i-tane, **Nic-ō-lā-i-tan**, a. & s. [Gr. *Nikolaos* (*Nikolaitos*), Lat. *Nicolaus*; remote etym. doubtful. (See def. B.)]

A. *As adj.*: Belonging to or characteristic of the Nicolaitans. [B.]

"It may be concluded that the Nicolaitan doctrine was a doctrine of general libertinism in religious rites, passing quickly into a doctrine of general libertinism, defending itself under a show of fanaticism, and attaching itself to other heresies.—*Alford: Doct. Sects & Heresies*, p. 373

B. *As substantive*:

Church Hist. (Pl.): An heretical sect mentioned in the Revelation (ii. 6, 14), and there charged with disregarding the injunction laid by Peter, James, and Paul upon the Gentile converts (Acts xv. 20). In all probability the impurity forbidden was looked upon as an act of religious worship, such as in early Jewish times had been borrowed from pagan nations (2 Kings xxiii. 6, 7; 2 Chron. xxi. 11; cf. Baruch iv. 43), notably from the Babylonians, whose worship of Mylitta is described by Herodotus (i. 199). Hosea (iv. 12-14) trenchantly denounces such practices. The Nicolaitans are said to have been founded by Nicolaus the Deacon, but the evidence is not convincing.

nic-ō-lō, s. [ONICOLO.]

nic-ō-pyr-ite (yr as ir), s. [Lat. *nicotina* = nikel, and Eng. *pyrite*.]

Min.: The same as PENTLANDITE (q.v.).

nī-cō-thō-č, s. [The name of one of the Harpae.]

Zool.: A genus of fixed parasitic Copepods. *Nicolthoe astaci*, a very small species, of a rosy colour, attaches itself to the gills of the Common Lobster.

* **nī-cō-ti-an** (ti as shī), * **ne co ti an**, a. & s. [Fr. *nicotiane* = tobacco.]

A. *As adj.*: Pertaining to or derived from tobacco.

"This gourmand . . . whiffes himself away in nicotian incense to the idol of his vague intemperance."—*Br. Hall: St. Paul's Combat*.

B. *As subst.*: Tobacco. (*Ben Jonson: Every Man in his Humour*, in. 5.)

nī-cō-ti-ā-na (t as sh), s. [Named after John Nicot of Nismes, French ambassador to Portugal, who first introduced the tobacco plant into France, having obtained its seeds from a Dutchman, who had them from Florida.]

Bot.: Tobacco; the typical genus of the solanaceous tribe Nicotianae. Calyx, five-lobed, permanent; corolla, funnel or salver-shaped, the limb five-lobed; stamens, five, as long as the tube of the corolla; stigma, capitate; capsule, two-celled, with many minute seeds. Viscous-leaved herbs, natives of Tropical America and Asia. [TOBACCO.]

nī-cō-ti-ā-ně-æ (t as sh), s. pl. [Mod. Lat. *nicotiana*(s); Lat. fem. pl. *adj.* suff. *-eae*.]

Bot.: A tribe of Solanaceae, sub-order Atropaceae; made by Myers an order.

nic-ō-tine, s. [Eng., &c. *nicotina*(s); *-ine* (Chem.).]

Chem.: C₁₀H₁₄N₂. An acrid poisonous alkaloid found in tobacco leaves to the extent of from 1 to 5 per cent. It may be prepared by passing a current of steam through a mixture of lime and powdered tobacco, neutralising the liquid which comes over with sulphuric acid, adding ammonia to liberate the nicotine, and dissolving the latter in ether. The ethereal solution yields almost pure nicotine. It is a colourless transparent oil, which boils at 250°, and does not freeze at -10°. Specific gravity, 1.027 at 15°. It has a strongly alkaline reaction, and turns the plane of polarisation to the left. Soluble in water, alcohol, ether, and the fat oils, and its characteristic reaction is the formation of a kermes-brown precipitate with tincture of iodine. Nicotine forms numerous salts. The sulphate (C₁₀H₁₄N₂)₂H₂SO₄ is uncrystallizable, but the chloride, C₁₀H₁₄N₂HCl, may be obtained in crystals by passing hydrochloric acid gas into nicotine under vacuo.

* **nic-ō-tin'-ē-an**, a. [Eng. *nicotine*; *-an*.] Of or pertaining to nicotine or tobacco.

"Lapped in nicotine-elysium, the cautious worshippers of the weed recline in fortified security."—*W. S. Mayo: Never Again*, ch. xxiv.

 I. *Literally:*
 1. *Ord. Lang.:* A fiend or specter of the night, popularly supposed to cause the nightmare; an incubus.
 "Besee this lens from every wicked wight,
 From the *night-mare*."
Chaucer: C. T., 1,611.
 2. *Pathol.:* The disease technically called incubus (q.v.), which comes on during sleep, and is characterized by a sense of weight upon the chest, oppressed breathing, inability to move or even to speak, palpitation of the heart, &c., while the mind is troubled by a frightful dream. After a longer or shorter period of helplessness, the patient breaks through the state of lethargy, and awakes with a start. He finds the morbid physical symptoms are gone, but unpleasant memory of the dream remains. The proximate cause of nightmare may be contraction of the diaphragm and the intercostal muscles. The remote causes are lying on the back, or in a constrained position, indigestible food in the stomach or pressure upon it from flatulence with acid secretions, or other causes. Speedy relief is obtained if the arms are so moved that the pectoral muscles elevate the ribs, or by an antacid draught.

I. Ord. Lang. (Of the form *Nihilism*): Nothingness; the state or condition of being nothing; nihility.

II. Technically:

1. *Hist. & Polit.*: A term used in Western Europe to designate the Russian Socialist movement, which began about 1870, and may be divided into two distinct periods: (1) "The going among the peasants." A number of young men and young women of the upper classes voluntarily went to work in the fields and the factories so as personally to carry on a Socialist propaganda and distribute Socialist literature. Their organs were the *Yperiod* (*Forward*) of London and the *Workman* of Geneva. This lasted about six years, during which time there were twenty-three political trials of 417 persons, half of whom were condemned to exile in Siberia or to hard labour in the mines. (2) In 1878 the struggle with the government commenced. At a congress held at Lipetz, shortly after Solovieff's attempt on the life of Alexander II., the acquisition of political freedom was declared to be the first

necessity. It was hoped to gain this by the formation of a legislative body, elected by the people, with guarantees for electoral independence, and liberty to agitate for reforms. This was demanded from Alexander III. shortly after the assassination of the late Emperor as the price of cessation from violence. The Nihilist programme is an agrarian socialism based on communal property. The discoveries of the police show that Nihilism is widely spread in Russia, not only among the working, but among the well-to-do classes, and even in the army, especially in Petersburg, and in many of the principal cities and towns.

2. *Metaph.*: The doctrine that refuses a substantial reality to the phenomenal existence of which man is conscious.

"Of positive or dogmatic *Nihilism* there is no example in modern philosophy."—*Hamilton: Metaphysics* (ed. Mansel), v. 294.

Nī-hil-ist, *s.* [Lat. *nihil* = nothing; Eng. suff. *-ist*.]

1. *Church Hist. (Pl.)*: A school of theologians who taught that God did not become anything through His incarnation which He was not before. This opinion is traceable in the writings of Peter Lombard and Abelard, and even to the early school of Antioch, which maintained that God clothed Himself with humanity as with a garment. It was condemned at the Council of Lateran in 1179.

2. *Hist. & Polit. (Pl.)*: A name given in western Europe to the adherents of the Russian Socialist movement. In this sense the name is unknown in Russia. It was first applied by Ivan Tourgenieff to the hero of his novel *Fathers and Sons*, who was intended to be the personification of a movement in Russia, about 1860, for the emancipation of women, the independence of children, and the spread of natural religion.

"Since 1876 the number of *Nihilists* of both sexes has greatly increased."—*Daily Telegraph*, Feb. 14, 1883.

3. *Metaph.*: One who holds that the phenomenal existence of which man is conscious has no substantial reality.

"He expeys *nīm*blý in a lady's chamber,

To the lascivious pleasing of a lute."

Shakespeare: Richard III., i. 1.

nīm'bōse, *a.* [Lat. *nimbosus*, from *nimb* = a rain-cloud.] Cloudy, stormy, tempestuous.

nīm-būs, *s.* [Lat. = a cloud.]

1. *Art*: A term applied, especially in sacred art, to a halo or glory surrounding the head in representations of divine or sacred personages. The nimbus is of pagan origin, and was probably derived from the Romans, who

fāte, fāt, fare, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, there; pine, pīt, sīre, sīr, marīnc; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūr, cūc, unīte, cūr, rūle, fūll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

ornamented the statues of their divinities and emperors with radiated crowns. The aureola, with which the nimbus is frequently confounded, envelops the whole body, while the nimbus is limited to the head. Nimbi are properly depicted in gold, but sometimes in stained windows they appear of various colours. The nimbus of the Father is generally represented of a triangular shape, with rays diverging from it in all directions; that of Christ contains a cross, more or less enriched; that of the Virgin Mary a circlet of small stars; those of angels, a circle of small rays, surrounded by another circle of quatrefoils, like roses, interspersed with pearls. When the nimbus is depicted of a square form, it indicates that the person was living when delineated, and is affixed as a mark of honour and respect. As an attribute of power, the nimbus is often seen attached to the heads of evil spirits. In many illuminated books of the ninth and following centuries, Satan wears a crown.

NIMBUS.

2. *Meteor.*: A rain cloud; sometimes classed as if forming a primary or fundamental variety of cloud; it is really a mixture of the stratus, the cumulus, and the cirrus. It has a uniform gray tint and fringed edges.

ni-ō bic, *a.* [Eng. &c. *niobium*; -*ic*.] Derived from or contained in Niobium (q.v.).

niobic oxide, *s.*
Chem.: Nb_2O_5 . Occurs naturally as euxenite, and is formed artificially by decomposing the chloride with water.

ni-ō bite (1), *s.* [Eng. *niobium*; -*ite* (*Chem.* or *Min.*)]
A. *Chem.*: A compound of niobous oxide with a basylous radical, e.g., sodic niobate, $NaNbO_7$.
2. Min.: The same as COLUMBIUM (q.v.).

Ni-ō bite (2), *s.* [See def.]
Church Hist. (Pl.): A party of Alexandrian Monophysites, founded in the sixth century by Stephen Niobes, who maintained that the qualities belonging to humanity could not continue in the human nature of Christ after its amalgamation with or absorption into the divine nature. (*Blount*.)

nī ō bī um, *s.* [Niobe.]
Chem.: Symbol, Nb. Atomic weight, 98. Columbium. A pentad metallic element discovered by Hatchett in 1801, but more fully investigated by Rose, who named it. Present in columbite, euxenite, pyrochlore, and in other minerals. The metal may be prepared from the fluoride of niobium by heating it in a covered crucible with sodium, and dissolving out the soluble salts with water. Obtained as a black powder; sp. gr. 6.27. Insoluble in nitric acid, difficultly soluble in hydrochloric acid, but dissolves in hot hydrofluoric acid. It forms two oxides of a chlorous character, uniting with basylous oxides to form salts.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çin, bench; go, gem; thin, this; sin, aš; expect, Xenophon, exist. -iñg. -cian, -tian = šan. -tion, -sion = šùn; -tion, -šion = žùn. -cious, -tious, -sious = šūs, -ble, -dle, &c. = beł, del.

nī-ō-boūs, a. [Eng. *nib(tium)*; -ous.] (See compound.)

niobous-oxide, n.

Chem.: Ni₂O₃. Obtained by fusing columbite with acid sulphate of potassium, and treating the fused mass with water. It is a white powder, which after ignition becomes insoluble in acids. It forms definite compounds with sodium and potassium.

nī-ō-pō, a. [Brazilian name.] (See *ctym.* and compound.)

niopie tree, s.

Bot.: *Piptadenia peregrina*. A kind of snuff is made in Brazil from its powdered seed-vessels.

nīp, nīp-pen, nyp-pen, v.t. [For *knip*; cogn. with Dut. *knippen* = to pinch; *knippen* = to crack, to snap, to entrap; Dan. *knibe* = to pinch, to nip; Sw. *knipa* = to pinch, to squeeze; Ger. *knöpfen* = to pinch, to nip; *knöpfen* = to pinch, to twitch.] [KNIFE.]

I. Literally:

1. To pinch; to catch and squeeze sharply and tightly between two points or surfaces, as the ends of the fingers.
"He that *nippeth* a man's eye bryngeth forth tears."—*Jesus Saigach* xxiv. (153.)
2. To cut or pinch off the end or point of, as with the ends of the fingers, the nails, a pair of pincers, &c.
"The small shoots that extract the sap of the most leading branches must be *nippt* off."—*Mortimer: Theobaldus*.

Spenser: Mother Hubbards Tale, 712.
6. To steal. (*Staug.*)
* (1) To *nip* a cable:
Naut.: To tie or secure it with a seizing.
(2) To *nip* in the bud; * To nip in the blossom; to destroy prematurely or in the first stage of growth; to destroy before development.
"I can frown and *nip* a passion,
Even in the bud."
Beaumont & Fletcher: Woman Hater, iii. 1.

nīp (1), * nīppe, s. [NIP, v.]

I. Ordinary Language:

1. Literally:

(1) A pinch or squeeze with the points of anything, as of the fingers.
"I am, sharply taunted, yea, sometimes with pinches, nips, and bobs."—*Ascham: Schoolmaster*.

* (2) A cutting, biting, or pinching off; a cut.
"Here's *nip*, and *nip*, and cut, and slash."
Shakesp.: Tempest of the Shrew, iv. 3.

2. Figuratively:

(1) A blasting or nipping, as by frost; a check of the growth or development by frost.
"So hasty fruits and too ambitious flowers . . .
But find a *nip* untimely as their birth."
Stepney.
* (2) A biting sarcasm; a taunt.
"He addeth a pretty clause, and giveth them a good *nip*, saying, And blessed is he that is not offended by me."—*Lutimer: Third Sermon in Advent*.
* (3) A thief. (*Staug.*)

II. Technically:

1. *Mining*: The gradual approach of the strata above and below a seam and terminating it.
2. *Nautical*:
(1) A short turn in a rope.
(2) The part of a rope at the place bound by a seizing or caught by jamming.

nīp (2), s. [Dut. and Low Ger. *nippen*; Dan. *nippe*; Ger. *nippen* = to sip.] A sip; a small draught or drink, especially of spirituous liquor; a dram.
"Young Eyre took a *nip* of whiskey."—*Black: Principles of Thele*, ch. xxiii.

nī-pa, s. [The name of the plant in the Molucca Islands.]

Bot.: A genus of Endogens, with some affinity to the palms, which they resemble in habit, but placed doubtfully in the order Pandanaceae, tribe Cyclotheae. Only known species *Nipa feutibus*. The trunk is creeping and furcated; the leaves feathery, often twenty feet long; the flowers in a spathe; the fruit in large, round bunches, the size of the human head, and consisting of one-seeded drupes. It grows in the river estuaries and tidal forests of the Sunderbunds, Chittagong, Burmah, and the Andaman Islands. Sir Joseph Hooker found the fruit floating in the mouth of the Ganges in numbers sufficient to obstruct the paddles of a steambot. Gamble says that the inside of the large fruit is eatable when young, and that a toddy is obtainable from the spathe. (*Calcutta Exhib. Report*, &c.)

nīp-a-dī-tēs, s. [Mod. Lat. *nīpa*, genit. *nīpatis* (s); suff. -ites (*Palaeont.*)]

Palaeobot.: A genus of fossil fruits, believed by Brongniart to approach those of Pandanus, but which Bowerbank considers yet more akin to those of *Nipa* (q.v.). They have four, five, or six irregular surfaces, and the base torn. They are so abundant on the beach at Sheppey that the women and children have given them a name, calling them "figs." They were washed from the London Clay. They were believed by Bowerbank to have floated in the estuary of a great river which probably flowed, in Eocene times, from near the Equator and fell into the sea near Sheppey. He described and figured thirteen species: *Nipadites unobovatus*, *N. ellipticus*, *N. crassus*, *N. cordiformis*, *N. pruniformis*, *N. acutus*, *N. obtusatus*, *N. laevigatus*, *N. Parkinsonianus*, *N. trigonus*, *N. giganteus*, *N. senariatus*, and *N. pyramidalis*. (*Bowerbank: Fossils of the London Clay*, pp. 1-25.) Sir Joseph Hooker combines *N. turnulatus* and *N. giganteus* into a single species, which he calls *N. Bertii*. Brongniart's specimens were from Belgium. (*Quart. Journ. Geol. Soc.*, viii. 344-5.)

*** nīp-chēse, s.** [Eng. *nip*, v., and *cheese*.] A very miserly or parsimonious person; a skinflint.

nīp-pēr-s, s. pl. [NIPPER, s.]

1. *Ordinary Language*:
A grasping tool with cutting jaws; small pincers.

2. *Handicrafts* or *foot-shackles* for prisoners.

II. Technically:

1. *Dentistry*: The mechanical forceps used by dentists for operating on the plates.

2. *Naut.*: Strong seizings for binding the messenger to the cable, to form slings, &c. They are made from clean unclayed yarns drawn from unbleb rope.

3. *Hydr. Eng.*: Nippers for cutting off the heads of piles under water consist of two serrated jaws, one attached to a small, and the other to a large sector. On each sector is a cogwheel engaged by two pinions on an axis which is perpendicular to the plane of oscillation of the nippers. A rotary reciprocation is imparted to the nippers, which cuts off the pile, the jaws being gradually brought together by rotation of the axis and pinions as the teeth bury themselves in the wood.

4. *Print.*: The clasps in a machine which catch the sheet and conduct it to the forme.

5. *Wire-drawing*: The tool for pulling the wire through the plate.

nīp-pīng, pr, par, or o. [NIP, v.]

nĩrles, s. [Etyim. doubtful.] A popular name for the *Herpes phlyctenoides*, or milinary herpes of Bateman.

nĩr-va-na, s. [Pali.]

Boodhism: The exact meaning of this word has been disputed. It seems to be used for (1) the goal to which Boodhists aspire; (2) the state of mind which is a condition for attaining that goal. Spence Hardy considers it to mean simply the cessation of existence. It is only attained by those who have released themselves from cleaving to existing objects. (*Eastern Monachism* (1850), pp. 280, 292.)

"The believer who has gone thus far has reached the last stage; he has cut the ties of ignorance, passion, and sin, and has thus escaped from the net of transmigration; Nirvana is already within his grasp; he has risen above the laws of material existence; and when this one short life is over, he will be free for ever from birth, with its inevitable consequences, decay and death."—*Richs Davids*, in *Encyc. Brit.*, iv. 428.

* nĩs, v. [A contract. of *no is*.] Is not.

"Leave me those hills where barlough us to see"
Spenser Shepherds Calendar; *Dane*.

nĩs-ã-tũ-tũs, s. [Gr. *Nĩsũs* (*Nĩsus*) = a King of Megara, fabled to have been changed into a sparrowhawk, and *aerũs* (*aĩtus*) = an eagle.]

Nĩ-sãn, s. [Heb. *šp*; (*Nĩ-sãn*), from the Assyrian and Babylonian *Nisan* = opening.]

Calendar: The same as Abib, the first sacred and seventh civil month of the Jewish year. It contained thirty days, and corresponded chiefly to March and part of April (Nehemiah ii. 1; Esther iii. 7).

nĩš-bĩr-rỹ, s. [NASEBERRY.]

* nĩš-ey, s. [A corrupt. of *nĩc* (q.v.).] A fool, a simpleton.

nĩ-sĩ, conj. [Lat.] Unless; if not.

nĩsi prius, s.

Law: [Lit. = Unless before.] A law phrase originally occurring in a writ directed to the sheriff of a county, and commanding him to cause the men empouled as jurors in a civil action to attend at the courts at Westminster, "unless before" (that is, the justices attended at that place (*i.e.* in the county in question), to hold the assize, which always happened. Hence, the writ, as well as the commission, received the name of *nĩsi prius*. Judges of assize are said to sit at *nĩsi prius* in their several circuits, and their courts are called *nĩsi prius* courts or courts of *nĩsi prius*.

Nisi prius, *nisi prius*:

Law: A document containing the pleadings in a civil action for the use of the judge who tries the case.

Deere nisi: [BEEREL, s. * 6.]

nĩt grass, s.

Bot.: *Gastroidium lepidigerum*. [GASTROIDIUM.]

nĩ tĩl-la, s. [Lat. *nĩtũla* = spindlebar, or Mod. Lat. dimin. subst. from *nĩto* = to shine.]

Bot.: A genus of Characeæ, now reduced to a sub-genus of Chara, from which it differs in having the stem composed of a single tube, and not spirally striated. The component cells are not coated with secondary cells; hence under the microscope the Nitella exhibits the movement of the protoplasm better than Chara proper.

* nĩ-ten cỹ (1), s. [Lat. *nĩtens*, pr. par. of *nĩto* = to shine.] The quality or state of being bright or shining; brightness, lustre.

* nĩ ten cỹ (2), s. [Lat. *nĩtens*, pr. par. of *nĩtor* = to strive.] A striving, an endeavour, a struggle, an effort, a tendency.

"Those zones will have a strong *nĩteny* to fly under open."—*Boyle*, *Works*, i. 179.

nĩ thĩ-a-lĩn, s. [Eng. *nĩ* (*nĩtrĩc*); *thĩ* (*tr*), and *nĩtrĩn* (*trĩc*).]

Chem.: A yellow amorphous substance produced by the action of ammonium sulphide on paranitraniline.

* nĩth-ĩng, n. & s. [NITING.]

nĩ-tĩd, n. [Lat. *nĩtidũs*, from *nĩto* = to shine; Ital. & Sp. *nĩtido*.]

* I. Ordinary Language:

1. Bright, shining, lustrous.
"We restore old pieces of dirty gold to a clean and *nĩt* yellow."—*Boyle*, *Works*, i. 200.

2. Gay, spruce, fine.

II. *Bot.*: Having a smooth, even, polished surface, as many seeds.

nĩ-tĩ-doũs, n. [Lat. *nĩtidũs*.]
Bot.: The same as NITID (q.v.).

nĩ-tĩd-u-la, s. [Fem. of Lat. *nĩtĩdulus* = somewhat spruce or trim.]

Entom.: The typical genus of the family Nitidulidæ (q.v.). The basal joint of the antennæ is enlarged. The species, four of which are British, feed on carrion.

nĩ-tĩ-dũ-lĩ-dæ, s. pl. [Mod. Lat. *nĩtĩdũlĩdĩ*; Lat. fem. pl. adj. suff. *-ĩdĩ*.]

Entom.: A large family of Beetles, tribe Necrophagæ or Chalcidæ. They have a short, oblong, generally depressed, body, with the head usually retracted within the thorax; no exterior lobe to the maxillæ. Tarsi five-jointed, the fourth joint very small. Found in all climates, the majority feeding on decaying animal and vegetable matter, but many found only on flowers. Eight hundred are known. Sharp enumerated seventeen genera, and ninety-one species as British, including Nitidula, Cereus, Meligethes, and Ips.

nĩ-trĩ-erũl, s. [Eng. *nĩtrĩ* (*ic*), and *ærol* (*ic*).]
Chem.: A heavy, colourless, pungent liquid, formed, together with others, by the action of strong nitric acid on oxanthol. (Hott's.)

nĩ-trĩm-ĩ-dĩn, s. [Eng. *nĩtrĩ* (*b*), and *amĩdĩ*.]

Chem.: An explosive substance produced by the action of strong nitric acid upon starch, also called xylonin. (Hott's.)

nĩ-trĩn, s. [Eng. *nĩtrĩ* (*ic*); -*nĩ*.]
Chem.: Grabau's name for the radicle NO₂.

which must be supposed to exist in the nitrates when they are regarded as formed on the type of the chlorides, *i.e.* nitric acid, NO₂H.

nĩ trĩn ide, s. [NITRIN.]

nĩ trĩn-ĩ lĩnc, s. [Eng. *nĩtrĩ* (*ic*), and *ĩnc* (*ic*).]

Chem.: C₆H₆(NO₂)X = C₆H₄(NO₂)XNH₂. Three modifications of this compound are known; distinguished as ortho-, meta-, and para-. Ortho-nitraniline is obtained by heating a mixture of orthoform-nitrobenzene and alcoholic ammonia to 480°. It forms yellow crystals, melting at 147.9°. The meta-compound, which crystallizes in long needles, melting at 109.9°, is obtained by passing steam-purified hydrogen into an ammoniacal nitrobenzene solution of meta-nitrobenzene. Para-nitraniline, formed by the action of nitric acid on acetanilide, crystallizes in yellow needles or plates, melting at 145.9°.

nĩ trĩr-ĩ-a, s. [Lat. = a place where nitric was dug or prepared.] So called because first found near some Silerian nitre-works.]

Bot.: A genus at first considered by Linnæus the type of an order Nitranæceæ, but ultimately placed by him under Malpighiæceæ, tribe Malpighiæ, and by the *Flora of B.* transferred to Zygophyllæceæ. It consists of shrubs with decussate, succulent, alternate leaves, sometimes fasciated; flowers in cymes or solitary; calyx five-toothed, fleshy; petals five; stamens fifteen; ovary superior, three- or more-celled, with a fleshy style; ovules pendulous by a long funiculus. Fruit capsule-cornic; seed solitary. It consists of a few salt plants, from the West of Asia to the North of Africa, and Australia. The fruit is eaten near the Caspian Sea and in Australia. *Nitroaria trichotaba* has been supposed to be the lotus of the ancients. (LÖUIS, *Loroneæ*.)

† nĩ trĩr-ĩ-a-çẽ-æ, s. pl. [Mod. Lat. *nĩtrĩn* (*ic*); Lat. fem. pl. adj. suff. *-æcũ*.]

Bot.: An order of Hypogynous Exogens, alliance Sapindales. Character the same as that of Nitaria (q.v.). Now abandoned by most botanists.

nĩ-trĩte, s. [Eng. *nĩtrĩ* (*ic*); -*ĩte*.]

Chem.: A salt of nitric acid.

* Nitrate of magnesia = Nitromagnesate; Nitrate of lime = Nitrocalcite; Nitrate of soda = Nitratine; Nitrate of potash = Nitrate.

nĩtrate of potassium, s. [SALTPETRE.]

nĩtrate of silver, s.

Chem.: AgNO₃. Lunar caustic; prepared by dissolving silver in nitric acid. It crystallizes in colourless trimetric crystals, which dissolve in one part of cold water, and melt at 210°. [GASTRIC.]

nĩtrate of sodium, s.

Chem.: NaNO₃. Cubic nitre. Chili salt-petre. Occurs abundantly as a natural product in Chili, in beds several feet thick and many miles in extent. It crystallizes in orthorhombhedrons; soluble in 1½ parts of water at 0°.

nĩ-trĩ-tĩnc, s. [Eng. *nĩtrĩ* (*ic*); suff. *-ĩnc* (*ic*).]

Min.: An hexagonal mineral with rhomboidal cleavage. Hardness, 1½ to 2; sp. gr. 2.99 to 2.29; lustre, vitreous; colour, white, brown, blue, brown-yellow; transparent. Compos.: nitric acid, 63.5; soda, 36.5 = 100; yielding the formula, NaNO₃. Occurs massive granular in beds of enormous extent, at a height of 3,200 feet above the sea, in Tarapacá, Northern Chili.

nĩ-tre (re as er), nĩ tĩr, s. [Fr. *nĩtre*, from Lat. *nĩtrũ*, from Gr. *nĩtrũp* (*nĩtrũn*) = nitron, potassa, or soda, from Arab. *nĩtrũ* = nitron = nitron.]

1. *Chem.*: [SALTPETRE].

2. *Min.*: An orthorhombic mineral occurring in crusts, silky fibres, acicular crystals, or diffused through certain soils. Hardness, 2½; sp. gr. 1.937; lustre, vitreous; brittle; colour and streak, white; taste, saline. Compos.: nitric acid, 53.4; potash, 46.6 = 100, corresponding to the formula, KNO₃.

3. *Pharm.*: It is exhibited in small doses as a refrigerant and diuretic, and in large doses as a vascular sedative in fever, especially in that of acute rheumatism. It has been found useful also in dyspepsy.

bũil, bũy; pũut, jũwĩl: cat, çell, chorus, çhĩn, bench; go, gem; thĩn, thĩs; sin, aç; expect, Xenophon, exist. ph = f. -cian, -tian = şhan. -tion, -sion = şhũn; -tĩon, -sĩon = şhun. -cious, -tĩous, -sĩous = şhus. -ble, -dle, &c. = bel, dcl.

nī-trī-ār-ŷ, *s.* [NITRE.] An artificial bed of animal matter for the formation of nitre; a place where nitre is refined.

nī-tric, *o.* [Eng. *nitrogen*; -ic.] Contained in or derived from nitrogen (q.v.).

nitric acid, *s.*

Chem.: HNO_3 . Azotic acid. Aquafortis prepared by heating equal parts of nitrate of potash and sulphuric acid. It is colourless as water, and of a sp. gr. of 1.517. It consists of 54 parts of real acid and 9 parts of water, and boils at 184°. It is very corrosive, staining the skin yellow, and when more dilute attacking many of the metals with great energy.

Pharm.: Used externally to destroy warts, hemorrhoids, &c. Much diluted it has acted on phosphatic calculi in the bladder.

nitric-anhydride, *s.*

Chem.: NO_2 . Nitrate of Nitric. Obtained by decomposing nitrate of silver with dry chlorine gas. It forms brilliant, colourless crystals, having the form of a prism with six faces; melts a little above 30°, and boils about 43°.

nitric-oxide, *s.*

Chem.: N_2O . Bin oxide of nitrogen. Prepared by placing shavings of copper in a flask, pouring in nitric acid through a funnel, and collecting the gas over water. Specific gravity compared with air = 1.039.

nitric-peroxide, *s.*

Chem.: NO_2 . Hyponitric acid. Formed by heating nitrate of lead in a retort connected with a receiver surrounded with a freezing mixture.

nī-trī-cūm, *s.* [Mod. Lat., from Lat. *nitrum*.] [NITRE.]

Chem.: A synonym of nitrogen.

nī-tride, *s.* [Eng. *nitrogen*; -ide.]

Chem.: A compound of nitrogen with phosphorus, boron, silicon, and the metals, e.g., boron nitride, BN.

nī-trif-ēr-ōus, *a.* [Lat. *nitrum* = nitre; *ferre* = to produce, and Eng. adj. suff. -ous.] Bearing or producing nitre.

nī-trī-fī-cā-tion, *s.* [NITRIFY.] The act or process of forming or converting into nitre.

nī-trī-fŷ, *v.t. & i.* [Lat. *nitrum* = nitre, and *ficio* (pass. *fiō*) = to make.]

A. Trans.: To form or convert into nitre.
B. Intrans.: To become formed or converted into nitre.

nī-trile, *s.* [Eng. *nitrogen*; -ile = -yl.]

Chem.: A term applied to the cyanides of the alcohol radicals regarded as compounds of nitrogen with acid radicals.

nī-trin, *s.* [Fr.]

Chem.: A kind of nitro-glycerine, patented by Nobel in 1866. (*Annuaire*.)

nī-trite, *s.* [Eng. *nitrogen*; -ite.]

Chem.: A salt of nitrous acid.

nitrite of potassium, *s.*

Chem.: KNO_2 .

nī-trō- (1), *pref.* [NITRE.] Containing nitre, or a nitrate.

nitro-aërial, *a.* Composed of nitre and air.

nī-trō- (2), *pref.* [NITROGEN.] Containing nitrogen or any of its derivatives.

nitrobenzene, *s.*

Chem.: $\text{C}_6\text{H}_5\text{NO}_2$. Nitro-benzol. Nitro-benzid. An oily body prepared by gradually adding benzene to cold fuming nitric acid, so long as it dissolves, and precipitating with water. It is a yellowish liquid with a sweet taste, and an odour of oil of bitter almonds; insoluble in water, but soluble in alcohol and ether; sp. gr. 1.2 at 0°. Much used by perfumers under the name of oil of mirbane, and manufactured in large quantities for the preparation of aniline and its derivatives.

nitro-benzid, **nitro-benzol**, *s.* [NITRO-BENZENE.]

nitro-cellulose, *s.* [GUN-COTTON.]

nitro-coccic, *a.* [NITRO-COCCUSIC.]

nitro coccic, *a.* Derived from nitric and coccic acids.

Nitro-coccic acid:

Chem.: $\text{C}_8\text{H}_7(\text{NO}_2)_3\text{O}_3$. Nitro-coccic acid. An acid obtained by treating carmine acid with nitric acid. It crystallizes in yellow rhombic plates; soluble in water, alcohol, and ether. It explodes when heated.

nitro-compounds, *s. pl.*

Chem.: Compounds in which one or more atoms of hydrogen are replaced by an equivalent quantity of nityl (NO_2); thus, lactic acid, $\text{C}_3\text{H}_7\text{O}_3$, becomes nitro-lactic acid $\text{C}_3\text{H}_5(\text{NO}_2)\text{O}_3$. The nitro-compounds are nitramin, nitro-tartaric acid, nitro-saccharose, benzoic acid, nitro-carbolic acid, nitro-coumarin, &c.

nitro glycerine, *s.*

Chem.: $\text{C}_3\text{H}_5(\text{O}_2\text{NO}_2)_3$. Glyceric trinitrate. A heavy, colourless, poisonous oil obtained by dissolving glycerine in a mixture of fuming nitric and sulphuric acids, and precipitating with a large volume of water. It has a sp. gr. of 1.6, crystallizes at -20°, is insoluble in alcohol but dissolves readily in ether. By percussion, nitro-glycerine explodes with fearful violence. [DYNAMITE, GLYCERINE.]

nitro hæmatic, *a.* [PICRAMIC.]

nitro-methide, *s.*

Chem. (*Pl.*): Certain compounds derivable from marsh gas (hydric methide) by the substitution of one or more molecules of nityl for an equivalent quantity of hydrogen.

nitro muriatic, *a.* Derived from nitric and muriatic acids.

Nitro-muriatic acid: [AQUA-REGIA.]

nitro-naphthalene, *s.*

Chem.: With strong nitric acid, naphthalene yields three substitution products—nitro-naphthalene $\text{C}_{10}\text{H}_7(\text{NO}_2)$, which crystallizes in sulphur-yellow prisms, melting at 61°; dinitro-naphthalene $\text{C}_{10}\text{H}_5(\text{NO}_2)_2$, crystallizing in colourless prisms, melting at 186°; and trinitro-naphthalene $\text{C}_{10}\text{H}_3(\text{NO}_2)_3$, crystallizing in pale yellow rhombic tablets, melting at 210°.

nitro-prussides, *s. pl.*

Chem. (*Pl.*): $\text{M}_2(\text{NO})\text{Fe}^{\text{III}}\text{C}_5$. Salts produced by the action of nitric acid upon ferro-cyanides and ferri-cyanides. The best known of the series is the nitro-prusside of sodium, $\text{Na}_2(\text{NO})\text{Fe}^{\text{III}}\text{C}_5 + 2\text{H}_2\text{O}$, obtained by treating potassium ferro-cyanide with dilute nitric acid. It forms rhombic crystals of a splendid ruby colour, the aqueous solution of which strikes a beautiful violet tint with soluble sulphides, thus affording a very delicate test for alkaline sulphides.

nī-trō-bār-īte, *s.* [Pref. *nitro*- (1), and Eng. *barite*.]

Min.: An isometric mineral occurring in octahedrons, which on examination prove to consist of the + and - tetrahedrons; twins like those of spinel. Colourless. Found in Chili.

nī-trō-cāl-gīte, *s.* [Pref. *nitro*- (1), and Eng. *calcite*.]

Min.: An efflorescent silky mineral occurring in limestone caverns, and on covered calcareous soils. Colour, white; taste, bitter. Compos.: nitric acid, 59.4; lime, 39.7; water, 9.9 = 100, corresponding to the formula, $\text{Ca}(\text{NO}_3)_2 + \text{H}_2\text{O}$.

nī-trō-form, *s.* [Pref. *nitro*- (2), and Eng. *formyl*.]

Chem.: $\text{CH}(\text{NO}_2)_3$. Trinitro-methane. A nitro-methide prepared by boiling trinitro-methide with water or alcohol, evaporating the solution to dryness, and decomposing with concentrated sulphuric acid. It crystallizes in colourless cubes, which melt at 15° to a colourless oil of powerful odour. It cannot be distilled, as it explodes with violence when heated.

nī-trō-ğen, *s.* [Fr. *nitrogène*; from Gr. *νίτρον* (*nitron*), and *γενε-* (*gen-*), the base of *γεννάω* (*gennāō*) = to produce.] [NITRE.]

Chem.: Symbol N. Atomic weight = 14. A pentad non-metallic element forming four-fifths of the atmosphere and entering into a great variety of combinations. It may be obtained by burning phosphorus under an inverted bell-jar placed over water. The residual gas, when freed from phosphoric pentoxide,

P_2O_5 , is nitrogen. Very pure nitrogen may be obtained by passing chlorine into a solution of ammonia. It is destitute of colour, taste, and odour, and is incapable of sustaining combustion or animal existence, though containing no positively poisonous properties. It is best characterized by its negative properties. Nitrogen acts in the atmosphere chiefly as a diluent to moderate the activity of the oxygen. It has recently been liquefied with the aid of cold and a high pressure. It combines with oxygen, though indirectly, forming well-known compounds. [AZOTE.]

nitrogen monoxide, *s.* The same as NITROUS-OXIDE (q.v.).

nī-trō-ğē-nē-ōus, *a.* [NITROGENOUS.]

nī-trōğ-ēn-īzc, *v.t.* [Eng. *nitrogen*; -ize.] To imbue or impregnate with nitrogen.

nī-trōğ-ēn-īzed, *a.* [NITROGENIZE.] Containing nitrogen.

nitrogenized-foods, *s. pl.*

Chem.: Foods containing nitrogen in combination. [FOOD, II. 1.]

nī-trōğ-ēn-ōus, *a.* [Eng. *nitrogen*; -ous.] Pertaining to nitrogen; containing nitrogen.

nī-trō-ğlāu'-bēr-īte, *s.* [Pref. *nitro*- (1), and Eng. *glauberite*.]

Min.: A mineral found in fibrous translucent masses, consisting of imperfect crystals. An analysis yielded: sodium sulphate, 33.90; sodium nitrate, 60.35; water, 5.75; suggested formula, $4\text{NaOSO}_3 + 6\text{NaONO}_2 + 5\text{H}_2\text{O}$.

nī-trō-māğ-nē-şite, *s.* [Pref. *nitro*- (1), and Eng. *magnesite*.]

Min.: A white, bitter, efflorescent mineral, found associated with Nitrocalcite (q.v.), in limestone caves. Compos.: when pure, nitric acid, 72.3; magnesia, 27.7 = 100.

nī-trōm'-ē-tēr, *s.* [Lat. *nitrum* = nitre, and Gr. *μετρον* (*metron*) = a measure.] An instrument for determining the quality or value of nitre.

nī-trō-phēn-ā-māte, *s.* [Eng. *nitrophenamic*; -ate.]

Chem.: A salt of nitrophenamic-acid.

nī-trō-phē-nām-īc, *a.* [Pref. *nitro*- (2); Eng. *phenic*]; (*ammonia*), and suff. -ic.] Derived from or containing nitro-phenic acid and ammonia.

nitrophenamic-acid, *s.*

Chem.: $\text{C}_{12}\text{H}_{12}\text{N}_4\text{O}_8 = \text{C}_{12}\text{H}_{12}(\text{NO}_2)_2\text{N}_2\text{O}_8$. Produced by the action of ammonium sulphide on dinitrophenic acid. It crystallizes in brown hexagonal needles, slightly soluble in cold water, very soluble in alcohol and ether, and dissolves in ammonia, forming a dark-red solution, which soon decomposes. With potash it yields the salt, $\text{C}_{12}\text{H}_{11}\text{K}(\text{NO}_2)_2\text{N}_2\text{O}_8$, which crystallizes in red nodules soluble in water and alcohol.

nī-trōph-tha-lēnc, *s.* [Pref. *nitro*- (2), and (*my*)*thalene*.]

Chem.: $\text{C}_8\text{H}_7(\text{NO}_2)$. A crystalline body produced by the action of potash on nitro-naphthalene. It forms long yellowish needles, insoluble in water, but soluble in hot alcohol, in ether, and in coal oil. It melts at 48°, begins to boil at 289°, and distils over between 300° and 320°.

nī-trōse, *a.* [Lat. *nitrosus*, from *nitrum* = nitre.] Containing nitre; pertaining to nitre; nitrous.

nī-trōs-ō, *pref.* [NITROSYL.]

nitroso compounds, *s. pl.*

Chem.: Compounds in which one or more atoms of hydrogen are replaced by an equivalent quantity of nitrosyl (NO); thus malonic acid, $\text{C}_3\text{H}_4\text{O}_4$, becomes nitroso-malonic acid, $\text{C}_3\text{H}_3(\text{NO})\text{O}_4$. The nitroso-compounds are, nitros-ethylin, nitroso-naphthalene, nitroso-sulphates, &c.

nī-trō-stil-bic, *a.* [Pref. *nitro*- (2); Eng. *stilbene*], and suff. -ic.] Derived from or containing nitrons acid and stilbene.

nitrostilbic-acid, *s.*

Chem.: $\text{C}_{12}\text{H}_9(\text{NO}_2)\text{O}_4$. An acid formed by the action of boiling nitric acid on stilbene. It is a yellowish powder, nearly insoluble in water, but soluble in alcohol and ether.

fāte, fāt, fārc, amīdst, whāt, fāll, fāther; wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sīre, sir, marīne; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rūlc, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

nī-trō-sul-phāl'-ic, a. [Pref. *nītro-* (2); Eng. *sulphur*]; (*crystal*, and suff. *-ic*.) Containing nitrous and sulphuric acids.

nitrosulphalic acid, s.

Chem.: Laurent's name for the compound $SO_3(NO_2)H$, which he supposed to constitute the crystals of the sulphuric-acid chamber.

nī-trō-sul-phūr'-ic, a. [Pref. *nītro-* (2), and Eng. *sulphuric*.] (See etym. and compound.)

nitrosulphuric acid, s.

Chem.: $H_2SO_5(NO_2)_2$. Does not exist in the free state, but known in combination in nitro-sulphate of potash = $K_2SO_5(NO_2)_2$, which is formed by the action of dry nitric oxide and sulphurous anhydride on caustic potash.

nī-trōs'-yl, s. [Eng. *nitro(us) -yl*.]

Chem.: (NO). Azotyl; the name of nitric oxide in combination.

nī-trō-thē-ine, s. [Pref. *nītro-*, and Eng. *theric*.] [CHOLESTROFRASE.]

nī-trōis, a. [Lat. *nitrosus*, from *nitrum* = nitre; Fr. *nitros*; Sp., Port., & Ital. *nitroso*.]

nitrous acid, s. [NITROUS-ANHYDRIDE.]

nitrous anhydride, s.

Chem.: N_2O_3 . Nitrous acid. Prepared by mixing four volumes of nitric oxide with one volume of oxygen, and exposing to a temperature of -17°. It condenses to a thin green liquid, its vapour being orange-red. It is decomposed by water into nitric acid and nitric oxide, hence it cannot combine directly with metallic oxides.

nitrous ether, s.

1. *Chem.*: $C_2H_5NO_2$. Obtained by passing the vapour of nitrous acid into alcohol mixed with water. It is a pale yellow volatile product, possessing an agreeable odour of apples. Boils at 16°, and has a gravity of .947. It is the active agent in the sweet spirit of nitre of pharmacy.

2. *Pharm.*: Nitrous ether, popularly known as sweet spirits of nitre, is used as a diaphoretic in dropsy and slight fevers. It is also refrigerant.

nitrous oxide, s.

Chem.: N_2O . Protoxide of nitrogen; laughing gas. Prepared by heating solid nitrate of ammonia in a flask and collecting the gas evolved over warm water. It is a colourless gas, without smell, of a distinctly sweet taste, and is remarkable for its intoxicating power upon the animal system. The effect is transient. It is used in dental surgery.

nī-trōx'-in, **nī-trōx'-yl**, s. [NITRYL.]

nī-trōx-ŷ-nāph'-tha-lāte, s. [Eng. *nitroxynaphthalic*]; (*-ate*.)

Chem.: A salt of nitroxynaphthalic acid.

nī-trōx-ŷ-nāph-thāl'-ic, a. [Pref. *nītro-*; Eng. *oxy*(gen); *naphthal*(ene), and suff. *-ic*.] Derived from or containing nitro-naphthalene and oxygen.

nitroxynaphthalic acid, s.

Chem.: $C_{10}H_9NO_3 = C_{10}H_9(NO_2)O$. An acid produced by the oxidation of nitro-naphthalene. It crystallizes in needle-shaped crystals of a golden yellow colour, soluble in water, alcohol, and acetic acid, melts at 190°, and is not volatile. It is a weak acid, but forms very soluble crystalline salts with the alkalis.

nī-trŷ, a. [Eng. *nītr*(o); *-ŷ*.] Pertaining to nitre; producing nitre; nitrous.

"Winter my theme confines, whose nitry wind shall crust the slabby rime." Gay, *Trivia*, ii.

nī-trŷl, s. [Eng. *nītr*(ic); *-ŷl*.]

Chem.: (NO_2). Nitroxin, nitroxyl. The name of nitric peroxide in combination.

nīt-tā, **nūt'-tā**, s. [A West African word.] (See etym. and compound.)

nitta-tree, s.

Bot.: *Parkia africana*.

nīt-tēr, s. [Eng. *nīt*; *-er*.] An insect that deposits nits on horses.

nīt-tī-lŷ, *adv.* [Eng. *nītty* (1); *-lŷ*.] Lousily. "He was a man nītty needy, and therefore adventurous." Hayward.

* **nīt-tŷ** (1), a. [Eng. *nīt*; *-ŷ*.] Abounding with nits; lousy. (*Ben Jonson*: *Poetaster*, iii. 1.)

* **nīt-tŷ** (2), * **nīt tic**, a. [Lat. *nītulus* = slining; *nītō* = to slinge.] Slining, spruce, elegant, neat.

"O dapper, rare, complete, sweet *nītŷ* youth." Marston, *Satires*, iii. 4150s.

nītzsch'-i-a, s. [Named after Prof. Nītzsch of Halle, who studied the Amphora, &c.]

1. *Bot.*: A genus of Diatomaceæ.

2. *Entom.*: A genus of Anopŷura. *Nītzschia laureasteri* is the Louse of the Common Swait.

3. *Zool.*: A genus of Annulata.

* **nī-val**, a. [Lat. *nivālis*, from *nīx* (genit. *nivis*) = snow.]

1. *Urb. Lang.*: Abounding with snow; covered with snow; snowy.

2. *Bot.*: Growing near snow, or appearing while snow is on the ground.

nīv'-ĕ-ōūs, a. [Lat. *nīvris*, from *nīx* (genit. *nivis*) = snow.] Resembling or partaking of the nature of snow; snowy.

"Clunder . . . otherways presents a pure and *nīvris* white." Browne, *Vulgar Errours*, bk. vi. ch. xi.

nī-vōsc', s. [Fr. = snowy, from Lat. *nīvosus*, from *nīx* (genit. *nivis*) = snow.] The name adopted in October, 1793, by the French Convention for the fourth month of the republican year. It commenced on December 21, and was the first winter month.

nīx, **nīx'-lĕ**, s. [NĪK (1), s.] A water-spirit, good or bad.

nī-zām', s. [Hind. & Arab., from Arab. *nizam* = to govern.] More fully *Nizam-ul-mulk* = the governor of the state, the title assumed by Azof Jah, ruler of Hyderabad in the Decan, in 1719, and since that time adopted by his successors.

* **nī-zŷ**, s. [NISEY.]

nō, *adv.* & s. [A.S. *nā*, *nó* = never, *nō*, from *nē* = not and *ā* = ever. A.S. *nē* is cogn. with G. H. Ger. *nī*; M. H. Ger. *nē*; Goth. *nī*; Russ. *nē*; Ir., Gael., & Wel. *nī*; Lat. *nē* (in *nonne*); Sansc. *nā* = not, and appears in English in the initial letter; of never, naught, none, neither, nay, nor, &c.]

A. As *adverb*:

1. A word of denial, contradiction, or refusal expressing a negative; the negative particle, equivalent to *noy*, and opposed to *yes* or *yea*. In Mid. English there was a clear distinction between *nō* and *nay*, the former being the stronger and more emphatic form. [NAV.] *Nō* was used in answer to questions involving a negative expression, *nōy* in answer to simple questions. Thus, Will he come? would he properly answered by *nay*; but, Will he not come? by *nō*.

2. *Nō* is used to strengthen or emphasize a negation or refusal; as,

(1) With another negative.

"There is none righteous, *nō*, not one."—*Romans* iii. 12.

(2) When it follows an affirmative proposition; as,

"To whom we gave place by subjection, *nō*, not for an hour."—*Galatians* i. 5.

(3) When it introduces an amplification of a previous negation.

"The devil himself could not pronounce a title more hateful to mine ear." Shakespeare, *Macbeth*, v. 7. "Ye, nor more fearful." Shakespeare, *Macbeth*, v. 7.

(4) To strengthen a following negative.

"Ye, not the low which orders the skies, So glorious is, or boasts so many eyes." Waller; *On a Breeze of Divers Colours*.

3. *Nō* is used as hypothetical for *not*, when standing as the correlative of *whether* or *if*.

"Is she welded or *nō*!"—Shakespeare, *Love's Labour's Lost*, ii.

B. As *substantive*:

1. The word of denial or refusal; a denial, a refusal.

3. Those persons collectively who are of noble rank; the collective body of noble or titled persons in a state; the peerage; as, the English nobility, the French nobility, &c. In Great Britain there are five ranks or degrees of nobility, viz., dukes, marquises, earls, viscounts, and barons. Titles, or patents of nobility, can only be conferred by the sovereign, and are hereditary except in isolated cases where life peerages are created. Members of the peerage of England, of Great Britain, or of the United Kingdom, have an hereditary seat in the House of Lords. [LORD (l), § (l).]

"Exclusive of their capacity as hereditary councillors of the crown, a nobleman, in cases of treason or felony, shall be tried by his peers. This privilege does not extend to bishops. Peers, either in their own right or by marriage, are by statute entitled to be tried before the same judicature as peers of the realm. A peer or peeress cannot be arrested in civil cases. A peer sitting in judgment gives not his verdict upon oath, but upon his honour; he answers also to bills in chancery upon his honour, and not upon his oath; but when he is examined as a witness either in civil or criminal cases, he must be sworn. A peer cannot lose his nobility but by death or attainder, and he can not be degraded but by act of parliament."—*Blackstone's Comment.*, bk. i, ch. 12.
